freedom man that's what it's all about [Music] you've got to groove on freedom like the good book says [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio [Music] welcome one and all you're listening to what on earth is happening right here on the republic broadcasting radio network i'm your host mark pacio my website what on earth is happening dot com the network's website republicbroadcasting.org today is saturday october 18 2014 this show is live every saturday evening from 10 p.m to 1 a.m eastern time that's 9 p.m to midnight central time we have another great show lined up for you here tonight i'm going to be continuing going into the cosmic abandonment extended presentation cosmic abandonment is a presentation which explores the connection between the interference theory of human origins and the present human condition on earth so i'll be going into some uh researchers that have dealt with the interference theory of human origins tonight we've done that before on a previous show but i'm going to actually give some resources for the listening audience uh to explore uh regarding some of these researchers uh and then hopefully if there's time i can get into some fictional allegories that have dealt with the cosmic um abandonment hypothesis the ancient alien hypothesis the uh interference theory hypothesis if you will so that's coming up on this edition of what on earth is happening i will be taking calls uh probably toward the second half of the show the call-in number to join us i'll give it the top of the hour for those who want to call in if you want to get in the the call or queue i know sometimes it can be difficult to get through on the air so i'll give the call-in number at the top of the hour the call and number to join us 800-310 once again the call-in number to join us 800-313-9443 i'm going to start the show with some uh very sad news um a very good friend and fellow patriot and fellow truth seeker popeye from federal jack dot com and uh the radio show down the rabbit hole has uh unfortunately lost his life partner his wife marcy and she passed away i believe yesterday and um our heartfelt condolences go out to popeye a very tragic tragic thing to lose someone you're that close to and at such a young age so uh pop i just know that your your true friends are here for you and uh if you need anything please do not hesitate to ask we're here for you in your time of grief so um with that having been said uh move on to um a couple of quick event announcements not really uh too many announcements for tonight's show but i just want to remind everyone of course the freer mind three conference is coming up in 2015. they're still planning the new organizers are still planning on hosting it in april uh i believe the dates were um april 10th 11th and 12th if i'm not mistaken uh let me just look on my calendar here um i'm sorry uh the the dates looked like that they were going to be uh the 8th 9th and 10th uh so scratch that uh what i said before uh it's going to be friday april 8th saturday april 9th and sunday april 10th um if the dates that i was told hold uh true hold steady and it is going to be in southeastern pennsylvania not right in the city limits of philadelphia but just in the suburban area just outside of philadelphia so uh i'm going to let them make the official announcement of the venue on the website which is www.freeyourmindconference.com so for your mind three coming up in april early april of 2015 uh already uh a a bunch of speakers have been lined up for that more speakers will be coming in the coming weeks uh tickets will go on sale fairly soon and the official venue will be announced uh i i believe pretty pretty shortly so uh keep that in mind uh and definitely check out the website freermindconference.com you could also go to the past conferences and see the type of caliber of speakers that are booked for this conference and watch the videos from the previous uh two for your mind conferences so um with that having been said uh there is a donation button on the left hand side of the what on earth is happening dot com website uh if you feel as a listener that you have received value from the information that has been shared and presented on this radio show in my website you could feel free to make a voluntary donation to help support my work so that it can continue into the future and that button is on the left hand side of the site uh on the navigation uh it's um right under the podcast link uh it says donate to what on earth is happening and it's a green button so with that having been said i want to direct everyone's attention to the radio show page of my website what on earth is happening.com just click the radio show tab if you're not already on there and underneath the player for the show there are images for tonight's broadcast and then there are the cosmic abandonment presentation slides broken up into two parts um we're going to be focusing on part number two and we're going to be starting with slide number 139 which is the researchers section of this presentation and uh even before we do start that i may step back a couple of slides and just say a couple of quick things about the last section that i went into which was the psychological framework for um understanding um what is going on in the human condition in the in the present and understanding that from a point of view of uh having the knowledge of the situation that occurred here with humanity in its infancy in our ancient past with these beings that came to the earth and did what they did here and and left us in the condition that they uh put us in so um but i just want to say one more thing about the images uh the the numbers will not correspond because they're in two sections so uh you know you could just go through them in order as i tell you to move to the next slide i'll try to um basically uh observe the the numbers the best way to do it is to download the zip file of all cosmic abandonment slides and uh you can unpack them on uh you know decompress that zip archive on your own computer and then you'll have all the slides there in one folder and you could just open them up with any image viewer as we go so that's my recommendation is to just download that zip file where it says all cosmic abandonment slides it's a small zip archive 48 megabyte archive so um let's start at um the section uh there was many slides before slide number 139 where i talked about order followers and i gave some images of order followers as basically being psychologically immature people that don't want personal responsibility for themselves they don't want the personal responsibility to choose for themselves right action over wrong action and as such they are what i would consider psychologically immature people they are psychological and spiritual infants if you will they have not grown up they haven't grown up at a mental level they haven't grown up at an emotional level they certainly haven't grown up at a spiritual level and don't really understand natural law they don't understand what conscience is they don't understand the true difference between right and wrong although many of them are convinced that they are the good guys and do understand the difference between right and wrong they 100 absolutely do not understand the difference between right and wrong behavior because if they did they wouldn't be order followers the very nature of being an order follower is a wrong behavior and people will you know vehemently disagree with this and you know the the debate will go on and on uh between people who don't understand principles or first things and those who do understand principles and philosophy uh to understand that the entire mentality of being an order follower is an act of evil in and of itself by its very nature we'll pick up that concept on the other side there's a wall between us and it can't go on ladies and gentlemen you're listening to what on earth is happening here on republic broadcasting i'm your host mark pascio my website what on earth is happening dot com we're continuing the cosmic abandonment extended presentation on tonight's show we've been covering this for many weeks and we'll continue to cover it for many more um i was basically talking about slides uh 137 and 138 in this presentation for those who are following along with the slides i'm going to go on the last slide that gave an image of order followers and basically start there and just retouch on this one topic to clarify a very important point when someone is following orders it's an immoral act by its nature because what you are doing is you are attempting to abdicate a personal responsibility which can never be given away to someone else no matter how much you claim that you're trying to give it away this is a essentially a birthright given to you by creation by the very nature of being a being that has the capacity for holistic intelligence and the ability to discern the ability for discernment so if you say i'm not going to judge or discern for myself whether this action is actually morally right or wrong and i'm just going to act when this order is given to me that in and of itself is a wrong behavior is a wrong action i don't care whether you're doing whether the action yields a right and positive result in the way of not harming anybody the actual decision to simply follow an order is a wrongdoing by its nature i i don't know if i could really clarify that any further than that i i don't understand how people don't really grasp that entire concept or idea yet so many people still don't understand it they they want to debate this and think that somehow you can do good or be good while you're following orders there has never been an order follower who was a good person ever in the history of humanity in the history of the universe and never can be not ever will be never can be the two things are mutually exclusive they are diametrically opposed to each other being a truly good being is antithetically opposed to being an order follower it cannot you cannot have those two things existing in tandem or combination simultaneously it is not possible okay so for people that think there are good soldiers good cops no they can do good things in their life but ultimately a person is not a good person until they are actually judging the difference between right and wrong for themselves and then willfully consciously in a state of knowledge choosing the right behavior over the wrong behavior consciously and willfully which is the definition of following conscience of obeying conscience of exercising conscience when you're doing that you're actually in harmony with the objective knowledge of the difference between right and wrong behavior which is what natural law is all about not doing that meaning following what someone else tells you to do by definition is not exercising conscience by the very definition of the action that you are performing and the lack of thinking that is involved in the performance of that action so people really have to understand this in a deep deep way to understand there is no such thing as a good order follower um not to belabor this point but i just want to wrap up this part of the presentation and move on into the researchers but i just want to tell people this is going to be one of the focal emphasis of my work in the coming months i'm actually going to put together an entire presentation on the dynamic of order following more likely than not if i do not do it before the for your mind three conference my presentation at the for your mind three conference will be uh on the dynamic of order following and how it is the ultimate evil that has ever existed and ever can exist okay so pr more likely than not this is going to be one of the the it's going to be the crux of my work in coming months okay and it's something that people really have to deeply understand that and i called these people in uh these slides the least mature among us and yet the most responsible among us for the continuation of the human condition of slavery because of their blind belief in authority and their willingness to obey orders they are the most morally culpable or morally responsible individuals okay for keeping humanity in the current condition notice i'm not going to say putting us there these people didn't put us there you know we were put in this condition uh over aeons of time but these people keep the condition the way that it is they are the the paradigm protectors you might call them of the violence ideology that currently rules the world and because they give their mind and their body over you know they're an actual cog in the mechanism of that entire evil system i don't care who that offends again get as offended as you like you're you're taking offense to truth matters completely zero truth is what is it's always going to be that way it's never going to change and these principles are eternal okay it is eternal that an order follower cannot be a morally good person because they are not actually using the their ability to morally judge whether an action is right or wrong by definition inherently if you can't see that there's something broken with your logic okay you're not actually really using your mental faculties and processes properly to weed out logical inconsistencies anyone who who thinks that that isn't the case and again i'm making an absolute statement here 100 blanket statement i don't really care who disagrees if you if you disagree with that statement you're incorrect not because i say so or because you disagree with me because you don't philosophically inherently understand the difference between following orders and exercising conscience by definition so so not to again stay on this topic too long because i want to move on the last slide that i did on this topic was very harsh rhetoric you might say you know i call these people the house slaves of the world and you know i was saying that unfortunately a lot of these people are so stupid when it comes to their long view of history or even their short-term view of history that they're not even offended by that term they don't even understand what you're saying when you say a house slave which was basically a slave living in in uh the civil war area period when black slavery was practiced particularly in the southern states where the um the plantation owner would basically control the rest of these slaves who didn't want to be slaves and who would often you know make efforts to try to free themselves he would control them by giving a select small tiny group of of these slaves um certain special privileges like more food more clothing more you know blankets in the in the cold weather be allowed to sleep in a shack instead of out in the field under the elements etc and for those little tiny pittance of favors uh the the uh master of the plantation would demand that these uh so-called privileged slaves which were called the house slaves by the rest of the slaves would give them special privileges and make them basically keep the other slaves in line brutally in in many cases brutally beating them if they stepped out of line and this is how these house slaves actually turned violently on their own people and basically went along with the bidding of the masters because they got theirs in their mind but they were still slaves nonetheless they were still kept you know as pets as work mules just like the rest of the slaves it's just that you know they got a little bit um better treatment by their their animal master you know and uh you know they thought that they were actually making out in this deal when in fact all they were doing was putting even tighter chains on themselves and this is what the military and police forces are of every country not just america every country everywhere on earth at every single time and place in human history and the same dynamic would apply on all other planets in the entire cosmos wherever there is a life with the ability for the capability of of holistic thinking of holistic intelligence every person who has ever been an order follower anywhere in the cosmos that it's that same exact dynamic they have been the house slaves of that particular culture anywhere in the cosmos and people have to get this through their thick skulls and understand that order following is not a virtue it is the antithesis of virtue it is the exact opposite of any kind of virtuous thinking or behavior period so you know that that's all i'm really gonna say about this i'll just repeat my little um saying that i put in their mouths because if the truth be told this is what these people are really saying to the world whether they understand it or not or whether anybody else understands it or not just putting it out there on the table openly regardless of who likes it the the order followers of the world are saying to everyone else we are the house slaves of this world we would rather enslave our own species ourselves included because we're some of the biggest you know slaves of all basically agreeing with our own servitude and everybody else's including our own children okay we'd rather enslave our entire species including ourselves rather than grow up become psychologically and spiritually mature develop real courage because these people don't have one ounce of real courage real courage would be to speak out to speak the truth to take the truth into oneself and then communicate it to others and ultimately to say no to say no when somebody is telling you to perform any kind of an immoral behavior that that would take real courage these people don't have one drop of it and for the people that quit this job and and refuse to continue to be a cog in the machine of e of evil okay i have all the respect in the world for them all right that's not what i'm talking about i'm talking about the people who continue to follow these orders on a daily basis who are still in that machine of evil for whatever reason i don't care because you're feeding your family i don't care because you can't imagine yourself doing anything else because you don't think you have the education to do anything else does not matter why you continue to do it okay unless you develop grow up develop real courage and think for yourself there i'd have zero respect for anybody who's still an order follower you don't deserve any respect you're not worthy of any respect okay you are the person who is responsible for the continuation of slavery on the earth the end period deal with it you don't want to look at in the mirror and accept that that's the truth you don't want to look at yourself you don't want to look at all the the dark aspects of your subconscious what made you behave that way what made you go into a field like that what did you think you were going to get on the other side you know for whatever justifications or reason you chose to do it the universe does not care this is another aspect people have to understand natural law are ba is boundary conditions existing in the universe just like any physical law the physical laws of creation and dynamics do not care about you you walk off a cliff it doesn't make a difference if you didn't understand gravity it doesn't make a difference if you thought there was a ledge there but there wasn't one you're going down anyway because it's a law that you're bound by the laws of morality and behavior work the same way they don't care whether you don't understand them they don't care why you chose to take the action that you took that was immoral you're going to reap the consequences for the actions that you perform because you are ultimately responsible for your behavioral choices and you can never abdicate that personal responsibility ever for any reason the end so you know i just wanted to wrap up that section with a definitive exclamation point people still i i just see i see people still don't get it folks they still don't understand these principles they still don't understand this dynamic they're still debating it or arguing or trying to justify it they're completely and utterly clowned clowned okay and the joke is on you if you don't understand what i've just said you're playing yourself you know because i just see the dynamic that's out there i see co i hear conversations i i see blog posts i see comments and message boards you know and i'm telling you humanity is still in a deep slumber when it comes to this in a deep slumber and you know why it is it's because we're still not talking to these people we're still not getting up in their face we're still not talking about this dynamic openly and unapologetically right in people's face with it no now we want to tip tip toe around everybody you know we want to dance around the subject we don't want to offend anybody's delicate sensibilities we don't want to lose a friend by speaking the truth we don't want to alienate a family member well that's the reason we're in this situation ladies and gentlemen it's the reason we're in the situation we're in because not enough people are willing to speak the truth to those around them and that makes them just as cowardly as these house slave order followers just as cowardly see ultimately that's the dynamic that's really going to pull us out of this mess is true courage and that's that's that's what's going to get us out of it so let me move on to the researchers that i highly recommend people check out for um looking into the dynamic uh or the the um topic i should say of the interference theory of human origins this is one of the most critical pieces of evidence that people have to look into when it comes to what happened us in the ancient past the dynamic of these beings that came here and essentially created a new species that didn't exist before made them as a slave race that didn't want to think that only one that you know follow orders reproduce eat sleep you know breed and do what they're told and some have come out of that condition they've evolved out of it through hard work through the hard work of those who came before them and propagated knowledge you know but many people are still in this original condition you might say the condition of quote-unquote the original sin of what these beings did to a species that they had no right to do what they did to at all which is genetically hybridizing them then genetically further manipulating them and dumbing them down even more we've talked about this on past shows you know go back into the archive on the podcast section and look at the uh cosmic abandonment slides and presentation watch my cosmic abandonment video which i had to do very rushed because i only had two hours to do it and there's a couple of errors in it but you know the video stand that presentation stands on its own nonetheless because you know for that small amount of time i had to do it i have you know no problem with the way it ultimately turned out um so this section is called researchers and i'm starting here with slide number 139 so i want to basically give some resources for people to research this for themselves that's ultimately what this is all about so with the cosmic abandonment slides for this um podcast and by the way this will be podcast 172. uh i have put together a list finally of all the people who i recommend that people research into deeply to start to have a handle on this topic and i've made a little um uh three links next to them basically um next to each researcher's name or author's name or presenter's name uh there is a little g link a little y link and an a link okay so the the key is right up above this section above their names underneath where it says researchers to explore and i should should take the word into out it really just should say researchers to explore when studying interference theory of human origins and there's a key right below that the g link for each researcher will take you to a google search of that researcher so you don't even have to type their name or copy their name into a search engine you just click that link and you'll be uh presented with a whole bunch of uh you know search results regarding that individual if you click the why it will do a youtube search on their name and again you may get uh different results uh you know certain people will have more you know videos available certain people might not have might not have any videos available but it's uh there nonetheless as a resource to you know just uh you know if you want to research a particular person's work you click on that it'll do a youtube search on it if there's any videos related to their work then uh if you click the a that will take you to an amazon.com search you know there's other bookstores and whatnot and places to obtain hard copies of materials but amazon is pretty well known one it's uh you know deals with a lot of merchants all over the world so you can click that if you wanted to do it maybe an ebay search look for different prices or whatever whatever shopping outlet you like you can go and search on places that accept bitcoin if you use that it's up to you you know but i just provided one um link where you could find materials to buy from these researchers and so i went with amazon because it's probably the easiest and the most familiar for people so if you click the a that will take you to an amazon search for that individual researcher and you can see what uh materials are available by them in the form of books or dvds or things like that so um without having been said let's jump into this section i'll move on to slide number 140 and talk a little bit about some of these researchers the first i want to mention is and i'll mention probably all of them in this list that i compiled but i want to really focus on some of who i would consider the heavyweights or the really important people to study the other thing i want to say and i always do whenever i talk about other people's work because if you don't give this caveat you have a million people knocking down your door saying how could you you know get behind this person he said this do you agree with that i don't agree with everything that any of these people have said or write about i think their research is valuable i think you need to look into it to put a bigger picture together you come to the truth by doing eclectic research that means gathering all your grammar from various sources of information you gather all the seemingly disparate pieces of information you bring them together and then you start filtering it and you work through it and you say look at these commonalities look at this person you know doing this research how did he do this what was the process he used to look into that you know here's his conclusions what are these people's conclusions does it make sense when it fits together does it explain what's going on now in a more clear way in a way that makes sense you know you could ask so many questions regarding these people's work it doesn't mean i agree with everything any particular one of them says i think their work is valuable and is worth looking into okay so eric von daniken is the first this is slide 140. he's written a slew of books uh made tons of documentaries chariots of the gods of course is his most well-known work um you know uh he also wrote a book called gods from outer space which i definitely recommend to people uh it's one that i think people would really get a lot out of some of these books are still in print some you can find again on amazon or ebay or something like that you know some of them may have fallen out of print maybe a little bit more difficult or expensive to find and many of them you can also find online you could actually download them in either pdf format portable document format or electronic book format epub format electronic publication so um you know you could do uh torrent searches if you want to try to find these people's work you could uh in many cases you could um as is the case with many of these researchers work uh you could uh you know request my arc drive my amazing repository of knowledge hard drive which many many people have requested from me it's actually really uh has gone very well the distribution of the research that i've compiled over the years online um i've probably already given out over 150 of these drives you know it's a real simple process you just email me from the contact page and you know say you want the ark i mean it's right there on the contact page of the website you know and uh many people have taken me up on this offer and it's worked out pretty good i send a list of very clear detailed instructions which people do have to follow if they want to receive uh that offer uh you know without any problems but uh most people follow it to the letter and you know they they get the research and it's a lifetime of research look just this little tiny research list that i am providing here with this podcast today will keep you busy for multiple lifetimes you will not be able to go through all these people's material if you lived probably ten lifetimes okay that's how voluminous and proliferous their work is alright so um this is stuff that you know you have to take it a little at a time you know let synchronicity carry you people always say to me also you know where do i start start where you're interested in so you know find somebody that you already resonate with some of their work their work will take you to other people's work you will be where you need to you will go where you need to be okay the universe has a way of working things out like that when you're seeking the light when you're looking for knowledge when you're looking for truth synchronicities pop up left and right constantly almost on a on a minute to minute basis you know that's how it was during my rapid awakening process you know when i really turned kicked into high gear of course my uh initial awakening stage was very slow and i had to come out and decondition myself from you know satanic thought from the you know uh dark occultism that i was involved in in my in my youth but after that when i really started seeking the light and seeking truth the process really accelerated and that's how it will work for most people so ladies and gentlemen stay with us we'll pick this up on the other side of this break you're listening to what on earth is happening we'll be right [Music] back [Music] we don't need no thoughts controls [Music] teacher leave their kids alone welcome back everyone you're listening to what on earth is happening here on republic broadcasting i'm your host mark pacio my website what on earth is happening.com i want to apologize i think i uh spoke right through the last network break uh because uh there was a slight technical problem on the network and and i would did not hear the break coming through my headphones in my studio here so uh no worries uh you can uh still hear that um uh content when i put my podcast up on my website because uh i actually record everything here on this end that's what i edit my podcast from so um for those who missed out on a little bit by listening over uh the network um you could just check that out on the podcast page nothing was lost but i do apologize for that and uh hopefully uh you know we'll reel in the slight technical issues but um let's um continue on with the presentation uh and these researchers names uh again i was saying that uh you have to put together all of these seemingly disparate pieces of information and then you see the full puzzle picture a lot of people aren't willing to do that work you know they don't want to do the reading they don't want to do the homework you know they don't want to take that time and that effort so you know they'll say oh that he said something that i don't like and i'm done listening to him you know that's unfortunately how most people's broken reasoning works you know they won't actually sit and listen to something that they potentially disagree with see again this whole dynamic of the mark of real true intelligence is being able to consider a notion or consider a piece of information without at first accepting it or rejecting it and you would be surprised how many people cannot or are unwilling to do that i've actually asked someone to their face are you the kind of person who is capable just ask this question to an individual that i saw out on the street at some kind of a rally i think it was a rally to try to get um marijuana decriminalized here in philadelphia and i was asking one of the people who attended the rally i was talking about consciousness and how you know that it's never brought up that you own your own consciousness you uh own your own body and somebody telling you that you may not put something into your body is a claim of ownership on that body and consciousness and therefore it's slavery and i said no one ever makes the right to use whatever drug you want to use an issue of slavery and the person was so effect like got so you know flummoxed and offended by this you know which is r it's really the real issue that goes on with any uh you know concept of prohibition and this person was so didn't understand the principle of self-ownership behind it that they're like look i don't want to talk to you anymore i don't want to hear anything else that you have to say this is how unconscious and unready to hear truth this particular individual was and i said just listen what do you need to take that kind of a all or nothing approach for i said there's no possibility of interchange or interaction with for information with you clearly i said i said just answer me this one question and i'll and then i'll leave you alone are you the kind of person that is capable of listening to information or reading information or watching information and reserving judgment about what you've just seen heard or watched okay read heard or watched um and just putting the idea somewhere in your thought processes of your mind but not actually immediately accepting it as being true or rejecting it as being completely false and the person said to be honest no i am not capable of doing that when i hear see or read something almost immediately i make a judgment decision about it and it either fits into what i already think in which case i think it's true or it i reject it because you know it completely conflicts with the way i already think they actually said that to me and i said goodbye there is no help for you i said there is nothing i can show you there is nothing i can teach you there is nothing i could do for you i cannot assist you in any way that's called the 100 calcified ego that's what the ego is ladies and gentlemen that's one of the things that the ego is the the deep calcified ego attachment that's what it is right there it's no better way could i describe it to people and this is what you see when it comes to this topic people don't want to do the research they don't want to listen to someone else and just put it in their mind and then you could sort it out after you don't have to accept everything eric von donekin says you don't have to accept everything lloyd pie or william bramley or zechariah sitchin say but you can take it in and you could keep it in your mind and say hey how does this fit into the bigger picture is there something to be learned from this is there anything of value here that i could explore that i could learn from no most people are unwilling to do that they already have their belief system and and information be damned you know that's where most people's head is at so the next researcher on slide 141 i want to call to people's attention to zechariah sitchin zechariah sitchin is has put out some of the most proliferous amounts of work when it comes to the uh ancient aliens slash interference theory uh hypothesis out of any other researcher and he's often along with eric von daniken considered kind of like you know the grandfather of of this field of research and you know there is just so much uh in the way of books that he's written and his books are like they read like textbooks you know he's um put out the whole um earth chronicles series starting with the famous 12th planet book which i highly recommend um other books in that series were stairway to heaven wars of gods and men which i actually amazingly just found in a a trash pile in in outside of a thrift store the wars of god and men were sitting in the trash for stuff to give away for free you know this is the kind of stuff i come across when i'm walking the streets of philadelphia you know i'm i i'm magically am there at the right moment it's a book i have digitally but i didn't have a hard you know printed copy of it so of course i told i took it um you know i found another book in by sitching in like a bargain basement section of a thrift store the end of days that was his most recent one you know other books in the earth chronicles were the lost realms when when time began was book five book six was the cosmic code and then end of days was the last one in that series i believe he wrote that uh shortly before he passed a few years ago uh there is also dividing encounters genesis revisited journeys to the mythical past there were giants upon the earth and then of course the lost book of enki which is just an amazing um you know recounting of the ancient story that uh happened between the quote-unquote gods uh these non-human entities that came to the earth in the ancient past and the early human beings who they basically uh were ruling over like gods you know as the authority figures and the kings on the earth back in the ancient past so uh highly recommended is sitchin's work he also appears in a lot of documentaries on this topic um let's move on to the next researcher lloyd pie lloyd pie of course famous for the star child skull exploration which he's done a lot of great work with and dna analysis on and his books um everything you know is wrong and alien origins that's really the main crux of pi's work is uh human origins and hominids and how you know human beings are not evolved from our hominid ancestors but are a result of uh genetic manipulation i think pai's work is some of the best in this regard and i really highly recommend everybody checking him out you could go to his website you could uh you know download some of his uh videos on youtube just brilliant brilliant stuff and uh unfortunately he passed back in 2012 the week that i did this uh original presentation of cosmic abandonment here in philadelphia slide 143 william bramley most famous for writing the book the gods of eden which is a book about again the early uh human um experience with the gods still living the quote-unquote god still living on the earth with us um bramley takes kind of a little bit of a different approach um and you know i think he somewhat sees it as they were trying to uplift us and you know make us uh they were you know our they were our creators our um you know gods quote unquote and some of them were there to try to bring humanity out of its uh you know early mental state of you know barbarism and degeneration which of course they put us in you know he kind of doesn't really you know get too much of a down uh attitude toward these beings uh certainly i do uh you know i don't see these beings as moral or ethical in any way i've said that time and time again so uh we'll pick this up on the other side folks ladies and gentlemen stay with us you're listening to what on earth is happening we'll be right back you know the day destroys the night night divides the day try to run try to hide break on through to the other side break on through welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pascio my website what on earth is happening.com we're into the second hour of the show and we are continuing with the extended cosmic abandonment presentation as we have for many weeks here on the show i'm going to get right back to the slides we were on slide number 143 i was uh talking about william brownlee's take on uh the the quote gods of the ancient past the anunnaki the nephilim etcetera um he kind of lets them off the hook a little bit easy for my tastes i really look at everything they did here as very more immoral and you know some of them tried to clean up the mess afterward but you know some of them didn't want to do it uh didn't want to do what they went ahead and did uh but they did it anyway you know so it's kind of like they say you know the apple doesn't fall too far from the tree you know we don't understand morality just like our parents didn't understand it so very unfortunate but true so let's move on to slide 144 i'm going to pick up the pace a little bit because i really want to get to some callers uh who are holding and uh take some more calls throughout the show so let's um move on to slide 144 michael tallinger his book slave species of the gods is perhaps the single most important book that has ever been written on this entire phenomenon on on this area of research etc okay people have to read this book that's all i'm going to say about this guy this book is required reading if you don't already have it get it if you haven't already read it read it read it okay uh he's also done a lot of good work with um the concept of ubuntu he has a book out called contributionism a blueprint for human prosperity which is also an excellent book michael's um take on uh ending money i certainly agree with some of his methodologies i don't particularly agree with um i don't think he has a firm enough handle on the concept of ownership which is what all rights are based upon and many people who are you know not saying this about michael in particular i'm just saying many people in general out in the world who are very right-brained don't have a concept of uh the true concept of ownership they don't have that understood and they want to try to say that there's no such thing as ownership you know it's like you know if you're not if you're too left-brained you think there's such a thing as authority if you're too right brain you think there's no such thing as ownership these two things go hand in hand together because if you don't claim ownership of yourself ladies and gentlemen authoritarians who believe in authority come over and claim it for you very readily you know and if people still don't understand the concept of self-ownership i mean you know god help us what can you say i mean what else needs to be said that hasn't already been said now that's the way i think of things nowadays it's like really people are still this deep in unconsciousness for and this long all these people have been talking about these things all this information's out there and still people haven't even begun or have gone so far off track in one form of imbalance or the other they continue to believe in authority or they actually have worked themselves into an imbalanced state to believe that the whole concept of ownership is completely and utterly uh uh illegitimate needs to be thrown out the door you know so nothing could actually be owned including my body my consciousness while i'm inhabiting this body in this physical vehicle somebody would say i don't own this because they want to take things to the right brain extreme of well it's not eternal well nothing has to be eternal for you to own something my computer isn't eternal but i own it it's my property you know my body's not eternal either but i own it it's my property while i'm inhabited while my consciousness is inhabiting it some people are just never going to understand it they're never going to understand they're off in a in a spiritual days you know they don't they don't get it because their brain is burnt their brains all burnt up from whatever drugs they've done from you know whatever endless meditations they've sat doing you know it's uh you know the whole spiritualism movement has just gone so awry it's made these super right brained individuals and please i'm not referring to michael tellinger here i'm talking about people in general who are very right-brained and balanced i think michael tallinger is very well uh thought individual i just think he needs to firm up his understanding of ownership and that you know there are certain physical items that are more important than other physical items it's kind of like a you know a point of contention that i have with some of his work which like i said i don't agree with everything everybody says or teaches or talks about um but one thing i will tell you is that slave species of the gods will give you a very firm understanding of the events that happen here in the ancient past the subtitle of the book is the secret history of the anunnaki and their mission on earth i highly recommend the book i think anybody who's studying this topic needs to get that book and read it next researcher slide 145 david ike and not enough can be said about david ike again most people have not looked at any of his real information because they will not sit and read his books in their entirety that's where his information is laid out in their tapestry that's what he is he's an author of books he doesn't do podcasts like i do um you know he does uh you know very um large presentations similar to my all-day seminars but his main area of focus is writing that's what he does this is what i'm more than not loathe to do i'm not by my nature someone who really likes to write words but when i do write i can write well uh and you know again i'm working with an editor to get a book out by sometime next year but uh david's work is in his books and uh for people who really want to look at the information that he has assembled and put together and aggregated you need to read his books in their entirety and they're long big books that read like textbooks again this is not information that is put out there to entertain people so you have fun with it it's not they're not picture books they're not it's not like you know you're gonna jam out to some rock music it requires focus and intent and dedication and time and energy and effort you know nobody wants to put those things into that we want just self gratification you know so when you tell people you're going to need to read to understand this for a long time like i said i shot myself in basically in my room you know in my house for for practically the better part of a decade mark why are you so anti-social mark why don't you interact with people mark why don't you talk to family members because i'm sitting here learning about what's really going on on this slavery planet that's why that's what that time was used to do to awaken myself you know that's not easy work that means repeating over and over again i was wrong about this i was wrong about that i was wrong about this i was wrong about that and then taking in the correct information and understanding how it all fits together in a tapestry that makes sense of the world of the crazy insane asylum in which we live and i think here's a guy who has done brilliant work when it comes to decoding that entire matrix of information the book i highly recommend is children of the matrix particularly on the interference theory hypothesis uh his other books are also equally as brilliant uh and the truth shall set you free if people have the patience to go through it is a great book for waking up people who are beginning on their journey uh you know for just some of the 3d worldly aspects of the the whole uh you know conspiratorial aspects of things that are going on in this world if people would simply take the time and just read that book so many things would be answered he wrote alice in wonderland in the world trade center disaster he wrote the guide to the global conspiracy human race get off your knees infinite love is the only truth everything else is illusion the biggest secret the robot's rebellion tales from the time loop um yeah you can go on and on and others so uh his work is again huge and it his books are big and they're very well sourced and referenced you could you could research in one of his chapters you know probably for a lifetime with just the end notes to the chapter and go read the other books that he cites it's just amazing work and again i've talked about his courage before um if anybody if the world had one tenth of this guy's courage we'd be free already you know uh this guy is not afraid to speak his mind and come forward and say what he thinks regardless of what anybody else thinks about what he's saying so uh i personally have a tremendous amount of respect for him and uh we'll continue with some more researchers and their work on the other side stay with us everyone [Music] welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pacio my website what on earth is happening dot com i'm going to continue to move through some of the researchers that i think people should be aware of and check out their work the next person is cradle mutual david ike has done a lot of work with him particularly in his series the reptilian agenda uh he's an african uh sanuzi shaman from the zulu uh tribe in western africa and uh he's a library of information one of his people's uh you know keepers of knowledge uh to tell people about the uh origins of humanity and the events that took place in our ancient past i highly recommend his work he also has a book um i can't remember the name off the top of my head but i'm sure you'll come across it in the links that i have provided the next researcher on slide number 147 is michael tessarion who i have an absolutely tremendous amount of respect for and consider him a mentor to myself and my work and his origins and oracle's series must be viewed period i mean it's just absolutely 100 percent required viewing for anybody that is trying to decode what is going on in this world period and the work is just it's an enormous in scope and he presents it brilliantly and in a scholarly um you could actually watch that all on youtube if you just type in origins and oracles it's out there you know or you could find it on a torrent site he's also done a lot of work on the irish origins and influence of early civilization and he's put out a great documentary called architects of control um i can't recommend michael tosarion enough also his recent work with the major arcana of the tarot is brilliant as well so do check out his website as well and uh check out his work on youtube and uh you know pick up some of his books um graham hancock is the next researcher on slide 148 famous for fingerprints of the gods famous for his uh series called uh the lost civilization uh the video series i highly recommend people watch that one um doesn't get into ancient astronaut or uh cosmic abandonment uh slash interference theory that much but his work on you know uh the ancient world is absolutely worth checking out and his work that you know there were ancient civilizations here in the distant past and you know the progression of technology and civilization has not been linear uh his work really demonstrates that uh beautifully slide 149 michael cremo famous for the tome forbidden archaeology which presents many many many cases of suppressed archaeological evidence that is basically thrown in basements of anthropological and archaeological museums and universities never to be seen because it doesn't fit into the existing paradigm that the entrenched researchers so-called want to tell people about the linear origins of humanity the linear progression of civilization and humanity um and the whole darwinian macro biological uh evolutionary theory quote unquote evolutionary theory cremo uh demonstrates that you know not only is uh technology and civilization much older than we think but you know it goes into uh advanced technologies of the ancient world evidence for that it's just a book that people really just have to look into and see how much suppressed evidence that there is to support alternative uh theories and hypotheses for human origins and uh the the events that took place here in our ancient past that shaped and you know um formed forged civilization as we know it today so-called civilization um the next researcher on slide 150 is la marzulli i think uh this gentleman has done great work when it comes to looking at ancient architecture evidence for these beings existence these quote unquote gods anunnaki slash nephilim gods of the ancient world uh he's done a series called watchers a video series it's like a video magazine series just incredibly well put together uh where he enter interviews a lot of researchers he goes uh to different countries and looks at different evidence um great work uh in tandem with brian forrester who i'm also going to recommend later and he's got a few books out as well so i really recommend his uh work he takes a little bit of a uh you know traditional christian perspective that these beings are in fact fallen angels i tend to disagree with that conclusion but nonetheless i think his work is very well put together and very much uh worthy of people's time and consideration uh the slide 151 deals with david hatcher childress and his work his focus has been on the ancient technology that these beings used when they were here and you know the science behind them he's also done some work into the beings themselves with uh looking at the whole skull elongated skull um evidence and how this was not just cranial deformation done you know with uh binding um but in many cases that which you know the the cultures that did do that were mimicking the gods their quote gods the beings that were here and acting as gods over us because they had essentially created us so uh childress's work is very good he's also a uh in many different documentaries that deal with ufos and uh the ancient uh aliens hypothesis slide 152 trey smith his main work has been um looking at the nephilim and uh the stories of them in the ancient past a great um uh long dvd uh series called the nephilim the truth he's also done another pretty good series called noah um i definitely recommend checking out his stuff again a little bit more of that christian perspective uh that traditional christian perspective but again i'm not going to hold that completely against somebody regardless of what religious tradition they want to view this in from a filter through that's their filter that they're processing it through i could still listen to the information and take what is valuable to me from it without having to accept their conclusion regarding what these beings are what it means in the spiritual uh aspect you know so they could have their look at what this means spiritually and i can have my look at what it means spiritually it doesn't mean that i think that all their data needs to be thrown out you know i i don't look at this from that type of a traditional christian perspective but uh nonetheless uh many researchers who do study this have come from it from that biblical perspective and i don't have that much of a problem with that um again i don't have to agree with their conclusion but i can look at all the evidence that they've aggregated and that can basically be put into the huge pool of resources and evidence to draw from and help understand the dynamic better giorgio suclose is on slide number 153 of course very famous for his ancient aliens series which i definitely think is really worth watching um the earlier ones i think are some of the more densely information packed and then you know as they are more pressed to come up with some original information some of the later ones may stretch a bit and you know put forward some deeper conjecture than i i would prefer but nonetheless the ancient alien series particularly the early ones are is is excellent viewing and i i definitely recommend people watch those um the next researcher on slide number 154 emanuel velikovsky of course famous for his worlds in collision book about the formation of the early solar system and how uh bodies uh heavenly bodies collided and you know release tremendous amounts of energy into our solar system he was ridiculed endlessly for this whole hypothesis and you know in more modern times uh he's been kind of vindicated and a lot of uh you know cosmological evidence has proved him correct so a couple more researchers i want to talk about on the other side and then uh hopefully we can get to your calls in a couple of segments ladies and gentlemen stay with us you're listening to what on earth is happening we'll be right back [Music] wake up [Music] oh [Music] welcome back everyone you're listening to what on earth is happening i'm your host mark pascio we're continuing with the extended cosmic abandonment presentation talking about researchers and their work in this field we're moving on to slide number 155 if you're following along with the slides this is uh robert shock shock basically talks about um how the sphinx has weathering patterns that are not consistent with air or wind but water it's one of his main focuses of his work which basically uh makes its antiquity much older than what traditional egyptologists have talked about have talked about so uh he has a book out called forgotten civilization and um basically uh again gets into how our you know v world view and our paradigm of what human culture and civilization has been like uh you know is not the linear progression that we think that it is and uh many events in the past have basically uh rapidly changed um you know what what is the events that have occurred on this planet his book is about uh you know the the sun and it's uh you know sun spots uh and solar flares that have affected things here on the earth um again another theme in this whole field is cataclysms and research into um earth changes that that fits hand in hand with the story of the beings that came here in the ancient past and affected us in many cases they use these cataclysms to take advantage of you know their whole view of themselves as our gods and also uh in some cases there is evidence to speculate or support the possibility that these beings caused cataclysms that they actually had technology that was so advanced that it could actually cause cataclysmic events on a planetary scale so um moving on the next slide is uh slide 156 ds allen and jb delaire together these two scientists wrote a book on um essentially uh cataclysms that have happened in the earth's past and they focus on the last major cataclysm that happened over ten thousand years ago here on earth again this is a very uh uh consistent stream of data that comes in through a lot of other researchers including people like shock uh velikovsky graham hancock michael cremo and others so um this book is another huge tone but it's got a lot of really important information in it regarding how you know certain cataclysms may have happened in the ancient past on the earth so another highly recommended book and they really do a very scholarly job with that book some researchers that i did not put in the slideshow um because again i had very limited time i just wanted to point to people some of the um what i would consider the most important information to look at but nonetheless there's so many other researchers out there in this field that it's way bigger than most people think i just want to mention some other people's names and briefly mention some of the things that they have done you want to look into william cooper of course his book beyond a pale horse lays out a lot of information about uh humanity's involvement with some of these beings jordan maxwell has talked about um interference with humanity in his presentations again a brilliant researcher very courageous individual too brian forrester has done some of the best work with the elongated skulls uh evidence and uh he's also done a lot of great work with uh nephilim architecture uh his work is highlighted in la marzulli's watchers watchers video series i definitely recommend all seven of the watchers videos i think he's coming out with an eight with an eighth one very soon too so brian forrester um also has a good youtube channel i'm sure if you click the youtube link you'll come across that in the links that i've provided richard hoagland i think has a lot of great information on ancient civilizations on other planets in our solar system namely mars somebody i've been following his work for you know 20 years just um absolutely great stuff again i wouldn't say i agree with everything that he thinks or you know i would say he needs to go further in some of his understanding and areas of research particularly when it comes to government and authority but um in general i i like his work and i think that he is a person who's trying to get it the truth of what happened here in our very ancient past richard mooney wrote the book called gods of air and darkness which is another great book old not very difficult to find in print anymore but deals with a lot of ancient technology and hypothesis about beings that may have come here in the ancient past also gets into a little bit about the possibility of the moon being a non-natural object uh that possibly may have been uh artificially created uh similar to some of the things david ike talks about when he talks about the moon in his newer material rob skaiba or skiba i'm still not really sure about the pronunciation i think it's skyba he has some great videos on the nephilim on youtube i definitely recommend people check those out again kind of a traditionalist a christian perspective but again i don't have to agree with his conclusions to look at his data jay weidner uh done a lot of work on um alchemy and the the great cross of hende he wrote that book with vincent bridges i definitely recommend that but he also gets into the archons and and what they may be and this kind of overlaps and fits in with the uh interference theory hypothesis as well paula violet another uh scientist who has done a lot of research when it comes to cataclysmic events and what may cause them he talks about seaford galaxy explosions in his book earth under fire that may uh send out gravity waves from the center of uh galaxies and affect planets in you know the outer recesses of the galaxy definitely a book worth checking out uh connor mcdoury again this is a researcher uh michael tasarion often points to in some of his work he's done some uh work with um you know humanity in the eden time period you know the whole garden of eden story ignatius donnelly has done a lot of brilliant work regarding atlantis and lost ancient civilizations his work is actually uh very very scholarly put together and uh worth checking out john anthony west uh does a lot of work with the ancient commission or egyptian civilization and uh you know their whole belief system and spirituality definitely um a gentleman i highly respect and recommend people looking into mark pinkham he wrote the book called the return of the serpents of wisdom which deals with this topic steve quayle he's done a lot of research and work with the nephilim and giants etc tom thomas horn again a lot of work with nephilim both quail and horn take again a christian perspective when it comes to it will hart um he's a lesser known researcher he wrote the book called the genesis race our extraterrestrial dna and the true origins of the species a great book which i definitely recommend people checking out rick smith uh also known as the ufo teacher he's done a lot of great work on this topic he's also put uh together a lot of work about the um moorish legacy and its suppression by the entrenched powers that should not be i definitely recommend rick smith's work uh i was recommending him for the freer mind three conference i'm not sure if the new organizers are going to look into his work and take him on board but i'd like to see him speak there um w raymond drake has um uh also put out uh i i believe several books on on this topic um let me see if i could find the the one that i was recommending for people uh it's called gods and spacemen in the ancient east uh goes into you know uh the the vedic gods and you know their ancient technology that they used and how these were basically recountings of beings that came here from another place so uh yeah drake's work is definitely worth looking into there's andrew tomas i believe i'm saying that right he wrote a book called we are not the first about a lot of um you know proof of ancient technologies and beings that had come here lost science and and technology pretty good work let's see robert charo if i'm saying that properly he's uh it's obviously a french name or a french canadian name he wrote the book called forgotten worlds i believe he also wrote the book called the book of the masters of the earth but uh forgotten worlds is again postulates um you know scientific and technological uh advancements of beings from the ancient past and uh you know there's some other researchers that you know people could look into their work as well [Music] [Music] there's a code of silence but we don't dare speak [Applause] there's a wall between us [Music] that there's nothing wrong [Music] there's a code of silence that can't go on welcome back everyone you're listening to what on earth is happening i'm your host mark pacio my website what on earth is happening.com i'm going to try to go to the phones in this segment i'm going to just wrap up this uh section on researchers briefly but uh let me give the call-in number to join us here live on the air 800-313-9443 again the call-in number to join us on what on earth is happening hundred three one three nine four four three that's a toll-free number and there's no taboo topics here on the show there never is we're talking about the interference theory of human origins but i won't limit the discussion to that you could basically ask anything you want comment about anything you want that i've talked about or covered so far or anything else you want to bring up so um that's the toll-free number to join us and let me go back to wrap up these uh these last couple of names that i wanted to put out there i was talking about uh andrew thomas and robert chiaro let's let's move to uh uh rl dion he put out something called god drives a flying saucer what had which had a very interesting uh kind of biblical take on the whole phenomenon again kind of a alternative christian perspective you might say but uh i think still worth checking out for some of the information he puts out in the in in that book josh reeves is one of the few uh freedom oriented hosts uh and researchers that uh has really uh talked about this topic on air a lot uh at least from a uh open-minded perspective that has gone into this uh topic in depth uh a little bit so i definitely uh recommend checking out some of the things he's talked about regarding this alan landsberg uh was the individual who uh put out the uh series the television series in search of and he also i believe uh wrote some books on the topic if i'm not mistaken but uh the in search of series really uh went into a lot of alternative explanations about different things in the world and you know mysteries of the past and hidden technologies occulted technologies etc so it was a very well put together series i believe it was done back in the early 80s if i'm not mistaken it could have been in the in the late 70s i think it was in the late 70s um but he also wrote a book called in search of ancient mysteries and it uh definitely deals with a lot of these topics as well and is a a decent read so they're all the researchers i want to talk about i'm sure people will have many others and uh can point out you know names that i've missed uh but this is just intended to be an introductory list to get people interested in the topic and looking at it with an open-minded perspective and understanding there's a lot of different perspectives that people come at this from and there is a whole lot of data to be looked at but that's what finding the truth is all about that's what truth discovery is all about it's about gathering the information from a wide eclectic variety of sources and looking at it all without prejudging it and then performing a filtration process upon it to be able to get the big picture about what is really going on so if you do that you know then i think you'll understand the bigger picture and the big pattern that uh the powers that should not be in this world don't want us to see or understand so i think if we do that we'll be one step closer to really um understanding ourselves that's what this is all about this see people will say well why do we need to know about all this stuff that happened isn't that ancient history isn't that all in the past yes but no i'm not saying dwell on this i'm not saying let this be you know the be all and end all of your life i'm saying but if you don't understand the past you don't have a accurate framework for understanding how we got to where we're at today that's why this is so important to understand you have to understand what happened here that put the human mindset in the psychological framework that

that it is in and again that mindset is all about abandonment that's the root issue because from abandonment issues with mother and father you get i'm not worthy i have to find a a surrogate mother or father figure i i don't have true deep self-respect or self-esteem therefore i am not confident in my own decision-making because i didn't have that guidance there and i don't want that responsibility that comes along with truly discerning and judging right from wrong for myself so i want to give that responsibility over to somebody else and i'm just going to stay willfully ignorant of true the true difference between right and wrong morally you know that and that's where we're at in society this is where what society has become folks and this psychological framework didn't just happen all at once one day this was born due to circumstances and and this hypothesis this theory if you will readily explains the fertile ground in which this psychological framework grew from cosmic abandonment our cosmic parents left this place abandoned us here put beings that were all about authority and control and domination in charge of us and then we inherited that legacy and again i'm not stating they're not possibly not still around or monitoring the situation people want to you know say what makes you think they're not here cosmic abandonment isn't about them not being here it's about the fact that they are not here openly they left the parents made us and left okay they made something that was like a baby that they really didn't want except for specific purposes it would be the equivalent like i said of somebody who was very very destitute and believes in authority and wants to rely on the state having a child only to get income money welfare money from the state but you know they did this for their purposes they wanted workers for whatever their purposes were for whatever their reasons for mining whatever resources that they wanted to take from this planet and that's what they used us for or so many of the stories go if you accept you know that part of the stories so you know the whole point here is if we don't understand the conditions from which we came from in the ancient past we're not really going to have an effective understanding of the psychological framework of humanity in the modern day and that's what this entire presentation was designed to try to help people to grasp so next week what i will start to get into since i've for kind of the second time gone into some of these researchers work and finally uh you know aggregated a little list of them and you know put some links out there so people again can just click on the link they don't even have to type the name or get the spelling right it's all right there and you can research in three different major areas of the web google the major search engine yahoo the major video i'm sorry uh youtube the major video website and amazon you know a big outlet for books and dvds so i'll leave this section there and next week i'm going to be talking about some fictional allegories that have really presented in kind of a brilliant way this ancient story whether it's conscious or deliberate or not it really highlights a lot of the aspects of the ancient story of our past through allegorical fiction so that'll be coming up next week on what on earth is happening let's see if i can get a phone call in before the break and then we'll continue with your calls throughout the third hour of the show let's hear from tyler in utah tyler you are live on what on earth is happening welcome to the show hello mark how are you i'm doing well how are you i'm doing great what do you have for us tonight yeah my name is tyler's lawyer my question definitely partially relates to what you're saying okay um like on a personal level okay but i do have a couple of things really quick if you don't mind sure um i'm at the point in your podcast where i'm up to where we're moving forward together now i'm all the way caught up so i'm gonna be listening live now that's great and uh this is the first time i've been listening live i didn't meet you in manchester i came out um to the conference and we spoke briefly but presentation was excellent i appreciate that i really appreciate your time and all your efforts and everyone was involved including richard groves yes richard is going to be editing the presentation and putting a video out of it uh in hd he said the video came out very well the audio came out very clear i got my slides over to him and he's going to be editing that and i'm waiting it'll it'll probably look similar to the natural law video he did a phenomenal job with that and uh that should be up probably you know i don't want to give a time frame there is no rush for it but it'll be up shortly and uh you know people will be able to check out that seminar on demystifying the occult got an update from him yesterday that he's working on it awesome that's great you know i want to thank again the woman that mentioned to you you've mentioned several times throughout your podcast that um kind of sparked you on this thing with uh you know releasing your information yes and i think that you know she's a very important person in your life and it just goes to show how important it is you know when somebody says something that they feel like they need to say to somebody sometimes it does really plan to see if it matters i would like to come back and ask my question absolutely i'll hold you through the break stay with us everyone we'll be right back [Music] [Music] welcome back everyone you're listening to what on earth is happening i'm your host mark pacio my website what on earth is happening.com we're into the third hour of the show for this evening and we're taking your calls for the duration of the show the toll-free number to join us 800 we were talking to tyler in utah tyler are you still with us uh you were you were basically saying um that it's so important to reach out to people because you never know how you're going to affect another person and what they may go on to do or who they may go on to affect or who they may go on to wake up i mean i think it's a great point i mean realizing that and then taking it in and you know acting on it like you say that really will show you that that's true but um you know um your work on natural law has become what i would call a part of required information to look into and i pass it on and i talk about it all the time and i understand the weight of how important that topic is and uh in order to take back our freedom and to end the powers that should not be and i think you know that's a cornerstone of what you're doing i really appreciate it i absolutely concur whenever people ask me what i think is the most critical aspect of my work and the thing if they pay attention or look into nothing else it is the natural law material that is the thing that people have to understand and integrate most deeply into their consciousness right yeah and we just need to keep you know keep pushing it out there and just stand in that because i mean that's really all that needs to be done in my opinion when you boil it down but anyways i'll move on to my question yes so it does tie in a little bit not necessarily on the on them on the macro cosmic level of uh you know whatever came and manipulated whatever um that's still something i'm really kind of dealing with and processing so sure i'm there with you but you know so how does one approach you know figures in their life who may have contributed to abandonment issues you know like in on an individual personal level like family members that actually cause like harm within you and and does want to approach individuals once they realize you know the weight of all this and then you know especially if you're trying to maintain and repair and and move forward yet you know there's this big huge pink elephant in the room you know with these people and then you know are you and how are you dealing with this personally yeah well i could even just use myself as an example uh to the for this question uh there isn't really a need to have to um uh like confront somebody up in their face like a parent about the issue of abandonment from whatever perspective in other words i was talking in the the shows on that about my own and my siblings own abandonment issues i could get over those abandonment issues without having to work with the parent okay it's something that is going on in the individual so the the parent does not have to be remorseful or even understand that they performed such abandonment uh to their child or or what you might call neglect in a certain aspect of their life so just me consciously recognizing that that happened is progress and then what you're doing is you're working with the emotions and the shadow material that comes up from the understanding of having been on the receiving end of that condition so it's it's internal work it's not something that really you have to make confrontative with somebody else you know it's a form of being harmed but it isn't direct over harm like somebody following orders it's you know them not just really deeply understanding the things that are really truly required for the upbringing raising nurturing of a child most people on this planet simply just are not good parents i mean it's just like take the higher road and move forward without necessarily you know making the situation any worse right and then it's also about understanding the things that are required for true nurturing of a child and raising real true raising morally of a child go forward that's right and you can do that with if you're going to bring enough new life into the world you know uh you know at some points i think you know anybody even thinking about doing that you know how could they even think of it with how the world is now and the uncertainty but i understand people are still going to procreate at least they could do this at a conscious level and understand that they want their child to be in a better position than they themselves was were attempted to be brought up in so that's my kind of take on it it's really about internal psychological work that the person who was on the receiving end of that traumatic uh you know um situation of abandonment does upon themselves to transform that and then rebuild the personality in a stronger form in a way that they're not dealing with these issues of self-esteem and that they have you know they're empowered and they're confident and they can let go of that even if the person won't you know say that they are sorry about it or even acknowledge it you can let it go it whether true forgiveness is involved in it as a two-way process and the person wants to involve you know work with a healing process with that with that those parental figures or not at least you're letting go of that and you're not staying attached to it and you know it's not uh holding you back in your future endeavors that's really my take on uh what yeah the real healing process is about yeah that's great you know i that's just like reflecting back you know exactly kind of where my thought process is going so you're just like repeating and instilling that that's the case and really you can only affect yourself and then if those people want a relationship with you and they see you making those changes they might decide to look at certain things and if they don't and that's kind of that's kind of the door that i leave open with family members again people who have heard me talk on this topic know that i don't have a very positive opinion of my family in general but nonetheless if they wanted to come and wanted any of this information i would never turn them down and i would try to help them to understand it's just they're still in the state of being unbegun they have not started it doesn't look like many of them have any intention of ever starting they're in full denial mode they're in what can i do about this mode even if it is true and it's just uh that fear will will completely block you and and hold you back and that's kind of like where you know everybody i grew up around is at so i just don't really deal with much of that and you know i'll still speak the truth unapologetically whenever i have the opportunity or i'm in their presence but i don't really seek out those relationships i don't try to surround myself with any anybody like that i surround myself with other conscious individuals and try to build you know vertically on our knowledge but that isn't to say that you know i'm not open to forgiving them or working with them if they wanted to know and move forward in knowledge i would embrace that with open arms and i would never hold their past you know unconsciousness against them so that's where i think people need to to leave that when it comes to unconscious family members you know that's kind of my my take or approach to it that's great that's great and then really quick just like totally off topic have you ever heard of the new living kabbalah a practical and experiential guide to understanding the tree of life by will perfect i think is how you say it for perfect i believe i have heard of this book um i'm not sure if i went through the entire thing but i know i did see it uh so um tell me your impressions well i'm still working through i've been working through it since an individual handed it to me like eight years ago and i pick it up every now and then i really you know try to work through it but it's just really you know you know it's a steep curve so but i'm picking it back up and so just wondering if you had an opinion on it but anyway i mean it's interesting if you have a chance to look into it maybe if it's you know give me the author's name one more time will perfect can you spell it a-r e-a-r-f-i-t-t okay great tyler thanks so much for your call really great uh observations and things that you brought up ladies and gentlemen stay with us we'll be right back [Music] [Music] yourself we don't need no education we don't need nose dogs controls no dark sarcasms in the [Music] welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pacio we're taking your calls in this hour final hour of the show the call-in number to join us 800-313-9443 let's go back to the phones and let's hear from kevin in philadelphia kevin you're live on what on earth is happening welcome hey mark how you doing dude hey kevin how you doing great to hear from you i i i very amusing that your last um your last caller was who they were and said everything that they had said i had a whole bunch of things i wanted to say but this is almost kind of more important i'm hoping the guy's still listening listening i also have just recently caught up finally to the end of of all of your stuff i think i have missed like maybe one or two in like the 50s or 60s but i believe i've hit all about 95 percent of your show and i have to admit that like he is 100 right about that taking a chance on saying something to someone you you and i met uh at like a screening of the zeitgeist film at a germ bookstore in philly like all those years ago and it was that moment and you later giving me uh those dvds of michael tessarion and the oracles and origins series like that just blew me away and i was like hooked i was just like how much more information can you give me and you seem like decades ago doesn't it it seems like an eternity about seven years ago right yeah i think it was about seven years ago so i think it was like it was it was exactly like what you're with what that was called was talking about when it comes to like you saying something to the per to a person at the right time in their life when they hear it that's right and it and and that actually happened to me with you so like the reason why i've been in the route that i've gone you know i've met like two podcasts have done one i'm kind of like setting aside because i feel like i've gone through is like what i've gone through with it and it's kind of over and i'm kind of concentrating on this but fun thank you fat as well for coming on the show oh sure too long ago for that um that whole thing of uh self-public ship and uh property rights in like a resource-based economy is like is something that the the zeitgeist movement really needed to touch on because it's really like they they they needed to have people understand that they don't uh won't kill their stuff at all it's really about getting people who don't have access to things currently the access that they need exactly we all know that money is a social construct that we could just like end the federal reserve or at least the irs the home yards even we had to keep money transitionally for a little bit like with like an unconditional uh income would be nice i like as a transition but there are so many things that we can do that we're not really doing in like thank you for for showing me that there are other people out there that think that things are really messed up that was just you've been there to just simply point that out and say like i'm with you man like i see that too see where where are the discontents kevin we're we're the people we're the discontents we're the people who are not content with the status quo with the way things are and we need more people like that the problem is comfort the problem is when so many people are just get into this comfort level that they can't see the injustice and they can't see the violence and they can't see the evil that's really going on in this world because from their perspective well they're comfortable they're being left alone they have a roof over their head they have money in their bank account they have the car they have the tel the widescreen tv the flat panel tv you know they can afford a meal and have friends over for a football party or whatever you know so that comfort level is what's holding them back from in consciousness from their understanding of what this world really is that comfort levels holding them back from their understanding of the difference between right and wrong and natural law and like you said and like the previous caller said you never know who you're going to affect with your voice or what they'll be inspired to do like you know you've already done two podcasts you've probably woken up a lot of other people you know it it you never know who you're gonna activate you know that's why you know my myself me and jay parker were talking about this earlier actually and he was saying you know we continue to do what we're doing believe me folks i am a normal mortal human being i don't even feel like doing a show tonight it's it's like i had to really you know use my willpower like i would i worked on computers today i was tired i wanted to sit and lay down and now you know after relaxing a little bit i have to force myself to get up and go on the air for three hours you know it's like that takes you know dedication and willpower and it's not like i you know i'm looking at it like oh this is the greatest thing let me get to it it's like here's more work coming i have to focus now i have to get real my mind and focus and pay attention and then you know be ready to talk to people and receive calls while i'm doing it yeah the energy is there you know i get into it but it's like you know it i don't really want to do this i don't want the world to be this folks i don't want the world to be this way i want to live my life in peace and freedom and not have the world be ruled by violence unfortunately it is that way so the only way to undo it is to speak to people and get them to understand basic principles about the difference between right and wrong and the point that's being made here is we're going to power through this anyway even if we don't feel like doing it even if it's not something we want to do we're going to continue on with willpower persistence and you know as much patience as it takes to get the job done because without that you know we're not ever going to really affect change in consciousness which is where it has to happen you know we could talk about you know physical revolutions we could talk about physically trying to do something to change things but unless it's changed in the mind the same events in the same circumstances the same basic outcomes are going to be presented to us so what this is about is reaching out to people with the power of your voice that's more important and more powerful than any other agent agency of change is speaking truth and if you understand what's going on you have a moral obligation and responsibility to speak it to others because again like the callers have been saying here tonight folks you don't know the person you're going to touch or reach and what they'll be inspired to go on and do in the future yeah i really appreciate how much that you have inspired me it's exactly that too i i saw what you were doing and then i um i couldn't help but emulate my emancipator for lack to better terminology you emancipated yourself see you know i could be exactly a slight assistant in that process through the information but ultimately you wanted to break your chains and look at what you've done you've gotten active you've gotten active and involved you're on the playing field and now you're influencing others and that's what this is all about yeah that's exactly it because like i i it literally went from those moments where you like you helped hand me that information and then i like to get home and i just sit there for 20 some odd hours and listen to it all you know i i was in a way lucky i had like a newborn that was kind of like just hanging out with me the whole time you know like it was very simple for me to just sit there and watch this stuff you know i see this happening more and more and it's a very encouraging sign for me again we're nowhere near where we need to be as a species but there's more teachers starting to step up there's more people that want to propagate this information to others you know for your mind groups cut prop cropping up all over the country you know people are getting on the battlefield they're understanding what's going on and they're saying well it's time to take out the sort of truth and start going to work you know so that's an encouraging sign and you know kevin i want to thank you for your courage and uh you know for for getting involved in the great work so thanks so much kevin great call always encouraging to hear from somebody who's active stay with us everyone we'll be right [Music] back you know the day destroys the night night divides the day try to run try to hide break on you to the other side break welcome back everyone you're listening to what on earth is happening we're taking your calls in this final hour for tonight's broadcast i want to thank kevin from philadelphia for his encouraging call during the last segment let's move on and let's hear from bubba in colorado bubba you are live on what on earth is happening welcome okay good to hear from you we're here me and my team members we saw this video on the internet and it showed the astronauts this apollo 8 mission and they were saying we're a couple hundred thousand miles from earth and yet they were they were showing the window there's the earth and then all of a sudden the screen fell off and they were in low earth orbit they were lying paper moon yeah i've seen that as well and this is a total light um we're actually connected me and my buddies to the nasa's program and we've been cape canaveral and of course the manned space center in houston and also cape canaveral and we were told in 1960 it was called the west ranch there's gonna be a manned space program but it was going to be phony we got a lot of information and that this stuff is never going to be revealed you know and then you know what we just this is over like 55 years ago going on right and and then they told us look you're just going to be lied to about this and what the heck what are they doing i'm not sure if you're familiar with any of jay weidner's work he's done a series about uh kubrick stanley kubrick's and possible involvement in the moon landing uh you know uh uh creation you know the the whole story that they told the people statement and anything you know he kind of comes to the conclusion that there may have well been a real mission to the moon but we're not we're not uh privy to the real data that set that they brought back or the real encounters that they may have undergone there but uh instead you know broadcast kind of like a sanitized version of this uh to you know through a studio to the american public and uh you know the the movie um wag the dog uh is about uh creating a war through the media through you know uh the uh ability to affect consciousness through mass media and uh it's done by a guy called named stanley who's played by dustin hoffman and a lot of people suggest that was really about uh kind of like a veiled allegory about the life of stanley kubrick so i think it's definitely an interesting um uh topic to explore and look into and i kind of fall on the side that more likely than not they definitely were holding back data if not fabricating it outright but i think people should check out the works of jay weidner when it comes to that his stanley kubrick uh movie series is very well put together and definitely worth checking out so bob i want to thank you for the call and i'm gonna take another call here from zach in chicago zach you're live on what on earth is happening welcome to the show hi mark how you doing doing well it's good to finally get to talk to you i've listened to uh your stuff for a very long time now and i gotta tell you going through all your stuff i've gone through your whole series like three times now and i still get new things from it oh my god three times i don't know if i could handle hearing myself for that long that's that's great though i'm glad i'm glad you find the information valuable enough to to go back and revisit it oh yeah i uh i've been going through many different podcast series such as gnostic media school sucks peace revolution and uh free main radio and i kind of feel like just like what all the other callers and i've been talking about it's funny because everyone's on the same page like it's so awesome but uh i realized that you know it is like our job to get this information out there and i kind of realized that like my job in this is to kind of look at all these different sources of information and just basically like make a mind map of like all this material and say hey here's an amazing starting point here's a bunch of stuff go for it you know sure like i said it's largely introductory material to get people started to wet their appetite get them researching on their own i provide some resources to do that like i said i just consider myself an aggregator of this information this information has always been here and will always continue to be here and uh and on that topic i realized part of the reason why you know it is slightly difficult to communicate these ideas to people um comes really down to the words as as you've said many times you know like the universe the world is made of words and if we know you know how to use the words right and we can make the world what we want one of it well i think said that but yeah um and so when i'm i'm saying all this because i have a few questions that i think can get through pretty quickly and it's pretty much just about defining a few words because i think we agree on things but uh i just i feel like our the way we think of the word just makes it a little different for each of us so if you don't mind i'd like to just uh give like a definition real quick and then just have to say about it sure go ahead alrighty um well right before that i want to give it i want to let you know that i do believe that there is a you know there is a will of creation or the generated generative operative and destructive forces um of the universe and that there is like something out there and i say that as a caveat because the word i'm defining is atheist okay and uh from merriam-webster the full definition says one who believes that there is no deity and uh and just the common like person definition is a person who does not believe that god exists and god is like a very general you know word and if i click on the word god it goes to you know well let's see what it goes to real quick sorry god the perfect and all-powerful spirit or being that is worshipped especially by christians so what i'm getting is if we go by like um the definition that it gives then an atheist you know simply doesn't believe at least from from my understanding they don't believe in basically a big guy in the sky you know and so when you say you know the schism of the mind one side is atheism um it's like well do you mean like there's no there's nothing out there at all or do you mean people's general definition of atheism which is right there's nothing at all okay that's that's kind of what i thought no i i i mean people who don't believe in any higher um power in nature which is essentially what deity is i mean if you look at the definition of deity deity is basically a higher power in nature you know that is like uh you know a supreme power or force in nature that this is what i'm saying atheists don't accept they think that you know our will is the highest will in creation and you know there's nothing out there beyond us that governs what we are doing that we are the ones who have the right to basically control and govern things and they don't believe that the universe has boundary conditions in place for the way humans behave that's what i'm i'm looking at is the definition of an atheist that's my my way of seeing what atheism really is about the traditional i don't accept your god or any of the religions god's you know it's a limited way of looking at atheism i look at it as there's no higher power at all i don't accept that there is any higher power that man is it okay well that's exactly what i thought and uh if you'll bear with me i just have two more words and i think one of them is going to be even easier libertarian the definition and adherence of the doctrine of free will so when you put libertarians in the same right you know cabinet as menarches and things like that like that's the first time i stepped back and like whoa whoa whoa i define our terms i was like i finally don't agree but i think it's the political party is what you're referring to libertarian political party philosophy is monarchism the true you know unadulterated or un influenced definition of libertarian literally just means somebody who believes in and follows liberty or the non-aggression principle or the principle of volunteerism you know which you know i certainly accept but i'm talking about the political party libertarians when i talk about that yeah and uh and i have one more um thing that i i don't even have a definition for i just want to hear what you have to say and then i'll let you go to the next caller but before i i would like to once again thank you for all the work you do and uh i can't wait to have my own work out there that you can look at and say hey this guy's doing it too and that's what it's all about i mean that that that to me when somebody sends me a link and says here's what i'm doing or here's what i've put out there that's what i'm encouraged by you know uh people can thank me or whatever you know that that's neither here nor there i'm i'm gonna do this regardless of you know what whatever gratitude or you know comes my way but um i appreciate that but what i like to see more than anything else is people actively getting involved yep and uh and i'd also like to say i'm i am also sorry um because i'm sure a lot of people are that you have to teach people right and wrong that is like it's almost insulting that we have to teach people like the most basic things about ownership it's amazing i i like i said i i sometimes lay awake and i'll lay awake at night and almost laugh because it's like really that this task has fallen to me you know and and other people who understand you know not just me obviously but you know it's just a ridiculous notion it's i can't even fathom that this is where we're at in the world yep and uh so here's my last little thing um actually uh i'm gonna just say a green word uh green language word and then my last thing sorry sure um my friend said the word measure to me and if you take that apart in green language you could look at it as me as you are as in am i if i'm measuring you i'm looking at you know me in relation to you like the ratio of me to you interesting that's a very interesting way of looking at it [Music] welcome back everyone you're listening to what on earth is happening here on republic broadcasting final segment for this evening's broadcast we're taking your calls let's see if i could uh fit in a few more callers in this segment let's hear from mark in our real quick before i do go to the next call uh the previous caller he had mentioned the green language aspect of the word measure as me as you are i think it's a great way of looking at it because isn't that the true measure of a person you know the ability to see themselves as someone else the ability to equate uh and uh relate to each other to see the you know the uh basic essence of consciousness and the divine spark of creation within everyone you know uh to understand the equality under natural law of all people not that everyone is the same but that we are all equal in our rights um you know i think it's a a really nice green language way of of looking at it so uh thanks for that uh let's hear from mark in oregon mark you're live on what on earth is happening welcome to the show [Music] i'm ray oh ray i'm sorry ray in oregon you're live on what on earth is happening welcome all right i'm sorry about the confusion there uh hey uh mark uh i just your previous callers i i don't even know where to start they it is a stream of consciousness they they you call up with one thing you want to talk about and they bring all these other good points to it i mean you can't help but be a little bit uh just happy with the work you've done i i can tell because i've done your your you know i've listened to most your podcasts i've read a whole lot of those books i haven't finished i'm not caught up because i stopped to stop to read the books you know but uh i i also heard you're you're a funny guy too you know if people wouldn't when they think of mark pacio probably funny isn't one of the things that comes up no i wouldn't expect so but i could tend to have a kind of a dry sense of humor sometimes i like to think i make people laugh every now and again i get it i get it when you're told last week you said sell your clothes to buy a gun man that cracked me up and then uh i'm totally serious about that one though i know i it's still funny uh what i called uh i mean among uh these million times million things that the mutual admiration society i want to thank you uh the first time i ever emailed you i think i asked you for you know what were your your pivotal books your important books you just listed them it's amazing uh i don't even know where to start i've read uh some of them uh but uh the thing that i wanted to talk to you about is this this uh georgia guidestones i know it's kind of trivial and it it really doesn't matter in the greater scheme of things but it's kind of caught my interest they just put the 2014 in there i saw that yes not really sure where they're going with that or if they're trying to tell us something but most certainly uh occultists have erected this monument and uh clearly there's got to be some significance to them putting that stone in there yeah and if you look on uh there's there's guys that apparently do gematria and have reduced the numbers and the angles and and all the different things that you can and they came up with 10 24 14. does that number mean anything to you um it does not right off the bat but you know i i guess we'll find out uh or you know next week sometime right real quick here yeah uh i wondered also i the thought that came to me is a stonehenge where that's always been you know this mystical circle and memphis to you know these things to these people or whatever uh maybe the words just wore off of that uh and and what we've got left is is you know whatever they say i also read i'm not sure if this is true but that stonehenge got knocked down once and they re-erected it yeah the all those stones were in total disarray it was basically reconstructed i believe in the uh mid 20th century or early part of the 20th century i'm not exactly sure the date but um they definitely reconstructed it as they thought the arrangement went if you really look at a visualization of the completed stonehenge it was a full ring of those sarson stones with lentils on top of them all so the arrangement of stonehenge certainly was not as uh archaeologists and anthropologists found it originally it was rebuilt yeah yeah they're they're pretty they're pretty uh open about telling people that that's that was reconstructed back then it's not really a secret i mean you know we learned about that when i visited stonehenge back in 2004 cool well and so as far as these these georgia guide stones definitely occult but not really uh you haven't really put a lot of thought into it as far as whether that means anything or or obviously whoever erected the monument which again he gave his name is rc christian which is christian rosencruts the mythical founder of the rosicrucians clearly what i would consider a dark element of rosicrucianism the person who uh you know made this monument which is essentially about world population control a very dark world view of humanity certainly um i i i think they must have some kind of a reason in their own mind for putting that uh other cornerstone in there with the date 2014. i can't tell you that i know what it is because i don't but um you know like i said if there is any significance to that uh date uh particularly in the month of october uh we'll find out very shortly i would say but um you know a lot of people have been speculating about the possibility of a major event taking place toward the end of this year uh i guess time will tell and uh you know we'll either be here to sort it out or not but you know uh uh they'd certainly have these beliefs and uh kind of uh put this out in their symbolism on their on their monuments and and through their their uh occulted writings and symbols so uh again i think we'll just have to wait and see on that one fair enough mark thank you very much for everything you do for who you are uh you're i just you said you're not a superman i have my doubts man i don't agree with everything you say but uh for the work that you do the things that you put out there you're amazing please continue i know you will i will continue but ray believe me your your praise is way way beyond uh if you really uh you know knew me personally and and saw what i deal with i'm just like you man it's just it's just we got to just stick together and do this if we want to get this work done that's all it's really about i'm plotting through it and you know i have to refocus my will on a daily basis and sometimes it's very difficult but i really really appreciate your your encouraging words there thank you so much amen and and we really don't have a choice do we mark no that's that's right if you understand the truth about what's going on there isn't really a choice but to get involved and do it you know that's all there is to it you know it's just get on the battlefield folks this is a spiritual war we need to be fighting it you know now is not the time to rest on our laurels it's just we need to press forward ray thanks so much man i really appreciate the kind words love you bro you got it let's hear from jonathan in kentucky jonathan you're live on what on earth is happening welcome hey mark i just want to let you know i confirmed that i sent you an email jonathan your phone is breaking up can you repeat i apologize i said he sent you an email to confirm and the uh title should be jonathan from kentucky okay i'll check it out okay uh the other thing is i want to give a real quick story i did a military simulator once and you put on this headset you're in this virtual world and you're supposed to engage the terrorists and while you're doing it i was i was talking back the whole time so all the guys could

What On Earth Is Happening Show #173

Topics: *Fictional Allegories portraying the Intervention Theory of Human Origins, Shutting Off The Poison Signal, Allegories of the Two Brothers, Playing God, Genetic Manipulation, the Inability to alter the Past, Allegories dealing with advanced civilizations stealing resources from less advanced civilizations, House Slaves and Adrenaline, Knowledge as the Solution to ending Slavery, the name Bill and its variations used for an Occult Solar Deity, Truth-tellers who were ahead of their time yet proven correct, Entropy (Death/Chaos) vs. Syntropy (Evolution/Order), Becoming Active on the "Spiritual Battlefield," the importance of Epigenetics in healing Humanity*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're listening to what on earth is happening here on Republic Broadcasting I'm your host mark passio my website what on earth is happening dot-com the network's website Republic broadcasting org today is Saturday October 25th 2014 this show is of course live every Saturday evening here on RB n from 10:00 p.m. to 1:00 a.m. Eastern Time that's 9 p.m. to midnight Central Time we have a great show lined up for you here tonight we're going to be continuing to present the extended version of the cosmic abandonment presentation that I gave back in late 2013 cosmic abandonment is a presentation that explores the connection between what I refer to as the interference theory of human origins and the current human condition tonight on the show we're going to have a little bit of fun and we're going to discuss some movie allegories some works of fiction that actually tell a very powerful and important part of the story of the real origins of humanity the interference theory of human origins through Hollywood fiction and I'm going to discuss several movies and talk about some of the connections that they have with the events that occurred in the ancient past on earth so that's coming up on this edition of what on earth is happening and then maybe about halfway through the program or so I will start taking your calls on any topic you want to explore including cosmic abandonment or anything else because there are never any taboo topics on what on earth is happening and never will be so I'll give the call-in number right here at the top of the show and people can get in the call or queue if they wish to so the call-in number is eight hundred three one three nine four four once again the calling number to join us here on what on earth is happening 800 3-1 394 43 just a couple of brief event announcements the for your mind 3 conference is coming up in early 2015 you can check out more information about this great forthcoming conference at the conference website free your mind conference calm I am scheduled to be one of the featured speakers at the free your mind conference really looking forward to it it's going to be held just outside of Philadelphia of this year and that's all I'll say for now all that you know people go to the conference website to get details which will be forthcoming so for your mind 3 coming up in April of 2015 the website free your mind conference calm definitely check it out I want to let people know that I am working with an editor on a what on earth is happening book I've talked about this briefly on past shows this individual has done absolutely phenomenal work helping me to prepare the material for this book and he sent me a draft and I've been looking it over and having a couple of people look it over and it's coming along really great and I'm really excited that I think probably by early next year hopefully by the time the free your mind conference rolls around although I don't want to make any promises the book will be actually you know published I'm gonna self publish it and you know put it out there for anybody who wants to pick up a copy so you know I just want to let people know a little progress report there that it's going really the book is coming along really well and I'm really looking forward to putting that out sometime early next year if everything goes according to plan with that said I also want to mention that there is a donation button on the left hand side of the what on earth is happening dot-com website if you feel that you have received value from the information that I've presented and shared on this radio show and on my website you can feel free to make a purely voluntary donation to help support my work so that I can continue it into the future and you know don't you know the new thing the new attack when you know people when absolute chills and you know people who are brain damaged can't attack the information that you put out and they can't put a chink in you know what other people mentally you know think of you as because you do hold some integrity and you do stand in truth and you do stand in courage and you do keep speaking the truth out into creation for other people to hear the very last thing people can attack you on is oh you're accepting donations you know that makes that makes everything you know all my work somehow invalid or that makes me some kind of a show because I open up for you know other people's generosity should they want to voluntarily give it I mean this is the most nonsensical notion that I've ever personally heard of but you know for people who you know fall into these kind of logical fallacies it doesn't really surprise me there's a lot of people out there with completely burnt brains so you know that's all I really have to say about that and you know I've already spent too much time even even bring mentioning or bringing it up I guess I'll be you know EE or Tripoli a shell by mentioning that I do still have some what on earth is happening t-shirts I have not put anything for sale up on my website ever up to this point when the book comes out I'm obviously not going to be able to just give books away because I'm gonna have to put out a significant amount of money to press the book on my own to actually you know self publish it so of course the physical copies I will have to sell but I'm going to arrange somehow putting out electronic copies of it for extremely extremely inexpensive prices maybe I'll just do any any kind of a voluntary donation for the book we'll get you an e copy of it you know and you know that'll be as close to free as I could put it out there and you know I don't care if anybody wants to share it with whoever they want of course I want it to be shared I want the information out there so you know I'll probably do something like that with an e copy of it once it does get published and of course you know I'll have to charge a small amount for the actual physical book you know because I can't just press those and give them well I don't have that kind of money to do that but you know I also have some t-shirts that are left over from I printed up a bunch of t-shirts for the Connecticut seminar that demystifying the occult seminar and I want to really thank everybody who attended that seminar and the t-shirts actually sold very well it was like a hot item at the table you know when we tabled some merchandise there and you know people seem to really like the design it has the what on earth is happening earth design on the front you know with the website and then you know with the the blu-rays coming off of the earth and then on the back it has the one great work seal that I kind of designed based on the the you know the classic all-seeing eye design the reverse of the Great Seal but it says one great work truth love freedom and then there's the phrase there is only two mistakes one can make on the path to truth not starting and not going all the way so we'll continue on the other side of this break folks you're listening to what on earth is happening we'll be right back [Music] [Music] [Music] we welcome back everyone you're listening - what on earth is happening here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm before the break I was just letting everyone know you know I was basically continuing my shale activity because I'm going to mention some merchandise for like the first time since I've you know pretty much come out and started publicly speaking we printed some what on earth is happening t-shirts I put out maybe about a little over 1,500 dollars to have these professionally silk-screened they came out really nice and we brought them to the connecticut seminar it was the first time that i've ever had any t-shirts pressed you know the idea here was you know let's get some promotion going for the website and you know a nice t-shirt might get some people talking could you know bring up the topic of you know kind of what this radio show talks about and you know what the website gets into and turn some people onto it and that was the intent so we printed some up they sold really well people really seem to like the design and i may offer these on the website you know people can let me know what they think of that or maybe i'll just put an email link or something like that and you can email me and ask me how you can get a hold of a copy i'll you know figure out exactly how i want to work that but you know i'll probably make some of these publicly available because i do think they came out really nice I think people will like the design maybe I'll take a photo of them and you know put it up on there on the radio show next week or you know put it up somewhere on the site next week but I just wanted to mention that that I'll probably be doing that in the near future and of course that makes me an absolute fraud so you know just so everybody's clear on that seriously though let's jump into the the topic the material for tonight's broadcast and as always I want to direct everybody's attention if they're listening live to the what on earth is happening comm radio show page you go - what on earth is happening click the radio show tab as always underneath the player when I'm live on the air there are images for the show and underneath that you'll see the cosmic abandonment slides if you're listening with the podcast this is podcast 173 and the slides of our of course posted with each podcast there's also a zip archive link where you can actually download a zipped archive of a zipped folder of all of the images if you want to open them up just locally on your computer that's my recommendation probably the easiest way to do it you have all the images numbered in one folder so we're gonna be starting on image number 157 this evening which is simply the section it begins the section of the cosmic abandonment presentation called allegories so I'll just start by defining what an allegory is because you know some people may not be familiar with that term I would guess any kind of longtime listeners of course are familiar with what an allegory is something I talk about a whole lot an allegory is a story a poem a picture a symbol of some kind that can be interpreted it's an encoded story poem picture or symbol it's something that is encoded and it could be decoded or interpreted in a certain way to reveal a hidden meaning to reveal some hidden understanding and usually that hidden meaning were hidden understanding is a moral lesson of some kind it can also be hidden events that people want to explain in a covert way without coming out and actually saying you know these are the names these are the dates these are the people involved etc you know so they'll change the name but the story is basically the same so this is what we're going to be talking about tonight on the show allegories that deal with the cosmic abandonment topic that deal with the interference theory of human origin that beings came to our planet in the very ancient past and did some of manipulation to humanity or created humanity in a manipulated way for their own purposes and wanted to use this planet and people for their own resources and their own reasons their own agendas that's the general thesis people have called this you know I call interference theory people have called intervention theory you know I accept that as a name for this topic but like I say like I've said it kind of like doesn't really do it justice because it almost sounds like oh you're doing an intervention of some kind well that could be helpful you know interference means you're standing in somebody's way of where they want to go you know you're blocking them you're preventing their forward progress that's why I prefer the term interference theory but it's also been called ancient astronauts theory you know things like that alien involvement in human evolution etc you can call it really whatever you want it's all the same basic concept and many fictional movies fictional stories have dealt with this theme again in an encoded way and you have to understand the general background story that we've gone over in the first part of this extended presentation which was called the story of the human past if you need to understand the basic outline of that story in order to understand how these allegories are retellings of that story of our past so you know of course if you're not familiar with that you want to look at the researchers I talked about last week on the program and listed and I've gotten some good feedback about that people seem to be putting that resource list to good good use they like the way I you know provided some basic links so that people can just click on you know to do a web search or to do a YouTube video search or to do an Amazon book search you know so that people can do this type of research on their own and you know you'll discover so many other researchers connected with this field when you research the ones that I put out there so it seems like that was a it worked out the way I linked that stuff and people are getting some good use out of that and I'm glad to hear that so let's start in with some of these allegories and I look I'm sure I've missed some I'm sure people will have others you know there's a couple that I am gonna mention that aren't on the slides I didn't make slides to to represent them or you know I became aware of them after this presentation had already been built I'll probably add in some slides down the road when I refine or enhance this presentation but for now we're just gonna touch on a few and then we go when we go to the phones if you want to bring up any that you think allegorically deal with this topic you know you're free to do so so the first one that I'm gonna talk about on slide number 158 is probably my personal favorite movie of all time it's the cult classic they live starring Roddy Piper it was made by the director John Carpenter and I'm gonna tell you know a little bit of an anecdotal story about my meeting with Roddy Piper in a little bit but let's talk about the movie first they live I believe came out in 1985 or was a 8088 I'll look up the date but essentially it's it was 88 and essentially it's about a man who is pretty poor he's looking for work he's out of work and you know he finds some work as a construction worker and very synchronistic experiences lead him through and kind of living in a tent city to become aware of some sort of an underground resistance movement that has together detected the presence of alien beings that are already in control of the planet that are already in control of the earth they are you know the so called elite of the earth they're the people who are the quote movers and shakers they're the people who own all the corporations all the money all the business the police the military etc politics - we'll pick this storyline up on the other side stay with us everyone [Music] [Music] [Applause] [Music] the cool side that we don't dare speak [Applause] it's a while between us it'll rip so we keep pretending that there's nothing wrong that's right the code of silence can't go on ladies and gentlemen that's why we're gonna broadcast the truth out into the universe until it is heard understood integrated acted upon and sets this world free let's continue talking about some of the fictional allegories that deal with the interference theory of human origins as part of the extended cosmic abandonment presentation we were talking about the movie they live starring Roddy Piper a cult classic by John Carpenter from 1988 the piper character his name is not a very interesting that that kind of is a slang word for nothing you know he's like the the spirit you know who's going through through life going through the world of incarnation here on earth and you know discovering hidden truths so he comes across this resistance movement that is poor and trying to put the word out about aliens who are present in the midst of people you know this could be a allegory regarding Psychopaths and you'll understand that that's in many cases that's what these people are talking about because you know that they're the progeny of these beings that were here from thousands of years ago they interbred to try to keep the genetics as quote pure as possible you know as they saw it and therefore they may have uh you know kept a lot of psychopathy going in or in many cases again I talked about psychopathy primary psychopathy in particular having an origin in the genetic manipulation that was done to early humanity and then therefore Psychopaths want to continue to enter breed those traits those those genetic characteristics among them to kind of keep it in the family and keep their ruthlessness intact so that they can stay on top so to speak to that they can keep these dominating and controlling aspects you know that come with the concept of the come with the disease I should say of psychopathy so um you could interpret the allegory that way or you can just see it as you know these beings represent you know on at face value what they're portrayed as non-human entities or perhaps possessed Souls beings that have been inhabited spiritually you know and have been taken over you know another movie I I'll just briefly mention it has a concept like this is invasion of the body snatchers that that I didn't include a slide for that either but that has a lot of these same themes in it where people are being taken over and you know they're not acting you know as normal individuals and these are consciousnesses from elsewhere coming to take the planet coming to basically inhabit the the bodies of the people of Earth and and ultimately take everything they live you know works with this alien theme and the goal with what they realize this underground resistance movement that the piper character nada becomes involved with what they realize they have to do is stop the mind control signal that is going out to the population through the television the radio the newspapers subliminal messages everywhere he looks with these glasses that this underground resistance movement has developed that they call Hoffman lenses these black sunglasses can allow you to see all the subliminal mind control that these beings are putting out to keep the population asleep and continue to rule over them so it's a brilliant allegorical film it's kind of b-movie ish in many ways and that's you know absolutely I have no problem with that as a matter of fact I kind of think that lends to the character or charm of some of these movies a lot of people who want to watch this as strictly you know movie buffs a bad idea because you're not watching this for the entertainment value so much as you are for the encoded message if you understand it's an allegory try to reserve your judgement about well how were the effects or how was the acting okay moviemaking aside you have to be willing to suspend that critical aspect of looking at a lot of these films and just watch them to look to hear and understand the message that's contained within them a lot of people can't do that you know unfortunately very unfortunately they see a movie as just a piece of entertainment value just a movie just something a story if somebody's just trying to creatively tell and in many cases that's definitely not the intent behind the creators of film they're really putting out a spiritual message in many ways and what Carpenter is clearly putting out here is you know what he thinks of our current situation in the world as being ruled by these sick psychopathic people and the the whole goal is shut the signal off get the television message out of people's heads get the propaganda out of their heads once you shut that signal off by their very nature they'll be open-minded more to the truth it's like I said you know the whole mind control signal is like the sorcerers dissociative datura this plant that is used by South American sorcerer shamans to basically dissociate people from reality and basically then you know keep them under their thumb and keep them under control and keep them in a hypnotized type state that's what the television does and the message of this is until we turn off the poison signal we interrupt the poison signal we're not going to really make be making much headway and the main character has to actually sacrifice himself at the end of the film in order to do that so you know themes of sacrifice are profound in the film as well I cannot recommend strongly enough to anyone who has not seen this film to watch it immediately if not yesterday okay I mean that's I can't give any stronger recommendation for a film so for those who are familiar with it you understand why I recommend it so highly for those who are not familiar with it you need to watch it right away I just want to briefly talk about my personal meeting or encounter with Roddy Piper when he came to Philadelphia and it was at a movie screening for the 25th anniversary of the film they live I saw they live in the theaters on the first night of its release and people will say well why would you go see this film on the first night of its release you know and that was 1988 what was i I was that would make me 14 years old at the time okay so why would I as a 14 year old boy want to have gone to see this this film and the answer is because I was a big fan of Roddy Piper growing up because when I grew up I was into pro wrestling yes I've said it live on the air you know uh people will probably you know have lots of things to say for that revelation but I was big into wrestling when I was young as are many you know people so I liked Piper in particular from the very folks first moment I saw him wrestle and saw you know do his his uh you know stage persona and that's why I wanted to see the film because when he became a Hollywood actor I wanted to see you know what was he gonna do what kind of movies was he gonna make and I didn't understand the film at the time of course you know not many people did a lot of people still don't but I went to see it and I really enjoyed it and so of course after really you know becoming awake and understanding what the film was really about I saw it with completely fresh and open eyes and saw its brilliance by John Carpenter so I went to the 25th anniversary screening which was very awesomely presented here in Philadelphia when I saw that you know that was the the 25th anniversary screening was going to be only a couple of limited places New York was one Philadelphia was one of them I think there was a couple other cities if that I was really excited to see that so Oh barb and i did get tickets with some friends and went to the screening and there was a there was a picture signing session with Piper kind of meet-and-greet afterward and we got kind of held up we had tickets for the meet-and-greet as well but we kind of got held up talking amongst ourselves and doing some other things and we ended up being the last people in line lit was literally the last person in the line for the meet-and-greet there was no one behind me I was the last person in line so you know he was you know still there and I had noticed even up to the very end he was very cordial very gracious to the people who came to for the meet-and-greet and the autograph signing you know with his picture that they had given out and you know I was pretty impressed by that because it had to be a long time that we were staying in a couple of hours at least standing in that line to to you know go up meet him shake his hand talk to him a little bit and get the photo that they had given out to all the people who had bought meet-and-greet tickets autographed and I thought that was pretty cool of him that you know even till the very end he remained you know really happy and very glad to meet and greet the people who came to see the film so I'll pick up that little anecdotal story after this break ladies and gentlemen you're listening to what on earth is happening here on rbn we'll be right back [Music] [Music] [Music] welcome back everyone you're listening - what on earth is happening here on Republic Broadcasting I'm your host mark passio was giving a little anecdotal story about the time I met Roddy Piper last year and I was saying how cordial he was even though he had spent you know couple of hours signing autographs and talking with people even down to the very last person in line which was me and when I got up to him you know I gave him the photo to sign and I also handed him my card my what on earth is happening dot-com business card and he said what's this and I said that's the real sunglasses and if you go to that site you can put them on and he said okay I'll definitely do that and I'll check it out I'm open-minded to hear what people have to say I said awesome and I you know shook his hand and I said you know at this screening you know you you were you know you came out on the stage and you talked a little bit about the making of the film and how it was to work with the other actors and the directors and everything like that and you know how the film blew up and you know you didn't expect it to get as huge as it did and to become a kind of an underground cult classic film and I you know it was really awesome what you came out and said and you know it was very interesting to hear but I said you didn't really get into what the film was really about you know philosophically and what the message that carpenter was putting out there was and he said yeah I've kind of stayed away from doing that up to this point and I said well have you ever considered you know really coming forward and talking about what this film is really about because you're a very charismatic individual and people would be willing to listen to you you know they know you as a public figure you know and if you did something like that it would probably be very well received and he said well you know I appreciate you saying that and I appreciate the vote of confidence and he said there are some other people who have been asking me to do that as well and I've been just you know talking with them and considering it and kicking around the idea a little bit but I haven't really decided to go ahead with it and and I you know kind of tried to like give him that little nudge or that push and I said well you know I think you would be awesome at it because again you're very well-liked and it would probably be a natural thing you're you're you already you know we're always you know great speaking when you were in wrestling and you know this would kind of be a natural extension to that except you would be putting out really valuable information and as again a public figure that is charismatic and well-liked people would be open-minded to hear what you have to say and I could tell he really you know thought about what I was saying and was you know again very nice and very cordial about it shook my hand again we said goodbye and you know that was my little encounter with him so I didn't really think too much of it after that and again I'm not gonna take credit for this I'm just gonna throw it out there that possibly I may have had something to do with it but very shortly after that maybe within about a month or so after that encounter Alex Jones actually brought Roddy Piper on to his show and interviewed him and he talked about all the themes that you know we're in they live and his whole mental you know view of the world in the modern day and you know how it was really going and did a great job I thought and he was a kind of influence to do that by Sean stone you know the director Oliver Stone's son who you know knows Piper's friends with him and I believe Jesse Ventura and and his son Tyrell and then you know they know Alex of course and he brought them on his show which I thought was a great interview and you know I'm not going to say I you know made that happen but maybe who knows maybe he took to heart something that I said you know I'd like to think of it that way anyway and hopefully kind of uh that you know encouraged him a little bit if nothing else so that's my little anecdotal story about my uh my meeting with Piper during the 25th anniversary they live screening here in Philadelphia it's very cool let's move on to the next slide 159 and take a look at a couple other allegorical films dealing with men who want to be gods which has put this whole interference theory of human origins is really about beings claiming God ship over other beings and there's no better example of this than the old story by Rudyard Kipling the man who would be king that was made into a Hollywood film back in the 70s starring Sean Connor and Michael Caine great film about actually very interesting that the they're

Masons in this movie as well you know so the idea of secret societies and you know hidden knowledge and occultism is brought into the film that way and the one character once of course the one brother were you know you know you could look at them as two soldiers on a mission one of them wants to stay and rule a less technologically advanced civilization that they are thrust into and the other one just wants to do what he has to do and move on and get out of there and go back home it this is the veiled story of the brothers and key and Enlil of course an key being the being that wanted to create us and lo the being that wanted to rule over us mercilessly once we were created because he looked at us as sort of an abomination against nature that had been made and disagreed with the whole plan to genetically manipulate an entire race of beings these themes are heavily overlapping in this throughout and again with these films you know it's not an identical telling of the tale there's a lot of themes in it and some of that there's a lot of different themes in it you know some movies have some themes with the the this story that we've laid out here on this extended presentation and many other researchers have talked about and written books on and made documentaries and you know television series etc so you're not going to see every film containing every element you know they're they're scattered throughout all of these films and again the other part of this is you have to take into consideration that possibly the universe is at work here that literally the underlying intelligence creation and will of the universe itself is it work dynamically in this dynamic form of energy and flow that people have referred to as synchro mysticism and we've talked about this on the show in the past many times synchro mysticism is kind of how information gets populated into fictional stories through the creative process now some people will call this wrongly in my opinion predictive programming predictive programming is what people think well they're putting out these things deliberately to try to get people to have this in their subconscious mind I really don't see these allegorical works of fiction so much as predictive programming now I'm not saying that none of that exists I definitely think it does exist but these types of films that are trying to that are putting out elements of the truth okay I don't think it's predictive programming I think it is an example of synchro mysticism in many ways where the creative process perhaps opens people up to information that is simply all around us in what people have referred to as you know the underlying field of intelligence you know the Unified Field the Akash whatever you want to refer to it as you know this is what you know certain people with psychic capabilities have been able to pick up on this is what people I feel tap into through the extreme creative process of something like writing or directing a film and it so it doesn't have to be conscious knowledge necessarily on the part of a lot of these filmmakers although in many of the cases I do believe that it is conscious knowledge so with that being said there's a film that's very similar almost an identical retelling of the man who would be king in animated it is a type of like it's I don't think it's Disney I think it was DreamWorks if I'm not mistaken dreams were DreamWorks films made an animated variant of this called the road to El Dorado which is also the the movie poster is also pictured on this slide very similar they're coming they're they're coming for the gold see again here's this concept once again that these beings were here for gold and then they stayed for the quote adventure and it's definitely a film worth checking out that has a lot of parallels with the interference theory so we'll continue on the other side of the break folks stay with us we'll be right back [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening com were into the second hour of tonight's broadcast continuing with the extended cosmic abandonment presentation tonight we are talking about fictional allegories that recount the events of the ancient interference with our origins and we were talking about the films that kind of deal with the the two brothers like the man who would be king and the road to El Dorado by DreamWorks the road El Dorado is has some interesting symbolism in it you know you look at the movie poster there and the first words on it is they came for the gold you know this whole concept of these beings coming here for gold as being some sort of a sought-after substance in the universe in general I mean you know this is repeated in the movie we're gonna get to in a few moments dune you know but in that it's the spice and it could represent oil as well but it could also represent gold you have the gold step pyramids in the the movie poster and you have the two brothers one in blue one in red in masonic colors here Masonic connection the two opposing colors on both ends of the spectrum of the light spectrum okay and you know you have the they're both riding the white horse and he's holding up a bag of money the one eye tons of little you know wink-wink nudge-nudge symbolism they're they're you know they're the riders on the white horse that you know biblically you know in revit revelatory symbolism that's death you know there's saying these beings brought death here they brought you know of the the death of you know our potential here if we don't try to undo what they've done I think there's tons of symbolism right there just in the post or a loan not to mention the film and I again as I was saying before the last break I think it's definitely a film worth checking out certainly in conjunction with its original counterpart the man who would be king let's move on to the next slide slide number 160 again you're gonna see this two brothers theme repeated once again and in more modern times the four movies you had the first Thor movie and then you had Thor the dark world I really enjoyed both of these films actually and almost immediately recognized the pond seeing them that this was going to be again another retelling of this ancient story of brothers that had very profound impact on our world who came here from elsewhere their father the king of their their world Odin you know that that would be representing he would represent anew again this is all Norse mythology and it's just a direct parallel to Sumerian mythology these are the stories that are essentially written about and told about these beings and their interactions with our planet so you know in the Norse mythology Odin is the Creator God his sons are Thorin and Loki again in the Sumerian mythology you have the in the story of the Anunnaki you have a new who is the king and then you have the brothers and key and Enlil and in this allegorical fiction of Thor Thor himself would represent the brother Enki and Loki would represent and keys brother Enlil again and lo wants to be the one who rules with an iron fist and key I'm so yeah and lo wanted to be a guy who ruled with the iron fist and and and ki is the brother who while he had the most direct interaction with human beings wanted to see them helped and uplifted again I've come forward and said in no uncertain terms do I think that that makes him the quote good guy many people see it as such that he was such a great being and you know tried to help people I don't see the whole story like that I have a pretty dark negative view of all of these beings quite frankly because once you start getting involved in messing with another races evolutionary progression in the natural realm you've played the role of God you've tried to usurp the role of the creator in nature and so all of these beings were wrong all of them were immoral none of them were we're good guys were some of them somewhat better than other in their interactions with us yes most certainly did some of them regret what had been done and tried to negotiate the situation or mitigate it yes which again in an unwanted pregnancy or an unwanted child situation that is what a parent or parents who want to try to become responsible would do so maybe n ki started looking at us in that regard perhaps okay I have to keep an open mind when it comes to the whole you know recounting of these events that that may have very well been the case and lo of course is always basically written about such that he really wanted to see Humanity gone he didn't didn't agree with the plan from it's very inception and wanted us gone up until the point of the monstrous deluge that basically wiped out 90 plus percent of the population on this planet upon pockets of survivors of surviving that Cataclysm the Sumerian texts actually tell about even Enki's heart kind of being softened at that point and saying along with some of his counterparts discussing the idea that perhaps fate itself or the god of creation itself may have one of these beings to remain alive and propagate for some unknown purpose and at that point allegedly and he even backed off of his position that all the humans need to go if you accept those you know those texts as being accurate so the Thor movie unequivocally is a recounting of these ancient stories and again it all comes from Norse ideology with that which has a direct parallel to again the original Sumerian Akkadian Babylonian you know etc texts from the ancient Middle East so the Thor movies I definitely also recommend for some allegorical works and you know not to bad action line stories from from Marvel if you're into that kind of thing from a purely entertainment perspective but the allegorical content is what I'm mostly interested in let's move on to the next slide slide number 161 in the presentation is the island of dr. Moreau again this is about genetic manipulation this scientist / doctor played by Marlon Brando basically is creating animal-human hybrids or what you would call chimeras by splicing their genes together and coming up with new species the is exactly the story that the anunnaki uh that is told about the Anunnaki and this movie poster actually has these beings kind of like worshipping this hood at an inroad being that has like a triangular shaped hat like the all-seeing eye you know this priest class type being who is the god of the island well what is the island of dr. Moreau it is the earth we are the genetic chimera we are the hybrids and the the caption on the poster says through DNA experimentation dr. Moreau has upset the balance of nature that's an understatement he has turned animals into humans and now heaven has turned into hell so ladies and gentlemen will pick up exploring some of these allegories on the other side of this break you're listening to what on earth is happening here on rbn stay with us everyone we'll be right back [Music] you know today destroys the night-night divide today trying to run welcome back everyone you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening dot-com we're talking about fictional allegories that deal with the interference theory of human origins and we were talking about the island of dr. Moreau the movie poster is on slide number 161 if you're following along with the cosmic abandonment slide presentation images again the story is about a doctor who you know wants to improve upon nature he wants to be God and he changes the genetic code of many beings and hybridizes them and turns him into human animal chimeras and the the caption on the poster says he has turned animals into humans and now heaven has turned into hell it's this story of our planet what could have been sort of a parody sickled realm with evolution taking its course naturally according to the natural evolutionary progression in nature was interfered with by a group of beings and you know they wanted to be God here and create you know beings as they saw fit to create which was again the usurpation of the place of the creator in nature and this is the argument that kind of went on between the Brothers of Enlil and Enki and Enlil argued on the side of not performing these experimentations because that was usurping the role of the creator of the universe itself and you know of course they went ahead with it anyway and that's kind of you know what this allegory is about the island of dr. Moreau is the earth and you know morro is you could say Enki for the one who actually conceived of and for with these experiments genetically definitely an interesting film that shows that it kind of it probably isn't going to end well let's just say that to move on to slide number 162 this is the time machine I didn't put this in the original presentation and I kind of you know beat myself up over that that I had left this out this is probably one of the most important films that deals with this topic allegorically because it's about a man who loses his wife which is about the loss of the Sacred Feminine and wants to reverse time he wants to go back in time to prevent her death what he finds out is that no matter how many times he you know makes it his absolute obsession to be able to build a time machine and go back in time and when he finally succeeds in going back in time he finds that he cannot prevent her death she dot she'll die in a billion different ways no matter how many times he goes back she doesn't you know he prevents her from dying the first way and then she dies another way and then he goes back again stops that death and yet she dies yet another way and the main overarching concept of the film is that once something has happened it can't be undone truth is what is and you you can't change that it's what has occurred and is occurring so you can't go back in time and have events undo themselves and that's part of dealing with what we would consider the linear notion of time okay we talked about how time is kind of an illusion there's only the now but in the now that's where events happen and then they're written into the record of creation and that's it you can't undo a past event so this is what this film is saying you know esoterically when it's talking about the possibility of time travel there is no possibility of going back in time and altering the past the past is absolutely irrevocably set in stone because of choices and the wavefunctions that those choices collapsed on to the present moment as that which has occurred that's called the truth so this film is talking about that very concept and what it the you know aha moment of the film were the you know actual piece of enlightenment that it's trying to get forward to the people who are you know watching it for its allegorical content is what can be changed is the future because the future begins in the now and that's what the main character finally realizes now what he encounters in the far distant future is that humanity has basically been turned into a form of food for a genetically modified race a genetically you know quote-unquote superior race that evolved because the moon broke up and they had to go underground and essentially they developed these different traits and characteristics that made them almost like reptilian / dinosaur type beings again this reptilian theme comes up in a lot of these allegories as well again we talked about the possible appearance of these beings as having skin that looked somewhat reptilian fish-like or bird-like scaly in other words and that may have led to the whole you know cults of the serpent the cults of the snake etc the veneration of the serpent and the snake throughout time religiously in just about every culture anywhere on the earth at any time period no matter how far you go back as long as there have been humans so in this particular allegory you have and again I I just want to say I highly recommend the newer version the 2002 edition of this film okay you you could watch the original nineteen fifty something version of the film for sixty something I don't quite remember but I'm specifically talking about the 2002 edition which I find you know the one that really has the effect of allegory and again here's another film folks destroyed in movie reviews again you'll see that theme pop up over and over and over and over when they don't want you to recognize a film's allegorical content guaranteed Hollywood writers reviewers film critics magazines newspapers journalists of all kind are going to come out of the woodwork and absolutely crucify a motion picture if they're doing that in unison go see that film because I guarantee you they're doing that for a reason because they want to cut off its popularity as quickly as possible so that the the vast amount of people say it got horrible reviews I'm not gonna waste my money I'm not gonna go see that film and even if you don't see it in the theater see the film download it okay go on BitTorrent or wherever and grab the film and watch it okay you could easily find any of these films on wherever you want to search for them online any torrent site probably has most of these popcorn times stuff like that they're easily findable you know if you miss them in the theater or you don't own the DVD or a blu-ray disc okay or you can go and if you want to buy them buy them on you know wherever your favorite DVD site is so my point here is the second incarnation of this film from 2002 is the one to watch and you could see this movie poster has this very sinister looking Bing alien looking Bing which is this you know genetically modified being from the future that is essentially these beings like eat the people of the earth they use them as food as resources and the one race is the Morlock and then the race that they control and eat and dominate is the Eloi and what this character the hero of the film wants to do is try to free the Eloi from their suppression and domination by the more and try to make them aware hey you're not even resisting you're just being eaten by these by these beings and finally when he recognizes that what he can do is change the future by what he's doing in the now he steps up into the moment and starts to offer resistance against these beings it's uh it's a very decently put together film and I think it really shows the whole concept of the predation of humanity by these beings that came here from elsewhere so definitely worth checking out the new version of the time-machine stay with us everyone more allegories on the other side we'll be right back welcome back everyone you're listening - what on earth is happening I'm your host mark passio we're talking about allegories that deal with the interference theory of human origins and we were discussing the time machine what I find interesting in the 2002 version of the time machine is the Morlocks kind of control there there are enforcers through a form of mind control and you'll see this repeated as well and this is all about you know the the dark occultists who ultimately are ruling in on this world who are the progeny of these beings that came here from elsewhere they ruled their house slaves called the police and the military through mind control you know they're just basically telling people exactly what's going on in the world through this allegory and the discussion that the high-level Morlock the the super Morlock type being you might say that is the really advanced one the discussion that he has with the main character toward the end of the film is a very very interesting that he talks about how you know they would be even more vicious barbarians if we didn't control them with you know through their mind you know it's talking about that's what order followers are like order followers are absolute animal barbarians with absolutely no conscience whatsoever that would you know eat their neighbors basically you know and exhaust their food supply it's just uh I personally agree with the sentiments put down by the super Morlock in that movie regarding the people that he's really talking about as being you know absolute sick demented monster type meant having a monster type mentality because that's what order followers are they're the ultimate evil and the movie does a pretty good job explaining that element of mind control I'm going to kind of talk about that a little bit when I talk about Deep Space 9 coming up so I'm gonna move a little bit faster here and try to go through some of these because I want to get to your call soon the next slide is 163 and this deals with the movie dune also one of my favorite films also got crushed in the reviews somewhat b-movie ish the novels by Frank Herbert are great it's a very high level spiritual allegory the main character Paul Atreides sent with his family to live on a planet where spice mining is the big thing this spice melange is the huge thing in the galaxy perhaps this is about gold again some people see it as oil you see the recurring theme of beings coming to another planet to take resources from them this is repeated over and over and over again and you see you know the again the robed royal type figure with the triangle shape behind them in the archway Stargate is enough film again I didn't put that in this round of slides but you know stargates another film that has a lot of these similar topics you know you have the God raw in Stargate who's ruling on another planet and taking the resources of these people bringing them aboard his ship you know ruling as a god when he's just an alien being and you know they travel back and forth through stargates and and ships so there's so many films that that deal with this type of stuff all have again bits and pieces of the story different aspects of the story are involved in dooms case is largely about the resource mining and it's also dealing with you know that you have to actually fight these people on a mental level and change your mental vibration if you're going to rise above and see through all their mind-control so powerful themes in dune I can't recommend that film enough either let's look at the next slide slide number 164 avatar I think it's still the top grossing film of all time if I'm not mistaken I could be wrong about that but this film just absolutely blew up when it came out people intuitively recognize the allegory of this film as being an allegory for going into a less developed area region a less technologically advanced civilization you know just taking their resources by force similar to what we do to other third world nations and that's basically what it's about but it could also be interpreted to be about the beings who came here in the ancient past and took over this planet again an all new world awaits is the subtitle these blue creatures again that's another big theme and the recounting of these stories many of these stories talk about humanity as being blue beings you know as being the blue monkeys you hear them referred to as the Sumerians referred to them as the referred to humanity as the Loulou race the Loulou species which meant worker race were primitive worker okay and again the humans in Avatar represent the alien consciousness that comes to another world and basically takes it over and exploits the beings as and their resources very powerful allegory people I think resonated with it at a very deep spiritual level and that's why it became so popular even though many people didn't really outwardly understand the allegory when this film came out again I highly recommend the film I think it was brilliantly done and uh you know I'd like to see them come out with you know a sequel or something like that you know to continue the story but avatar is just I think a great allegory about you know of one highly advanced technological civilization basically coming in and pillaging a less advanced one along those lines of the trilogy the matrix of course which I broke down extensively in my matrix trilogy decoded presentation is all about another consciousness ruling humanity and enslaving it in the in this case in the form of AI being beings artificial intelligence you know robotics etc and again this could be interpreted as an allegory for these beings keeping us in a state of mind control enslavement being used as human resources exploiting us just as a resource for the energy that they require a need using us as slaves you know and again the idea is to come out of their matrix of mind control that's the way you're going to really recognize truth and stop being acting like a slave brilliant allegorical trilogy not enough can be said about it for people who haven't watched all three of them and don't really deeply understand all three of them you need to watch them all not just the first one the first one is the one that's popular the second one's the second and third are not nearly as pas because they're much less understood than even the first one the first movie answers the question what is the matrix the answer is control slavery of course the second film answers the question how did the matrix basically come to be why are we in the matrix and the answer to that question is we don't understand the laws of causality or in other words we don't understand natural law we don't understand the law of freedom how morality is inextricably linked to the manifestation or the lack of manifestation of freedom in any given society and the third movie answers the question how do we get out of the matrix which is what is what kind of persistence and sacrifice is going to be required to ultimately undo the situation that we are in the these films are such high level spiritual truth that I don't even I personally don't even really believe that the Wachowski brothers were the driving force behind the allegorical spiritual knowledge of these films I could be wrong about that you know people will disagree and debate that people talk about Sophia Stewart as writing the kind of predecessor the framework for for this trilogy and not being kind of credited for that I don't really know what to make of that situation either although I'm open-minded to you know hearing or reading about it but the thing that trikes me is highly interesting just as a brief aside regarding the matrix that I didn't really cover in my presentation on it is that when you look at the Wachowskis brothers contract with AI I think it was Village Roadshow films they're forbidden to do ever do any interviews about this film now why would a movie company forbid the so-called writers of a film ever to discuss the film publicly for like the duration of their natural lives to me I think it's because they wouldn't be able to tell anybody what the film is really about because probably they were just kind of like you know puppets put up to put this out under some kind of pseudonyms or whatever and you know again I could be wrong about that I could be you know not really seeing the situation accurately when it comes to these brothers but I personally don't really think if somebody puts out a work of art like this which is what this is it's a it's a work of alchemical art the Matrix series and then they don't ever want to talk about it for the rest of their lives something is wrong there something isn't right there folks that's all I have to say so I'll wrap up on the other side the allegories and then we'll get to your calls coming up on this edition of what on earth is happening stay with us everyone [Music] [Applause] [Music] [Music] we go welcome back everyone you're listening - what on earth is happening I'm your host mark passio I'm gonna wrap up this segment of these spiritual allegories that we've been talking about dealing with the intervention theory of human origins I just have a few more to put forward slide number 166 Star Trek Deep Space nine I would say the entire series deals with this entire concept allegorically especially once it transitions into dealing with the Dominion this race from the other side of a wormhole or a Stargate again you see the Stargate theme repeated over and over again throughout these spiritual these fictional allegories as well not only in the film Stargate you know you have the the movie Thor dealing with the Rainbow Bridge you know the Bifrost as it was called in the Norse mythology you know this is an allegory for a Stargate and the the Deep Space nine station is positioned in front of a Stargate or a wormhole a stable wormhole that connects to quadrants of the galaxy in this you know incarnation of Star Trek and these beings the founders depicted here on the lower left-hand side of the image in orange they're they're shapeshifters again you often hear the things that came here in the ancient past being depicted or recounted in the stories as being shape-shifting or having the capability of morphing their appearance at a genetic level and you hear these stories by modern researchers researchers I'm sorry of course David Icke being one of the most popular ones that discusses this topic of shape-shifting and in the film again you see this tight level of control over their house slave minions once again by pumping them full of drugs and the drug that they give them is known as white and what this is is an allegory about adrenaline that the beings that act as the house for the real controlling class our adrenal junkies and adrenaline is probably the substance that will destroy the human neocortex faster than any other substance because when the adrenal response is going what happens is Quan large quantities of blood are quickly pumped away from the brain to put you into what's known as the fight-or-flight modality the fight fight-or-flight response in which case the extremities need to be blood filled and hardened to deal with the threat in in the case of fighting the threat fight response the upper extremities or the arms have to be hardened and rigid with blood because you're going to actually use them for combat purposes in the example of the flight response where you're going to try to escape the dangerous encounter with a predator or something else that may be happening the blood has the heart in the lower extremities the legs so that you can flee and therefore survive in this case the torso is largely the internal organs are large richly oxygenated blood is pumped away from the torso and the internal organs and that's why if you're in a constant state of amped up you know high you know tension stress consciousness where unconsciousness as the case would be you're going to develop internal organ problem body body problems health problems and of course the brain isn't going to function properly because blood is pumped richly oxygenated blood is also pumped away from the brain in that bio physiological response circumstance a fight and flight fight or flight mechanism response so this is a a great you know allegory for the control that the so called controllers the oh the obedient order followers who think they're in control but are just basically a junkies and hopped up on stuff that is probably the most dangerous substance in the world called adrenaline that if you're on it constantly will basically burn your brain not to mention burn your health out these people die of heart attacks all the time it's the number one leading cause of death and people in the control industry whether it be police or military heart attacks is what most of them die from because you know one they don't have true care and that affects the heart at a spiritual level and to you know this flight flight response constantly going off in them you know destroys the heart you know and it certainly destroyed their brain a long time ago I'll tell you that much you know and like I said you know you get offended by my you know flat-out harsh statements when it comes to things like that get his offend that as you want folks it's not going to stop it's probably that rhetoric is probably going to be amped up if anything else after I cover this this topic in the coming weeks much more is to come on order followers in general I'm probably going to even prepare an entire presentation on the the evil that is order following so just a couple more briefly this is the last slide that I'm going to talk about tonight but I do have two other films I just want to briefly mention so we're on slide 167 which deals with Battlefield Earth and I'll leave that for last I want to talk about Jack the giant slayer just briefly it's a film about giants and again a bridge connection from the earth the heavens to the earth in the neigh in the form of the Beanstalk this is a retelling of the Jack and the Beanstalk mythology and you know he deals with giants and having to reclaim sovereignty from them very very interesting film that I definitely recommend for people dealing with this topic also the movie Noah that just came out with Russell Crowe and Jennifer Connelly absolutely is about the factions of so called angels the endo faction and the Enki faction being the angels that were serving the Creator helping Noah and his kin versus the angels that were serving to Baal Cain and his kin which were the fallen angels of the fallen ones Nephilim etc a brilliant allegory as well plus a lot of the themes about second chances can people change you know is there good left in humanity are powerfully brought out in the film I absolutely recommend the new Noah film you have to set aside any kind of literal interpretations or traditionalist interpretations of the flood mythos in general and a look at it from the perspective of ancient aliens and interference theory if you're going to get a lot out of it allegorically however the film that is the story of the ancient interaction with the beings that came here and created humanity and put us to work as a slave species is Battlefield Earth written by l ron Hubbard of Scientology fame but whatever else you think about Hubbard regarding the religion that he put forward in the name of Scientology in the form of Scientology which was originally Dianetics and then I feel co-opted completely because of the information it was talking about dealing with the reactive mind and then you know it got morphed into a religion to basically get people away from looking at some of the positive aspects of Dianetics then they came in with Scientology and turned it into a ridiculous religion aside of what you think about Hubbard personally he had knowledge dealing with the ancient past certainly and he is telling this in a future version where it happens in the future but really what he's talking about is the is the ancient past of Earth and this is the film that I think most accurate accurate accurately portrays what really occurred here or something similar to what really occurred and probably accurate accurately portrays some of these beings and how they may have looked with their conical shaped head in large stature certainly like you know 9 to 12 feet tall beings easily lifting men throwing them around very advanced technology putting men to work to mind gold this film was utterly crushed in film reviews and in the theaters flopped horribly is it a b-movie yes it is is it cheesy in some parts yes it is is the acting ham e'en in many parts or most parts John Travolta's in the film folks ok you know so you're not we're not looking at this film for Academy Award acting potential we're looking at what is the allegorical content of the storyline and if you watch it for that this film will blow you away it's as good as they live or if not better in many respects and I love the solution folks the solution is knowledge it's presented in the film that unless we get knowledge of the enemy of who we're really dealing with of their tactics of their mentality we're not gonna make progress toward freedom an ignorant society is an enslaved Society ladies and gentlemen your calls in the third and final hour coming up stay with us the cool side that we don't dare speak it's a while between us dear ladies and gentlemen welcome back you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening calm I'm going to be taking your calls in this hour the toll-free number to join us 800 three one three nine four four three once again toll-free number to join us here on what on earth is happening for the third hour 800 three one three ninety four forty three phone lines are lit up so I'm gonna get right to it there are no taboo topics you could talk about anything you want ask anything you want comment about anything you want or if you want to bring up any allegories that portray the intervention theory of human orange origins that I may have missed or comment about the ones I already discussed you're free to do that as well so let's see what people have to say this evening let's go to the phones and hear from Brandon in Boston Brandon you're live on what on earth is happening welcome hey Mark thanks for taking my call it's not you had just really great movies you mentioned there just wanted me mention a few more sure go right ahead alright I would say people look into the works of Stanley Kubrick oh absolutely I mean that's required viewing as far as I'm concerned yeah you know I mean all his movies dr. Strangelove 2001 and 2010 yeah brilliant films yeah and he you know the apple core opens Clockwork Orange yep oh let's not forget Eyes Wide Shut I mean you want you want a fictional tale about what's really going on in the world as far as the influence of the dark occult that's it and a lot of people think that Kubrick may have been the you know deliberately murd for the making of that film and you know how he portrayed the elite in that especially the footage that ended up on the cutting room floor even after he was told that he had final edit of the film the movie studio you know basically went back on on that agreement and took out footage which many people feel may have portrayed pedophilia within these groups oh yes and the connection between ron Hubbard and Scientology and the OT oh sure or the yeah anyway because you have the marine loses Nicole Kidman another thing and everybody I mean just look at the algorithm and a lot of synchronous ISM in there as well yeah oh yeah and then just the names and that was one of my questions as you said the law thinking a half-shell few weeks ago he said you could break down I've been thinking about doing a special presentation on that like I kicked around like the the comical somewhat comical title of there is only one God and His name is Bill I mean if you see how the name bill or the phonetic variation of simply the characters B and L have been used by the dark occult over the centuries it's absolutely astounding and amazing because that's that was the name of their God in the ancient world the ancient Phoenicians Aenon dark Sun God was Bill or Bell and many people know him by you know the variant Bale ba al you know so there's tons of examples of this in in culture I mean you just look at what's the the the God the symbolic God that these beings basically put right in in front of their their altar of money on Wall Street is the bull you know and you you have this whole BL phonetic variant you know regardless of what vowel sound is in the middle of it repeated I could literally go on and on and on and on and I'm probably going to put together this presentation like I said I'm gonna call it there's only one God and His name is Bill and it'll be a little comical title but just to you know piqued people's interest and say hey what's this guy on about talking about Bill as being the name of God and I'll break some of this wordplay and symbolism down in a presentation it's something I've been you know basically kicking around the idea of doing maybe uh I really wanted want to put some presentations here together in Philadelphia and bring some people here you know like small gatherings you know not a whole conference maybe me and another speaker something like that and just do it locally here at a venue in Philadelphia and I'll just throw this out here on the air while we're on the topic if anybody has any venue space in the area or in or around Philadelphia I very much appreciate that they contact me if they'd be willing to you know work out an arrangement for you know a reasonable cost to rent a place to do a present an all-day presentation like you know from like maybe 9 to 5 or 9 9 to 8 o'clock at night something like that like what we did in Connecticut you know I'm looking for an active venue in Philly because there's just not many places that are willing to host something like this so I just wanted to throw that out there but that concept of the dark occult is God being named bill bail bail the bull etc is something I'm definitely gonna work up a future presentation on something local though that you could have William of course Bill's right on the the big phallic symbol that presides over this city absolutely and he's pointing and also with very Bell right sure I see that as a more positive aspect of it because there was the positive aspect of bell the Sun you know you have to understand what you're dealing with silver symbolism as I broke down in my demystifying the occult presentation the sun's always been a symbol of knowledge light spiritual enlightenment etc and truth and you know the essence of the divine at work in the world and within us but there is a dark side to the Sun that's when knowledge is perverted and used to control people when you keep certain people in ignorance and then one group hoards all the knowledge and uses that as a weapon to control those who are still in ignorance of that knowledge which is what dark occultism is all about so the the the Bell God or bill God had this dualistic aspect just like in Egyptian culture you have the the three different aspects of the Sun God and many other aspects as well but three main aspects the Rising Sun Horus almond raw which is at its zenith of light the high point of light at noon and then the setting god the dark sun set so you know it's this whole concept of darkness and light but they both are about knowledge and how it is used so I want to office also emphasize that when I eventually get around to making this presentation on the the Sun God named Bill and I'll break down the Wizard of Oz I would highly recommend the movie dark meat which also critically ignored the very old German film metropolis oh yes Oh cult symbolism rich throughout that film you know Jerry dystopic very ahead of its time for sure yep and you can it's right on Netflix and another in the holy mountain by Alejandro Georgia absolutely one of the probably one of the best pieces of it generally about the spiritual journey in in general and I highly recommend that one as well yeah and it it's just my question sure he also did a thing I almost mean doing by the way he almost made his own version of it on it oh I just want to mention real quick since you brought up dune I really recommend dune 2000 which I think was a an extended like TV movie on dune and that's actually tells the story even better than the original Hollywood film and I think the the characterization is better in the the plotline just it's just a much better put together film from a storytelling perspective and a good look at the a jack India's first movie ever made absolutely and be on Brennan thanks so much for the suggestions my friend we have to jump to break ladies and gentlemen stay with us more of your calls coming up [Music] [Music] welcome back everyone you're listening to what on earth is happening we're taking your calls in this final hour of the broadcast for this evening call a number to join us 831 394 43 I want to thank Brandon for his call in the last segment and I'm going to move on to Chris in Canada Chris you are live on what on earth is happening welcome hey Mark the first thing I want to ask is uh are you familiar with a Myron C Fagin I am NOT okay well he'd eat this I wasn't either he spelled the name for me Myron my Oh n okay he Fagin F a G a n okay and what what his work deal with well what what he had to do was his uh the Illuminati and the CFR and he recorded on vinyl discs if you're familiar with that sure the Illuminati in the CFR exist in 1967 and he recorded it on vinyl discs so that people would be able to to hear it I know up there you know with most most of listening audiences they're not they're not familiar with vinyl discs sure I mean it's you know an older form of media but by today's standards certainly yeah but it was around in my time starting to fade as I was getting into music but still they're still there today I mean you know a lot a lot of people prefer it because of its audio fidelity but what did he really get into when he are you know for me that you and this is this is what I really found fascinating in 1967 he was trying to tell us about that takeover of our governments and in the whole world and and a new world government and this is a 1967 what I find what i find really um - well I just find it amazing that this man can do the research that we couldn't do back then I couldn't do it there there were people still doing it according to the old methods you know call its call it was called going into research libraries and you know actually doing your homework in books you know we have it easy now we could we could download whole books you know we could download whole libraries practically you know video supplementation documentaries audio presentations I mean you know the information is all widely available it's just people largely don't want it so looks like this guy was well ahead of this time and I will absolutely have to check out his material I will listen to it okay well it's Myron C Fagan excellent and yeah totally amazing I mean it'll blow your mind fantastic in wood everything that's happening now back in 1967 sure now you know people people were in that they knew about the plan you know they knew that this was actively at work in the world I mean you know look at researchers like Gary Allen how long ago he told people about the things that were coming and has been absolutely accurate on so there's many people like this who were visionaries of their day not listened to and yet they're being proven right by what's the the actual events playing out in our world in current time so Chris I want to thank you for your suggestion I'm definitely gonna follow up on that so thank you so much for the call let's move on and hear from Kevin in Philadelphia Kevin you're live on what on earth is happening welcome to the show Hey hi again mark it's Kevin good to consume you as always I want to mention you brought up Doon earlier and it was brought up again so I want to talk that first but I have one other thing that I thought was a synchronous with what you're saying earlier as well the god-emperor Doon book would like the fourth book in this series and that was never really made a movie into like you had mentioned they did like three films just recently it was like the first three books all it together by sci-fi and it was gritty but they never did the fourth book and the fourth book as far as I'm concerned was actually the most important of all other stories because it was like how they defeated the god emperor of doing that dig and and like not like this is kind of a spoiler alert for people who don't who want to read a book but like oh no worries I've been spoiling movies all night so you know just to get ahead and talk about it as long as you know you're you're gonna bring up a good point regarding the allegorical content go right ahead that's perfect actually that very simply put the God Emperor literally beat down humanity until humanity finally understood the only way to take him out was to become responsible for itself imagine that Kevin yeah what a novelty lights out there huh Joe is like this state like the ultimate embodiment of the state and it just the only way Humanity was ever able to finally defeat him well he always had this one moment that was like in his future that like he never like he always kept in his death from himself like even though he had the ability to see into the future he kept that moment from himself and essentially it all came to like a head where like humanity Rosa and then in in combination with rising up against those ultimate powers they also rub for themselves in such a way that they took responsibility for each other and and kind of created their own new their own new paradigm really together as like examining one human family kind of right yeah you know not everyone did some people like ran away and that became like the second or the the fifth and sixth novels that Frank Herbert out because that was them those people then coming back but that this mean arching story itself was all about how humanity literally had to become responsible enough for itself to finally stand up for itself to take on the god-emperor absently do it I mean that's the key you know total freedom with total freedom comes total responsibility and you know it's amazing how like you know something like the Dune franchise they never really tried to pursue a lot of these topics and in movies and just like that first movie fail you know basically flopped in Hollywood and no one ever came back and tried to uh you know to retell these stories in a way that would get people really interested in them it's it's pretty much a shame I think yeah yeah the other thing I want to throw at you with some you dest things that me may have missed and I always thought it was really important that whole I I found it really amusing that there's this guy named de la Lu who fought against on you yes or they ever like left Atlanta and like ship according to these lapping ship legend exactly actively in the end key in the books of M key and in in one of them specifically it was like a wrestling match that they had together that they fought together on one the other planet to start out with and that's actually what when he when everybody wants to congratulate you for winning a lalu left like when took I went to earth and that's when he discovered that earth had the resources that they needed exactly yeah very interesting these little details and gems are in a lot of these recounting of these ancient stories I definitely recommend people check it out we're going to get into that in future weeks on the show - ladies and gentlemen stay with us we'll be right back [Music] welcome back everyone you're listening to what on earth is happening here on Republic broadcasting i'm your host mark passio my website what on earth is happening calm we're taking your calls in this third hour of the broadcast tonight toll-free number to join us 831 394 43 I want to say thanks to Kevin who called it in the last segment and we're going to move on to hear from Michael in Pennsylvania Michael you're live on what on earth is happening welcome hi mark thanks for taking the call sure um my question regards our they will I'm sure you've noticed the scene where on Roddy Piper whose character is not uh and his coworker walking in through the building a building which is like the meaning place and on the wall on the brick wall 93 yes exactly I love it I love the little nods that you get in the film like that it's a it's kind of like what LED lens to the charm of the film as far as I'm concerned yeah do you think that has anything to do on the T part 93 current which I believe is a polemic Aleister Crowley on you know philosophy and I know you've talked about - Creon on the dollar bill and in 911 which blew my mind you know it absolutely is a reference to Thelema and what a Crowley referred to as the Aeon of Horus which is when humanity would begin to emerge from the mind-control slumber that it's under a lot of people erroneously believe that Crowley's a on of Horus was about the the dark new world order coming in and taking over that is that was what Crowley referred to as the Aeon set and the Aeon of Horus would be when knowledge and enlightenment would be being born in humanity and they would start breaking their chains and getting out of mental bondage that's what the Aeon of Horus referred to Salima Klee in the in the philosophy of Thelema so clearly you know the movie they live is about slavery versus freedom you know and how the mind is either controlled or it's either free and carpenter clearly was somewhat studied in fillet McFaul Asaf II and through the number 93 in there deliberately I'd be highly highly shocked if that weren't a deliberate reference to Philemon general if it were just an example of synchronous tiss ism I'd be pretty amazed by that personally yeah what what do you think of I mean what do you think of the teachings of bounine or also the order of the Golden Dawn arm as a practice you know in other words ritual magic of the library right right has not only a tool of personal transformation but also kind of the defense I don't personally discount it but I also don't personally really practice it it's not just an aspect that I've gotten into because I just feel like the mental and spiritual aspects of awakening are just so much more important to free the mind of illusion and delusion and you know not and just stop accepting things that aren't true or real is so much more important than trying to perform conjurations or calling down certain energies etc that I mean there are people who would disagree with that and think that there's a lot of importance to it but this is kind of where I delineate what I would call mysticism from true occultic teachings from true ocultism which is hidden knowledge regarding the human psyche and the laws of nature and how those things work in tandem with each other to create the reality that we experience I see mysticism as simply sets of practices that have a ascribed spiritual intention or intent or frame of reference or you know goal and kind of leaves knowledge a little bit more at the door when it comes to natural law or just knowledge of self you know deep introspection of the human psyche and the understanding of the different aspects and motivations within all of us so that's kind of my line that were I delineate between mysticism and ocultism and I explained this in my demystifying the occult seminar which I just wanted to let people know it will be available shortly again when Richard is finished editing it he'll be publishing it you know no rush on it I know he's gonna do a brilliant job and again we always thank him for the work that he does especially with the you know his tragedy and hope calm website of course linked on what on earth is happening and you know the the great podcasts and videos that he's done and put out just some of the best work out there as far as I'm concerned and he's going to be editing that footage and putting it out shortly so you know look for that it'll be up on my youtube channel it'll be up on my website I'll mention it of course on the show but this is the kind of stuff I got into a little bit in the presentation it's you know kind of talked about it in a rudimentary way but I still did cover this type of stuff that you're talking about here on in this question so I think you'd find that part of the seminar pretty interesting and if you want to know a little bit more about my take on Thelema in general my main recommendation to you where I could you know cover it on a future what on earth is happening show I would you know like people to go and check out in my news section when I did the show with Bob from Cincinnati on a cult Empire we covered Crowley's life in general his writings the thalamic the basic principles of the thalamic philosophy I didn't get super in-depth but it covers the general points and think I did a pretty good job in that in that interview so I recommend that one to people when it comes to this topic okay um and I have one movie on shortage of ability oh I think I ought to do community intervention theory and that is a fountain directed by Darren oh what a great film I mean I can't specifically say that it deals with an intervention theory but that is a brilliant spiritual allegory that does deal with you know true awakening and you know getting to the place of recognizing sovereignty you know just a really powerful psychedelic film I mean that is a mind trip for sure that film you know now that one definitely is about intervention theory without any question you know that talks about the Fallen Angels you know these these were the Nephilim these were the beings that were you know the the progeny of the Anunnaki and you know in this film they're depicted as rock beings because they were originally beings of light and spirit who then had been encrusted by the earth before coming here and interfering with humanity's natural progress progression of evolution according to the real creator of the universe and you know the beings that are sent by the Creator the Creator quote-unquote is Enki that's the Anki faction in this film and then the beings that support the rock beings or fallen angels who support the to Baal Cain character are that's endless faction so you know if you look at it with fresh eyes knowing the story of the ancient human past as we've laid it out here you really can can see this film as really being a battle for Humanity and it's it's between the N key faction and the n low faction of quote-unquote angels or Anunnaki beings or Nephilim beings so it was I think really well put together the allegory is pretty veiled because of the way they depicted these and not showing them as you know they anything like what they really looked like it's very symbolic but it upset a lot of people who you know follow with the Bible and illiterate from a literal perspective because they don't understand all these different aspects that were being brought up in this film because they don't know the real you know story of interference theory of our origins unfortunately yeah um so the parting of falcon of as far as like then defeating death that'd be something that has its you know because we're maybe our DNA was programmed full of short lives deliberately i mean it could be something regarding that i think it's a little bit more symbolic to mean that you're you're conquering the things that really hold you down and the whole you know death card and the tarot isn't so much about physical death as it is the force that counteracts evolutionary progression or in other words the entropic force is the death force and i think that's what they're talking about we can counteract that force of entropy at work if we align ourselves with the sin tropic force which is the will of creation so Michael I want to thank you for off those points that you raised really great stuff and we'll continue with your calls in the last segment folks stay with us [Music] you know today disguise and night-night divide today welcome back everyone you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening calm last segment for tonight's show we're taking your calls let's move on and go to another caller and hear from Steve in Pennsylvania Steve you're live on what on earth is happening welcome to this show thanks for having me mark um I just want to first of all compliment you on your work I actually went to your one of your national law seminars about a year ago well sorry I appreciate that thank you and I just want to let you know people are out here you know doing something with the resource that you have because your website essentially is a database and it's helped me with my progression as far as you know vehicle and different things and I'm actually working on a book right now called with the side so I'm just using you know some of the stuff that you helped me get a better understanding on and presenting that as a resource and see that's what it's all about right there folks I mean just listen to that you know it's somebody doing something with what they've come to understand and they're putting it back out there for other people to learn from that's taking action in the world that's affecting people at a mental and spiritual level that's what the great works all about so I commend you for that Steven that's that's getting on the battlefield you know exactly and it's something I want to present to you as a possible theory on the human interference and I've been doing some study on the Hebrew language and just making what I call like a cross reference so when you look at blood and Hebrew the letters that are used to spell blood or D and M and I don't know if you know but Hebrew actually has pictograms know the potential pictogram for D would be a tank door or a pathway and then with M it would be water or chaos though a potential I guess you could say esoteric definition for blood is pathway to chaos and I'm just curious as to you know your feedback on that because you know whatever these gains were or the whole human interference theory I think what it has something had to do with that intermarriage of blood in the human body because if you look at like to be and just different things that happen as an effect of having blood or losing blood I think that has something to do with on a generative human body it's also why certain blood types are completely incompatible even when it comes to pregnancy in human females in many cases but I think instead of interpreting it in a negative way like that you could also look at that as meaning watered or right which is that what a Stargate is that if we go through the process of transforming our mind and coming out of the types of of epigenetic conditioning that were under who knows how we could transform our actual physical selves genetically you know the DNA is just a an antenna receiver type thing that has to do with the type of consciousness that we're in when we're at a point where we can direct our evolutionary development epigenetically and this is something I'm going to talk about over the next couple of weeks as we move toward the end of the basic extended presentation I'm again going to look at some ancient texts and you know put some information forward from these texts deliberately displaying a lot of the interaction between ancient humanity early humanity in these beings and you know put some evidence forward from these actual you know source accounts in coming weeks as well but I think what I'm going to do before I even start to get into that is talk about epigenetics and how regardless of what was done to us genetically by these beings it isn't a hopeless situation because consciousness ultimately can change things even at a physical level I'm not saying we just you know magically wish ourselves into being a different type of creature but I'm saying that when our consciousness moves forward eventually the physiology follows suit and who knows what will be capable of or what latent capabilities that have been disconnected from us will be taken out of their dormancy and reactivated at that point and to understand this you really have to understand the relatively new science of epigenetics and how it works yeah I totally agree with that and it's it's funny that you say that because the final chapter can I try to keep the book you know not too long because I know you know a lot of people aren't going to read and do the research so I don't want to you know deter them because the book is too long but the final chapter of the book is entitled destiny unbound and it's just kind of like him humanity wants to take the chains off and we want to recognize what goes on like you've been saying for a long time now you know the possibilities are endless it's just collectively everybody has to do their part nothing right whether whether people want to believe it or not what they believe and what they do actually does affect other people because the whole earth is a community that's right and we are all interconnected yes right when people don't step up and do their part they're either affecting what's going on in a positive or negative way depending on would be you know what they do with their life because ultimately the actions is read counts everybody is or isn't going matters Steve you have a very firm handle on the situation dinah the whole dynamic that's going on I'd be very interested in checking out you know the information you put out and I like I said I commend you for getting on the battlefield and and sharing what you've come to understand because it definitely sounds like you you know what you're talking about when it comes to how the dynamic of interconnectivity works within a species it's something I've been trying to impress upon people and you've definitely expressed it pretty eloquently there so I want to thank you offer the call and the insights that you've all put forward thank you and my final word would be up it's not exactly a movie as far as like the human in the Spanish theory but I think I movie everybody you know should watch that was way ahead of his time the network oh sure network yeah I mean it's about using the dynamic of righteous indignation to start speaking the truth out into the world and trying to create change in other people without any question network is a brilliant allegory about the takeover of media and the mindset of the people and how to get out of that mind control so I would definitely recommend network to anybody who's listening Steve thank you so much for the call really great points that you brought up there let's end the show with Ivan from Phoenix tradition right Ivan yeah and I just got off work so we got rid of all that background noise we got a little bit more time than last week's and what do you have for us tonight okay well trying to stay on topic I just got home look quick and quickly picked through a whole bunch of my DVDs and blu-rays here to pick titles that might correlate with what what's talking about tonight so they might not all deal with the origins or interference theory but they all deal with some beings having something to do with humanity's in the past and the president or maybe even in the future sure so War of the Worlds the remake wasn't even cooperate and Tom Cruise even though the beings appeared to come the devices were already here so that shows you know a timepiece there the alien versus Predator films those films showed how the Predators were using the aliens and humans way back before for their little ritualistic stuff instead a little I haven't seen those ought to check those out yep then we have James Cameron's other film the abyss where they were being deep in the ocean yes watching what humans were doing Villiers right and this one's kind of hokey but I've always liked the 1980 film Flash Gordon did you have that thing the merciless way on another part of the galaxy on this planet just for you know the personnel amusement you know so we could be a little bit of an allegory like on ooh on Nibiru if you accept the Sumerian text version you know controlling things from you know another aspect of the galaxy mm-hmm right and then actual physical you know manipulation we had that Steven Spielberg miniseries called take it I love to take it taken is a miniseries that people absolutely have to see about the kinds of cover-up that go on within the entire spectrum when it comes to nonhuman interference with our species I highly recommend it yep and before we're done there was a film called knowing KN owi Nicolas Cage great movie Ivan unfortunately that's all the time we have for this edition of what on earth is happening remember ladies and gentlemen there's only two paths you could ever make on the path to truth not starting and not going all the way thanks for listening - what on earth is happening this week we'll see you right here next week folks you have a great night [Music] [Music] [Music]

What On Earth Is Happening Show #174

Topics: *Free Your Mind 3 Conference, "Planting Seeds" for the Unaware, Police Violence and Brutality, Understanding Natural Law as a "Psychedelic Experience," Bitcoin as an uncontrolled alternative currency, Synchronicity, Meditation, Regional Free Your Mind Groups, Conscious Music, Gold's Non-Intrinsic "Value," Brain Balance leading to Right Action*

freedom man that's what it's all about you've got to groove on freedom like the good book says welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio welcome one and all you're listening to what on earth is happening right here on republic broadcasting i'm your host mark pascio my website what on earth is happening.com the network's website republicbroadcasting.org today is saturday november 8th 2014. the show is live every saturday evening from 10 p.m to midnight eastern time 9 p.m to 11 p.m central time and yes you heard me right folks from now until further notice this show is going to be a two-hour broadcast i uh regret to inform people of that uh the scheduling on the network end has changed a little bit and i'm going to be on for two hours every saturday evening instead of three until further notice i've been told that uh that may go back to being a three-hour time slot at some point in the future uh the network's uh juggling some things around and that's fine uh you know i'm sure it will work out fine and if it goes back to three hours uh so be it but for now until um you know things change and uh we have a a different situation uh this show will be a two-hour broadcast every saturday evening from 10 p.m to midnight eastern time that's really the first announcement that i wanted to make i do have a great show lined up for here for you here tonight in the first part of the show i'm going to be talking to a former rbn host and one of the two main organizers of uh next year's freer mind three conference i'm referring of course to bob tusk and bob is one of the new for your mind three organizers with of course john g vibes and i'm going to be bringing bob on the first part of the show to discuss the for your mind three conference uh make the announcement official and i want to give the call-in number right before we even really start in tonight because i'd really like to have some people call in and talk to bob and ask bob questions about the conference and we want to get your take on maybe what you want to see happen at the for your mind three conference potential speakers that you might like to see there because new speakers are going to be added the call-in number to join us here on the air with my guest bob tusken coming up in a few moments is 800-313-9443 once again the call-in number to join me and my guest bob tuskin regarding the free your mind conference in the first part of the show tonight is eight hundred three one three ninety four forty three call in right now and i'll get in the caller cue to talk to uh me and bob tusken about the freer mind three conference so um in the later part of the show i'm going to continue with the cosmic abandonment extended presentation cosmic abandonment is a presentation that explores the connection between the interference theory of human origins and the current human condition uh in the later part of the show when i get back into the cosmic abandonment presentation i'm going to be covering what i call the unwritten story of our future which is part three the third and final part of the cosmic abandonment extended presentation that's coming up later on what on earth is happening on tonight's broadcast the big event announcement of course before i bring my guest on to the air the free your mind 3 conference coming up in langhorne pennsylvania just outside of philadelphia april 10th 11th and 12th 2015 the dates are official they've been announced the event is taking place at the sheraton bucks county hotel the sheraton bucks county is a beautiful hotel with a great ballroom style theater room that uh is the where the conference is going to be taking place there's going to be a meet and greet with the speakers on the first evening uh april 10th friday night uh this is going to be at 400 north oxford valley road in langhorne pennsylvania langhorne is spelled l-a-n-g-h-o-r-n-e langhorne pa just outside of the city limits of philadelphia a little bit to the north of the city and it's going to be a great venue for this event coming up next year the speakers that are already confirmed for the event are as follows bob tuskin clint richardson curtis the illuminated one davis derek bros ed fortune freighter x ed fortune of course is the new known as the new jersey weed man for those uh people who are familiar with him freighter x freeman returning to the for your mind three conference as is fritz springmeyer also jay parker john vibes one of the main organizers for next year's conference josie the outlaw wales larkin rose and somebody you may or may not have heard of somebody named mark pascio will also be speaking at the for your mind 3 conference april 10th 11th and 12th 2015 at the sheraton bucks county hotel 400 north oxford valley road in langhorne pennsylvania get your tickets in advance an all weekend pass only hundred and thirty dollars the cheapest ticket that you will possibly find for a three-day conference of this scope and magnitude with the kind of high caliber speakers whistleblowers researchers that will be presenting um april 10th 11th and 12th 2015 an all weekend pass for the conference only 130 the best way to support this event ladies and gentlemen is to get your tickets in advance this is the best way if you want to help spread the word about human freedom if you want to help these whistleblowers be able to tell their stories get out there reach other people's minds bring everybody together so they can network come together meet each meet each other meet new people okay the best way to support this effort because this is a a a task that takes a lot of resources okay you have to get the venue lined up which is thousands of dollars you have to pay for all of the speakers travel and lodging expenses which is goes into the tens of thousands okay i mean when it's all said and done a conference of this magnitude costs probably close to thirty thousand dollars if not more to really do right to do it well okay so you know the best way to support this effort is get onto the website and get your tickets in advance buy an all weekend pass to support the effort people you know we're really asking people even if you cannot attend support by buying a ticket get a ticket in advance make your travel arrangements now if you know that you want to go get the ticket first then you can make you know travel and lodging arrangements soon after you get the tickets but commit by buying a ticket and that really helps to promote and to really host the event because again a lot of money is involved in putting on an event like this so that's the best way anybody can really support the effort you can get your tickets now they are already on sale at freeyourmindconference.com okay www.freeyourmindconference.com is the conference's website and in the next segment of the show i'm going to be bringing on my special guest bob tuskin one of the main organizers of the for your mind three conference in april of 2015 and we're going to we want to hear from you we want to know what you want to see at the for your mind three conference we want to know who you might want as a guest as a speaker at the conference and we just want to get your general input and bob's going to be making some announcements as well so that's coming up in the next segment the toll-free number to join us get in the call queue 800-313-9443 we'll be right back with bob tusken welcome back everyone you're listening to what on earth is happening right here on republic broadcasting i'm your host mark pacio my website what on earth is happening dot com all right i'm gonna go to our special guest one of the main organizers of next year's upcoming free your mind 3 conference in april of 2015. ladies and gentlemen welcome to what on earth is happening my special guest bob tusk and bob welcome to the show getting ready for a revolution here mark i've been ready my friend i know i know let's get it on that's what i got to say at any moment at any given time we will experience a massive collapse whether that's because of a financial reason or a solar flare or something else it doesn't matter we're going to experience it and i'm sure of this and every opportunity we get to get together in person and learn from whistleblowers and researchers and thinkers and learn from each other and hang out with each other and share with each other it's an opportunity that we must cherish and we must not take for granted and that's why these conferences are so incredibly important and so powerful and the freer mind conference is definitely going to continue the legacy of the last two with the upcoming conference this april 10th 11th and 12th absolutely there's there's something about being there yeah you know nothing compares with being there live i mean it is one thing seeing it you know recorded in hd on you know a youtube channel or something like that but it you know it really can't be understated to say how palpable and tangible the energy in the air with that many conscious people in one venue together is when you gather those kind of minds um it's an absolutely amazing experience that will really stay with you for for the rest of your life i guarantee it you know we're gonna put these talks on youtube like we have in the past and and they're going to be out there and i hesitate in saying that because i don't want to deter ticket sales because as you just mentioned we don't have any money up front for this event this event is manifested strictly from those out there who want to support it and if nobody supports it in the beginning then it's not going to happen i'm sorry you know we'll have to refund tickets well you know i don't know what would happen but that's not an option in my mind it's going to take place like it did the last three times this isn't the law of attraction bs this isn't no new hbs this is a matter of manifesting this because people are hungry for the truth they're hungry for that camaraderie and they want to get together and and that's what the freer mind conference is it's for that purpose entirely do you know what an experiment i would really like to see happen as part of this conference i'll lay this out on the table you know my kind of in intention for for next year's event i would like the people who really want to attend this conference and who have the ability to attend it and are gonna go okay i would like to see them reach out to another individual who is not as consciously aware as they are and bring them to the event you know say hey mom dad sister brother son whoever okay come with me to this event make it a a family or friend thing and say i would like you to be here with me spend some time with me even if you go for a date if you go for two days or if you go for the whole three day weekend you know come out and bring someone who needs to hear this information i i think that the person's world view would totally change in that short a period of time by seeing how many conscious people are all coming together and supporting the same basic information talking about you know how we have to completely change our paradigm how we need to change our world view how we need to change our our mindset and the way we see things and we're going to talk about the deep dark problems that are going on in the world and a lot of people are going to be presenting solutions at this event and it's not even just about the speakers it's about coming out there and networking with a lot of other conscious individuals that's what happens at these events friendships are formed there and you know it's just again i just can't understate when you go and you attend something like this lie live it stays with you for the duration of your lifetime because you are actually changed by the energy of an event like this being around this many people in one place who are really kind of largely all on the same page and are largely very very conscious individuals and you could really help you know your fellow family member or friend who might not know as much as you do by reaching out and saying i want to bring you to this event i want you to be a part of it i want you to experience it with me i don't think you could do anything better for a human being that you're trying to help wake up i wonder how that would play out though mark my idea is that okay you might have a couple of different things come from that so you bring your mom your friend your sister whoever that is completely in the dark so to speak but maybe they have an open mind enough to come with you and spend the time to go there right but this flood this absolute massive tidal wave of consciousness and light just encompasses them on a three-day period all at once you know they live their whole lives in a box in this you know blanket of deception and all of a sudden that blanket all at once is removed do you have this phenomena where you wake you know you wet you've woken up a sleeping dog and it bites you i mean what happens do they go jump off of a bridge afterwards i mean it would it's it would be incredible to see what kind of a reaction people have that i think they can do a couple of things they can continue to go down that journey of learning and go down that journey of enlightenment for lack of a better term or they can put their heads back in the sand like an ostrich right and i could tell you a a small quick anecdote about you know a gentleman i won't mention his name uh who attended the second for your mind conference uh who was invited uh you know by um by barb and kind of um you know wasn't very conscious about these type of topics but after attending the event he did react with a little bit of fear and hesitation and trepidation you might say because there was some heavy subject matter going on there especially with you know people like cathy o'brien and jay parker and fritz springmeier etc and um you know although the initial reaction was wow this is really heavy heavy dark even frightening material in many cases um afterward you know the the actual energy the ripple effect you might say didn't hit him until much later like months later down the line he would talk to barb and say you know i'm seeing the things that you guys were talking about at that event and i'm becoming aware that this is what is really going on and that i really need to pay attention and i'm waking up to all of this you know and it it wasn't until those seeds were planted in fertile ground and then later on you know it it it it kind of it bore fruit later down the line and that's how it will happen for many people like that who may not uh you know previously have been exposed to a lot of material like is going to be discussed but you will be planting seeds often in fertile soil and that will bear fruit later on down the line at least that's how it played out for some of the people i know who came with an open mind uh to the other conferences and later on you know they they kind of had an awakening absolutely amazing i can't wait to hear from the listeners 800 313-9443 so excited about this conference and thank you as always for having found it and continued uh to be a part of this conference it couldn't be the free or mind conference without mark pascio folks i appreciate that bob and you know when i was uh starting this idea back in i guess it was 2009 or so um i did it on the inspiration of a woman named betsy metz who in this area just outside of philadelphia in the main line area um hosted a conference about 9 11 truth and when i attended that conference i said you know i could do something like this i had no resources at my disposal no money on which to do it just an idea i said i want to do a conference about consciousness mind control and the occult the topics i care about and talk about you know and we made it happen yes ladies and gentlemen the freer mind three conference is gonna wake up a lot of individuals from their sleep that's what it's designed to do it's a conference on consciousness mind control and the occult coming up april 10th 11th and 12th 2015. my special guest bob tuskin one of the main organizers of next year's for your mind 3 conference and we're going to go to your calls in this segment just want to finish telling people you know i started this conference uh being inspired by another conference organizer betsy metz in this area who hosted a conference about 911 truth upon attending that and seeing what a great job she did organizing that event i said i think i could do this you know i want to do this i want to put together a conference and i want to do it on the topics that i think people really need to know about um you know even more so than anything else and that's you know mind control the the all the different aspects of the occult you know and uh human consciousness in general and where it is now and where it needs to go and um you know so that inspired me to start you know getting organizers together and uh putting a group together in the philadelphia area and you know the rest is history we hosted two conferences right in the city of philadelphia in 2011 and 2013 for your mind one and two uh all videos are up on the uh the website and the uh youtube channel of course people can check out what the past material was like it's only going to get better and better and you know i stepped down from the organizational role because it was very taxing and what i really want to do is present i'm a researcher i'm a whistleblower i'm a presenter and that's what i do best i speak to people you know i want to get up there and give the best presentation i know how to make and to deliver and you know um not that i didn't don't think i did a bad job uh i think i did a pretty decent job organizing the other two events um but uh i think you know that kind of workload of organizing and presenting was a little bit tough and so you know i i'm was looking for other dedicated organizers and bob and john stepped uh up to the task they stepped up to the plate and said we would like to take this over and continue it in the tradition that you began and uh you know the you know they're going to take the reins from here on out in the organizational capacity and i'm going to do what i feel i do best which is present so uh that's you know how bob and john came on board and so far i think they're doing a really great job the new website is up the new venue is secured the dates are announced the tickets are on sale and uh looks like they have a really great lineup of speakers already with more to be announced yeah we're really working hard mark to bring on some new speakers we want to get your input on that because you know we really want to continue to widen our horizons with speakers at the conference some of the old speakers that have been at the conference in the past will be there again and a few more will be announced shortly we're still working on some of the loose ends with a few speakers before we make those announcements official and these are going to be speakers that the listeners know i don't want to make any hints but these are going to be several you know well-known individuals who have been presenting in this field for some time now and are going to be presenting again at the third freer mind conference in april but i'd love to hear from the listeners i know it's been a while since i've been on the air i've taken a bit of a hiatus with my own show working feverishly behind the scenes on the conference and to figure out what my next incarnation is going to be of of the bob tuscan show and and my research and without further ado i'll let you start grabbing some of these calls i see the lines are lit up absolutely the phone lines are full so let's start going to some callers let's hear from andrew in arizona andrew you're live on what on earth is happening with our special guest for your mind 3 organizer bob tusk and welcome to the show hello mark hello bob how you guys doing hey man uh mark great work on uh the streetwise spirituality thank you um it was excellent uh really reminds me you kind of remind me of a young jordan maxwell a little bit i appreciate that that's a high compliment yeah and thank you uh bob tusken for your work as well yeah we we wanted to have jordan at the conference uh and we did reach out to him and speak with him uh you know because he's in his old age now i guess i can say that without being too derogatory he's not able to travel to be there um but he's definitely there in spirit and we're definitely all big fans of his work absolutely yeah that's what i was gonna recommend as a guest speaker but i'm also interested in hearing what jay parker has to say maybe more on the satanic you know kind of agenda and stuff so um i mean he was there man he was there i mean there's something that comes with having lived that and continue to live it you know we this trauma we've all experienced it on different levels and we've all been around these occult groups on different levels perhaps but um you know he lives with it to this day and he is an extremely powerful speaker and and he definitely needs to be heard at the third conference without any question and jay will also be promoting the conference on his own radio show sra today which is hosted on the blog talk network so check out check that out as well yeah i'd love to speak to jay parker because i do have a friend who was uh ritualistically abused and i did hear their story and uh it's very disturbing there was underground tunnels uh underneath this church and went into a separate house and i could get into more detail than that i would love to speak with jay parker sure yeah absolutely you should call into his show he does his show every sunday on blogtalk uh just type in sra today and you'll you'll find it online he does it uh sunday seven to nine pm eastern okay fantastic anyways mark i'm a film student right now okay uh i'm working on my own allegory uh because i love allegories and i like network yes awesome we put in about 20 000 of dollars into this film i'm working on uh it's going to have you know props uh wardrobe makeup visual effects it's gonna be really groundbreaking and i'm hoping to get it out there pretty soon i know i wish you the best of luck with it i'm still it's very similar to brazil like terry gilliam's work is a great allegory anyways i'm very disturbed by uh you know 911 and uh you know what's going on in this country uh the desensitized decentralization of a lot of these citizens uh when it comes to uh violence yeah tv um you know the clock is ticking for us you know we have to do something about this uh very soon all the police all the police brutality and total you know raping of human rights that are being done by police in this country trying to desensitize people to it and accept it like this is just everyday normality you know and that's that's what we see every single day i hear the scary thing martialization story yeah the scary thing is it is every day every day every day every single day uh john vibes um my co-organizer he writes for the free thought project right and there is every single day a new article about some guy in a fancy costume with a shiny badge that the occult spits on doing some act of cowardly absurdity bob i think the number stands at almost 5 300 people have been murdered at the hands of police since 9 11 2001. more far more people dead at the hands of police in this country than died in the 2001 9 11 event uh you know have died since that date at the hands of police police and doctors the two biggest that's troublesome on this planet millions you know if not if not the hundreds of thousands you know the biggest killers police doctors and politicians there you go that's the holy trinity of murderers yep absolutely it really reminds me of what the people about nazi germany were probably going through ah you know things were kind of going downhill you know people got probably knew oh shit oh shit you know some people oh hey man we gotta watch our language but um appreciate it yeah anyways uh the clock is ticking and i think we need to get rid of all the chemicals are building up in our bodies we need to be juicing that's it i know cilantro parsley is very good for really heavy metals um i have a masticating juicer myself mark you should definitely get a mask oh i i have one i have one of each kind mm-hmm yeah yeah they're really great i mean uh you know that's the thing i people always ask me what's the first thing i should do you know if you want me to do one thing or change one thing i say improve your diet get onto juicing get onto blending get on making green smoothies you know get a single auger juicer uh you can get a single auger juicer on ebay for ninety dollars you know these things used to be four hundred and fifty dollars only a couple years back now ninety dollars on ebay gets you a great vertical single auger juicer that you could totally extract all the micronutrients out of you know good fruits and vegetables and you know really improve your diet and as a result really improve your your your mental faculties sure great behind-the-scenes story every time we're up there in philly for the conferences mark treats us for some juice it's out of this world we'll be right back everyone talking to our special guest bob tusk and about the freer mind 3 conference more your calls coming up stay with us it was a cool silence but we don't dare speak there's a wall between us that's right folks the code of silence cannot go on and it will be ended at the freer mind three conference as it has been in the former for your mind conferences whistleblowers galore at these events ladies and gentlemen and bringing forward empowering information that you'll you will hear nowhere else april 9th i'm sorry um 10th 11th and 12th of 2015 the free your mind free conference at the sheraton bucks county hotel 400 north oxford valley road in langhorne pennsylvania tickets are on sale right now an all-weekend pass only 130 dollars that's the early bird special go to the free yourmineconference.com website and get your tickets today buying your tickets in advance is the best way to support this event and its organizational team because the monies that are received from early ticket sales will help to pay for the the conference venue for the speaker's travel arrangements and for the speakers lodging arrangements and that is what takes the bulk of hosting a conference like this ladies and gentlemen so if you want to support this effort and you want to support this conference and its organizers please go to the free yourmineconference.com website and get your tickets in advance that's the phrase get them now okay i mean mark it doesn't happen otherwise i hate to say that and federal reserve notes suck and it's a crappy thing to have to sit here and i mean we're not begging if you see value in this right financially you got to put your money in your federal reserve notes because unfortunately the people who um you know facilitate travel aren't going to take anything they're not just going to do this because out of the kindness of their heart and say hey fritz springmeier needs to get to philadelphia so let's just put him on a plane for free the world unfortunately doesn't work that way yet okay we want uh donations if you if you don't want to be there in person i know a lot of people out there listening they really value the talks that are put up on youtube they really value your show and the speakers at the conference donate there's an easy way to donate uh it's you know the equivalent of being there in spirit if you will that's one option and also we're looking for sponsors if if you have a business if you have something that you would like to have associated with the conference sponsor the conference you know that's a great way to get involved and there's plenty of opportunities there as well just go to the website freermindconferences.com and you can find all of that there real quick folks another quick rundown of the speakers so far bob tuskin clint richardson curtis the illuminated one davis derek bros new jersey weed man ed fortune freighter x freeman legendary freeman fritz springmeyer you know one of the pioneers in this whole field of endeavor jay parker john g vibes josie the outlaw wales larkin rose and myself mark pacio it's already an all-star lineup it's only going to get better from here on out bob let's go back to the phones and hear what other people have to say about the conference let's hear from selt in the united kingdom you're live on what on earth is happening with my special guest bob tusk and welcome hello hey hello yes hey man hello can you hear us hear me yes we can we can just england on a mobile phone so not a great connection um well first of all i just wanted to say i really wish i could be able to come over and come to the conference but even if i had the money i got arrested for marijuana when i was 18 so they probably wouldn't even let me in the fucking country sorry sorry i forgot i'm not allowed to swear but mark what i really wanted to see it will ask you about or comment on was uh get your comments on was something that happened to me a while ago i was lucky enough to um be the kind of person who didn't ever take any hallucinogenic lightly when i took hallucinogenics in my early adulthood i just basically noticed because i was inclined to observe a certain pattern happening and that pattern was what i call a spiral of seven okay starts with visual beauty the surface things the surface of things moves to spiritual beauty you know the deeper aspect of life then to molecular or atomic beauty the intricacies and precision balance of it all which leads to thoughts of educational beauty that point at which you kind of realize that you're learning something and try to enhance that process and after that comes the divine comedy some comical or you know mad moment where you realize one of the contradictory aspects of existence going into um for some sort of a practicality of life and finally coming around to just a bit that i used to call that bit where you feel like you're looking into the eyes of god and then you go around the spiral again and it was something that was definitely happening to me rather than i was making happen sure and the only thing i've ever come across that's come anywhere near to reminding me of that or seeming similar was the work that i saw uh youtube on natural law i appreciate that so much you know that can be a psychedelic experience in and of itself i mean you think about what uh you know natural law helps us to do it helps us well coming into harmony with that understanding helps us to to make our minds clean once again sanitize the mind that's what psycho psychedelic means to make the mind clear to clear it out you know and that's what uh an understanding of natural law will do as well there's nothing more psychedelic than that as far as i'm concerned so salt i really appreciate those sentiments as i said i was i was very much uh i very much got a grip of it myself and get it out myself but what i really wanted to thank you for was when i watched the the natural law presentation that you did and i watched it about six or seven times like you know i'm really taking it on board the bit where you talk about the eighth encompassing principle of just care yes and that really opened it up for me because then i realized that when you're going around the spiral it that eight point that point in between the the the eyes of god and the back to the visual beauty side of it you have a moment where you get to choose you get to decide whether you're going to be flippant and just you know observe this on a superficial level and have a superficial journey around the spiral or whether you want to really apply your brain and get involved yes exactly and that's the that's the third part of the trivium which is the rhetoric stage and applying that wisdom i and it's it's a fascinating talk we're having here um and theogens has always been a part of my personal research and you guys really put something together in my mind that i had never thought about before and it's it's really profound it's that in theojins a lot like understanding natural law and several of the things mark brings up in his presentat his presentation on that is a removal of ego it removes all the filters if you will and that right there takes us to nature and truth and that right there to me is is one of the most pure and profound states of consciousness that you can be in and it's exactly what the powers that shouldn't be the satanic scumbags want to take you out of yeah and that is essentially why they want to keep us mind controlled yep and like i say natural law is the most occulted information if you want to know what the occult is ultimately it comes down to what natural law is all about which is what they are trying to keep hidden the very meaning of the word occult that's why because if people don't grasp that understanding they can continue to be enslaved that they're disempowered and they're easily manipulated and they don't know the nature of the reality they're living in and they don't know the nature of truth and therefore they can be easily led and swayed in whatever direction these uh dark forces want to want to take them in and uh once you de-occult that knowledge and then you grasp it and you deeply integrate it in your life and act upon it you become empowered and you cannot be manipulated anymore you know conscience the true understanding of the difference between right and wrong if definitively acted upon and you choose the right over the wrong action there's nobody that can sway you or manipulate you toward that dark side anymore you know and that's what this is ultimately all about is standing firmly in that truth yeah i mean like for a lot of years and basically until i'm until i saw your natural law presentation i kind of had truth or ps ptsd because of my whole life i i me i came to i'm not perfect i haven't followed natural law perfectly my whole life but um i've had an instinct for i mean my dad's a policeman and i told him when i was 12 years old that there was an inherent um lack of morality in what he did right because he only followed orders right and that they may come down a bad order and he was like now he's starting to see that now i'm starting chip by chip to get through to him i mean basically that's caused by the fact that in in england it's only very recently that they've started hiring the f with psychopath is the candidate for police until very recently there was still quite a lot of good policemen you know you know since you brought up this topic uh just that as a brief aside or maybe you could call it a a uh you know uh um an announcement of sorts um i already know what my topic of my presentation is going to be at the free your mind three conference so i'll just throw this out there my uh topic is going to be about order followers this is what i'm going to talk about at the uh conference and i'm gonna really put the pedal to the floor on this topic at this event mark we just sold out on tickets ladies and gentlemen stay with us i'm gonna hold bob on for another segment or two so we can get through to some more of your calls we'll be right back welcome back everyone you're listening to what on earth is happening i'm your host mark pascio my website what on earth is happening dot com holding bob tusken over into the second hour of tonight's show we have some more callers on the line bob let's uh go to dave in new york dave you're live on what on earth is happening with my special guest bob thompson yes bob thank you for taking my call guys sure hey um i am my first i want to say that uh you have your work has helped raise me in recent months and i have a lot of gratitude thank you hey man thanks um yeah i have a bunch of stuff i'd love to talk about but um i guess in terms of the conference one thought i had was that um if there was anyone who could give advice on people who were going through trauma um based on quote unquote waking up and i remember years ago when i was first going down some rabbit holes i came across a couple therapists who specialized in people who were dealing with peak oil and i feel like this is a similar model in some ways it would be interesting to get some uh people who deal with this purely from the psychological perspective of you know what's going on in the world and how it's affecting people that would certainly fit into uh you know the human consciousness angle of the conference bob what do you what do you think of something like that maybe bringing on some type of a uh you know uh quote-unquote professional psychologist or someone who helps people through emotional difficulties or problems i have a i had a guest on um jesus name escapes me yeah he's in texas and he has an institute of helping heal trauma he got out of the um psychiatry business what is his name it's going to kill me i had a guest on and he would be perfect for this because he talks about healing people who have been through intense trauma and he takes a you know his experience having written many books um not not that his authority being a phd in whatever psychology and and whatnot really uh is the end-all but he really did does do a good job and it's killing me somebody's going to know who i'm talking about here uh i'm looking through my skype context to find them but when i think of it i'll let you know i think that would be a great addition thanks for the suggestion you know and dave it's kind of funny that you even mentioned this topic in general of healing from trauma or healing from abuse because this is kind of like the first uh part of this this third section that i'm about to go in on the cosmic abandonment extended presentation healing from trauma healing from abuse the whole abuse victim cycle and how to transcend it is one of the first parts of this uh you know end part of this presentation and again we may not even get to to it this week folks you know talking about the free your mind conference is going to take precedence here this week because i have bob with us we have lots of callers on the line clearly want to ask both of us questions and talk about the conference a little bit and that's like kind of the main focus for tonight so uh you know this material can can wait it will be there and i could go into it uh you know at any given time but i think it's really important to get the word out about the free or mine conference tonight and take some of your calls so uh dave uh did you have anything else or is that all um i just wanna before i go i want a second what the previous caller was talking about okay and say that um when i first got into the natural law seminar as i was watching it i had the thought this is how i think when i'm tripping and um that like and i you know i have some friends who can vouch that after i watched it i was like this was arguably the most psychedelic experience of my life outside of that that's totally awesome i i mean i just i think there can be no higher compliment than that because ultimately that's what real anthogens are designed to do to put us in a a mind state that is closer to truth and divinity and clarity and um you know as assistants if they're used wisely if they're used properly that's what they have the ability to do and that's just what i look at myself an assistant to help someone uh clean up the uh you know um the false paradigms that they're clinging on to mentally and emotionally and you know psychologically and get all of that mental uh you know garbage and clean it up and just you know make the mind clear enough for them to see what really is just to see the truth as it really is out there that's that's all i can hope to assist somebody in doing so to call my work you know a psychedelic experience i i consider it a high compliment a high compliment a high compliment yes okay pun intended well i was up in manchester and i'm hoping to be in philadelphia on sunday so um keep up the good work guys and uh look god god bless absolutely dave thank you so much for the call and the encouraging words let's hear from thomas in south carolina thomas you're live on what on earth is happening with my special guest for your mind three organizer bob tuscan welcome to the show gentlemen how are you doing this evening doing well um i started listening to your show mr passio last week i apologize i'm not too familiar with uh bob's work i did just search his site seems a very in-tune gentleman as well thanks for having me on tonight sure don't be uh don't be too sure of that but anyways now bob's very in tune absolutely i want to make i would have not i would have not handed off the reigns to an event uh you know such as the for your mind conference to him if i didn't think so myself so okay you know the conference is in good hands i i trust your opinion on that mark um i want to make you guys aware i'm sure you're aware of this phenomenon but maybe stress it a little to you a little more that there is something that can free us all from the entanglements that we're in right now and it's called the bitcoin and i know you guys are aware of it but i'm guessing that you don't really fully understand how powerful that technology is no actually i really i really do uh thomas i i use bitcoin and um you know i understand how it can help transition us away from um you know the type of stranglehold uh fiat currency that we're attached to that is regulated by the federal reserve system bitcoin is a type of fiat currency as well um that exists electronically and it's a cryptocurrency meaning it works on encrypted transactions through what's known as a blockchain uh not to get too technical but um you know uh it's really funny and very synchronistic that you would mention this because i actually just met with a gentleman earlier today who's a listener to my show who made a bitcoin donation to what on earth is happening so i just actually engaged in a bitcoin transaction earlier uh today so it's something i've been using uh more yeah and i'm gonna make one to your conference because i fell down the bitcoin hole rabbit hole really luckily in 2010 and i own quite a few of them um and i'm i'm using my it's freed me let's just say that i bought a thousand of them when they were at 25 cents wow that'll give you any kind of indication and yeah that'll give me some indication about you know being that they're up over uh what 350 dollars now yeah yes sir i'm not one of those person that's just a listener i've kind of dedicated my life to trying to spread the word about it i'm actually working with a with an actor right now that lives in my area promoting his coin um very cool you know the the first bit bitcoin conference was actually held here in philadelphia at a location where um you know uh truth freedom prosperity a group that i work with has hosted many events um in center city philadelphia it was the bitcoin summit i actually sat and watched the whole thing i wasn't able to attend live i had some other commitments but uh watched the whole uh conference that was hosted online i definitely encourage people to do that and check it out a lot of different perspectives were presented there and if you aren't familiar with bitcoin you could become familiar by checking out the bitcoin coin summit that is available on youtube hey thomas email me man let's talk and we'll get you involved all right thanks stay with us everyone we'll be right back we don't need no thought controls man your music kicks ass mark i'm jealous i i've been getting emails about how terrible it is and and not non-suited to the type of material that i talk about you know which i don't know how are they listening that's what i'm saying bob because you know i think uh rock music and metal music is the music of rebellion the lyrics talk about freedom the lyrics talk about escape from mind control i'm personally into this stuff and uh you know uh i think it's very suitable to it personally but hey to each his own you know but uh what do you say we go back to the phones and uh talk a little bit more about the conference yeah let's do it and by the way the person i was thinking of from the psychological trauma institute is colin ross dr colin ross i think you would be great for an event like this do you know him i am familiar with some of his work yeah i think he'd be great too so another great suggestion that's why i'm i'm excited about this show tonight we're getting some great calls absolutely and um you know i really appreciate the input so we'll reach out to colin ross and see if he he'll be a part of the conference cool all right let's hear from daniel in is it uh los angeles or louisiana daniel you're live on what on earth is happening welcome oh hey what's happening man yeah it's a daniel from oh the dirty south oh yeah i i know dan from louisiana all right what's happening bob what's good hey man uh uh an old time caller mark to my show one of the frequent callers that i missed not doing my show right hey dan hey yeah you know i know you was holding it down with rbm for a while this cat uh come in your slot you know y'all spitting some legit game on uh uh on a for your mind conference i got 130 down on that right now all right because like i'm trying i'm trying to make a name for myself in this alternative media blogosphere well you know that's a it's funny to say that because a lot of people want to get involved and they want to look for the opportunity to do that and the conference is is a great way to get involved to get out there and network with these people start to make connections and it's great opportunity to do that so i i think you're on to something there and saying that you're trying to get more active and the conference is a great place to try to work on that yeah yeah yeah i could bring a i could bring a second amendment angle i could bring a health foods angle i can bring a conspiracy theory angle to the uh to the conference you know i'm excited about it you know it's a long ways away but hey you know i mean i'll make a meet up i'll make a meet up monday and if there's anybody that you know in my area that wants to mac about just new world order stuff and just free your mind stuff like i'll make a meet up like monday yeah that's that's good but mark doesn't eat meat so uh this is in the show to talk about making your meet up i'm gonna have him there i'm just i i i'm rambling i'm sorry bob oh well good to hear from you dan good to hear from you man yeah yeah for sure for sure like oh you want to hit up some face-to-face time on skype about this for your mind confidence let me know all right hit me up you know how to reach me and uh you know that's the thing mark i'm out there for anybody to reach uh if you want to get involved in any way with the conference if you want to help out get the word out just reach out to me i'm you know it's it's not like uh we're hiding behind some thick veil of uh several people i'm just a dude that is like many of the listeners and everybody everyone else out there that appreciates this kind of research and wants to get involved so reach out to me go to the website you can email me personally the bob tuskenshow gmail.com and we'd love to hear from you absolutely ultimately we're just basic down to earth people who are who want to live free want to spread the message of truth want to spread the message of freedom and want to bring together people so that they can network and spread these ideas themselves as well so uh let's hear from another caller ladies and gentlemen on the line with us one of the speakers from the freer mind 2 conference and who is going to be hosting a meditation gathering at for your mind 3 welcome to this show swami shivananda geary from illinois ladies and gentlemen uh swami shivananda geary namaste and blessings i welcome everyone with great love and great respect from the heart of all outstanding to be on the airwaves with two of my favorite humans cruising around the planet and working for the upliftment of humanity that's right swami you're going to be a big part of for your mind three as well let's talk about that well uh i'm not sure what all is gonna happen but i'm looking forward to whatever does happen uh you know last year or last time showed up there and uh next thing i knew i'm at your house and you're saying oh hey uh we've got a slot would you like to do a talk in the morning amazing synchronicity yep synchronicity was just i could talk about something for an hour synchronicity and good fortune it just all came together you know and exactly what was supposed to happen happened and then we had that room that you know we put together the uh meditation gatherings yes and a lot of people benefited from that got to experience something from inside themselves and they have some uh inner experience right including myself i mean right before i went on to the stage to deliver my uh new age bs and the suppression of the sacred masculine presentation uh i sat in that meditation gathering with you in the other hall at the uh freer at the uh quaker meeting house and uh it really helped me focus uh myself and gather my thoughts uh and gather what i knew i needed to get up there and do with that event yeah it was awesome and and i got there now here here's what i want to really bring out and speak to for everybody listening live or in the archives podcast later whatever you the listener right now doesn't matter what your name is each and every human you run into at for your mind three is gonna welcome you like a brother that's right like sister yep it's the most amazing vibe i've been i've had the opportunity in in my 51 years cruising around the planet to be around people with name and fame and this idea but you know what swami you're not you're not kidding and you're not just saying that i know because i felt it myself you know there were speakers you know big name speakers at some of these events and they personally came up to me thanked me for hosting the conference for being one of the organizers of the conference and said this is the best event i've ever been to and they must have spoken at a whole lot of events too and yet they said the energy at this event is the best i've ever felt it was amazing i mean you would think being you know in and amongst the speakers and that sort of thing you would see some riffling and some attitude none of that men of that and every ticket holder and attendee was hugged and handshaked by everyone they cared to me you know so all these people that you the listeners have been listening to through internet radio for all these years who are part of the free your mind group whether it's jay parker whether it's mark cassio bob tuskin yeah for you freighter x freeman come on you know i mean and these are just the names that have been released thus far i can't wait to hear the rest um every single one of these people you're going to get to walk up and and express personally how they've touched your life and they're going to be happy to hear it you're not going to get an attitude of superiority from anyone all of us are just happy that you're there to share the vibe with them absolutely swami thank you so much for the kind and encouraging words and thank you for being a part of the conference last year and thank you in advance for the contribution you'll make this year ladies and gentlemen you're listening to what on earth is happening right here on rbn don't go anywhere we'll be right back you know the day destroys the night night divides the day try to run try to hide break on through to the other side welcome back everyone you're listening to what on earth is happening here on republic broadcasting i'm your host mark pacio my website what on earth is happening.com talking live with my special guest bob tusken this evening about the freer mind 3 conference and we're taking your calls i'm just going to keep bob on till the end of the show and we'll continue with the cosmic abandonment material next week because i think the for your mind conference announcement uh of the uh the dates and the venue need to take precedence and we're interested in hearing your uh perspective on this conference and what you'd like to see out of it so let's go back to the phones and let's hear from ivan in phoenix ivan you're live on what on earth is happening with our special guest bob tusk and welcome my friend hey mark bob thanks for having me on the show right now sure i'm good to hear your voice ivan was a great help at the last conference absolutely he's hosted his own uh meetups uh vegetarian meetups uh in arizona for the freer mind arizona group and we always appreciate ivan's work ivan was a huge huge i don't know about vegetarian i think i think i think bob was just was just uh you know gently uh giving you a little uh a little kidding there but uh but um ivan really was a huge help at the for your mind 2 conference i mean i can't thank you enough for the the work that you put in at the event uh in 2013 ivan it was just a huge help and we really appreciate your efforts well thanks for that and you know that that was uh kind of unintentional i have bought my ticket went there with my little camera just as an observer just to take it in but i can see that you know hands were needed and that was something leading up to that event that you were always saying many have made like work that's right and that that that was it i just found myself putting my engine where it was needed us a lot on the setup day made that easier and uh you know just uh helped facilitate anything that we needed during the the actual event and uh that's what it's all about ladies and gentlemen it's all about just getting involved you know it's it's really easy once you start doing it you know the hard part is making the decision developing the courage to make the decision to get onto the playing field you know you can't uh you know put the ball into game in baseball from the dugout you got to get onto the field to do that you know you can't stay in the grave that masonic allegory of rising up from the dead you know that's what the game of baseball is all about you got to get out off the bench and onto the field where the game is played and uh it's about getting involved and putting what you know into action you know so i i commend you ivan for doing that and doing that in your own area with the free your mind arizona group and uh you know i hope these uh groups kind of spring up all over the country we would love to see something like that happen well it's it's happening slowly but surely it is happening i've received uh maybe two more uh little messages one out of uh washington that they want to try and start something up there and i saw a message out of new jersey and so the ones that already uh got up and going there's a one in colorado there's one in georgia i would i would suggest this is something i did for the last conference when uh you guys are gonna probably hold two or three fundraisers where you do about 10 or 12 hours on one of the radio networks or a marathon right or building up funds i went ahead and both uh times for the last one held a meet up out here throughout the whole 10 or 12 hours of the marathon to have members come in listen and get some of the information and uh hopefully they you know they can call in and make whatever contributions and donations for uh you know helping uh get the funds out yes we will definitely you know the meetup groups to do that also to come together and uh bring you know awareness to this we are definitely going to try to do that again uh before this conference uh these radio marathons we would like to do at least a couple of them more likely than not so listen you know stay tuned and listen for announcements regarding that and hopefully we can make that happen right and um thanks thank you mark i received the shirt the what on earth is happening shirt and work already this week and i had about three or four comments uh from workers that you know they read the back of the shirt with the uh uh two mistakes on the path to truth not starting not going all the way and had a few little huh okay huh so that at least got planted a little bit of seed just uh you know hey something's going on here kind of thing and then also a co-worker um who's uh who my shared information with i told this person about the conference and they uh expressed some interest of possibly heading up there and taking this in and that's that i wouldn't be surprised if that happens because the last conference i ran into someone from arizona from phoenix from one of the other meetup groups out there so we never know where you know where uh we're gonna run into people and and all this kind of stuff but yeah um bob i wanted to bring up um we had one of the meetings online or sharing ideas for the conference and we threw out some names and it's pretty interesting that i was thinking of uh josie the outlaw and claire richardson and before i spit it out you guys already had them in there i threw out the name mark devlin he's a dj out of the uk who's focusing a lot on the music industry and the uh satanic influence through music to the youth and he contacted me and we've been in touch and he's inter you know brought up a lot of different uh local artists that uh are also awake and um sharing information one of them isn't too far from here in colorado the female artist elias clay and that maybe that might be an area that we might want to also address is the youth and so there's a lot of hip-hop they're changing the term now from hip-hop to truth hop trying to get the truth information out there and that's a good avenue to try and get the youth aware of this stuff through the some of the rap music and hip-hop music where the lyrics talk about i love i love consciousness i love conscious rap and conscious hip-hop i can listen to that a lot as well you know conscious rock you really you know inspires me a lot but uh conscious rap and hip-hop is definitely a uh very very very uh encouraging genre of music as far as i'm concerned and uh you know that would be great i think you guys are missing one genre to add there and that is reggae music absolutely believe it or not a lot of modern reggae music is really filled with uh conscious lyrics you know a gentleman wrote a song about natural law who is a member of a reggae band i i really should play it on the air one day or put it in my um bumper music rotation because it's really really an excellent song maybe i'll even play the whole thing on the air one day he sent it to me in my email and said it was kind of dedicated to to my work and it is i think i believe the song is called natural law and it's really a phenomenal reggae song so uh that's something i want to do in the future i'll have to remind myself to uh play that on the air one day yeah music should i i think music should be a part of this conference in some form or another you know it's uh something that i think uh really um you know inspires people and uh that right-brained you know creative capacity uh should really be included as part of an event like this so something uh to to to look into awesome that's pretty much all i have for for the call great uh ivan always a pleasure to speak to you and you know you mentioned the t-shirts i just want to say a quick thing about that because i have to complete my uh complete uh chivalry you know that you know being that i'm now uh offering a piece of merchandise in in uh in return for a voluntary donation as a gift for voluntary donation of course that makes me a complete shill and you have to throw away all the information i've ever said from day one so i might as well just uh finish my shall we complete it uh by making the announcement officially on the air that uh the the there is a what on earth is happening promotional t-shirt that is available um and i posted it on in my news section it's at the top of the news section and in the latest news on the left hand side of the what on earth is happening website i made these shirts when i did the demystifi demystifying the occult seminar in connecticut uh um in uh last last month in october and um we printed up some shirts to to bring and sell at that event and um you know i had plenty left over because i printed up a nice big batch of them and uh they're all professionally silk screened they're on good high quality black t-shirts the front of the shirt has the water on earth as happening logo if you will you know i call it the awakening earth motif with the words what on earth is happening in front of the earth and then on the back it has my all-seeing eye design that says one great work truth love freedom and it says on it of course the phrase i usually end the show with that is a quote from buddha that it says there are only two mistakes one can make on the path to truth not starting and not going all the way and then it has the wall on earth is happening dot com website url on the bottom of the back of the shirt so uh if you go to the uh news section of the site uh it's the first item there uh the promotional t-shirt is available there's a little they're available in medium large uh extra large and double extra large they're only in black color and only in men's style you know regular standard traditional t-shirt style for now um but there's a little email link you can click there it says ask about the what on earth is happening promotional shirt if you click that if you're interested in a shirt you know i'll let you know how you can get a hold of one so uh that's up on my site i just wanted to mention it and now you know i'm a complete show so there you have it ladies and gentlemen stay with us last segment coming your way more your calls with our guest bob tuskin welcome back everyone you're listening to what on earth is happening i'm your host mark pacio my website what on earth is happening.com this is the last segment of tonight's broadcast i'm with my special guest bob tuskin one of the co-hosts and organizers of the freer mind 3 conference coming up april 10th 11th and 12th 2015 in bucks county pennsylvania let's uh go back to the calls and let's hear from mike in california mike you're live on what on earth is happening with our guest bob tusk and welcome good evening gentlemen thanks for having me on absolutely mike um not totally right on the conference thing but uh maybe throwing out a point i tried to call him before in the past um i've always been well been researching in your realms for a while now and one question that keeps coming up to me that i've never quite heard anyone really expand on a maybe you could get a guest that could get into detail is the importance of gold throughout history i've heard some people kind of touch on it whether it be you know involved in hyper dimensional uh travel or whatever it might be but i've never really gotten a really good answer as to why gold throughout history is so important uh to the powers it be well i'll tell you my take on it is it's just a matter of scarcity it could be anything and it would serve the same purpose and i think gold just happens to be a convenient scarce metal that is utilized to perpetuate control and and s and scarcity because at the end of the day there's technology out there that could extract certain minerals from ocean sea water and provide an abundance of gold more gold than has ever been harvested from the planet so the only value that i see gold having and i don't know if any occulted uh re rationale behind their an obsession with gold but i know the practical obsession with gold is that it's scarce and it if we keep it scarce we keep the control and it's the same mind control we see behind all forms of money mike i'll give you a slightly different take from my perspective and i would recommend my podcasts number 165 and 166 on my podcast archive on my website where i talk about this as part of the extended cosmic abandonment presentation that the so-called intrinsic value of gold actually comes from the gods valuing of this substance for reasons that we do not really fully understand because as i talked about in those um two shows the word intrinsic literally means what you can do with something in nature when i tell people to consider what intrinsic value really is is if you were put into the wild with uh no means of really sustaining yourself um what are the things that you would pretty much look for to assist you in a situation like that you would look for food you would look for clothing you would look for shelter you would look for the ability to defend yourself and that is what would be intrinsically valuable to you that's what intrinsic means literally by definition it's something that is existing in nature inherently and possesses value a piece of technology has intrinsic value a a structure that you can shield yourself from the elements has intrinsic value clothing has intrinsic value food and water have intrinsic value apart from that if you can't do any of those things with it feed yourself shelter yourself use it as a mechanism of defense from you know other predators then it's not intrinsically valuable okay people use this term in the way they want it to what they want it to mean that's not what the word intrinsic actually means it means what i just laid out there for you so if it doesn't have any of those applications it's not intrinsically valuable does gold supply any of those applications nope not one of them okay you can't eat it you can't drink it you can't close it clothe yourself well you could eat it but yeah i mean i guess you could make some kind of a flaky light clothing oh yeah with gold flakes but who's doing it for breakfast all those t-shirt sales but but seriously you can't make a weapon out of it because it's super soft you know it's james bond golden gun man so you know when people talk about it as having intrinsic value that's their definition of what intrinsic means it's not the actual definition of the word so um it's a it's an ascribed value so then what i talk about in these two podcasts is where did that ascribed value come from who held it intrinsically valuable for reasons we don't understand and then kind of you know transferred that perceived value onto us you know because it had some kind of social status because if it was intrinsically valuable to these beings and if you go back and listen to the cosmic abandonment presentation and the extended podcast presentation from the beginning of that section you know i slowly work into that topic and it kind of comes to fruition in shows number 165 and 166 so i just recommend you go back into the archive and check those shows out where i give my take on why gold became uh popular in human in the human mind i'm going to have to check that out myself awesome mark we have three more callers in church only three minutes can we do it let's at least take one of them let's hear from nick in ohio nick you're live on what on earth is happening with our special guest bob tuskin hey how you doing i'll be quick uh hello yes yep you're go ahead okay first of all i just want to say thanks man you're uh you being so bold and saying what you say even though you know it's not popular whatever it's really giving me a lot of courage too just because you know i used to be all paranoid about talking to other people about this kind of stuff you know but now i'm just kind of like whatever that makes me really happy to hear that's a high encouraging compliment as far as i'm concerned because when you're bold universal forces come to your assistance right on yeah like i always you know thought and learned but i i was always so passive you know because i grew up really religious you talked about the right brain and i was always so passive and scared to act and to speak you know what i mean i've been speaking more and acting you know a little bit more i wish i was more like you i got such a big mouth i can't shut up don't like that when i was younger i'm getting back to it i'm going from coming full circle now all right man sure wasn't helping me um just uh i feel like i've been on this path ever since i was a kid and this is the closest thing that i've gotten to what i was seeking you know i mean like in terms of learning about natural law there's two interesting things i just wanted to say to people out there um like when you're talking about ma'at and uh natural law it's funny that uh i'm researching this and she has a uh kind of like a reflection or a counterpart and then her name is she's shot like s-e-s-h-e-s-h-a-t yes this is the goddess of measuring and architecture and building right she has a seven a seven leaf star up overhead looks like a marijuana leaf and i feel like there's a connection there but also what in terms of you know smoking and all that i feel like it's good for uh people out there it's good for shadow work because like if you are a paranoid type person whatever like your fears and stuff come up or like things come from your subconscious at a higher rate and it projects it in front of your face and you can see exactly where you have a masculine feminine imbalance oh i totally agree cannabis can absolutely be used like that if you decide to do that and you want to work with that shadow material it can be a a very uh influential uh force uh to help you work with that um that that kind of subconsciousness one addendum to that in addition uh to what you guys just mentioned cathy o'brien speaks about that in her book and i actually when she was at the uh second freer mind conference spoke with her about this and of all the substances her handlers would allow her to have cannabis was the most prohibitive of them all and ladies and gentlemen i will testify to that myself i will i will uh corroborate that in the satanic um community okay cannabis is the single most frowned upon substance because they know about its curative properties they know about the properties that can affect consciousness with this plant and they do not want people to engage it their god shiva he's known for uh smoking you know marijuana also uh along with dreams you know what i mean dreams are also good for alchemy also like they show you theatrically in symbolism what your masculine the the the the trap that your masculine mind is putting your feminine mind in you know what i mean it's like abusing your emotions you know it's like that abuse of the male hat to the feminine half left and right brain whatever right but uh so that those things in conjunction the marijuana and dreams in conjunction with shadow work when you talk about you know facing all your demons and all that i know exactly what you're talking about man like i'm going to the same thing i feel like i'm coming to some kind of end but it's like my final arch enemy you know what i mean which is my terrible social anxiety but i've just decided like we're coming up to the end of the show it's all about balance my friend ultimately leading to courage and right action it's part of what the whole free your mind conference is all about bob tusken main organizer thank you so much for being my guest give him the details about the conference one more time bob freermindconference.com check us out on facebook please get your tickets now because we can't afford to do the conference if you do not mark you're the best man absolutely ladies and gentlemen be part of free your mind three april 10th through 12th 2015 sheraton bucks county langhorne pennsylvania bob thanks so much that's all the time

What On Earth Is Happening Show #175

Topics: *Cosmic Abandonment, Interference Theory Of Human Origins, The Unwritten Story Of Our Future, the Possibility For Positive Change, the Abuse-Victim Cycle and how to break it, Knowledge of Self, the Human Brain, Genetics vs. Epigenetics, Human Nature as Programmability, the Power of Human Consciousness, Old Science vs. Emerging Science, The Generative Principle of Care, Free Will Choice, Self-Loathing as a major factor which holds Humanity in a state of Slavery, The 3 R's (Respect, Remembering and Responsibility)*

freedom man that's what it's all about [Music] you've got to groove on freedom like the good book says [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio [Music] welcome one and all you're listening to what on earth is happening right here on the republic broadcasting radio network i'm your host mark pacio my website what on earth is happening dot com the network's website republicbroadcasting.org today is saturday november 15 2014 this show is live every saturday evening here on rbn from 10 p.m to midnight eastern time that's 9 p.m to 11 p.m central we are still in a two-hour time slot for the time being again i announced that last week and that will continue on into the future and may go back to a three-hour time spot at some point in the future so for now it's a two-hour show 10 p.m to midnight eastern we have a great show lined up for you here tonight i'm going to be continuing the cosmic abandonment extended presentation here on the air tonight cosmic abandonment is a series that explores the connection between the interference theory of human origins as i call it uh with the current human condition that is taking place on this planet in the times that we are living in tonight i'm going to be getting into what i call the unwritten story of the human future how we can change it some solutions and we're going to look into something known as epigenetics and how critically important of a role that plays in finding the solution to the current problems that our species faces and overcoming the trauma and the abuse that this species has taken in its quote-unquote childhood so to speak so that's coming up on this edition of what on earth is happening i will be taking your calls in the second hour of the show maybe a little bit later into the second hour depending on how the presentation uh material goes but i'll give the call-in number right here at the top of the show so that those who want to get in the call queue can do so early on the toll-free number to join us here on what on earth is happening is 800-313-9443 once again toll-free number to join us 800 313-9 i do have a couple of quick announcements that i want to make so bear with me and then we'll jump into the material the truth freedom prosperity documentary night that takes place uh monthly here in philadelphia will be happening this thursday november 20th from 7 p.m to 10 p.m at the guerin recreation center the guerin rec center is at 16th and jackson streets in philadelphia this month we're going to be showing a film called park avenue money power and the american dream here's a brief description of the documentary in america the rich are getting richer well isn't that great doesn't that mean that there's lots more wealth to go around or is it good news for the rich but very bad news for the poor 740 park avenue manhattan is one of the most exclusive addresses in the world home to some of the richest americans the one percent of the one percent 10 minutes to the north across the harlem river is the other park avenue in the south bronx here unemployment runs at 19 and half the population need food stamps the american dream of equal opportunities and hard work says that you can be born in the bronx bronx and end up at 740 park avenue but is that dream still true this film argues that the super rich haven't just bought exclusive addresses they've bought the whole system and they're running it for themselves let's say that's absolutely true of course this film is a little more on the mainstream side of side of things about wealth disparity here in america it doesn't really touch on the occult aspects of what's going on and how really these people are indeed dark occultists but uh i we we have been touching on the topic of wealth disparity in the discussions at some of these meetings and i uh we thought that this film would kind of be appropriate so uh that's the film we're showing this month and uh the again the guerin recreation centers at 16th and jackson streets all the documentary nights as always are free to attend uh they always happen on the third thursday of every month hosted by uh myself and barb and uh truth freedom prosperity and um there is a free parking lot at the gwaran center off street parking fenced in and you could feel free to bring your own food and drinks if you're going to be coming out to the free documentary night this thursday so the big announcement is that the freer mind 3 conference is coming at us in the first part of 2015. april 10th 11th and 12th of 2015 free your mind 3 at the sheraton bucks county hotel 400 north oxford valley road in langhorne pennsylvania just outside the city limits of philadelphia a little bit north of the city the speakers already lined up for this uh coming years for your mind conference bob tuscan clint richardson curtis davis dennis mckenna just announced he has been secured for the freer mind three conference really looking forward to seeing dennis mckenna as part of for your mind three derrick bros ed fortune also known as the new jersey weed man freighter x freeman fritz springmeyer jay parker john vibes josie the outlaw wales larkin rose mark devlin and of course myself mark pacio those are the speakers that have already been announced more speakers will be forthcoming in the coming weeks an all-weekend pass for this conference which is what i am highly recommending everyone who attends to go ahead and buy right now is only one hundred thirty dollars for all three days including a speaker meet and greet on friday night where you can get to meet all the speakers and have a discussion with them we are asking people um as part of the support effort for this conference to buy your tickets in advance buy them now if you plan to attend you don't have to wait to make your your travel to get your tickets when you make your travel plans get your tickets now in advance because ladies and gentlemen what that does for this event is it helps to pay for the entire event it helps the organizers of the event to pay for the event the venue is very expensive it costs multiple thousands of dollars to rent a venue like um the sheraton bucks county hotel for three days and nights um the um the cost of um the speaker's travel expenses and lodging expenses you know a lot of these speakers are coming from all over the country so they have to be flown or uh often may be taken by train from one place to uh near philadelphia where the event's gonna be held and then they have to be lodged there themselves for four uh nights okay um for the whole conference so uh imagine when you have 20 speakers or something like that how much that cost is and you know it just takes an extraordinary amount of resources to host the conference of this magnitude so the best way you know i can't over emphasize this enough the best way that anyone can support the free your mind three conference if you are in to the information that these whistleblowers and researchers are putting forward if you are into the goals of the organizers of this conference to try to raise awareness about all the uh you know horrific problems that are going on in our world and have people come forward to uh expose those wrongdoings and those injustices and then put forward very empowering solutions and to bring people together so that they can learn from each other and network and make new friends and then you know spread the word throughout the you know the the rest of the course of their lives throughout the year until they meet again at another conference if you support that those whole general goals the best way that you can support this effort of the freer mind conference in general is to buy your ticket up for the conference in advance again that's what helps the organizers accomplish what they want to accomplish so we'll pick this up on the other side ladies and gentlemen stay with us you're listening to what on earth is happening [Music] [Music] [Music] okay welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pacio my website what on earth is happening dot com just have a couple other quick event announcements uh there are still what on earth is happening uh t-shirts available promotional t-shirts that i made uh from my last seminar in connecticut the demystifying the occult seminar you can receive those as a gift in return for a voluntary donation uh to do that to receive the info on how to do that you could just click the email link that's listed in the article regarding the t-shirts which is at the top of the news section on the watonerthishappening.com website also there is a donation button on the left hand side of the what on earth is happening dot com website if you feel that you've received value for from the information that i've shared here on the what on earth is happening radio show and website please feel free to make a voluntary donation to help support my work so that i can continue to do it into the future with that having been said let's jump into the material for tonight's show and i want to as always direct everyone's attention to the radio show tab of what on earth is happening dot com underneath the player whenever the show is live there will be images for uh tonight's show there's only one images in that one image in that section tonight it's just an image for the for your mind conference website uh they're they're working up a um a poster for the event i'll be posting that um with each show and also making an article and probably putting it in the news section uh regarding the conference uh once the uh some of the imagery is completed and i'll also be putting a banner on the front page of the site as well um but underneath uh the images for tonight's show you'll see cosmic abandonment slides part one and two we're well into part two we're going to start with slide number 168 this evening and move on from there and hopefully uh get through the rest of them but if you uh like you can also download a zip archive containing all of the slides for this presentation unpack that locally on your computer after it finishes downloading and then open up the slides with any image viewer that you prefer to work with probably the best way of doing it so we're going to start on slide number 168 for the cosmic abandonment extended presentation this evening and that slide is part three the the third and final part of this presentation called the unwritten story of our future of course part one was the story of our past part two was the story of our present and now we're talking about where do we go from here now that we know the kind of horrific truth about what the origins of humanity was was really like and you know a lot of people will say that the whole interference theory of human origins is kind of like a psyop in and of itself this is one of the things you hear anybody that's talking about the possibility of non-human involvement in the events that have taken place on this planet in the um you know things that were done uh in the early human uh time period and uh regarding our origins and how we came into the current condition that we've arrived at in the in the times we're living in a lot of people will say that anybody that that thinks that it had anything to do with non-human entities um or any off-world forces is you know somebody who's trying to spread fear and just make it seem so hopeless make the situation seem so hopeless that people give up now i want anybody to find me ever saying the words it's completely hopeless in any of the material that i've ever done never from day one have i ever put forward that sentiment and i still to this day don't think like that it can be changed our situation can be changed our condition can be changed the question i always ask is will humanity will it to change because it doesn't just change on its own the the factors that have driven this condition of slavery that we are trapped in uh it's not just going to they're not just going to go away they have to be addressed they have to be looked at deeply they have to be confronted it's not going to be we're not going to be able to ignore the causal factors and somehow create the change that we want to see reality doesn't work like that natural law doesn't work like that so in this section what i'm really trying to do for people is to leave them with with some hope regarding that this situation is changeable and i hope isn't even the right word to use in in this instance it's really to help to instill some knowledge in others that the situation is in fact changeable if enough care attention and willpower is put into the dynamic of actually changing it through our behaviors so the first thing we have to understand is i'm not telling anybody my take on the the human origins story to make them depressed to make them disempowered or the to make them give up and think that it's hopeless that's number one i'm trying to explain these factors because only in knowledge and knowing the truth about what happened to us as a species are we ever going to be able to identify and confront those causal factors head on and then work to change them to work with that shadow material and not ignore it and not try to run away from it to actually transmute that energy and understand how this condition came about because only when you understand how something a problem actually came about are you in an empowered position to do something about it to change it for the better so that's the whole intent of this entire cosmic abandonment series all right it's to instill that knowledge and then say here's what was done you have to deal with it you can't run away from it you can't pretend that it didn't go on it explains just about everything that's happening in the world if you are being honest with yourself and you really look at it objectively some people will deny that some people will you know won't want to look at any of the evidence because of the horrific implications which i agree are pretty horrific you know it's like we were talking about uh just as a brief aside you know we were talking about uh allegorical movies and one of them that i brought up was the time machine and there's a a scene in the time machine when um the uh the quote hero is trying to get information from like a quantum computer or some type of a photonic computer uh and the the uh image of the person representing the computer uh asks him well you know he's talking about the rest of the people not wanting to know the truth and therefore they kind of deserve their situation because they're so ignorant and he was saying well you know isn't that kind of harsh and he says well i want to know the truth i want to know what happened and he said the computer answers him and you know kind of says well you still want to know the truth even if it is so horrific that it will haunt your dreams for all eternity you know that's the question i mean this situation is not good it's bad it you know we were served a raw deal we were served a bad hand of cards but you know that's that's you know as the ball bounces as the saying goes that's you know the deal that we got in life now the question is are we going to pick ourselves up dust ourselves off keep getting up regardless of how bad we've been beaten down and do something about it you know and that's what this section is about so i'll move on to slide number 169 and we're going to start talking about what the process of healing from abuse is all about because really what has been done to humanity is we've been put through a vicious vicious cycle of abuse and now we're continuing that pattern we're continuing the bad behavior of our cosmic parents who set themselves up as gods here you know as our owners as our masters and uh you know to get out of that abuse victim cycle is a very narrow pathway we're going to talk about that on the other side ladies and gentlemen stay with us you're listening to what on earth is happening we'll be right back [Music] we don't need no education we don't need no thought controls no dark sarcasms in the classrooms [Music] oh welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pacio my website what on earth is happening.com we're talking about healing from the abuse that's been done to our species over thousands tens of thousands of years possibly hundreds of thousands of years and it's a very difficult thing to break out of the cycle of abuse as i was saying before the break it's a narrow pathway to walk because so many factors are against you see i covered this before in a previous show when we talked about uh how dominators uh get to become like that how they go into that mindset and it's often because they've experienced um abuse it's a very critical thing to understand about the mindset of these people how sick they are they're they're ill people they're mentally ill people and they don't understand what is really the underlying psychological factors going on in their mind at a subconscious level at all because they run away from themselves that's what most people who have undergone severe abuse that's the pattern they generally fall into because they've been beaten down so badly it's where humanity is collectively so when a traumatic or chronic form of abuse occurs whether it is experienced directly or it is witnessed being done to someone else for example a child witnessing a for example uh their mother being abused by their father just uh to throw out an example you know um or whether the child has beaten themselves by one of the parents okay the one of the things that usually happens is identification with either the one who is performing the abuse or the one who is being abused and that kind of that bifurcation you know that choice between which one am i going to identify with am i going to identify with the one who is doing the abusive act and therefore i look at that as oh well that's strength because they're not being hurt or am i going to look at you know well the victim is being tortured or punished somehow and you know doesn't really deserve it so should i identify with that when in fact really either form of that identification is a form of imbalance of course identifying with the abuser is a hallmark of left brain imbalance because then the person usually goes on and becomes abusive and then identifying with the victim and maintaining a victim mentality is a right brain form of imbalance so if you look at the chart in on slide number 149 it you know talks about or visually demonstrates this uh this bifurcation of identification so the the traumatic or chronic abuse occurs the experiencer identifies with either the abuser that's that left hand path that they go down or they identify with the victim then you know since they're not dealing with the actual trauma directly their emotions are either going to turn outward toward other people and they're going to go out and look for someone else to abuse and therefore become the abuser if you follow the flow chart downward or on the other side of things if they identify with the victim mentality uh their the negative emotions that they're trying to suppress will turn inward and then they become a victim themselves and let other people walk all over them uh and in both of these situations really what's happening is the experiencer of the trauma is doing abuse to themselves because when we're hurting other people we're hurting ourselves or if we're allowing ourselves to be victimized by others of course we're hurting ourselves by not saying no and standing up for ourselves and our rights so really this is all about continuing to stay in a state of lack of self-respect lack of self-knowledge in a state of self-loathing all things that we're going to talk about later on in this solutions section and put forward some basic ideas to really help people to understand how we can come out of that mentality and the first aspect of coming out of that mentality is knowledge of self i i mean i can't over emphasize that enough that's the key to everything because through knowledge of self you then understand knowledge of your own sovereignty and then you extend that sovereignty out to others because you recognize they're not actually separate uh from we're not separate from anything we're all part of a living dynamic system which includes everything and um you know you then exercise the non-aggression principle you exercise the principles of a voluntary society you stop believing in the uh coercion of statism which is slavery and uh you know you actually maintain a free a philosophy of freedom in your daily life and actually put that into practice through your behavior through your actions so you know it all that all starts with knowledge of self if you don't understand yourself and how you work ultimately you never really truly get to that and whether people develop that knowledge directly or they absorb it you know through like osmosis or it happens organically ultimately they somehow understand enough about the self and how they operate to understand those basic principles that i just referred to so part of healing from abuse is really deeply understanding the kinds of imbalance that lead to a enslaved society whether it le it's a form of left brain imbalance that leads to what i call master think or a form of right brain imbalance that leads to what i call slave think um either one of these forms of imbalance allows the dynamic of slavery to be perpetuated and to be continued on into the future so the slide on on slide number 170 just again is been part of my work since day one talking about the basic concepts of the structures of the brain again this is a simplified model human neuroscience isn't quite this simplistic however the model in general holds true of the triune brain the three general complexes of the brain being the uh reptile complex or the r complex including the brain stem and cerebellum which largely facilitates motor skills and fight or flight reaction survival mechanisms etcetera then you have the mammalian brain or the limbic system which generally makes possible emotions by creating the uh chemicals that ultimately go into the bloodstream and throughout the body and help you to feel something in the physiology uh regarding what the behaviors that you're taking toward others and then of course there's the human brain or what's known as the neocortical brain the neocortex which uh generally um governs higher order thought functions um both left and right brain uh logical and intuitive thought processes both scientific and creative so if you're in a state of chronic left brain hemispherical imbalance in the neocortex we've talked about this many times what happens is um it will create a suppression of emotion and a suppression of the limbic brain and then will eventually be rooted into the r complex of the brain and live like a dominator you know wanting to control everything and everyone it's what i call slave i'm sorry it's what i call master think this form of extreme left brain chronic imbalance uh toward the logical uh you know side of the brain only the side of the brain that just deals with um the physical world okay and survival and you know analyzing things and breaking things down it doesn't ever get into the nurturing and compassion and creative and intuitive side of of thought that's what the right brain does which you could equally go into a deep form of chronic imbalance if you are too much toward the the right or feminine part of the brain uh just like you can go into uh the left brain masculine imbalance that leads to slave think so uh that leads to master think so when you go into this right brain form of imbalance uh the feminine imbalance when that part of the brain is chronically dominant it creates a suppression of the r complex of the brain where the survival instinct is made possible and what this form of imbalance does the right brain imbalance will it will eventually root us into the mammalian or emotional brain and we'll be at the you know we'll be basically a slave to our emotions and will constantly be in emotional thinking and reactive mode um uh and also it you know you're always in fear because the fear uh response also takes place in the limbic brain as do all other emotions positive or negative quote negative emotions they're not really negative they're they're all there for a purpose and a function but the ones that make us quote feel bad uh it's all there in the limbic brain the positive and negative ones so um if either one of these types of brain imbalances are present that is contributing to the dynamic of the continuation of slavery on either side that's the first step in knowledge that we have to understand toward getting out of the current condition we'll pick this up on the other side stay with us everyone you know the day destroys tonight night divides today try to run try to hide break on through to the other side welcome back everyone you're listening to what on earth is happening i'm your host mark pascio my website what on earth is happening.com we're talking about where the perpetuation of abuse comes from psychologically and um generally you know we were looking at slide number 170 and generally what happens is if someone's undergoing a lot of abuse early on in life usually and again it can be psychological emotional uh mental abuse it doesn't have to be physical abuse it could also just be you know not coping with whatever situation life has dealt and that could be a form of abuse you know somebody just not uh having that internal fortitude and strength or or support around them to deal with the situation that life has dealt them and they go into one form of imbalance or another the left brain imbalanced individuals will identify with the um abuser and they become they take on that master think mentality themselves that i'm going to take control now i because i'll show other people you know i've been hurt so then i'll go and hurt others um so they're always looking to control and the right brain imbalance uh the people who are in chronic right brain imbalance they've also had abuse uh often in their past and in their childhood and uh what they what form that this psychological dynamic takes on in their later years is they will go into this slave think mode where they'll look for protection because they're identifying with the victim mentality well i can't take any action myself somebody else has to do this for me i'm not responsible that you know somebody else has to take care of my basic needs or my protection you know that they want to be protected and so you could see how the whole dynamic of government and slavery is perpetuated through these two dynamics playing off against each other you know it's the it's it could be considered the ultimate dialectic you know it's like a feedback loop you need the masters there to basically be the controllers the people who think they're the masters you know who think that they're in control there are left brain and balanced um sick individuals that um you know think that they own and have the right to control other people and then you have the people who are willing to lay down to that and never stand up for themselves never stand up for their rights always want this quote protection from you know big daddy government and you know really don't understand human rights and keep uh you know wanting this slavery system to continue you know the the perfect house slave mentality of right brain imbalance and again it's it feeds back dynamically with the the master think uh left brain form of imbalance so until we understand how that dynamic works we're not putting ourselves in an empowered position to heal ourselves through um you know exercises and you know ways of healing that deal with this form of brain imbalance and ultimately work to bring it to balance okay and i've talked about those modalities of thought in the past there's many different ways many different methods many different programs that people can use to uh on a daily basis bring the brain to a state of balance and keep it there again if there's right brain imbalance there's concentrative exercises the left brain form of thought is largely concentration and logic somebody who's super right brain imbalance would have to use concentrative exercises in order to bring their brain to a state of balance if your super left brain imbalance and you're a control freak um you know like many of the police and military individuals out there you would want to use meditative techniques meditation is the right brain form of thought that stops the the mind and the logical and analytical thought and just puts us in this the state of present moment awareness being in the now and you know looking at ourselves of just being with ourselves and i've talked about you know the importance of meditation in the past i've also talked about the dangers of excessive meditation and how the new age movement uses it uh to basically get people to stand down and not really take action uh but there is a positive and empowering usage for it of course and then the contemplative exercises where you're just actively um using uh daydreaming and um types of visualization techniques to work with both the um very uh uh image based and verbal based and uh you know logical based left brain in conjunction with the creative and intuitive and flowing and um you know uh uh uh open-minded aspect of the right brain uh to just um visualize scenarios and uh you know do things that kind of let you see infinite possibilities that's what contemplation is ultimately about it's it's just working with mental material it's like an active form of daydreaming so these these three modalities of thought concentration uh meditation and contemplation are all methods of balancing the brain depending on what type of um uh inherent situation is already present in the human brain in in the uh brain complexes so it's so important to understand this basic knowledge of self and how we work psychologically and mentally and these physiological processes and it's amazing that none of this is really taught in schools at an early age you know the school system obviously has no vested interest in wanting people to understand themselves because understanding yourself is empowerment and they don't want you empowered they want you to be a good little slave so you can come out of the school system and just obey and go you know do work for whatever my you know uh faceless corporations that you're gonna go uh beg for work for uh worship the almighty dollar and just you know spit out children and wash rinse and repeat the cycle all over again only self-knowledge is going to ultimately take people out of these forms of imbalance and people have to want to work with themselves they have to want to know themselves they have to want to look at themselves and we have to encourage them to do that as conscious people if you're already conscious and you understand how this dynamic works you have to share this knowledge with people you have to put it out there for their consideration in a way that they can understand it so the second part of this uh what i wanted to get into tonight is the concept that regardless of any of the abuse and trauma that we have undergone in the past as a species consciousness can trump all of that knowledge of self okay and then putting that knowledge into practical application through enough care and enough willpower which is what consciousness is really ultimately all about being aware and then doing something with that awareness will trump any of that trauma it will conquer any of that trauma so what we're looking at has that has been done in the human past that we've talked about for many many weeks on this show is genetic manipulation uh a dumbing literal dumbing down of the species physiologically through genetic splicing and and modifications and uh you know uh tinkering that really these beings had no right to do now people will think well this is the ultimate code of nature and you know once that's done there's nothing that can undo it and it just it's set in stone it's set a certain way it's like a computer code and that's just it and we cannot possibly outgrow that or you know overcome anything that's been done to us genetically and that mindset is nonsense it's a newtonian world view that is completely out of date in modern science most people still think that way because they have bought into this you know early late 1800s and early 1900s model of science and quote unquote evolution which i talked about extensively at the very beginning of this uh you know extended presentation series cosmic abandonment um that that this uh entrenched model of ancient science of ancient outmoded outdated scientific thought is still largely entrenched in the public consciousness because newer sciences and newer discoveries within science really take a long time to filter their way down from the scientific community into the public's hands and again i'm not talking about scientism i'm talking about real cutting edge science in many cases it takes a long time to really even come into public consciousness years and probably about two decades ago most scientists said that the gap was over 25 years now scientists are saying the gap is almost 50 years five decades and that's a conservative estimate literally like what is being discovered in real cutting edge science now will not really be understood the implications of it may not be understood by the general population for 50 years and they're saying that that gap widens each day as new discoveries are made so you know when i talk about these uh the science of epigenetics most people won't even have heard of it or not have studied into it or looked into it at all um and most people again they're still working with this outmoded newtonian view of um you know reductionist materialistic science which is completely out of date and uh it's just perpetuated as the entrenched paradigm because that perpetuates the uh you know disempowerment mindset that we're all locked into a way of being that human nature is a certain way our genes make us a certain way and that's it and there's nothing that anybody could do about that you're dealt that those cards and you have to uh accept that it's not the case ladies and gentlemen we can actually change those things through consciousness and we're going to talk about that when we get into epigenetics we'll be back after these words stay with us everyone [Music] welcome back everyone you're listening to what on earth is happening into the second hour of tonight's broadcast i'm your host mark pascio my website what on earth is happening.com just want to make a very brief correction i forgot to mention uh to get your tickets for the what uh for the uh for your mind three conference uh you can go to freermindconference.com i forgot to give out the conference website i believe earlier and again i i'm highly recommending people to go there who are going to attend the conference even before you make any travel plans get your tickets in advance and i recommend getting the all weekend pass only 130 for that package that's the early bird special on that so uh you could do that right now at freermindconference.com uh and uh of course uh in coming weeks we'll have a lot more information on this great event but let's go back to the cosmic abandonment presentation talk we were talking about epigenetics in the last segment and this comes from uh greek and latin roots this word the the prefix epi epi means beyond you know or past so um what we're talking about here is to go beyond the genes to go beyond genetics of course genetics comes from the latin term generi which means to make or to create uh and um you know of course that's what we're made of is our genetic material and it uh definitely does facilitate a lot of the characteristics and functions of the being of course but um a lot of people think that uh it's all set in stone and it's just the card that you were dealt with and you can't transcend any of those characteristics uh throughout the course of your life and this is the big lie this is the big lie put forward by newtonian science and darwinian evolution theory etc and epigenetics is an emerging science that really shows us that we are actually the writers of our own genetic code in many ways okay it isn't to say we can just snap our fingers and chain you know you know uh grow a sixth finger or something like that okay that's not what i mean by this it means that if you work in consciousness if you work with all the aspects of your consciousness your thoughts your emotions and your actions and you engage the true intelligence which is a combination of the logical intellectual side and the creative intuitive side of the mind and you you develop true care and then you put you know all of that all of your willpower into actually doing what you know to be the right thing okay and um living in harmony with truth living in harmony with natural law and being unified in consciousness in such that your thoughts your emotions and actions are not uh dualistic or not in opposition to each other and are not inconsistent with each other meaning as you think you feel and so you act and there's no contradiction there you are going to be engaging aspects of the life force energy that underlies everything in ways that most people don't think is possible i mean here's a simple example okay do you think that the people who are truly aware and whose minds are working correctly and understand what's going on in the world in life on this planet uh haven't been subject to the same types of physical detriments going on through things like um chemtrail bombardment in our skies spraying of heavy metals okay uh the poisoning of the water supply um the poisoning of the food supply you don't think look the the extent that i have awoken my consciousness look at all the abuse i formerly did to myself my body the types of the type of diet i was on previously underneath all of that was still a drive to learn to grow to understand truth to want knowledge and to want knowledge of self above all that all of those things all of those bombardments which can affect the genetics which can affect the mind can affect the brain still in the long term because of the persistence that i activated within myself in consciousness could not prevail could not keep me down it kept me down for quite a long time but eventually the true self burst through and it emerged stronger for the experience actually and what i'm what i'm trying to explain to people is the people that think oh it's just a hopeless situation because look at how we've been dumbed down look at how they've done genetic modifications to us in the ancient past yeah that's it's very dark information it's very dark knowledge to understand i personally accept this as what went down in the ancient past okay i think there's enough evidence to prove it personally many people will disagree with that however it's not something to feel so disempowered about that you give up and you say well since non-human entities are more powerful than us there's no way we could ever rise above this condition you know it's not the case consciousness will trump even all of that genetic modification that was done the thing that has to drive it is care again that's why the image that i picked for epigenetics was an image of all the chakras of a being lit up these energy vortices that are associated with different levels of glandular activity within the body within the center line of the body going up to the the crown of the head representing illuminated consciousness but you look at the the chakras the way they're laid out in this image on the right hand side on image uh 171 in the presentation slides and you see that all the energy is focused in the heart the heart chakra that you know this is what i call the eighth principle the lost principle of the you know underlying dynamics of natural law the underlying principles of natural law uh it's care that's the generative principle that's what really is generating everything that comes after that that feeling okay that it's a choice of what we want to care about you know it's like going back to the matrix movie when neo is having that conversation with the merovingian and he's trying to tell him oh it's all just about a causality and neo uh the morpheus character says to the merovingian everything begins with choice it's true the merovingian tries to lead him off that path because he's the dark occultist that doesn't want people to understand it's all about free will choice you know there is causality there is natural law at work in the universe and we are uh bound by that and we have to accept those consequences when we choose a specific behavior or action but it all ultimately starts with choice we have to choose a behavior and then natural law goes into effect natural law consequence goes into effect so what we care enough about to do in the world is ultimately what's generating the condition in the world this is a huge part of epigenetics and what is driving our care well the quality of our mind the quality of consciousness you know that's why the first principle of natural law is everything is mental the whole universe is mind everything begins in mind mind is what's ultimately driving the dynamic of what we care about what we think about drives what we care about and then we behave that's why one is the father one is the mother one is a considered a masculine quality one's considered a feminine quality and then you know you have the um behavior is the ch the male child of the byproduct of that quote marriage this is the trinity this is what consciousness is all about so you know i think it's a very highly appropriate image compared to the very scientific you know double helix ladder twisted twisted ladder dna image there on the left because the energy is coming from the heart care is the underlying um the underlying dynamic that's going to create anything that we experience in our life that's why i call it the lost principle because so many people don't care you know that's been lost it's like the lost word is no so few people are saying no when their rights are violated that that's considered the lost word nobody uses that sacred masculine dynamic of saying enough is enough and i'm not going to take it anymore you know they just stand down you know and the sacred feminine principle of care is often lost that's all i call it the lost principle of natural law so we need to develop that care if we're going to engage epigenetics ultimately it does begin everything does begin with choice and that's a mental process which again is why mind control is such a powerful uh set of factors when it comes to the controller's um you know game plan their methods of manipulation to go to work on the human mind so that it stifles the care and ultimately they want to destroy people's care so an individual that i want to just recommend and again i can recommend an individual without agreeing with every single thing that he says again people will say oh i don't agree with this aspect of his work so this guy's got to be some kind of an agent or working for the bad guys not everybody is going to agree agree with everything someone says i don't expect everybody to agree with everything that i say okay i'm pointing out a high quality of work that i feel people will benefit from understanding and you take what you will from that and you leave what you feel is inaccurate or you know might lead someone astray in a certain way i think personally certain people in the field of studying uh you know consciousness can become a little bit too new again to right brained i feel the gentleman i'm going to recommend is pretty balanced and is on point when when it comes to his work in epigenetics and what he calls the uh biology of belief which is the title of his book his name is dr uh bruce lipton and bruce lipton wrote the book the biology of belief he has a lot of videos out on youtube i highly recommend people check them out because it's all about how ultimately consciousness is stronger than the material world of genes and if we want to change what's going on in ourselves we have to change what's going on in our mind so we'll pick that thought process up on the other side of this break ladies and gentlemen stay with us you're listening to what on earth is [Music] happening [Music] welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pacio my website what on earth is happening dot com we were talking about epigenetics and i was recommending some of the works of dr bruce lipton his book biology of belief i think is an excellent book that talks about epigenetics and the power of consciousness to actually uh change everything that we are experiencing in life including ourselves and you know epigenetics means to go beyond the genes to go beyond the physical matter that we think is just directing everything that goes on here it's not really the case it's the facilitator for it um it's uh what makes the physical experience possible is the genetics the consciousness is what's driving the genetics that's the code that uh ultimately underlies all of it and we are the the writers the controllers the directors of that code of that story and we can change what actually manifests by changing the the uh quality of our consciousness and that's what this book kind of gets into it talks about how um human quote uh the human condition uh is d lar very different than what people generally think of as quote human nature i've discussed this a lot in my work where i don't think there is any such thing as human nature as far as being good or bad um it's all about the conditions that result as a result of what is programmed into the individual if anything human nature is that we are a programmable species that is the nature of our actual um framework uh the physiological framework that we are born with that we can be programmed the question then becomes how will we be programmed what will be programmed into us what kind of information will we take into ourselves what kind of informations information will other people instill what we would take in through food and diet you know water etc you know again that old adage of quality goes in quality comes out garbage goes in garbage comes out um in that respect we are like a programmable computer if you put a good file format and a good operating system uh you know on the drive and then good programs that are written bug free then you're gonna have good quality output uh on that computer if those things are all corrupted you're gonna have terrible garbage output on that computer humanity's similar to that not again saying that we are computers saying that we work like that so the conditions are going to also influence the result and that's why they call it the human condition we improve the the condition by improving consciousness which then helps to improve the condition even more it's a feedback loop again another big um uh aspect of bruce lipton's work is the audio series um wisdom of your cells again i can't recommend that one highly enough either you have to check that one out wisdom of yourselves is a great audio series by bruce lipton that gets into epigenetics i again highly encourage people to check out his youtube videos as well and again you don't have to agree with every aspect of what the individual is saying in every part of the work that he does i think these are uh decent works that he has put out that explain epigenetics and i take that and then move forward with that information and if he says something i don't particularly agree with i don't have to accept everything that the man says nor does anybody have to accept anything that anybody else says you can take what resonates in truth and you know set the rest aside as as they say so um that's uh my recommendation for who you should check out um and there are probably some other people if you just type in the term epigenetics i'm sure many other people are getting into this topic now but uh lipton kind of pioneered this especially as a activist getting out there and uh giving presentations and talking about this uh dynamic actually got a chance to see him live uh just uh outside of philadelphia in haverford and uh he was it was a very good uh lecture that he gave um near near philadelphia um on this topic of uh moving beyond you know what people perceive as limitations through genes and you know how the whole medical industry is based on this whole uh you know we're gonna just affect the matter you know we're not gonna treat the whole being you know we're not going to actually take the whole being into account their conditions their consciousness their state of mind their stress level etc all of that you know it's just like here's a physical mechanism if we can change this we'll change the result well reality doesn't work that way folks we're not just machines you know we're not biological machines this is an old outdated newtonian notion that's been brought into other sciences like the the various fields of medicine and it is an inaccurate paradigm in general it's built upon fundamentally flawed axiom the fundamentally flawed axiom that matter is superior to everything else that matter is prime okay and as we've talked about here that's one of the huge things that this currently entrenched paradigm wants people to continue to accept because it doesn't want us to understand the role of consciousness and spirit involved in every aspect of our lives and how it's not really separate from the world of manifested matter the world of manifested reality it's what's ultimately driving it so um that's really what i wanted to say on epigenetics and um i want to get into the things that are going to really be required on our part to change if we're going to change the condition that we have been thrust into again a big part of this is not our quote fault okay what happened happened and it was done by beings that were um at that time certainly technologically superior to us certainly mentally superior or i should say just intellectually superior not in real intelligence not in holistic intelligence because if they had any holistic intelligence they wouldn't have done the things that they did but um i can't let humanity off the hook entirely because we are responsible for the perpetuation of the current human condition because we have not developed the intelligence the care and the willpower to change the current condition we um simply don't care enough in the aggregate as a species to change what is happening through our behavior and our choices we're in too much fear still as a whole to say this system is junk it always has been junk it is junk now it always will be junk for as long as it is perpetuated we need to stop fearing the chaos of the collapse of this system we have to allow that collapse to go on you know we need to set up other solutions in uh the process of that coming entropy you know and i'm all for that chaotic transition personally you know i think that order can emerge for out of chaos i think that the immoral systems that we've built up we have to stop staying attached to and let them fall and then we will build something that is more orderly on the other side and i'm not saying it may not be a painful chaotic transitional period in between but the problem is as long as people keep fearing that slavery is going to continue you know i'll take that chaotic painful transition any day over the continuation of slavery you know that's my choice i'll choose freedom any day but many people are still too in fear to make that uh that correct choice that informed and correct choice that conscious free will choice you know they want to continue to look for protection they want to continue to be dependent they want to continue to try to absolve themselves or abdicate themselves from their own personal responsibility in life and when you do those things slavery is all you can manifest that's all you're going to get so what this next section i call um respect remembrance and responsibility the three r's okay respect remembrance and responsibility now what defeats respect true self-respect what defeats it is the dynamic of self-loathing self-loathing is a and we're on slide number 173 now what creates self-loathing is the trauma that previously went on in someone's life and then when they id when they identify as somehow being deserving of that of that you know horrible events that were done to them uh it was done maybe because i wasn't good enough uh you know uh i wasn't smart enough i i wasn't worthy enough these feelings of unworthiness okay is the underlying psychological condition that it makes people try to abdicate their personal responsibility because they they don't have enough respect and self love for themselves okay all bullies are like this all controllers are like this all victims are like this okay ultimately a bully a controller a dominator hates themselves ultimately a victim hates themselves nobody who loves themselves could try to push other people around or sit there and take other people's abuse if you truly love yourself and you're not in a state of self-hate or self-loathing then you're not going to try to control anybody else nor you're going to accept somebody else's control you're not going to play any part of that game we'll pick this dynamic up on the other side of the break folks you're listening to what on earth is happening we'll be right back [Music] [Music] [Music] [Applause] there's a wall between us you know it was so [Music] that there's nothing wrong [Music] with this code of silence and it can't go on welcome back everyone you're listening to what on earth is happening here on republic broadcasting i'm your host mark pascio my website what on earth is happening dot com before the break we were talking about the psychological dynamic of self-loathing just hating yourself and so many people are trapped in this condition subconsciously psychologically and don't really even know it or understand this condition um this is slide number 173 and i'll just basically read what's what's on the slide it says self-loathing is the underlying psychological condition that causes people to attempt to abdicate their own personal responsibility to exercise conscience and to fall into patterns of willful ignorance order following and the justification of immoral behavior that's really what's going on in the world folks you know order followers just doing what they're told other people putting up with it people excusing this behavior thinking that it's okay that they have the right to do this somehow offering justifications for it not exercising conscience other people trying to hand off or pass on or abdicate their own personal responsibility to do the right thing or to be responsible for themselves to someone else you know this all stems from not caring enough about yourself not having enough self-respect i'm gonna end the presentation part of tonight's show with uh this topic of self-loathing and next week we're gonna get into this dynamic of the three r's respect which is what will ultimately heal self-loathing remembrance which is understanding knowledge of self and responsibility understanding that ultimately you are truly and totally and ultimately responsible for your own behavior and you cannot pass that responsibility or separate from it or alienate yourself from it in any way and you know those three things really constitute a solution when it comes to a deep understanding of what's going on in our world what's going on within ourselves and understanding the dynamic of natural law so um continuing with this slide self-loathing is created when earlier trauma or traumas have been suppressed and buried deep into the subconscious mind instead of being confronted dealt with and healed okay working your way out of the um abuse victim cycle through applied knowledge care and willpower that narrow path that we talked about regarding how to get out of the abuse victim cycle the effects of such unresolved trauma often take the form of feelings of inadequacy and unworthiness whether real suggested or imagined again can a dominator really like himself and who can like themselves if they don't really know themselves who can love themselves if self-knowledge isn't present you know could you really love someone you don't know no of course not you have to know them you have to know something about them in order to express feelings of even like care or love so people don't have a a deep relationship with themselves and in many cases that's why they don't love themselves they're trapped in this these feelings of inadequacy and unworthiness and so they either strike out against others or they turn inwardly against themselves and then imagine that they deserve more abuse of course neither one of those things is true a dominator has no right to do what he's doing and you know somebody sitting back just taking abuse is indirectly doing a wrong and a harm to actually everybody around them by not standing up for what's right for their rights and the rights of other people you know people sitting there watching other people be abused or just taking abuse themselves or indirectly doing something that is harmful to others that's why you know i always tell people people who do not understand human rights who do not understand the difference between right and wrong and want to remain in that level of ignorance are ultimately doing wrong to other people i don't care what somebody does to themselves their own body but there are levels of ignorance that you don't have a right to you know people say somebody can do whatever they want with their own mind think whatever they want well that's not really true it's not really the case there are mode there are modalities of thought that are wrong and that includes condoning violence against other people that can includes accepting violence being done to people in society in general and saying i don't care that's an act of violence in and of itself not to care about injustice is done to other people you think of it that way how many people are really doing violence indirectly indirect violence through their total not caring of what is happening with other people the injustices that are taking place with others that person's doing indirect harm because they by their ignorance are perpetuating those injustices and allowing them to continue so um the effects of these unresolved traumas take on the forms of feelings of inadequacy and unworthiness whether they're real suggested or imagined and again this is on both side sides the left brain imbalance dominators and the right brain imbalanced uh slave thinkers okay so moving on to slide 174 it's the last slide and then i'm going to start going to the phones for the time that we have left um i've just lowered prison bars like the door of a prison over the top of the image that's is this golem creature this totally destroyed self-loathing individual that says i have suffered therefore i shall cause suffering for others that is the very dynamic that perpetuates the prison that perpetuates slavery somebody who doesn't care is only focused on themselves doesn't care what anybody else is going through doesn't care what what injustices are taking place toward others uh or what's going on in the world and is totally focused on me me me me me which is satanism thought process it's satanic thought uh most people are in this modality of satanic thought from the minute they wake up they think about nothing but themselves they don't get involved in um you know communicating knowledge to anybody else and that very dynamic of i'm only concerned about me and since i've gotten a raw deal i'm gonna treat other people the way i was treated instead of treat them the way i would rather be treated um then that's what perpetuates the dynamic of slavery and and imprisonment and disempowerment next week we're going to get into again the three r's self-respect self-knowledge remembering who we are and personal responsibility these are the things that heal self-loathing and bring about true self-love so that we can effect a solution understand our own sovereignty understand how natural law works and then live our lives in harmony with it and ultimately end slavery by doing so so uh with that having been said i'll leave it for there and hopefully next week we can wrap up the official part of the presentation and then in coming weeks we'll move on to some supplemental material regarding cosmic abandonment and then future weeks i'm going to be moving into some of the dynamics of order followers and their thought processes and what we need to do to try to change their state of consciousness or influence a change in their state of consciousness i'm going to talk about some other social dynamics down the line that are going on in society that are really negatively affecting our society and keeping it where where it's at which is exactly where we don't want it to be which is a state of slavery and disempowerment but um next week more in the solutions section on cosmic abandonment for now let's go to your phones for the time that we have remaining let's hear from ivan in phoenix ivan you're live on what on earth is happening welcome hello ivan are you there maybe you should be oh hi you took me uh early today there you go yes i'm gonna take some calls till the end of the show and you're the first one in the queue my friend what do you have for us tonight oh okay um well uh i had mentioned to uh you and barb about the new film um interstellar in theaters yes you got a chance to watch that yet i have not yet i uh have it on my to-do list i'm going to get to it soon okay well this film is pretty interesting it uh again somewhat touches on what you're talking about here um again the general premise is that uh the world is uh can sustain life pretty much and instead of fixing the planet which they basically can't they're looking to go off world and find another place to go and ruin basically but it's pretty pretty interesting the first thought that i got when i saw this film even though they don't mention it i thought of uh you know how we in the truth movement or researchers pretty much we we look at things in a bigger picture in a holistic way right and i'm looking at mars how mars you can kind of say there was probably life on there and the beings on there screwed up that planet and then left that planet to find someplace else and kind of i guess came here and now whatever possible you know i think it's very possible they just moved a little bit in uh inward toward the next planet in the uh solar system who knows what happened on the other side of mars that was more likely than not a planet that became the asteroid belt through through some type of cataclysm hey ivan hold on the line with me i'll i'll hold you over through this uh break okay ladies and gentlemen you're listening to what on earth is happening we'll be right back with more of your calls to close out the show [Music] oh [Music] [Music] welcome back everyone final segment for this edition of what on earth is happening this evening we're taking your calls we were talking with ivan in phoenix ivan are you still with us yeah i'm here okay you can go ahead and continue the thought that you were on before the break okay um not to give anything away uh with the about the movie but basically um i saw the film twice and the second time uh while watching the film i can sense how the director christopher nolan took three hours and for three hours he was able to take the average movie gore and attempt to bring their consciousness from a third dimensional consciousness and even contemplate a fifth dimensional uh realization because the movie really gets trippy it's a little bit a lot 2001 space odyssey so that's all i want to say about it but you really got to have your mind open and just aware because things that are happening there and thrown at you your average movie goers kind of like makes no sense what the heck but highly symbolic highly allegorical if you're comparing it to 2001 i'd consider that a good compliment to the movie because uh that i consider to be one of the best films of all time and uh that definitely makes me want to go check it out right especially after reading one of the reviews from the daily mail and they trashed it so i was like oh there you go negative review go see it you know definitely going to take your recommendation yep well that's pretty much all i wanted to contribute with uh today so you can get a few other calls in before the show's done absolutely ivan always a pleasure to hear from you my friend all right take care mark you too all right let's hear from ailey in connecticut you're live on what on earth is happening welcome to the show hi mark hi how are you i'm good um thank you for having me on your show um i just want to say that um from having listened to quite a bit of your material now it seems to me that your position is that all forms of control are inherently slavery is that correct sure well you've expressed in your natural law seminar that it is critical to establish internal sovereignty as this leads to order and self-control um i found myself experiencing confusion when i have considered an application of the law of correspondence to this dynamic um how could it be accurate to make an um axiomatic statement statement that all forms of inter external control or slavery if we see a very clearly laid out example of the inner world so to speak where control leads to harmony and order so as you have said as well if this self governance is not applied there would be they're the interior anarchy which is tantamount to internal confusion um you're you're you're likening external control to internal control when in fact they're really opposites of each other they're not using the same dynamic which is external control is coercion based whereas to use the same word control to to refer to you know the dynamic of self-control perhaps self-mastery might be a better term for it it's knowing the self to the extent that um you are not being owned by the uh internal forces that dwell within the ind the individual uh consciousness you are directing them you are using them you are putting them into effect and as such you are uh exercising um mastery and skillfulness of using those whereas not knowing how to use them places you essentially at their mercy and they control you so that's how i would kind of rectify that because it's kind of like a language thing where you're you're kind of uh uh uh equating it with the kind of external control that is based in coercion and it's not that same dynamic i hope that kind of clears it up does it um well i just i'm curious how is or why is all control abuse because it's based in coercion and the removal of free will or the attempted removal of free will by one being against another that makes it inherently wrong because you're taking something it's theft you're stealing something that doesn't belong to you which is someone else's free will choice so long as they're not harming someone else all external control is based in the dynamic of coercion coercion is a form of theft and therefore wrongdoing so that's all pretty you know uh explicitly laid out in the uh natural law seminar and uh if um that wasn't a uh in-depth enough coverage of the the basic dynamics of natural law i would highly recommend that you go back to the podcast and go through the sections uh i did many podcasts on natural law i think it was back in the 60s or 70s i don't quite remember off the top of my head maybe a little after that but um you can go back in the podcast archive where i cover natural law pretty extensively in depth and talk about a lot of those dynamics there so more questions um relating to that what about anarchy in relation to freedom because um like using the law of correspondence as within so without i i just i just don't see how internal anarchy is any different from external anarchy because i believe that all it's all this you know the self really if we want to get back to like um oh like i guess oneness people would call it well again i'm using that term internal anarchy in the literal sense of the word so if we break down the word anarchy means no ruler or no master if there is no internal mastery that means that the house of the self is open to control or rulership from without if you are not applying then the knowledge of self for the manifestation of or or the realization of your own internal sovereignty someone else or of some other force is going to come in and and set up camp there it's like an abandonment of a house it's an abandonment of a piece of property you know you're not setting up rulership or possession within that that entity within that consciousness and therefore you know a squatter is going to move in and say well i own this now it's it kind of works like that dynamic when i say internal anarchy i mean literally there's no ruler or no master at home in the house of self and that's a very bad dynamic it's a bad thing so in that sense the word anarchy becomes anarchy becomes negative if it's inwardly anarchistic we need inward rulership of the self again you have to see the terms rulership control or mastery in a positive sense here because when they're applied within to the self that is what is based in knowledge not coercion that's what's what's based in nature not a perversion of nature and um i would the main thing that i would recommend at this point if you do have kind of grasp the whole concept of correspondence i would start to get into some occult writings that deal with these topics i think a few of the books that um i recommend in the natural law section might help and then you could branch off from that to go into some other works and uh you know some authors that deal with that topic richard weatherill is one he's not basically an occult writer but you can get into some of the uh writings of rosicrucianism that deal with a lot of these topics many free masonic authors have dealt with these topics as well it's probably where i would recommend for you to go next but the first place i would say is the extended natural law uh section of my podcast and as always i always recommend people to start at um at podcast number one and uh move forward from there to get a uh a general holistic uh um tapestry of my work so allie i want to thank you for the call and i'm gonna round out the show by going to a caller over in poland bart from poland you're live on what on earth is happening welcome hello mark welcome to the show oh yes can you hear me can you hear me yes i can you're coming through well okay first of all thank you very much you are back online and i would like first of all i would like recommend a few movies related to psychopathy or their following and justification so they are related to nuclear horror cows so this is face safe from year 2000 okay the u.s production and then we have threats this is uk production from year 9 1984 and of course uh the last one is the let's say a black comedy uh doctor strangelove yeah oh absolutely uh directed by stanley kubrick no less yeah yes great great recommendations okay thank you and the last question mark as you were the member of the church of satan so have you met such strange behaviors of some you know members that they for after some time they are starting having let's say homosexual tendencies we're out of time for this edition i'll try to answer that on the next show but ladies and gentlemen that's all the time we have remember there's only two mistakes you can make on the path of truth not starting and not going all the way we'll see you right here next week thanks for listening everyone have

What On Earth Is Happening Show #176

Topics: *Cosmic Abandonment, Interference Theory Of Human Origins, The Unwritten Story Of Our Future, Self-Loathing as a major factor which holds Humanity in a state of Slavery, The 3 R's, Self-Respect as the antidote of Self-Loathing, the Infinite Worth of the Self/Individual, Working with psychological Shadow Material, Remembering who we really are, the 3 Aspects of Consciousness and their Fulfillments and Failures, Understanding Individual Sovereignty, Personal Individual Responsibility for choosing Right Action over Wrong Action, the Inability to abdicate Personal Responsibility to someone else, Humanity's Critical Moment of Choice to enter Cosmic Adulthood, Understanding Natural Law as the Ultimate Solution and the Key to unlocking the Human Condition, the Soul Mission to End Slavery on Earth, the Higher Consciousness of seeing Humanity as one family, the Power of the Imagination in manifesting Freedom*

freedom mat that's what it's all about welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of the choice and now here is your host Marc Pascoe welcome one and all you're listening to what on earth is happening right here on Republic Broadcasting I'm your host mark passio my website what on earth is happening dot-com the network's website Republic Broadcasting org today is Saturday November 22nd 2014 this show is live every Saturday evening right here on our BM rbn from 10:00 p.m. to midnight Eastern Time that's 9 p.m. to 11 p.m. Central Time we have a great show lined up for you here tonight we're going to be continuing and hopefully finishing our cosmic abandonment extended presentation on the air tonight cosmic abandonment is a presentation that explores the connections between the interference theory of human origins and the current human condition that we face here on earth in the present day tonight on the show I'm going to be continuing and finishing up with part three of the cosmic abandonment presentation called the unwritten story of our future tonight I'm going to be talking about solutions to the human condition to the problem that has been ongoing for hundreds of thousands of years on this planet and that problem ultimately comes down to self-loathing a lack of self-respect due to the abandonment issues that this species has faced and tonight I'm going to be talking about the solutions in the form of three R's as I call them respect remembering and responsibility that's coming up on this edition of what on earth is happening I want to give the call and number right at the top of the show because I will be taking your calls in our number two the call and number two join us here is eight hundred three one three nine four four three once again the calling number to join us for your questions or comments in our number two on what on earth is happening is toll-free 800 three one three ninety four forty three just a couple of quick announcements before we get started the free your mind three conference is going to be the definitive event dealing with consciousness mind control and the occult in the Year 2015 certainly here on the East Coast free your mind 3 coming at you in April of 2015 April 10th 11th and 12th that's Friday Saturday and Sunday April 10th 11th and 12th 2015 right here just outside of Philadelphia at the Sheraton Bucks County Hotel at 400 North Oxford Valley Road in langhorne pennsylvania langhorne is just north of the city limits of Philadelphia the speakers already confirmed for the freer mind three conference on April 10th 11th and 12th of next year Bob Tuscan Clint Richardson Curtis the illuminated one Davis Dennis McKenna Derek Bros ed fortune than the New Jersey Weed Man freighter X Freeman fritz Spring Meyer J Parker John vibes Josie the outlaw whales Larkin Rose mark Devlin and Mark passio an all weekend passed to free your mind 3 one of the most affordable three-day pass ticket prices for a conference of this magnitude only $130 tickets are on sale now and the best way ladies and gentlemen that you can support the efforts of the free your mind conference its speakers and its organizers is to buy your ticket in advance do not wait until the day of the conference get it now not even waiting till the new year now is the time to buy your tickets for this event if you know you want to go to the philadelphia area and be present in person at a great event like this where you can network meet speakers meet all other people of a very like mindset to yourself and carry those relationships on into the future the free your mind conference is going to be the event of this magnitude and type anywhere in the world next year so get your tickets in advance at free your mind conference calm free your mind conference calm is the website okay with that having been said I have a couple more quick event announcements there are still what on earth is happening calm t-shirts available what what on earth is happening t-shirts available I should say promotional t-shirts that I printed for the demystifying the occult seminar in a Connecticut in October still have a plenty of t-shirts leftover from that event so if people want to receive a wat on earth is happening promotional t-shirt as a gift in return for a voluntary donation to what on earth is happening you can go to the news section or just click on the link that is at the very top of the latest news items on the left-hand side of what on earth is happening calm you'll see it says what on earth is happening promotional t-shirts now available you just click that link you could get a couple of images of the shirt design and then you click the email link that is listed there to email me about how to go about receiving one of these shirts as a free gift in return for a voluntary donation to what on earth is happening there is also a donation button on the left-hand side of the what on earth is happening comm website if you feel that you have received value from the information that has been shared on both the what on earth is happening radio show and the website through my video videos and podcasts you can feel free to make a voluntary donation to help support my work so that I may continue that work into the future so with that having been said let's jump into the material for tonight's show as always there are images for the show posted with both the live show and with the podcast tonight podcast will be podcast number 176 we're slowly working our way up to that 200 mark so you can if you're listening live you can go to the what on earth is happening radio show page and underneath the player for the tonight's broadcast you'll see images for tonight's show and then underneath that you'll see cosmic abandonment slides part 1 & 2 we're well into part 2 and we're going to be beginning tonight slide number 174 now if you don't want to follow along with the links the numerical links that open up like a little pop-up window right in your browser you can click the link that says all cosmic abandonment slides download them here and that's a zip archive that you could decompress on your own computer and then open up in whatever image viewer you happen to prefer and follow along with the slides that way so let's start at image number 174 which is the slide that I left off on at the end of last week's show in at least in the presentation section of last week's show we were talking about self-loathing as being one of the underlying if not the very most important underlying psychological conditions that has led to the perpetuation of the current human condition of slavery only a people who are self-loathing and ultimately do not have a deep personal relationship with themselves and their own inner aspects of their personality and psyche can allow themselves to continue to be enslaved there continue to be harmed or continue to harm themselves there has to be an amount of self-loathing present within the personality within the you know the nested shadow material of the psyche of the individual self-loathing is the ultimate condition that we have to overcome as a species if we're going to free ourselves and operate on this planet as we should be operating in harmony with natural law and as sovereign beings so what is the force that we have to understand that overcomes self-loathing we'll pick that up right on the other side of this break ladies and gentlemen you're listening to what on earth is happening we'll be right back we don't need kids welcome back everyone you're listening - what on earth is happening here on our DN I'm your host mark passio my website what on earth is happening dot-com we're talking about the over the underlying condition of self-loathing as being one of the prime psychological conditions that causes people to continue to accept and remain within the state of slavery as a species slide number 174 I have the the slide is about self loathing and I have the image up there of a golem creature a creature that's made by someone else a creature that doesn't even think its own thoughts has animation kind of breathed into it by its master and it's just a like a flesh robot and it's saying I have suffered and therefore I shall cause suffering unto others you know what is that a being that cares about itself is that a being that really has any developed self respect you know no it's a being that is ultimately trying to say I'm not truly responsible for what I do or what I caused in the world for what I put out there into the universe and they think good things are going to happen to them it doesn't work that way folks not according to the principle of Correspondence under natural law what we put out is what we're going to receive back from the universe you know so as long as we're in a condition of self-loathing expect more suffering heaped down upon you because of how you think about yourself self-loathing is the underlying psychological condition that causes people to attempt to abdicate their own personal responsibility to exercise conscience and to fall into patterns of willful ignorance order following and justification of immoral behavior only a self-loathing individual will fall into those patterns willfully remaining ignorant continuing to do things that they know are just horrible for them following orders of other people who they think somehow know better than them and they just want to follow them because they don't want the responsibility of choosing right over wrong for themselves and justifying their continuation of their their choosing of immoral behaviors self-loathing is created when earlier trauma has been suppressed and buried into the subconscious mind in order for someone to truly hate themselves there had to be at something traumatic happened to them and they don't want to deal with it at a conscious level they want to bury it into the subconscious keep it there and never deal with that shadow psychological material again the brilliant teacher Michael tous Ariane has likened this to continuing to eat off of a dirty plate day after day after day without doing any of any cleansing in the mind he likens you know compares the word sanity with sanitation both referring to cleanliness to clean up something is to make it sanitized well that's what we have to do to the mind and make the mind sane you know we need to work with that shadow material clean it up deal with it confront it face it recognize its presence and then work with it we don't want to do that the mind is going to remain in a totally deplorable condition and it's going to be largely operating at the level of the subconscious and therefore it's going to own our behavior without even us really consciously being aware of it and then we just fall in the same patterns over and over again so self-loathing is created when this earlier trauma has been suppressed and buried into the subconscious mind instead of being confronted dealt with and healed the effects of such unresolved trauma often take the form of feelings of inadequacy and unworthiness whether real suggested or imagined and I want to focus on that term unworthiness because that is the key the thing that we have to overcome as a species so many people think that humanity's nature is this way is what we have allowed to basically happened to us to the state that we've allowed ourselves to come into and it's not our nature it's our condition there's a huge difference between the nature of something and the condition it happens to be in you know you could take a silver coin that it's its basic nature is it's made of silver but if that coins extremely extremely tarnish you can't maybe maybe can't even tell that it's made of high-grade high-quality silver okay I mean it's just an example it's not saying that that has any actual intrinsic value what has real true intrinsic value is human beings you know we are the thing that we have to consider truly worthy of infinite worth as well as I'm going to get to you know that's the that's the key to all of this is a total reevaluation of what it really truly means to be a human being and stop you know having this negative poison worldview that human nature is somehow demonic or horrible or evil when that's not the case at all now that's not to say let people off the hook for their immoral behavior because they've been conditioned into accepting things as they are we should be striving to change that because that can be changed so you know it all comes down to healing that self loathing which is what we're going to talk about today and the only force that really counter self-loathing is self-respect and self-respect is about moving to a different perspective the word respect is derived from the Latin prefix re meaning again and the Latin verb SPECT RA meaning to look at to look upon to look at so we put them together RIA ghin and SPECT re look at respect to look at again to take another look at well what are you taking another look at of course for self respect you have to take another look at yourself reevaluate yourself honestly without lying to yourself and say what have I allowed myself to become what condition have I allowed to take root and if you honestly want that condition to change for the better then you have to develop self-respect by looking at it not trying to push it away and then working with it working with that painful shadow material which and there's the problem most people don't want to do that they'd rather try to run away well there is no running away from it how could you run away from the self you can doesn't make a difference where you go it's gonna be there with you because it is you so good luck trying to run away from it good luck taking the escapists approach that's what religionists do that's what New Agers tend to do you know and I'm not making it 100% general but a 100% blanket statement I'm saying you saying that as a generality the very right brain among us often fall into that that trap and you know the dominators of the world are both left and right brain imbalanced that's what people have to understand they're left brain and balance when it comes to the you know outlash that they want to take against other people you know for them hating themselves you know they think they're in control of other people this petty sense of illusory power that they derive from you know doing violence unto other people but then you have to understand they're also in a very twisted right brain imbalanced mindset as well because they hate themselves they have no true self-respect they don't have any knowledge about the self and they're willing to basically subjugate themselves and enslave themselves so whoever's giving them their orders as long as it means I don't have to think for myself and I don't have to engage my own personal responsibility in my own personal judgment to choose from that to choose the difference between right and wrong behavior for myself as an individual see when when you really start to gain true self respect you look at yourself and you say is the action that I'm taking does it fall within the parameters of natural law as something that I have a right to take is it an action that does not cause harm to others and therefore it's a right or is it something that does do harm and violate others and therefore it's our wrong we'll pick this up right on the other side of the break don't go anywhere folks you know today disguise at night today yeah welcome back everyone you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening dot-com we're talking about the power of self-respect to bring balance to the psychological condition of self-loathing as one of the ultimate solutions to overcoming the current human condition of slavery because only people that don't have a truly developed sense of self-love could continue the condition of slavery to continue to perpetuate it or could continue to accept it and that's the thing that's the harsh truth that most people don't want to hear and hate me for saying but it's true nonetheless ladies and gentlemen only a species that hates itself could allow itself to remain enslaved and participate in its own enslavement and if you just sit and think about that statement for a little while quietly with yourself you'll realize that it cannot be any other way therefore the solution is love but the solution is self-love before any other form of love you have to come to a personal relationship with yourself by looking at the shadow material only self-respect can heal self-loathing and therefore to help to put humanity on the path to healing and conscience and freedom nothing else can do it and let me tell you what the deep inner knowledge the core underlying truth principle if you will that has to be understood when it comes to the dynamic of self-respect as being the thing that can heal self-loathing you have to understand that the value of the individual is infinite that the individual has infinite worth it's not about a group it's not about society it's not about anything else but understanding if you take hold of your infinite value the infinite worth of the self and you recognize that there's nothing that is more important than that you're gonna be on the path to healing to understanding and ultimately to true freedom but so few people care enough about themselves in that regard to want to look at the things that are uncomfortable about themselves that they want to try to run away from that they want to try to escape they think that they can keep pushing it off and pushing it off and pushing it off well eventually that big beast comes up from behind you and he eats you when that's your attitude about that shadow material it doesn't go away it grows and it becomes more and more powerful as you ignore it this is what all the older followers have done this is what all the willing slaves have done that perpetuates this condition the super left-brain among us the order followers they want to just do harm to other people because they think that they can and they can get away with it all the people who want to sit back and take it and say oh we just need to watch you know we just need to sit back and see what how it all plays out you know not even being active participants in life what can I do mentality you know I don't want to get involved mentality all right brain imbalance and it needs to imbalance dynamics play off against each other to create a world of total enslavement and all of this because yeah it stems from what originally had been done to us in the past but as I said we talked about all of that we brought out all that shadow material we brought out all those things that those nasty things that nobody wants to talk about or even consider that has happened to the human species over vast stretches of time genetic manipulation enslavement you know being made to think of other beings as as gods somehow that have some kind of a actual right to rule over us and then perpetuating that system down through government and religion and kingship etc those systems being handed down to us by those beings and you can you know make the argument all this was done to us but like I said this is the solution section this isn't about crying in our milk folks you know as a little kid you know our childhood is over now it's time to actually recognize what's been done and man up and deal with it and say hey this is reality this is how it really went down what are we going to do about it now no use living in the past and saying woe is us it happened already nothing you could do about the past the past is done it's that which is it's the truth you either recognize it and accept it and then move on and do something about it or you live in a state of denial this is about looking at the truth recognizing it's it's a horrible condition and saying but what are we going to do about it now in the present moment we're all power lies to create change to create positive lasting change the answer is recognizing the infinite value of an infinite worth of the individual see that that's what if people ask me one of the things that brought me up out of my grave and my total unconsciousness that was it I was laying there in total depression recognizing what I had partaken in recognizing what kind of a person I was and I said well you could deal with this two ways you could lay down and die and let the world beat you or you can say I'm worth more than this they didn't beat me they may have used me for a time but I love myself more than that and I'm going to rise above that condition because I have the strength and I have the willpower and I have the self motivation and I have the self-love to do that these are what the solutions are so you know that this is all about that one overarching principle the infinite worth of the individual the infinite worth of the self so that's slide number 175 about self respect and you could put the word self love in place of that they're equivalent as far as I am concerned self-respect is self-love and vice versa because it is turning the attention toward what really matters what's going on within and ultimately that's a process of remembering again this is the 3 R's respect remembering and responsibility when you start looking at the self you start to discover what the self really is the deep core aspects of it that underlie consciousness that are the expressions for consciousness again people will say you know the ancient mystery traditions have said to know the self is the ultimate commandment you know that's what we're here for it's the ultimate dynamic that's going to bring about healing and freedom that's why it was kind of their mantra you know know the self know the self and you will know the universe and the gods only knowledge the knowledge of truth is going to set us free that's it nothing else can do it so this is a process of remembering who we actually are there we are a byproduct of our thoughts emotions and actions that's what ultimately what we express in the world that's how our consciousness expresses itself and either we come to a fulfillment of those aspects of consciousness or we fail to develop them again I really like the way the teacher Michael - sorry on the teacher researcher kind of has this idea that we're here to develop a soul a lot of people insist we have a soul or we are a soul you know maybe we're here to work upon the soul to develop it further you know it's not just the stat thing it's something that you work upon like a sculpture of some kind and you put the more energy and attention and focus you put into it the better it becomes so if we work with the thoughts emotions and actions and we develop them to their full potential we're developing the soul and if we don't we're going down deeper and deeper into darkness and that suffering in that pain is good we're gonna have to learn through that pathway that dark left-hand path instead of taking the straight albeit quite narrow road directly to the truth if we develop our thoughts we arrive at knowledge we arrive at a deep understanding of what is going on around us and why we're here and who we really are and then we will ultimately use that to do the right thing in the world which is what wisdom is all about right action if we fail to develop our true holistic intelligence we're going to be stuck in a condition of ignorance which is where most of humanity is clinging to illusion vested in the illusion wanting to prop up the amoral system that exists all around them believing in fault the false idol of money above everything else an authority 100% lost in the land of illusion attached to things that don't even really exist in nature will pick up this all-important process of remembering it's all about knowledge of self folks stay with us we'll be right back welcome back everyone you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening calm we're talking about solutions to the human condition of slavery and we talked about self-respect and recognizing the infinite worth an infinite value of the individual as being one of the underlying psychological conditions that really has to be developed in order to counter the self-loathing that is so prevalent in today's society that gets people to accept and participate in their own enslavement we're on slide number 176 of the cosmic abandonment presentation talking about remembering the knowledge of oneself and the expressions of human consciousness the true Holy Trinity of thought emotion and action or as it has been known mind spirit and body and we have to bring those together such that they are not in contradiction such that as we think so we feel and so we act as we think in the mind so we feel through our emotions the spirit in which we take our actions and then so we act with the body and those three elements of consciousness are in non-contradiction unity consciousness again we were talking about you know the fulfillment of these expressions of consciousness versus their failure or the inactive aspects when we don't put these to their best use in the world during the time that we have so you know in thought we can come to knowledge understanding and wisdom or we can not actively engage our holistic intelligence and remain in a state of ignorance foolishness and naivete believing anything that is put out there for us to believe refusal to look at information that is out there that can help us to understand what's going on most people aren't nation' because there's plenty of information out there they're ignorant they will willfully ignore the truth because they have this idea deep down nested in the subconscious mind if I'm ignorant I can't be made to be responsible for what's going on around me and that's folly in and of itself that kind of thinking we're responsible regardless of whether we know or not because the truth was out there it was all around us at all times you didn't take it into yourself that's that's on you you know the emotional aspect the emotional expression of consciousness its fulfillment is what I have called true care the generative principle empathy for all you know the high high expression of love not the you know bodily or just romantic love not even just meant you know mental you know deep understanding or affinity with a concept not that kind of love but the fully open and expanded form of love known as agape which is care for all care of injustice going on anywhere because if it's taking place even with one individual it's happening for all the understanding that as one suffers all our suffering true compassion true care that's the generative principle of the universe that's what drives everything ultimately the failure of this of course is apathy indifference callousness how much callousness and apathy is going on in society how many people just don't care about the injustice Azur sufferings or just just the everyday you know things that people aren't that it is uncomfortable for people that they happen to be going through many calloused people are out there that just try to go by whatever corporate policies are out there and don't treat people as human beings you see this constantly every day they've just become so callous to people around them that for a paycheck you'll just do whatever some heartless corporation commands of you to do and try to blow it off and justify it like that's just what I do for a job and this is just this isn't Who I am this is just what I do it's just I'm making a living nonsense you're putting that energy out into the world through your behavior it is becoming who you are you're allowing that to become who you are I'm not telling anybody you are your job saying that's what they're in that's the attachment the mindset they're in with that kind of an attitude that I don't care about how this affects others that kind of callousness in the world and it's all too prevalent and there's all way too few people who are willing to call people out on that BS that they exhibit in their everyday lives on a daily basis and get up in their face about it and tell them it's not acceptable and then the the final expression of the remembering of who we are in consciousness is our actions with the behaviors we actually put out into the world that affect not only ourselves but other others around us the fulfillment of which is courage will power the development of the will the true will and persistence never giving up never giving in never allowing this world to defeat you and put you down and take you off the battlefield take you off the field of action that takes tremendous courage you know what it takes way more courage to exercise the willpower and persistence to renew the resolve to continue to do that work that takes way more courage than ever even beginning it let me tell you something folks the day I began doing what I'm doing I tossed the die the die is cast already I knew what I was getting involved in I knew the enemy I'm facing and up against I know it definitively definitively because I worked with them so there's no doubt in my mind the kind of evil against none and let me tell you something it's way more it takes way more courage and way more willpower to continue to do that on a daily basis than it ever did to start doing it when you start doing it you start to develop that will even more that's what it's it's like any other task you want to get good at it you got to practice you got to keep doing it over and over and over again it's like playing an instrument you know getting good and anything computers you name you name the skill art the failure of the active component of consciousness is when we are lazy cowardly and submissive you know we let people push us around and we stop trying and we say that's too hard or I don't want to do that laziness cowardice and just laying down to the control system that whole mindset what can I do plenty you can get involved in any one of tens of thousands of areas that can help the cause of human freedom it's a math it's about asking what help others need for at first or just going out and finding something that you're good at doing and then just doing it it's real simple folks there's nothing to it but to start doing it you know and you'll build yourself up as you go I talk about constantly how I feel I waited too long to even start talking about all of these topics with what I knew previously at least at least I finally did get up and start doing it so the question becomes on this chart on slide 176 you know which column do you want to fall into you know what do you want to be said when you're when you're gone and you're no longer in this world you want to be said that you are a person who fulfilled those expressions of consciousness or one who ended up as a total fail that's all really comes down to I know I won't be able to look back on what I did here on earth and say I did nothing I know it will go on to affect other people and it will have a ripple effect and go and move outward as more and more people understand it and then become become teachers of it themselves so it's ultimately all about knowledge of self that's what helps you to develop that self respect these two dynamics work hand in hand folks hand in hand self respect and the knowledge of self remembering who we really are and the fulfillment of that remembrance that knowledge of self is the knowledge that we are sovereign and I'll get into the definition of that word that all-important word sovereign on the other side as we wrap up the extended cosmic abandonment presentation you're listening to what on earth is happening ladies and gentlemen we'll be right back don't go anywhere welcome back everyone you're listening - what on earth is happening right here on rbn I'm your host Marc passio my website what on earth is happening dot-com tonight we are wrapping up the extended version of the cosmic abandonment presentation at some point in the future I am going to go back and start to present some source material on some of the information within the cosmic abandonment presentation however I feel that this is probably a good time to start jumping off into topics that I've really wanted to be talking about in covering you know on water on earth is happening for a while and some of the issues that I'm going to be getting into is order following it's going to be my topic at the free your mind conference I think this is something that really really has to be deeply understood where this comes from it has to be understood that we have to reach the minds of these house slaves of society you know I'm just going to come out and call them what they actually are until you reach their minds we're not going to be making any progress you know or you know what is gonna have to happen is going to be really horrific that is going to be something that people can scarcely even imagine to secure any modicum of remaining freedom that is left in this on this planet for human beings but if we can reach the minds of these order followers maybe we could change the result for the positive without having to go down the path of bloodshed but I'm also going to be getting back into the importance of gun ownership Andry stressing that repeatedly on this broadcast and really helping trying to help people to understand you know the concepts of how important the people who originally created this country and essentially were you know not all the way enlightened but we're trying to help get give people some modicum of an of an idea of an understanding of what it meant to be a free free being and again you could make all the claims that you want say everything about how you know while they didn't support this for all people and yeah I get that and yeah we we also engaged in conquest of this territory of this actual physical land and I guarantee their sons and daughters are still paying the the brunt of the the karmic consequence for them doing that but my whole point here is through the idea of self-ownership and the ownership of the ability to defend yourself through weapons you know and the importance of the of the understanding of the Second Amendment the concepts laid down in it the importance of understanding what the militia even is I'm gonna be going back into that material again because I don't think it can be over emphasized particularly at that time in which we are living you know and I said at the end of my demystifying the occult seminar folks if you're unarmed at this point you're a very naive and even stupid individual I'll come right out and say it you know I I think at this point it's more important to be armed than it is to have food on the table that's how important I think firearms ownership is at the point in which we are living in history so you know that's another topic I'm going to get into and and and yet another topic I'm gonna be getting into when I talk about you know order followers is how important the awakening of women to the truth is going to be in helping to get these order followers out of their mindset and you know I'm gonna say some unpopular and controversial things when I start talking about the mindset of women in our culture in the modern day and how deeply the cultural conditioning affects them even in many cases much more so than it is affecting the male population I'm not saying both contingencies are not super brainwashed but I'm gonna specifically get into the the mind-control targeting of the female population so it should be quite interesting and even controversial topics that are going to be brought up on this radio show in the coming weeks and months as I stay on those topics probably for months so for now I just want to briefly make one more quick event announcement that I'm going to jump back into the material then I'm going to take your calls in the last couple segments but um I just want to mention to everyone that I was interviewed on the vinny eastwood show this week on Wednesday night November 19th it was a roundtable discussion with a few other individuals bill Turner took part in it Clint Richardson and of course Vinny Eastwood and we talked about the pros and cons of the free man on the land movement and the straw man slash legal fiction you know the separating from the legal name and legal fiction concept and um you know I think that just I'll just let everybody know that interview is posted on my website in the news section where all my radio interviews are posted I definitely encourage people to download that and check it out I just you know think that I was you know once again when it comes to a lot of these roundtable discussions I see myself as the most extreme individual from my standpoint of freedom and it's like you know I don't think our freedom needs to be negotiated with anyone it's already our possession we need to secure it the end you know that's it you need to be willing to do what's necessary to secure what's already yours isn't that what responsibility for something is that's my definition of responsibility it's a huge part of my definition of responsibility you know and it comes down to this notion of remembering who we are to go jump you know use that as a springboard to jump back into the material on slide 177 I I explained the word sovereign the word sovereign is derived from the Latin adverb super meaning above and the Latin noun regnum meaning rulership or control so we put them together that the first part of the word sovereign so there comes from the Latin super sue bear meaning above and then reign the word reign comes from the Latin regnum re G and um from the Latin wreck Regas meaning king regnum is the rulership of the king or the control of the king his control or rulership thus a sovereign means one who is above control super regnum above control not a subject to control not a subject to the rulership of another one who is above the rulership or control of another or in other words in one word someone who is free and people still don't understand this you say the word sovereign to them are you sovereign well if the answer is no that means you've just said you're a slave the if somebody says are you a sovereign and the answer comes back no the next question should be well then who owns you because what you're asking is do you own yourself when you ask somebody are you sovereign you're saying that someone else have ownership and rulership and control over you and therefore are you their property essentially you know if somebody says they're not sovereign that's basically what they're admitting oh you are owned by someone else would you could you please then tell me who who your rightful owner is in the natural world in reality who actually owns you and is responsible for what you think feel and do you know that that's the next question that should be asked because what sovereign means is free above the rulership or control of someone else not under the under jurisdiction of someone else not someone else's subject not someone else's slave sovereign means free not a slave a free being and by that definition all beings in the universe are sovereign beings because there is no such thing as legitimate slavery all claims of slavery are inherently illegitimate meaning all claims of slavery are morally wrong all conditions that you know take on the form of slavery are morally wrong conditions and are therefore invalidated the problem is so many people continue to give validation to the slavery system by even being willing to negotiate with it and therein lies the problem they don't understand their sovereignty moving on to slide number 178 and you know that that knowledge that part of self knowledge is part of the remembering process you have to get to a point where you know you remember oh I'm a free being I always have been a free Bing and I've just been accepting this condition of slavery and in many cases participating with it talking about participating with it you know slide number 178 you know has the the most least mature and the most responsible people among us that are responsible for the perpetuation of the human condition of slavery namely the police regardless of what country they're in or what time period they're in this is about personal individual responsibility getting out of collectivist mindset of trying to say this is for the betterment of the group or the group says that this is okay so it is no that's not how natural law works that's not how the truth of reality works either something is right inherently by nature or it is not doesn't matter how many people agree with it doesn't matter how many people condone it doesn't matter how many people support it an individual's personal responsibility to choose right action over wrong action for themselves as an individual always belongs to them it is always their own responsibility they own it whether they want to or not one can only make a claim that they can abdicate that will pick this up on the other side folks you're listening to what on earth is happening stay with us we'll be right back welcome back everyone you're listening - what on earth is happening right here on our bien continuing with the extended cosmic abandonment presentation I'm going to attempt to wrap it up this evening we're talking about the 3 R's self respect remembering who we truly are and personal responsibility this is what is going to get us out of the current human condition of slavery ultimately and they are all things that we have to work with individually in our own psyche it's not a external solution it's not an external thing folks if you're expecting that you're expecting what is never going to ultimately happen people have to heal themselves because they care enough about themselves to do it and they take the personal responsibility to develop the knowledge that can heal them we're talking about that personal responsibility and the people who don't want it more than anybody else who think that they can pass the buck on to someone else who's giving them an order it's just my job I'm just doing my job I'm just following my orders now you're just being a good little Nazi slave you know you're just being a good little house slave that's what you're really saying and think about it can somebody who accepts slavery for themselves and others really care about themselves are they a real man is that a real man is that what a real man is has nothing whatsoever to do with being a real man you're so attached to the system you're so worried about chaos I'm so worried about the bad guys I mean these people sound like little little boys who-who's whose mommy and daddy didn't pay enough attention to them didn't give him enough love you know I'm worried about the bad guys out there you're working for the bad guys out there clown you're already working for them you're working for the demons of this world news flash for you and you're so stupid you don't even know that because your face hasn't seen the inside of a book since you were in kindergarten that's the problem with these people and I've said it before and I'll say it again I'm not going to be ruled by dumb people who don't want personal responsibility for themselves and are afraid of danger lurking around every corner because that's no real man no so they're certainly not gonna rule me you know that's all I'm saying you know my die has been cast a long time ago though folks I don't really care anymore you know about what I say because I'm not going out if I'm gonna go out of this world I'm not going out of this world quietly let's just leave it at that I'm certainly not going to go out at the hands of let you know in the dynamic of laying down two little boys who aren't even real men you know they're so attached to this system that they're willing to give over their life for something that doesn't even mean anything all it ever has meant is slavery you know people think that they're good people that they care about them so they don't care about themselves let alone anybody else and yet these these are the people who serve the gods of old you think people like this didn't exist tens hundreds of thousands of years ago they served the beings who came down here and told us we're your gods same kind of people serving those demons then as are serving the modern demons of the world the progeny of those beings that came here and did what they did to us a hundred thousand two hundred thousand four thousand years ago nothing's changed because the mindset hasn't changed because these people still hate themselves still think that they're they're not worth more still want to accept the condition of slavery still want to abdicate something that can never actually be abdicated your own personal responsibility to choose right from wrong for yourself you can only make that claim that you can add the Kate personal responsibility for moral choice to someone else this can never actually be done in nature your individual personal responsibility for your own behaviors always remain your own property that always remains with you and can never be given to someone else so responsibility isn't how much money you make can you put food on the table can you have this kind of a house or this kind of a car that's not what real responsibility is I hate to burst the bubble of idiots and morons out there who think that that's what the measure of personal responsibility is because it is not and never was the measure of personal responsibility is how much knowledge do you have about what the difference between right and wrong behavior is and how much are you going to accept that the choice of actually making that behavioral decision always lies with you as an individual and can never be put off to any other individual that's what real responsibility is it's accepting conscience and saying I'm going to accept that this is the judgment that I have to be making I have to weigh these actions in the balance and say is that action a human right under natural law and if it's the answer comes back no I'm not going to take that action for any amount of compensation for any promises for any condition for any amount of comfort and certainly not for any amount of money that's what being a real man is that's what being a real is taken that as your own property your own responsibility so at the bottom of this slide I've just simply put you know three sentences grow up think for yourself and stop following orders that's how you'll know you've entered cosmic adulthood when you recognize following any orders doesn't matter who they're coming from is utter childishness utter slavery and you're not only putting yourselves in those chains you're putting your children and those who come after them in those chains that you have forged slide 179 regardless of how troubled it may have been humanity's childhood is over the past is the past folks I you know this section is not to be people down further it's a solutions section it's to explain to you what was done is done now you you've got to accept it and live in the present moment as any other trauma okay did trauma happen yes it did well we have to accept that there's nothing can not be altered the question becomes what are you worth are you worth picking yourself up and dusting yourself off and then moving forward it is the measure of yourself as an individual going to be not how many times life has beaten you down but how many times you're gonna get back up and say take your best shot again see because my worth as I see it is infinite I'm not just gonna sit down and lay down this slavery that's what reversed that realization is what reversed my mindset and an all came full circle back to the self but not in the way that I originally saw the self saw in a whole new light and it wasn't about just serving personal selfish interest anymore it was about knowing the truth and helping other people to understand it as well to get into the slipstream of the will of creation and do that great work fearlessly regardless of what happens to the flesh that's what the work the sole work is the soul journey is to do that work and as you do that work you're working upon the soul our choice as a species ladies and gentlemen is to accept cosmic adulthood or perish to accept it and enter it because we are not children anymore we're adolescents trying to move into adulthood that have really screwed things up and kept them in a screwed up condition yes again trauma was done to us except what I accept that I recognize that but that doesn't mean you sit there and you keep beating up on yourself never develop self-respect never develop self-love never develop personal responsibility it means you recognize something bad happened but I have more worth than to let that beat me down and hold me down and so therein lies the choice do we grow up as a species because the only other answer is we're going away as a species that's the only other real choice so is there a choice involved is the question I guess that is a choice you know do we have enough self-respect to dust ourselves off from the trauma that happened and say what are we going to do about this now are we worth more than this condition and we either choose to do that work upon ourselves helped others come out of this conditioning and change the dynamic that's going on on this planet or we're going away permanently folks welcome back everyone you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening calm just going to wrap up a few final thoughts for the extended cosmic abandonment presentation as I said humanity's troubled childhood is over and we are in our cosmic adolescence moving toward cosmic childhood and the answer is to stop believing in all the illusion and fantasy that we've been fed regarding authority and money and religion and all the other systems of enslavement that we are completely attached to and controlled by they only ever have been systems of control to limit us and then make us look at our self-worth as being limited when in fact it is of infinite value slide 180 the the ultimate answer is the deep understanding of natural law and its underlying principles the the objective inherent in nature difference between right and wrong behavior conscience the ultimate sovereign on the throne of the universe that will never be and can never be dethroned the boundary conditions that ultimately govern nature and govern the behavioral decisions of the individuals within it that's the key to everything folks slide number 181 it's the key natural law and its understanding is the key that can unlock all the locks on all the doors to all the cages of all the prisons everywhere in creation that's how powerful that knowledge is which is why it is the most occult acknowledge all of the other things all the other distractions all the movements all you know the the the heroes and and you know saviors come in to rescue us although distractions all the New Age nonsense you know you know the religious nonsense of the New Age and other world religions you know all the other distractions and minutia are all there to detract from someone's attention so that they do not get to an understanding of natural law it's all it comes down to so that they do not understand what rights are and what they are not when we get that key and actually put it into the lock on this world and turn it we will end slavery on this planet and that key is natural law and that's what our mission was here to do folks slide number 182 our mission here on earth we came here to end slavery now we took a mission when we incarnated on this world and we thought oh we can get this done then we come into the world of forgetting and the world of illusion where the conditioning is so strong from our birth and most people are derailed from the mission for one reason or another they've bought into one illusion or another that has derailed them from performing the mission that they came here to perform which is to lead a rebellion against slavery on a planet I mean there can be no greater mission than that folks and the brothers and sisters that we came here to perform that mission with they're here we are here the question is how many of us are actually doing the work of the mission versus sitting back and watching someone else how many of us are actively involved in the battle plan versus sitting back and saying oh I see what you're doing or I like what you're doing or I don't like what you're doing well instead of critiquing something get on the battlefield folks you know this has been my war cry for years and years now it isn't about watching someone else do the work it's about helping them do it when we end this condition that the trauma ultimately brought about and then perpetuated because we didn't engage in the healing dynamics of self-respect remembering who we truly are and then accepting our own individual personal responsibility to understand natural law and choose right action over wrong action okay we allowed this condition of slavery to perpetuate itself but when we do that personal introspective self healing work to take a look at ourselves again recognize our infinite Worth accept who we really are and accept the personal responsibility that comes with our natural inherent birthright of sovereignty that's when we're going to be free and that then and only then are we really going to truly exercise our birthright and step into the wider community of beings who also have gone through that transformative spiritual journey recognize their own sovereignty on our existing and operating within that sovereignty within creation and believe me they're out there slide 180 three and four they are out there in the cosmos not all the beings in the cosmos are like the beings that came to this planet and did what they did but at the same time they're not going to do that work for us because then we'll be their responsibility you know it'll be like them you know just taking on some kind of a an animal species halfway in between you know an animalistic state and a human state and they they have their own work to do upon themselves you know that they don't want us to be their responsibility they want us to be responsible for us that's what any good adult would want for a child not to constantly have to look after them and you know constantly provide for them even into their older years they would want the child to have enough knowledge and confidence and self respect and responsibility that they're going to engage in that for themselves so no one's coming to rescue us from ourselves folks it's not going to happen you're waiting for that you have been duped that's all I can say all the talk about this groups coming to rescue us the white hats over here the Andromeda is this space alien group it's all nonsense it always has been all nonsense if you are waiting for that you've been duped we have to do this for ourselves they don't want that these other beings that are out there don't want a species that can't take care of themselves out in the in the wider galactic community or the wider universal community we're going to be confined to the nursery that earth is to the prison that we've turned it into until we develop that personal respect and responsibility as individuals so you know when we do that the heavens will welcome us the very stars will welcome our presence we don't want to do that work it's going to be a long and painful journey down the left-hand path into the arms of eros that the goddess of chaos who will gladly assist us in our further teaching I for one would hope that people would choose the direct path that leads to the arms of Isis the goddess of truth you know and then helps us to understand who we really are what our real worth is as individuals and that knowledge and understanding will help guide us to wisdom which is right action and when we do that we end slavery here and then we'll be welcomed by the wider community that you know well we can then learn and grow from together so you know to me that's all they're really that really needs to be said to wrap this up and that's the end of you know my formal presentation on cosmic abandonment in the extended of variation I do want to revisit this topic in the future soon you know maybe even interspersed with in other shows that I'm going to be doing on the topics I already mentioned earlier just to UM you know bring out some source material and read some things from different ancient texts that will help people to understand this informations been out there since time immemorial and if you read these texts with the knowledge that we've already covered in these presentations you see it in a whole new light and then things start to really make sense to you and there are some very important things within those ancient so-called sacred texts we'll get into that on future shows but you know for probably the remainder of the show this evening I'll go to some callers and we'll see what you have to say and it's the topics as always there's never any tableau topics here you could talk about cosmic abandonment you could talk about anything else we've covered your questions your comments your concerns coming at you for the last segment of the show ladies and gentlemen stay with us you're listening to what on earth is happening we'll be right back welcome back everyone you're listening to what on earth is happening we're into the last segment for tonight's broadcast and we're gonna go to your phones no taboo top to your phone calls no taboo topics anything you want to talk about questions concerns comments coming at you right now let's hear from ally in Connecticut you're live on what on earth is happening welcome hi mark it's actually pronounced i li i li welcome thank you um we actually met last month do you remember us meeting i do not after your demystifying the occult seminar at the at the far side Manchester okay great yeah well I just wanted to let you know right away unfortunately I didn't have the opportunity this week to look at the specific source that you directed me to last week or to probe the document documentation and freemasonic or Rosicrucian source literature in general as regards the topic however I would really like to clarify my inquiry which I began last week a bit more okay okay um I feel it would be helpful to me if you could illustrate a bit more for me what our world would look like he like on a collective and an individual level in a hypothetical scenario where a great correction had occurred in humanity and natural law was being observed by all sure what what would well they're very very easy actually it's it's actually quite simple to visualize imagine a simple family unit mother father and a couple of children right that actually cared about each other and lived in a state of true care for the needs and the dynamics of that whole unit now extend that to billions of people can you imagine that that's possible yeah well then you're well along the path that most people are not on because unless that imagination is present that can never manifest that's what a world that would be peaceful and voluntary would be like and that's the consciousness that the world has to get to until you see things as different or separate or other from something like thinking about it like that you're you're already in that satanic consciousness if you see it that way in that state of separation but if you can envision that and hold that as a vision in your mind for what the world not only should be like but could very well be like it is possible then that imagination is going to is going to what is going to be what is going to propel us to actually create that scenario okay and if it never makes it there what happens to the collective it keeps suffering until it learns that that's where it needs to go for as long as it takes the the world is has no shortest shortage the universe has no shortage of painful lessons to provide us with trust me on that one if you in case you haven't already recognized that by just looking at the world we could be here for a long long long long time or we could tip things so far into imbalance that you know the our ability to have the the experience that we're having at least on this planet goes away and then you know the soul journey will probably continue somewhere else because if you haven't recognized that as such there's no shortage of places to have experiences in this universe you know so there is no escaping a lesson it go it will go that way at some point it will have to you know but it can there it can tip down and go into Hell worlds and hell experiences and it could tip upward and go into in you know experiences that you could scarcely envision if there a shortage of time for doing the great work yes I would say that there is I would say that there is a absolute moral imperative at this point to get on the battlefield and start doing what needs to be done absolutely I I am NOT one of the people that thinks there is an infinite amount of time in the experience that we are having to change the dynamic for the better before it tips into a really really bad direction we're already well along that way so my answer is there is a limited amount of time yes ok um one last thing last week you responded to me using the analogy of a house of the upkeep of a house regards responsible ordering and caretaking of the interior landscape transferring this micro module to the macro module who is in charge or who should be in charge of organizing and maintaining our collective house so to speak that would have to be done when a higher high enough level of by all when a high enough level of consciousness is reached see to do it without that level of consciousness is very extraordinarily difficult it's trying to put the cart before the horse a organically organized dynamic of people who are at a high level of consciousness would be able to do that very easily and without any authority involved that authority involved you know skills mic skillsets might come into play by choosing you know who's better suited to do those things but the problem is now we have a centralized authoritative way of doing that that always ends up being violent when consciousness is developed then you could do that that type of thing organically and naturally without it becoming something that is based in authority which is what a voluntary society would look like they would be doing those things of its own volition based on skill sets naturally and organically I mean that's the best answer that I can give you at the current time so great questions and I want to thank you for the call let's hear from Tom in Toronto Tom you're live on what on earth is happening we have limited time hi great show is usual Marv thank you this week I'm going to just talk about some symbols and symbolism sure I'm gonna go off quickly so the first one is the symbolism of Hell like you know how the underworld I think it could actually date back you know like the God location mark actually sending people to the mind when they were bad right okay because it was you know there was a hellish sort of yeah back then they referred to that place as the abbé sue which meant the abyss you know the word abyss is almost similar to it you know it meant the the deep literally translated meant the deep yep very similar indeed the next one I want to talk about is a Christian Jesus on the cross with the cost is supposed to represent or element or physical world sure and being tied to the cross or nailed to the cross represents not having any impact on the physical world and crown of thorns represents not being able to think so it's really about being a victim to or element I mean I I do personally see the crucifixion story of the physical man as something to try to keep people from emulating that mode I don't necessarily see all the symbolism of the crucifix in general as negative I've kind of broken down the the Rose cross imagery as being something that's quite positive but in general I like the though you know the way that you're breaking down some symbolism there unfortunately that's all the time that we have for this edition of what on earth is happening ladies and gentlemen I'm so I'm sorry I thought I heard the music coming in on the on the top for the end of the hour but okay so you can continue well I think we have one more minute okay the next one I want to talk about is clay golem okay actually quite accurate in describing how people are treated so it's really only made up of earth for action it has some emotion in it play but it's really about fire being used to cook the goal of win right they will power is used on the goal oh that's right well it has no willpower so it has no air it's taking away burning up its freewill burning up its care you know it just essentially is something that can act by only the direction of its master yeah and the last symbol I'd like to talk about the Illuminati pyramid it is people see it as they have all the knowledge but the way I see it it's about AI representing knowledge and it's being trapped inside a pyramidal structure you know you've heard time and time again people you know I want to follow my dream but regarding that regarding the triangle I kind of more see it as that that's that that Trinity that I described earlier of thoughts emotions and actions kind of encapsulating that I of the knowledge of self so there is the break music coming up for the end of the show

What On Earth Is Happening Show #177

Topics: *Order Followers as "The Bane of 21st Century Earth," the Real Issues regarding the Ferguson, MO incident, Precedents being set in America for summary executions by Police, Precedents being set for the elimination of free speech and assembly at Police "discretion," Those justifying Police-State behavior are Nazi-Lovers, Women's immoral support of Dominators, the real Race Issues involved in Ferguson, American-based Militias acting cowardly and racist, Agent Provocateuring at Ferguson, Robotic Order-Followers constitute a Cult and are driven by the same techniques cults use on their followers, Perverse sexual practices within Dark Occultism, How people fuel Slavery through support of the monetary and taxation systems, the irrational desire for "security" over Freedom, Women's support of the Dominator Culture, the Immorality inherent in the "New Cage" Movement, how people police themselves through fear of stepping out of our system-defined roles, Speaking the Truth and doing the Great Work without Fear*

freedom mat that's what it's all about [Music] [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of the choice and now here is your host Marc Pascoe [Music] welcome one and all you're listening to what on earth is happening right here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm the networks website Republic Broadcasting org today is Saturday November 29 2014 this show is live every Saturday evening from 10:00 p.m. to midnight Eastern Time that's 9 p.m. to 11 p.m. Central Time we have a great show for you here tonight I'm going to be beginning a series on order followers the bane of 21st century earth and we're going to get into some frank discussion and I'm gonna just lay it all out on the table about what these people are who they serve what they're doing what the psychological dynamics are at work to continue to allow them to do the actions that they perform on a daily basis and we're going to talk a whole lot in the coming weeks about the people who support them because they are part of the continuation of the dynamic of the destruction of freedom at work in this world that's what's coming up on this edition of what on earth is happening I'm also going to be getting into my take on the whole Ferguson issue I know I'd never really usually get into talking about common events current events I should say here on the show I get more into the underlying psychological issues but I am going to talk a little bit about Ferguson and the precedents that this event is attempting to set in the minds of the American public so we'll get into these issues and more I'll be taking your calls in the second hour of the show or really whenever I feel like you know stopping my rant for tonight we'll get into some of your phone calls the calling number to join us right here on what on earth is happening is 803 one three nine four four three once again the toll-free number to join us on Aer 800 three one three ninety four forty three if you wish you can call in now and get in the call or queue again I'll be taking calls a little bit later in the show quick event announcements I have we have the free your mind 3 Conference of course coming up the big event about consciousness mind control and occult forces at work in our world where lots of whistleblowers and researchers are going to come together and they're going to share empowering solutions they're going to shed light on the darkness that's going on in our world and then they're going to bring forward their brands of empowering solutions that they see as they see should be implemented in the world to help us really move out of this condition of slavery and toward a state of true freedom the freer mind free conference the biggest event of its kind coming up in 2015 April 10th 11th and 12th of 2015 at the Sheraton Bucks County Hotel the Sheraton Bucks County is a beautiful venue it's located at 400 North Oxford Valley Road this is going to be a big step up in venue from the previous two for your mind conferences the sharpton Bucks County 400 North Oxford Ali Road Langhorne Pennsylvania the speakers already secured for the free ermine 3 conference are as follows Bob Tuscan Clint Richardson kertus davis the illuminated one Dennis McKenna derek bros ed fortune the the New Jersey Weed Man freighter X Freeman fritz Spring Meyer Jay Parker John vibes Josie the outlaw Wales Larkin Rose mark Devlin and myself mark passio an all weekend pass up till I believe tomorrow is $130 that is the early bird special if you don't get your ticket at your all weekend pass at that price by tomorrow I have been informed that ticket prices will be going up I believe by $10 in December through to the conference so a great opportunity to support the conference and help to support paying for the venue and for all the speakers who are coming from all different places in the country for their travel expenses and their lodging expenses hosting a conference of this type believe me I've done it twice with the help of other kind souls within the Philadelphia area and I'm telling you it is one of the most difficult things to pull off for any individual or group it takes a tremendous amount of resources the venue does not pay for itself the speakers are not paying their own way there you know that the the organizers of the event have to put that those costs upfront and the best way to support their efforts to try to bring you this information and put it out there online is to buy an all weekend pass in advance because that means that the money for the tickets is helping to pay for all of this stuff so it doesn't have to come out of pocket of the organizers which is exceedingly difficult okay so please if you're going to the conference get your all weekend pass now then make your travel and hotel arrangements after but get the tickets now it's the best way you can help to support the organizers in the endeavour to host a huge event like this for more information on the free your mind conference please visit the conference website at free your mind conference calm once again the free your mind conference website free your mind conference calm and get your tickets today there are still some what on earth is happening promotional t-shirts available I printed these for the demystifying the occult seminar which still will be forthcoming shortly on on video it will be going live on the net and on my youtube channel so look for that shortly I don't have an exact release date but it will be forthcoming I printed some shirts for that event had a bunch left over and you can get one too as a conversation starter or just to promote the website and you could receive that as a free gift in return for a voluntary donation to what on earth is happening to find out the details just click the email link that's listed in the news article on at the top of the news section of the what on earth is happening calm website also there is a donation button on the left hand side of the website at Wat on earth is happening calm if you feel that you've received value from the information that I've presented on this radio show and through my podcasts over the year and through the videos that I've made over the years you can feel free to make a voluntary donation to help support my work so that I may continue it into the future with that having been said there's really no images for tonight's show I usually direct people excuse me up to the radio show page for the images for tonight's show but really I'm just gonna talk about some issues that I feel are important and I may revisit some images or put some new ones up when I break down this topic of order following and what contributes to it what makes it possible and the people who support it but right now the only image that's up there is of the for your mind conference page there they had a banner but they're modifying it there is a banner on the front page of my website but there's they're modifying a poster and I'm gonna get that soon and I'll be posting that I'll be actually posting a news article about the conference to the water on earth is happening site and with each podcast from here on out I'll be posting the the free remind conference poster so that'll be be put being put up on the site within the coming week but what I really want to start getting into is this issue that went on in Ferguson it's a good place to start the topic of the dynamic of order following because we saw just that take place with these absolute robotic cultish order following police in Ferguson Missouri and I'll pick up right there after this break ladies and gentlemen you're listening to what on earth is happening right here on republic broadcasting stay with us we'll be right back [Music] the night night divides a day to run welcome back everyone you're listening - what on earth is happening here on Republic Broadcasting I'm your host mark passio my website what on earth is happening dot-com was getting into the order following cult which I call the absolute bane of the 21st century you know these are the people that are destroying human freedom and I don't think there's any better example to look at in current events than Ferguson and the the sickening series of events that we saw play out this past Monday and you know it's just utterly ridiculous that people still don't see the real issues that are involved in an event like this they're so brainwashed by the media that they see all the things that the media wants to push at them and make them pay attention to instead of the real issue involved which are the police state the rising police state measures in this country the main two issues ladies and gentlemen regarding an issue like what's taking place in Ferguson just outside of st. Louis Missouri is twofold for anybody who has a little bit of consciousness and for anybody who's really paying attention and the two main issues are that a precedent is being set in the United States as we speak actively that police may engage in summary executions at their discretion because let's face it that's what this was and if you still don't understand that that's what this was you are absolutely not paying attention and you're still absolutely asleep to what's really going on and you know I base my understanding of this on initial eyewitness reports not testimonies that came months later to go to an event and understand it and understand what really happened you have to get the freshest I witnessed rip I witness reports possible immediately following the events and okay when you get that happening that's when truth is being spoken before the media and the government cult that runs the media okay and owns it comes in and cleans it all up and turns it into their official series of events that they want the public to you know think of it as just like we saw with 9/11 just like we saw in the 7/7 bombings just like we saw in the Oklahoma City bombings in any false flag event that's what you're always going to see you're going to see initial eyewitness reports that are trying to come out with the truth and you're going to see that all covered over by government propaganda very shortly after the fact the initial eyewitness events the initial eyewitness testimonies all consistently described the same series of events and that is after whatever happened between you know Mike Brown and the police officer Wilson okay and they had some type of a scuffle or confrontation Brown attempted to leave the scene on foot and Wilson took drew his weapon and told him to stop okay when he didn't stop and he came into a body posture that was facing Wilson Wilson unloaded two rounds at his body hit him in the torso lo the eyewitness has said that it happened in the abdomen said that he was struck in the abdomen he went down on to his knees after he's already shot gripping his abdomen with no weapon and from 20 to 25 feet away as all the eyewitnesses to the event described Wilson then proceeded to unload four more rounds into Brown's chest now all I want to ask anybody okay all you need to know about this event is if an average human okay that is not a police officer we're to take out a weapon and while someone first of all unarmed shoot them twice you'd already be probably going away all right if you if they were down on their knees unable to threaten you from 20 feet away already bleeding out and you unloaded four more rounds in their chest with your firearm you'd probably be going to jail for life if not facing a murder one charge that's the real issue involved here people okay I don't care what your background is I don't care where you're coming at this from what was witnessed was a summary execution at a police officers discretion and that's the precedent that they're trying to set in America just like they did in Nazi Germany then if you somehow disobey an agent of the state the agent of the state has license to murder you and I don't really care what you think about what this guy did first of all I don't even believe the official story that he somehow robbed this store you know even if he did you're going to hunt a person who took some cigar blunts and then summarily execute him you're not gonna try to actually take him in to a court you're gonna then just put bullet holes in him because he took some blunts I mean the the the idiocy of people talking about this event as if they really understand it or know what happened and support the police support summary executions of United States citizens you know and I doesn't make a difference how you want to use that term I'm talking about your average person living in you know this land okay I'm not talking about the whole straw man legal fiction argument of citizen you know we're talking about flesh-and-blood individuals living in America the precedent is being set that if you don't follow an order followers commands that they somehow have license to execute you on the spot that's an issue number one issue number two is the precedent is being set for the complete elimination of free speech and free assembly by people in America and cops are saying in all cities throughout the United States will shut down public speech and assembly at our discretion anytime we see fit and nobody's talking about these issues as the main issues you go to blog sites it's all about the rioting or it's all about the looting okay or it's all about oh they're they're blocking traffic well let me tell you something folks I've been through this before over and over and over and over again sorry to burst your bubble or to get you know you know tell people who are traveling on a road trying to get someplace where they're gonna either do some mindless consumer shopping or go to their corporate slave job your right to travel on a road does not Trump the right of a mass of people to freely assemble and speak about a grievance that they have regarding social justice so get over it get over that the right of speech and assembly Trump the right to travel in a car on a road a mass of people have the right to block a road with a protest regarding something that regards justice being served it's supposed to make life uncomfortable it's supposed to stop you from doing the average events that you would normally carry out so you pay attention and you look at the injustice okay so if I were being blocked on that road I would have no argument it's called tough it's called your right to get to where you're going doesn't come before the right of a mass of people who are assembling and speaking because they want to see justice done and if you think that's a more important thing than speaking the truth and trying to expose wrongdoing you're really messed up in the head we'll pick this up on the other side you're listening to what on earth is happening ladies and gentlemen stay with us we'll be right back [Music] welcome back everyone they're listening to what on earth is happening I'm your host mark passio my website what on earth is happening calm and I'm a bit fired up tonight as you can hear because you know what we're seeing in this country is absolutely deplorable and aside from the actual issues involved which as I've already said are precedents being set for summary executions by police for the slightest disobedience of their orders and a precedent being set for the complete elimination of free speech and assembly at the discretion of police whenever they see fit to shut down an assembly by people who have a grievance that deals with justice being served you know more disturbing than that are the people who support the police in these precedents that are being sent because there's a group of people involved that somehow they find distasteful or that they don't agree with you know it's the my freedom movement that I've been talking about ladies and gentlemen you know on one hand they'll say oh yeah we need to stand up for freedom in this country but what they really mean is we need to stand up for our freedoms my little group my little dynamic when it comes to the social justice being done for people who I don't see eye-to-eye with well then walk all over their rights who cares about them that wasn't being done to my people that wasn't being done to my faction you know I call these people the my freedom movement cuz they have nothing to do with a true human freedom movement they're after their own little slice of freedom and that's all they care about is themselves and I'll tell you what you know the media may may have pounced on this issue because of the racial dynamic involved to try to you know play the divide and conquer race strategy against the public and it worked but in many ways these there are underlying racial shoes when it comes to a dynamic like this one of the things I really want to talk about is all the people who because it's a predominantly black community are racist against black people and then therefore immediately side on the side of police and say I want this protest to be shut down or look at how these people responded when you know they saw it as justice wasn't served which it wasn't because again the precedents being set the police can murder people in a summary execution style with zero impunity having that not worry about it what so ever about any actions being taken against them that's what we really witnessed in Ferguson wake up and understand the real issues precedent being set for summary executions by police against anyone who disobeys their orders and the precedent being set that the state will completely shut down any assembly or protest as they deem that they're going to shut it down whenever and wherever and that's cold total slavery ladies and gentlemen that the founders of this country repeatedly warned us against and told us to watch for the encroachment of a standing army in our midst which is a militarily armed police force you have a standing army in your midst and that's what the militia was for to protect against the rise of a standing army in your midst and instead what did the sleeping populace of America do they lay down and they let a standing army rise up among them because they didn't understand the Second Amendment or why it was in place they didn't understand the writings of the founders of this country and what they were trying to warn us repeatedly about no but we know better than all of them we know better than those words of wisdom we don't have to listen to anything that they said because the modern people know so much better laying their Rights down to these total clowns these order followers what mommy and daddy issues who aren't even real men who are a bunch of cowards a bunch of cowards robotic cult members is what they are it's a disgrace so what's a bigger disgrace is the idiots that support these people if you could even call them people they're nazi lovers plain and simple the people who support these order followers are nazi lovers because that's exactly what they are you don't think that Nazi set this system up as they came over here after World War two through paperclip and other projects that funneled them into this country you're out of your mind the Nazis took this country from the inside and the morons of America are just sleeping to it look here's what I want to put on the table folks I'm gonna call out a couple of groups of people okay I want to hear from these groups of people I want to hear from militia members who are in active organized militias in any state in the United States that's who I really want to hear from on the open lines front from now - whenever I stop covering this issue or you know into the immediate future when I'm on the topic of order followers what I want to ask the militia members is where were you for this event when people got their free speech rights and free assembly rights shut down on them know you'll come out to something like clive Bundy about cattle grazing though and be willing to die over that when the BLM came and tried to take a ranchers land away that he had his cattle grazing on for decades and decades okay but you won't come out to support people who are completely angered at somebody being Somali executed by police without trial a precedent that was set in Nazi Germany there all of these people are completely amoral the order followers themselves the people who support them and the people who say this isn't my freedom that's being trampled on I don't care about this issue because Oh a black man somewhere in the middle of the United States was shot was murdered so that doesn't affect me doesn't affect my freedom your my freedom movement people you'll know what real freedom is you couldn't spell it because you don't know the real issues at hand and you're involved in this for the wrong reasons because you don't have actively advanced consciousness I'm calling all the militias in this country a bunch of cowards and racists right out in the open you're a bunch of cowards because you've had one iota of real courage okay you would have done what the real militia is supposed to do and defend the First Amendment with the Second Amendment now I've taken part in some open carry rallies I'm telling you right now police don't ever try to shut those down not a one will they come to and try to shut them down because people are carrying battle rifles with them and all the people in Ferguson showed up to a gunfight with a sign and a camera well good luck with that folks like the old saying goes you don't show up to a gunfight with a knife well you certainly don't show up to it with a camera and a sign so where were the militia to protect people's First Amendment what protected right to free speech and free assembly it was again Samaras nowhere no we're because it was a black man that's why and don't let's not let's not get it twisted and say that's not what it was about that's exactly what it was about race does play into this as an issue I understand the media wants to make it all about that but I'm telling you there's a real factor involved in that and these militias look at it and say oh it's just some black guy we don't care about that and I'm telling you that's how it goes down I hear about it from the inside from people who are involved in militias that's the thinking that's involved so don't try to tell me that it isn't because I happen to know firsthand that it is the other people that I want to hear from is I want to hear from women who are involved in some capacity in a relationship with order followers that means if you're a wife a mother a sister or daughter of a police officer I want to hear from you because I have some questions I would like to ask you if you have the guts to call in we'll pick it up on the other side stay with us folks welcome back yet you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening calm talking about some of the issues involved in the whole mess in Ferguson Missouri and how the my freedom movement doesn't want to come to the defense of somebody who's been completely some merrily executed by the state and and stand up for a just cause of trying to bring justice to this situation where a cop gets away with complete impunity from murdering somebody who didn't want to obey his commands god forbid okay and as I've said the people who have this attitude are Nazi lovers if you side with the police on an issue like this I don't care who you are I don't care where you're from you're a lover of the Nazi Empire deal with it because that's the truth all right and you want to take the attitude that this doesn't affect me or this was somebody else or I don't agree with the way this person acts or this person acts first of all the other thing you have to understand is how much Agent Provocateur happens at events like this you know where the crowd isn't even actually doing these things first of all let's talk about these fires for a minute okay because people just see Oh fire was set to this car fire was set to this building do you know how wet the weather was in Ferguson the week leading up to this event it was raining day after day okay and the it was so cold and wet and damp incendiary devices had to have been used to set some of these fires to have them burn as hot and as long as they did I guarantee you these people did not bring this stuff out there this is done by agent provocateurs who are hired by the state to make a situation deteriorate and look as bad as possible so idiots in the in the population say all see what these people are doing the police I have like to respond the way that they did by firing tear gas at them and shutting the protests down you got to understand this is a battle tactic this is a psyops warfare tactic that is done that is it's an agent provocateur in tactic and I will guarantee you those fires were set by incendiary devices by agent provocateurs and not by the protesters you know you people have some legitimate gripes about looting that takes place it's very easy to whip a largely unconscious crowd up into a frenzy and I'm not going to tell you these are the most conscious people on the earth folks because they're not I mean you look at some of the people to show up for protests like this they don't understand the real issues that are involved you know they often do use these things as ways of just taking out aggression I'm not saying that I am just for random violent actions I'm saying if you're gonna go to something like this have a purpose understand what's going on and if you're gonna show up when you know what the police are gonna do you better show up prepared you know they fire a canister of tear gas which is basically banned as a chemical agent in almost every country in the world but use here against the citizens of this country and you know not what everybody scatters because not one person even is prepared with a gas mask except a few media people what do you think they were going to do and everybody just scatters at the first sign of trouble when it comes to group dynamics like this you know because they're not prepared for it you think they're not going to use chemical weapons on you and rubber bullets and then eventually real bullets these people are cult members the police are cult members they're going to do whatever they are robotic Li commanded to do because they are members of a cult that is separated from society isolated put through traumatic techniques put through mind control put through repetition put through trauma put on a horrible diet put on a complete diet of adrenaline damaging the brain turning them into would essentially constitute a an adrenaline junkie that's what these people are they're brain-damaged junkies the police in this country are brain-damaged junkies and their drug is adrenaline the drug that will burn the human brain worse than any opiate worse than cocaine worse than amphetamines worse than heroin and that's what you're up against cult members with burnt brains who don't care about you and who are just going to do whatever justification is they can exploit to do violence because that's what they are they're in more violent people that are looking for an excuse to conduct violence that's what a cult member does I went through all the techniques of cults in the past on this show and identically every single solitary technique that any cult has used to bring in followers and to keep them under mind control to carry out their orders is identical to police and military training identical point four point four point and people want to look at them as just some institution some arm of the state when in fact what they really are ladies and gentlemen are one big cult and it's a big cult of little boys and little girls who never emotionally grew up who are still little children in their own minds who never did any psychological cleansing never did any psychological workup on themselves and are still in a childlike mindset of I want mommy and I want daddy to tell me what to do and that's exactly how it is that's exactly the truth so who I want to hear from in the second hour folks I want to hear from militia members and I want to hear from people who are directly involved in relationships with order followers of any kind particularly police but I guarantee you probably none of them will call in to the show you know because they'll have their little justifications about everything that they do and why they don't they don't want to do the right thing you know because they think they're moral people well you know I am all for the Second Amendment I'm all for gun ownership I'm all for organized the militias operating in this country all for it but you have to have a higher level of consciousness and understand the real agendas the real precedence that are being set in this country not just have your own idea of what thing is going on because oh this person or this issue I somehow find distasteful so I won't get involved there but I'll go and support the good-old-boy from Arizona on his land grab issue but god forbid the the black kid who you know was summarily executed by police in Missouri I want nothing to do with that issue it's called choosing pick freedom okay the my freedom movement will choose and pick the issues that we want to support or not support we don't they don't care about what's right or wrong they don't have any real moral sensibilities they're after their own interests trust me folks I'm the first person who would get on the air and want to tell you that the militias in this country are truly wide awake really know the difference between right and wrong and are going to act on that I don't see it just like I don't see a real freedom movement I don't see a freedom movement at all we have a my freedom movement going in some of the conservative wing of political structures there aren't fully awake even the whole politics rigged game the whole galley dialectic of politics the puppet show you know some of the people understand some of the issues regarding freedom but they only care because it affects their pocketbook it affects their wallet that's why most of those people are involved is it a real moral issue to them now no is when it's what's happening to the poor the underclass other races oh oh well then why don't the police just go in and wipe them all out you hear this on in ignoramuses speaking on on public boards I mean just the racism that's rampant on the Internet it's a it's a disgusting thing that speaks volumes about the more the real moral place that America is in which is absolutely in the at the bottom of a toilet bowl it's a joke the people of this country are a joke so I'm gonna go to your calls that's an all honesty that's the end of my rant for tonight let's hear what people have to say what they want to talk about and what issues they want to bring to the table because I'm fired up tonight folks and I've had enough your calls on the other side you're listening to what on earth is happening here on rbn stay with us we'll be back besides we don't hear speak between us they look so welcome back everyone you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening calm as promised we're going to go to your phones and your phone calls in this hour I've been talking about the absolute immoral condition of order followers how they're being used as pawns to essentially shut down free speech and establish the precedent that somehow the police have the right to summarily execute the people of this country without trial on their discretion for not following their commands and a lot of idiots out there actually believe this and follow them and stand up for these Nazis and continue to justify their completely immoral behaviors and I talked a little bit about the whole Ferguson incident the real issues involved compared to what the media want to you know mind-control people into believing the issues at stake are and the calling number to join us is eight hundred three one three nine four four three once again the calling number to join us in this hour your questions or comments eight hundred three one three ninety four forty three let's go to the phones and let's hear from Bart in Poland Bart you are live on what on earth is happening welcome to the show hello my good evening thank you for taking my call lutely oh my comment on the Ferguson events is Leo this is an example of involution and we in Poland had this situation during the Communist period you know and you can watch them find on a YouTube channel movies from this period from the late 80s when you know military military forces were just set against workers in Poland you know unbelievable I you know I have I never had such such a dark vision you know that the kind of situation may happen in the United States but unfortunately it is happening okay mark I have one more questions so two weeks ago I was asking you about the homosexual tendencies among the Church of state and global members and before I before you proceed with the answer I would like to present from the background you know why I'm asking you about such you know we serve a question so to be honest I was know non-verbally sexually abused by a group of people who were interned a member of this organization and it happened before my awakening when I woke up I was trying to find the answer and fortunately thanks to Thomas Sheridan material published on YouTube channel in you know video podcast series library of psychopaths I found the episode number 9 in which Thomas was talking about the sexuality this individual and according to Thomas information this psychopathic person because they are they are a secondary psychopath had no you know sexual orientation they are attract both genders because they perceive them all the people as the only you know another let's say trophies or objects in the sexual portfolio and it was you know a bull's eye and later on I found a very good material from Alex Jones regarding Bohemian Grove right and you know this was the final evidence so my question is do you face such behavior or what may be the level of dark occultism that I was involved in that I was personally involved in the answer is no that was not a part of the behaviors of the the grottoes that I was involved in but again by my own admission I was involved in dark occultism at a very low level without any question in my mind when you get to the higher levels of the dark occult societies orders networks whatever you want to refer to them as you are certainly dealing with the dynamic of perverse sexual practices particularly related to children and again of both Shias because they want to traumatize the the mindset of the child and often they'll do this with family members this is done generationally with family members the children of the people involved within these cults they're doing this to traumatize them to bring them into their perverse practices because they understand how the the trauma victims cycle works in most cases the person will not be strong enough on their own to overcome the traumatic abuse that was done to them and then they will fall into the same pattern and perpetuate the silent become a cult member and continue the cycle yes so this is not only done for pure you know perverse sexual you know desire purposes on the part of the psychopathic or secondarily psychopathic individuals but it actually serves a purpose to perpetuate the cult agenda and mentality down to the next generation making in the ragging yeah an individual I want to point you toward is Jay Parker you should definitely know rock out yeah he's done work to pair your mind conferences and he has his own radio show and I gets into this dynamic Laura deeply mm-hmm I know they are presented by Jay and one last one up question mark if you no could say something about the recruitment process to this organization how it does look like for example if somebody is a worker of such organization if now you admit a requirement how the congrat a generational level recruitment is done simply by family members bringing the younger generation into the fold of the cult at a level that operates with the general public which was my involvement recruiting is done through free will they don't want people who don't want to be involved involved they don't go out and try to actively convert people to their mindset they put their literature out there and for those who have slightly psychopathic tendencies let's say they'll be attracted to that literature and then become involved through their own free will as I did and then the material that is basically the application material for involvement with one of these cults or grottoes whatever you want to refer to them as is an extensive psychological profiling it's an extension extensive psychological workup on the individual by asking them many many questions about what they think on several different issues politically socially philosophically ideologically you know they get inside your head with a lot of these deep probing questions they you know want to know who you're your role models are who you look up to what books you read what movies you like just everything about your internal psychology so that they can recognize what where you're already at where your skill sets are you know how you might serve them what best ways they could bring you in gain your trust put you to work for them toward their agenda if you look at the application material in particular for the organization known as the Church of Satan which I've actually published on my website on the section about Satanism you'll see all of these questions as they're pretty extensive the notion that the psychologist plays the great role this is all about as I've said from day one the occult is ancient psychology the dark occult is a class of ancient psychologists that were called a priest class back then and they still operate as a priest class but essentially they are dark psychologists that know all the inner aspects all the workings of the human psyche and human motivations know how to exploit them know how to manipulate them and they're doing it on a completely unconscious public that doesn't know themselves that's why it's a piece of cake for them to do what they're doing ladies and gentlemen stay with us more of your calls on the other side of the break we'll be right back [Music] [Music] welcome back everyone you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening com toll-free number to join us I'm taking calls in the second hour of the show 831 394 43 I want to thank Bart from Poland for his excellent call in the first hour of great questions let's continue with our callers and hear from Joe in Los Angeles Joe you are live on what on earth is happening welcome to the show thank you Mark I think it's important to note that we and you know we all accept we should accept blame for this we fund these order takers we fund them through our our fear and paying taxes and in an even more diabolical way that I found I looked at my 401k and my IRA accounts and I looked at the book because I don't know money that well and I started looking at the companies that are listed in what's called this SNP 500 and do you know without me knowing as much as I try to follow natural law veganism watching what I buy why I contribute you I unknowingly have been contributing to companies like Monsanto Pharmaceuticals fracking you name it all the stuff that all the truths movement is against so I'm saying as to others that may be worth ignorant as I am we're actually a magnessen now if I continue to invest in those things I am I will be ignorant they're hidden in there and they're one another fear tactic of you will be taxed if you don't give us that fake money back that you've earned and put it in something like an interest you know IRA or 401k because you supposedly can't have it sitting in your savings accounts so my wife and I are currently working on getting rid of these things and I got to tell you the penalties are unbelievable like you have a penalty up front I believe you have a tax penalty immediately and then I think you get another tax penalty in the coming year however that works so I just wanted to alert your people of that and then the only quick question I have is I know you've mentioned before on the show and if you feel comfortable can you please give your tips on how you don't pay taxes because I think that's what you said you do I only only agree to work for anyone for cash that's it so that's an extremely difficult way to live in the modern world I know that's all I'll say about it I mean so my the money's going from there their hands to my hands and that's it there is no middleman that's why they want to destroy cash in society that's why they want a cashless society so that no one could possibly do that see my take is so much it's more extreme and different than most people I don't care if I starve in the street most people do most people will continue to play ball with this system because they care whether they will go hungry and starve in the street I'm never gonna give you anything directly as if I can help it I don't it doesn't make a difference whether I die the end that's the level of courage that people have to get to that's the level of courage that people have to get to and we're so far away from that that it's a joke it's laughable and they know that it's laughable you want to see the whole idea of money people in this movement still can't see that it's a religion and that it's all based on something that doesn't exist a construct invented as a quote-unquote medium of exchange when in fact there are only actual resources and actual people you know what's going to be food in the future I mean you know it's gonna be I'm sorry money in the future food seems to grow food anything that can shelter the body and any form of weapon or ammunition to fire from that weapon that's what that's what money is going to be and exist as which is called things with actual inherent objective value with real intrinsic value which is to eat it can you shelter yourself with it can you survive with it can you protect yourself with it that's it but most people don't want to understand that and they're gonna continue how many people continue to give their support to the monetary system in general how many people out there this is what they're chasing they're chasing an illusion it's all based on this illusion of security you know it's something I'm gonna get into in a huge way in in future shows the support of this monetary system and you know who the biggest supporters of of it are in our society the bit the people who are practically the absolute neophyte worshipers of the monetary system is the female contingency of this society as unpopular as that comment will be women are so tied up in the belief and money it's so few I mean so few men really understand that money is an illusion but the the level of mind control that that the female population is under when it comes to money being the source of some form of security and safety in this society is utterly laughable they have almost 100 percent of the minds of these people safety security beauty acceptance I mean you should see the Crick you know you see the thing is that they try to promote in your mag but real freedom is never discussed real freedom and this is part of the whole emasculation of the male agenda because they want to take the Sacred Feminine I'm sorry the sacred masculine dynamic of standing up for your rights and having the ability to defend yourself and the ability to provide for yourself independently away from the mail of society because they know they're the ones who who if they're informed enough and have the ability to defend themselves would be the ones with the physical strength to take action against this tyranny and that's why they need to masculinize the women and bring them into the state and emasculate the men so that they won't stand up for themselves I'm gonna be getting into this whole gender dynamic as a big huge dynamic of mind control operating in society and put there very skillfully put into this society by the social engineers who are basically running the show and it'll be unpopular you know I'll I'll be I'm sure I'll be called the misogynist for you know alluding to these issues and bringing them to the fore but so be it so be it people can think whatever they want I'm not here to be your friend folks I'm not interested in your friendship I'm not your pal I'm not your buddy I'm here to speak the harsh plain truth so you can hear it and you could wake the hell up and start taking this country and this planet back from the Psychopaths who have taken it Marc have you have you heard from the IRS regarding no and I will ignore anything they send to me what you're not going to get blood out of a stone first of all and secondly I'm not giving you anything pedophiles the end your pedophiles I know definitively what you're doing what government is doing with children I'm not supporting it the end ok the end you know once people understand that see if people really understand who they would up again we're up against definitively for real they wouldn't contribute their energy to continuing to help these people that's why if I had any magical ability all I would want is the ability to knock somebody unconscious and throw them in a ritual chamber with these Satanists because then you'll see Chiefs of Police judges teachers doctors lawyers everybody at every level of every social institution at the highest positions of power are involved in the satanic cults they're running your society you'd see that in a heartbeat and your your eyes would be open to what the world is truly suddenly unfortunately I don't have that ability I wish I did Joe thanks so much for your call great points we'll pick this up on the other side folks stay with us [Music] welcome back everyone you're listening to what on earth is happening here on RPN i'm your host mark passio my website what on earth is happening calm I want to thank Joe for the call in the last segment let's go back to the phones and hear from Fred in LA Fred you're live on what on earth is happening welcome yeah market spread in Iowa in

Iowa I'm sorry hopefully a dialogue if you recall on the Bob Tuscon show I was a hostile caller and we talked it wasn't a month roaring large March or April you recall that vaguely I do a lot of radio shows and interviews so what was the topic more or less than New Age movement I would like to talk about that later I'll have a dialogue with you but begin with everything you said in your rant on the first hour and your monologue I agree with you 1,000% total agreement to have a moral government requires the moral people Americans anymore are not moral and there's mitigating circumstances for that okay I strive to be a Christian and I fail every day of my life if we want to lay the troubles of our wars we could put them at the feet of ill understanding Christian they go along they don't know their Bible and the mitigating circumstances are that they have ignorant pastors or pastors with an agenda or even psychopathic pastor now to reiterate my face my foundation is the word the Bible that is what I judge everything again now when you went on on your rent and then just before the break what you said I'm an agreement with and I don't listen to your show because I was so teed off that I have hardly ever listened to it but right now what you have said and I'm saying it again I agree with you the issue I have and I made a misinterpreted is this the New Age movement is to brainwash and take away from people there are moral values put down and the word I absolutely agree and what you could do if you want to hear my take on the whole New Age or as I have come to call it along with many other researchers the new cage movement fred is you could check out my work on new-age BS and the suppression of the sacred masculine which is out there in several different forms it's out there in a slightly over one hour presentation from the free your mind to conference it is out there in a seven hour extended presentation of podcast a video podcast with slides and then it is out there in an even more extended format that I gave in I believe it was in North Carolina it was New Age bs extended an extended version of the presentation revisited with even more points that I brought up about how the New Age is a the New Age movement is kind of a deceptive religion which is trying to get people to to stand down not stand up for their rights actually you know fall into this idea of accepting everything as it is regardless of how much evil is being propagated and I get into your you know what you brought up that it's basically destroying morality through the concept of trying to emphasize moral relativism within the movement so Fred I want to thank you for your call and the points that you've brought up and I want to point you to those videos I think you'll get a lot out of them they're all on my website in the videos section let's hear from Eric in Colorado Eric you are live on what on earth is happening welcome are you doing I've been better kind of are kind of disillusioned that the general state of the consciousness that is being displayed in on planet earth right now but what do you have on your mind tonight well maybe I can cheer you up a little bit so we've had two meetings of for your mind Colorado great um following in Ivan's footsteps but for your mind Arizona absolutely great job I've had a couple people contact me via the net for you know other places that are trying to start up awesome the word is spreading um you know they've both been well attended it's a really great news Eric yeah people really interested we actually had a guy come in named Mike and he helped Richard Grove I guess he and his girlfriend helped Richard Grove with the taping of the occult of the demystifying the occult thing you know he was sporting one of your fine what on earth is happening t-shirts excellent as offended as you want on the back oh yeah that was a custom one that they are a listener to the show made and brought a few out they actually gave me one it was pretty cool sweet but uh so I'll throw in my two cents on Ferguson too if you if you're interested in or go right ahead um so I don't that was you who recommended it but this film snowpiercer that came out recently yeah yeah great movie great allegorical film yeah and you know to me the the main that's just that I refer people to in that film that I think useful it you know it communicates very well is that you know what the ruling class wants to get us doing is killing each other for them like this is by far the most efficient way that they have to control populations and to keep us all terrified and and you know if you look in I'm sure you have liked to you know what it says on the Georgia Guidestones about the big picture and you know I look at GMOs and vaccines and all the pesticides and you know just clearly they've been you know engaging in what I call you know song term soft kill program of reducing a population and Eric even more so than getting us to even fight with each other it's to get us to control each other to get people to be so afraid of stepping out of line you know that's what that whole movie was about know your place know your role stay in line stay in your place you know we're doing that we're policing each other and keeping each other in the mindsets that were in and in the support of the immoral system that we're in more so than anybody else more so than any external force that that's pushing on us to do that we're doing that for each other and acting as our own sheepdogs if you will exactly and you know this whole dynamic of this you know almost like a war that's happening between the sexes if this is what's driving it this social engineering you know I'm gonna talk a lot about you know things like even declining birth rates in Western nations you know and that's part of the eugenics op you know that's part of the depopulation agenda you know to get the the sex is warring with each other as well when they have two equally wake up to how these mind control tactics are being used in our culture its total cultural conditioning its mind control programming and I'm telling you some of the institutions that are putting it out there are the think tanks you know the Tavistock Institute you know different think tanks out of England different think tanks out of the the US and you know people don't even understand how these social engineers operate or the depths of site psychology that they have at their disposal to manipulate the masses and until people understand those aspects of the psyche and how these manipulation techniques are being used they're powerless to defend themselves against them yeah yeah it's that's why you know I've taken really deeply to heart your you know ethic of really focusing on causes rather than symptoms and you know I mean there's there's people around me right now who are getting fired up you know we know we need to go you need to go protest we need to fight this out in the streets and I just like I'm like you know really you want to go to war with this when you're surrounded by people who are so misguided they still think it matters who they vote for becoming like we're really ready to sustain a kind of warg into this massive war machine when when people can barely figure out what's going on moment to moment you know I I don't want to squelch anyone you know fire to stand up for the rights and whatnot but I'm I just know I don't see it being really truthful Eric I want to once again applaud you for all your efforts out there in Colorado keep up the great work with the free your mind group out there thanks so much for the he'll stay with us everyone would be right back [Music] today welcome back everyone last segment for this edition of what on earth is happening for this evening we're taking your calls I want to thank Fred and Eric for their calls in the last segment let's continue with your calls and let's hear from Ivan in Phoenix Ivan my friend welcome once again to what on earth is happening what do you have for us this evening hey Marc I'm glad to see that Eric got to caught the call in here every once in awhile that guy's from the meetup groups try and get into your show but you have so many callers that you forgot to get in the lines fell out pretty quick went one saw you know I give out the call and number I'm glad that to see that I'm glad that you know people are always have really good comments and questions and as I've said before I think this show gets the best callers in talk radio now as to the meetups I want to say something before I let you go on with your comment or question I did a search for freedom related meetup groups on meetup.com earlier today and it was very telling and it simultaneously gave me the chills and made me want to weep at the same time and I'll explain what I mean by that they gave you they give you a map of the globe with all the meetups that are related with issues of freedom with little red markers in those locations and you when you type in freedom meetup groups freedom related meetup groups you see all these markers on a globe of the earth on a map of the earth and almost the entire world is dark except tiny little places in there's some some in Europe you know there's some in Canada there's some in Australia there's some in New Zealand the basic English speaking areas of the world there is zero in like the whole Asian world there is zero now with the exception of like you know a couple of countries in Africa there's zero in South America and Central America but then the United States is so covered with meetup groups related to freedom that you cannot see the map underneath the red markers there are so many of them throughout the entire United States that it completely covers the map and when I saw that I just like you know it was almost like I couldn't believe it it's a very encouraging sign actually there's a lot of encouraging signs going on that there is a slow progressive awakening happening in this country and as the police police state marches forward I would expect more people to start waking up and becoming concerned and getting involved in really understanding the real issues that are going on so Ivan I'll just you know I threw that out there and I'll let you continue with whatever you want to talk about well well not now that you mentioned that that kind of takes me in a different direction from what I wanted to bring up some I'm still really working on my courage even though I've done the meetup group and the website there's a lot more that I know I need to do and I thought I can do and I need to get back to doing my podcast show it's been already over a year since the last show I only did four episodes time just flew by and I have these thoughts and ideas that I need to get out there but a slight fear in the presentation of it holds me back I don't want to put something out there and have it all you know like or or and I'm a couple can I make an effort in a laying some of that fear you're incredibly well-spoken Ivan you know the issues at hand I know that you do from speaking to you personally the all you got to do is go out there and start doing it let it happen naturally it will that will come those skills that you're concerned about will come over time you go back and listen to some of my earliest work you know I think I've come a long way in my presentation and delivery style compared to where I was I never really had those fears because I've throughout my life always been in front of the public I've been involved in music since I was 15 years old I've always been up on a stage it's like the most natural thing in the world for me to be out there in front of other people so I never had the issues of stage fright or you know speaking in public you know you know anxiety I guess you could say what I want you to know is it if there's anybody I know that can get out there and do this it's you I'm telling you that as a friend I'm telling you you have nothing that you should be worried about you know the truth you know what's going on just get out there and put it out there and let the chips fall where they may Wow well thanks for that Marcus you will not be doing anybody a disservice you will not be doing anybody wrong and putting out bad information I know that you understand yeah I got it I got it in fact now that you keep on tacking it on one of the main ideas that I had I've had for like two years and it it deals with this Ferguson stuff and what you were talking about on this show one problem that I've always seen is this constant thing that we any everybody anybody who drives has seen this when you're driving on the road and you see a police car with somebody pulled over we drive by like I'm glad that's not me and that's one of the attitudes that needs to change I've always envisioned what needs to happen in these situations every single car on the road that sees that police car pulling somebody over needs to do a u-turn pull over and you need to have 20 30 50 cars everybody pulls up right there to see what is what are you doing officer what are you doing to this guy that's that's a key that will shift it because right now it's it's at a point that three four or five police cars pull over for one person who ran a red light or something and all the pedestrians keep going now if you're doing any streets of America is even infinitely worse Ivan they're stopping people for walking down the street in the middle of winter with hands in their pocket saying that you look suspicious because you have your hands in your pockets you know I mean we're at a place that we're worse than Nazi Germany ever was with show me your papers saying you can't walk down a street in America with your hands in your pockets in wintertime you know that's right we're at folks right well let me throw out the quick feed of what I one of the areas I want to put out in my show along those same lines of this police officers pulling people over we need to give people a choice an option you want to get pulled over by the red and blue lights and get chance and being here or we want to have out there some kind of service or a group of people that put you at ease that make you relaxed that yes you're needed help this group you you're pretty sure that they're there to help you and that is what I would like to start planting seeds for us we need helpers and I've broken down the word helpers to mean human evolution lead person emergency response services and these guys can be wearing green jackets for balance with the yellow letters of helpers and they do everything pretty much just like a police officer but they're not there to enforce laws they're there to help people imagine that concept mark so that you know that's an idea that I had but that needs to be people that know natural law right then know the difference between right and wrong people who have a balanced mind not coming back from Wars and learning to kick people's but see that that's like people like us who know what's going on to go out there and spread this and that's what needs to happen and like one thing that that I liked is what you mentioned what the meetup all the red dots on the US if the United States or if America is going to be of some kind of importance maybe that's the importance of leading the world in this creating helpers not only us Oprah's but then global helpers because if the u.s. comes down if helpers bring down the u.s. system that exists then there's that fear of other countries coming in sure but on the ground we need to have global helpers that China has helped Europe has helped it and then when those governments try and do something help her step up and then globally it's like a militia but yet it's no military kind of name to it thumpers and like I said human evolution lead person emergency response services and that's what it is people taking care of people who know the difference between right and wrong be a very interesting concept you know I mean I think you should put it out there and see what kind of response it gets from from individuals who might want to you know get involved in starting something like this why not you know and that's what putting together information reaching out to people through meetups and and websites and podcasts is is ultimately all about it's finding people who think the same way propagate these ideas and you know we can change society for the better if we all get involved again the concept of many hands making light work you got to get involved in there in whatever capacity that you can put the information that you know out to other people because not everybody knows what we know folks you know it's up to us to spread that information in a distributed sense throughout society ladies and gentlemen that's all the time we have for this edition of one on earth is happening remember there's only two mistakes you could ever make on the path to truth not starting and not going all the way thanks for listening - what on earth is happening we'll see right here next week good night everyone [Music]

What On Earth Is Happening Show #178

Topics: *Order Followers "The Bane of 21st Century Earth," the Definition of Order-Following, the Difference between Following Orders and Exercising Conscience, Objective Right and Wrong, Using Judgement to determine the difference between Right and Wrong Behavior, Personal Responsibility, Justification for Order-Following, People who make excuses for Order-Followers are Nazi-Lovers, Order Followers have NO REAL COURAGE, Order-Followers are CULT MEMBERS, the Ancient Techniques used to dupe Cult Members throughout human history, Fundamentally Flawed Axioms which people repeat regarding Order-Followers: "They're not ALL bad," and "Their actions are evil, not them personally," Order-Followers ultimately work for Dark Occultists whether they realize it or not, the ability to admit that you were duped as the Measure of a REAL Man or REAL Woman*

freedom man that's what it's all about [Music] you've got to groove on freedom like the good book says [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio [Music] welcome one and all you're listening to what on earth is happening here on republic broadcasting i'm your host mark pascio my website what on earth is happening dot com the network's website republicbroadcasting.org today is saturday december 6 2014. the show is live every saturday evening here on rbn from 10 pm to midnight eastern time that's 9 p.m to 11 p.m central time we have a good show lined up for you here tonight i'm going to be continuing to talk about the overall psychological dynamic of order following and how the order followers of this world have absolutely zero to do with virtue have absolutely zero to do with true responsibility as an adult human being i'm going to be talking about how order followers are the general bane of 21st century earth and how that entire psychological dynamic needs to go extinct it needs to leave this planet if there's ever going to be anything that resembles true freedom here on the earth and as part of this discussion i'm going to talk a little bit about the current events that are happening in the united states particularly the eric gardner situat garner situation in new york city talk about some of the dynamics having to do with our wonderful order following friends as it relates to that entire situation i'll also be taking calls uh probably about halfway through the show so i'll give the call and number here at the beginning at the top of the show for those who want to get in the caller queue the call-in number to join us here on what on earth is happening 800-313-9443 once again the call-in number to join us talking about the dynamic of order followers 800-313-9443 i would particularly love to hear from order followers themselves although i doubt that they will have the intestinal fortitude to call into the show and take me on head on what i would really love who i would really love to hear from ladies and gentlemen are people who are in a relationship with order followers i want to hear from the wives of order followers i want to hear from the brothers and sisters of order followers i want to hear from the children of order followers and i'd like to ask you some questions about how you see your uh the person that you're in this relationship with your family member your spouse etc so who i would really love to hear from are people who are in any kind of an intimate close relationship with an order follower that's whose mind i really want to pick on the show and on the the next several shows where i'm going to be covering this dynamic so that's on the agenda for this evening we'll be getting to that in a few moments let me go uh to a couple of quick event announcements the freer mine three conference the biggest event of its kind in 2015 coming at you april 10th 11th and 12th at the sheraton bucks county hotel at 400 north oxford valley road in langhorne pennsylvania just a hop skip and a jump outside the city limits of philadelphia speakers already confirmed for free your mind three are as follows bob tuskin clint richardson curtis the illuminated one davis dennis mckenna derek bros ed fortune the new jersey weed man freighter x freeman fritz springmeyer j parker john vibes josie the outlaw wales larkin rose mark devlin and myself mark pacio i am going to have a presentation on the dynamic of order following prepared for the freer mind 3 conference i actually have a working title for my presentation my presentation at the freer mind 3 conference is going to be called the cult of ultimate evil order followers and the destruction of the sacred feminine that's going to be my presentation at for your mind three also just added to the freer mind lineup there's going to be a panel discussion group featuring luke radowsky and several other speakers and there's going to be open mic sessions at the end of the night i believe for at least two days of the conference uh people who attend the conference will get approximately five to ten minutes to air their views on whatever they really want to talk about or expose to the public and these sessions these open mic sessions at the end of the evenings will go for approximately two hours at the end of the night time permitting an all weekend pass for the freer mind three conference 150 dollars ladies and gentlemen i'm proud to announce uh that the organizers of the conference have given me an exclusive to announce here tonight on what on earth is happening you could enter a coupon code at checkout at the free yourmineconference.com website where you can get advanced tickets for this conference it's the best way to support the free your mine conference because a whole lot of funds have to go into uh renting the venue and getting the uh speakers travel expenses together to get them all to the philadelphia area and to lodge them for four days in philadelphia so um the best way to support the uh goals of this great event is to get your tickets in advance at freeyourmindconference.com and as i said for the first time here tonight i'm announcing an exclusive for what on earth is happening radio listeners you can enter coupon code 93 at checkout when you're getting your tickets online for a 20 discount to take the all weekend pass back down to 130 dollars uh you can't beat that ticket price anywhere for a conference of this size and scope with whistleblowers from all over the country remember enter coupon code 93 just the number 9393 at checkout at freermindconference.com to get a twenty dollar discount on an all weekend pass that's the freer mind conference for more information on this phenomenal event please visit the conference website at freeyourmindconference.com i also still have what on earth is happening dot com promotional t-shirts available you can get a promo t-shirt which is a great gift for the holiday season it's a great conversation starter it's a great promotional piece for my website in return for a voluntary donation you can find out about this by going to the news section of my website and clicking the email link that is listed in the article and then you could email me and find out how to go about uh making that donation so you can get a what on earth is happening t-shirt there's also a donation button on the left hand side of the what on earth is happening dot com website if you feel that you have received value from the information that's been presented here on this radio show through my podcast through my videos on my website and youtube channel please feel free to make a voluntary donation to help support my work and my efforts so that they can continue into the future and every donation is very much appreciated and will be put to good use you can uh do that by clicking the donate button on the left hand side of the wall on earth is happening.com website uh there's only two images for today's show they're usually listed underneath the player with the broadcast or with the podcast and those two images um are for the for your mind conference they're the new flyers really great artwork that has been worked up by someone who has volunteered their talent to help out with the art for the conference more coming at you right after this break stay with us [Music] welcome back everyone you're listening to what on earth is happening here on republic broadcasting i'm your host mark pascio my website what on earth is happening.com tonight i'm going to be continuing talking about the psychological dynamic of what is going on in the minds of people who become order followers what is order following first of all we really should define this we should define it very specifically and unambiguously so we know exactly what it is i'm talking about so many people will hear a phrase they'll hear a concept and they'll just try to you know go along with the definition that they already have in their mind instead of really sitting there and logically breaking it down and analyzing and looking at what it really is not thinking about it from the perspective that you want to think about it from but actually define it actually get down to the the nitty-gritty of what the dynamic of order following actually is and what order following is uh unambiguously is taking action based on what another being commanded you to do with their words when in fact you are not first deciding for yourself through your own skills of judgment through your own mental processes whether that action is actually a right or wrong behavior that is the definition of what simply doing a command that someone else has given given you or in other words following an order actually is so let's get that totally clear to begin with here when i'm talking about what order followers are now since that is the definition that we have firmly established okay and i don't see how anybody can really deny that that's what an order follower is someone issues a command the person follows the command it's so simple it's almost stupid when you think about it that way okay we can't get any simpler than that it doesn't mean they're doing any kind of mental processes to determine whether it's right or wrong an order follower does what they are told they follow the command that's what an order follower is now what we want to establish is is this what modern institutions of police and military and other government employees actually are are they order followers and i would say absolutely yes they are order followers because is a cop or a military personnel trained to sit there and debate philosophize think analyze regarding a dynamic of behavior they'll be the first people to tell you we're not thinkers we're doers we're not there to analyze the law we're there to enforce the law we're not there to think about our orders we're there to carry out our orders they're all too happy and proud to actually say that this is the dynamic that they engage in i've talked to many of them personally in the past and i'm telling you they're highly proud that this is the the way that they display their loyalty to their institution by not thinking and i would say that goes for 99.99 of them okay now there there may be very very few exceptions to that rule so i can't say 100 of the people are like that but i'm telling you right now the vast majority so let's let's get that clear before we go any further i'm going to make generalizations i always make generalizations in my work i think anybody that doesn't put forward a general philosophy without making generalizations is completely an unrealistic human being generalizations do generally hold true which is why they're called generalizations most people in these institutions fall into this category the other tiny tiny percentile of people that do go against that grain often don't last too long in these institutions folks because the institution doesn't want thinkers it doesn't want people that are going to question their orders it wants people that are just going to follow their orders that's what these institutional bodies are that's what they're set up that's what they're designed for if you don't understand that you're an extraordinarily naive human being so the dynamic of order following is about skipping the entire analytical process that should come right after someone is told this is how you should behave or this is what you should do or even if they're thinking about a particular behavior on their own the next step should be looking at what the difference between right and wrong behavior is and comparing that behavior to that set of standards which is called morality and this process is called exercising conscience it's saying do i know what the definitive objective difference between right and wrong behavior is which we've discussed odd infinitum on this show called the boundary conditions known as natural law consequences the difference between right behavior and wrong behavior right behaviors actions which do not cause harm to other living beings and wrong behavior are actions which do cause harm to other living beings does somebody who's an order follower sit down with that set of standards of moral standards objective moral standards in mind and then weigh the behavior in that balance and decide here are the the behaviors that fall within the parameters of wrongdoing because they are an affront to natural law they are things that are considered transgressions against natural law there are things which are ultimately based in theft from somebody else taking something from them which i don't have a right to take murder the taking of some other being's life uh rape that the the taking of sexual free will association assault the taking of uh someone's physical well-being that isn't yours to take theft the taking of property that isn't yours to take trespass the taking of security that isn't yours to take okay you know murder assault rape theft trespass coercion taking free will away from someone this is these are all forms of theft we've gone over it you know until i'm blue in the face basically in my natural law seminar in my podcasts on natural law go back to podcast number one listen forward you'll come across them somewhere i think in the in the seventies somewhere but my point here is is an order follower sitting down with the objective standards of right and wrong behavior and then actually weighing that potential action in that balance no they're skipping that entire analytical logical process the whole process of logic and they're just going right to the action i'm commanded and i act because what they really don't want is the responsibility of deciding and judging for themselves the difference between right and wrong behavior and whether the action that they are about to take falls within the parameters of right action they don't want that responsibility they want to remain little boys and little girls little children who don't exercise personal responsibility for their own behavior and are constantly making moral justifications for wrong behaviors again we looked at the word the breakdown of the word justification and the here's the problem folks before i even break down the word too many people are willing to excuse these order followers actions i'm going to get into the the whole um you know situation regarding uh eric garner as a case study as an example regarding order followers and what they actually do and the chaos that they actually cause in our civilization you know but the the bigger problem even then the order father was willing to perform these actions in my estimation is people willing to justify their behaviors endlessly to a point where they'll actually support something that this absolute murderer did to a person living in america you know and they'll actually support that kind of sick psychopathic immoral behavior it's absolutely disgusting and i'm personally disgusted with it justification for psychopaths we'll pick this dynamic up on the other side of the break folks you are listening to what on earth is happening right here on republic broadcasting don't go anywhere we'll be right back [Music] foreign [Music] wake up [Music] welcome back everyone ah yes the great band spirit caravan there with the lyrics wake up from your sleep if it's your soul you want to keep and that's the problem folks too many people are still in the consensus trance that there's any such thing as a good order follower there is no such thing as that creature in the universe there never has been any such thing as a good virtuous or moral order follower doesn't exist has never existed at any time period in history on this planet or any other does not exist now and never will exist in the future as long as you're living in a in the three-dimensional universe in the three-dimensional space-time continuum ladies and gentlemen there is no such thing as a virtuous good or moral order follower because by definition if someone is following the orders of another person they cannot actually be exercising the dynamic of conscience which is to weigh and judge for yourself whether a behavior is falls within the parameters of right or wrong and if you are not doing that for yourself therefore you are an order follower you can not be a good individual the definition of being a good individual is to exercise conscience which is the willful choosing of right action over wrong action once the difference between the objective difference between right and wrong behavior is fully understood and integrated into the individual's awareness but here's the problem the problem is so many people in this sick psychopathic society want to insist that there can be such a thing as a moral order follower so many people want to make justifications for order followers criminal behavior and as we've talked about on the show before people have to understand where words come from the word justification comes from two latin root words the word yes j-u-s in latin really in classical latin it would be spelled i us you know modern variants of the latin language will put the j in there which you know that character really didn't exist in classical time so you know it was spelled i us then but jus that's the root of the word justice because jus or ius in ancient latin meant law or right meaning morality to fall within the parameters of rightness within the law and then the second part of the word justification comes from the latin noun phacere fachere means to make or to create so we put them together yus and facere to make or to create right to make up what is right to create a new right to make up the difference between right and wrong for ourselves we can make it up we can create rights where a right did not exist because it was actually an immoral behavior that created harm but we can call it a right oh don't you know police have rights that other individuals don't have they're allowed to do things to people that other people would be jailed for that other people would be seen as a criminal or a murderer for but somehow they possess rights that other people don't have you know this is what justification is creating a right that does not exist and this is the problem is that too many people in our society want to make excuses for these psychopathic criminals they want to let them off the hook because you're in uniform you're just doing your job you're just following orders well guess what that's not a justification and just following orders and or just doing my job or however way that a member of one of these cults because that's what they are cult members wants to word this okay just following orders just doing my job none of these are ever valid excuses or justifications for immoral criminal psychopathic behavior and should never be accepted as such and therein lies the problem is that too many people just will accept that as a justification and the those people are arguably more asleep than the order followers themselves and i i actually in many cases will get angrier at looking at the rationales and justifications of these nazi lovers let's just call these people what they really are folks let's stop euphemizing things let's stop trying to be nice to people because we don't want to upset their delicate sensibilities they're nazi lovers that's what people who support order followers are your nazi lovers and that's what you've always been you're the same people who caused something like nazi germany by not speaking out by not getting up in an order follower's face and telling him he was full of crap and then what he was doing was wrong and immoral you know there's there's a phrase i can't really remember who said it off the top of my head maybe someone could call in and refresh my memory but the phrase goes something akin to there is a very special place reserved in hell for people who remain silent during times of moral crisis and that's where we're all at ladies and gentlemen in this society we are in a time of moral crisis and too many people are remaining silent they won't speak out they won't speak out to their friends their family members they won't get up in an order followers face and tell them what they're doing is nonsense and wrong and that's the problem they're in lies the actual crux of the problem the lack of communication between people as human beings because i don't want to cause waves i don't want to make people upset i want to be looked at favorably by these people i don't want them to see me as the odd man out or somebody who rocks the boat well that therein lies the the basic underlying causal factor of the problem fear not wanting to get up and engage somebody and call things what they really are without euphemism because i'm done with this society in case you can't hear it in my voice over the last few weeks i'm done with what's going on and anybody who can't feel moral outrage through righteous indignation through righteous anger about what is going on in this country and in the world has had something fundamental to being human robbed from them it has been broken from them it has been stolen from them it has been conditioned out of them and that's a choice ladies and gentlemen okay it's a choice to fall for that conditioning and mind control so if you can't feel righteous anger for what's going on in this country you have absolutely no idea what's going on like the saying goes those who aren't outraged aren't paying attention if you're not outraged you are totally unconscious and people will say they can't stand to hear me for any length of time because i display some emotion and outrage over the moral atrocities taking place in our name right under our nose in this country that was supposed to be founded on freedom and equality under natural law you're an immoral person if you're not angry about it how about that how about that you know i know so many people i'm telling you i know and see individuals in my life ladies and gentlemen there are people that i have met in my life and know personally that i have never seen them express the emotion of anger ever ever and that's not a person who has attained any level of self mastery or spiritual enlightenment that is a person who is fundamentally broken in the brain they're fundamentally broken in the psyche because they can't express that emotion of righteous outrage when people are being murdered every day in this country murdered by police now you look at this example of eric garner okay choked to death because god forbid he sold loose cigarettes without a license and taxation well we robbed from the god men international banker tax wage slavery masters are how dare you take pennies away from our masters in this world what are you thinking you're some sort of a free being that can interact with someone else voluntarily and be left alone you're insane it surely deserves being choked to death don't you think folks people in this country are clowned they're clowned by how backwards they think pick this up on the other side stay right there [Music] speak there's a wall between us but there's nothing wrong there's a code of silence and it can't go wrong yes there is a code of silence ladies and gentlemen and let me tell you where it really lies it lies in the hearts of the people who don't want to come out and speak out against this immoral system of corruption and order following there's where the code of silence is at that's where it has to be broken and you know where else it's at it's inside this cult itself the cult of order followers we need to stop calling this an institution we need to stop calling these people police we need to stop calling these people soldiers we need to stop calling them quote-unquote public servants they're most certainly not that we need to start calling them what they really are cult members that's what order followers are cult members i've gone on the show in the past i've done podcasts on it to explain the very techniques that cults throughout the ages have used to brainwash willing followers done whole shows on this maybe it's a good time to reiterate some of these basic techniques because this is what people don't understand you're dealing with a cult that is operating among you and moreover than that you're dealing with something that the people who did their best to try to bring a basic understanding of what would be required to keep any level of freedom active on this land okay continuously warned us about the founders of this country continuously warned the people do not allow a standing army to rise up in your midst continuously warned us to not allow that dynamic to happen less than 200 years later we have a standing army living among us in the form of militarized police forces they constitute a standing army this absolute communist michael bloomberg came out and so much bragged about this dynamic the other day he said at our disposal we have an army use the term army to describe the new york police department and he said it's the seventh largest standing army in the world and this is what we've allowed to rise up in our midst in america and that's what the militia was supposed to be on guard against that's what it was supposed to be used to defend against the rise of a standing army in our presence which the founders continuously warned against and that's why even provisions in the constitution stipulate that if an army needs to be raised it needs to be dissolved after the war is fought but no we keep a continuous standing army and we keep an even more infinitely dangerous standing army in the form of militarized police presence in every major city in the country they constitute a standing army and moreover what they really actually constitute ladies and gentlemen is a cult they are a tight-knit cult that has tentacles in every city every town in america and the techniques that are used to put people into this indoctrinated mindset into this cult mindset are the exact same induction techniques that are used for any cult throughout time the exact same techniques and there it's a piece of cake to use these techniques on people who want to give away their personal responsibility to judge for themselves the objective difference between right and wrong behavior or in other words who don't want to exercise conscience it's a piece of cake because what you accept essentially have on your hands when you have a person like that is a child who wants to be led that's the psychological dynamic at work here folks these are children who have never grown up they want to be led they don't have any personal responsibility they don't care what their actions are causing other people in the form of pain and suffering they don't care about the difference between right and wrong they want somebody else to tell them what to do so they could just do it without having to think for themselves that's called a child who does not want to grow up and take on personal responsibility for themselves and nobody's going to tell me any differently about what that psychological dynamic is because i've just given it to you straight about exactly what that dynamic is that's exactly what it is and when you have a bunch of little pathetic children on your hands that don't want to grow up a cult that is based on ancient occultic techniques of brainwashing and mind control and ancient subversive psychology it is a piece of cake for a cult like that to totally do a number on these people's minds and turn them into robot soldiers and that's exactly what the dark occultists of this world have done they own these people they own this cult of order followers they own this cult and they're only too happy to brag about it they'll brag about it in words to people who are within their circle of followers and they'll brag about it wordlessly through ritual and symbol through symbolism subversive symbolism that they plaster all over these idiot followers that they have amassed only too happy to tell them that they're their animals that they're their pets that they're their dogs that they command on chains and leashes they're a joke and the techniques are the same throughout history it doesn't matter what geographic region of the world it doesn't matter what time period of the world the techniques are the same and the dark occultists who use these techniques to bring these cult members into their thrall never vary they never waver they never change why would they need to change their techniques they work they work upon the simpleton mindset of these people when you have the mindset of a child and then you have people who have ancient advanced knowledge of human psychology and are willing to use it to manipulate people it's it's a joke it's a piece of cake it's a game to these people it's hardly even a challenge the techniques remain the same basic techniques throughout history have been used to indoctrinate cult members isolation heard conformity indoctrination through repetition saying the same thing over and over again until they believe it and using techniques of trauma physical and emotional against them isolation conformity repetition and trauma say them with me folks learn the techniques of cults because that's how these people are made this is how order followers are made isolation from the rest of society put them into an us versus them mentality get them to see everything as either part of the group or it's outside of the group demonize the outsiders outsiders don't belong they're not one of us it's us versus them if you could physically separate them from the community by putting them in a camp all the better all the better and these people can't see that that's what they are they can't see they're in a cult already police and military you are cult members it doesn't make a difference if you agree that's true you don't need to agree with it it's what these institutions are you're in a cult boy you're in a cult isolate them from the whole population create an us versus them mentality demonize any outsiders they're they're not us conformity no individuality will be tolerated break down the old identity give them uniforms give them the exact same look shave all their hair their head off their the hair off their head make them run through drills teach them songs where they say all say the same things at the same time it's called being a total conformist robot we'll pick up these techniques on the other side of the break stay with us ladies and gentlemen you're listening to what on earth is happening we'll be right back [Music] welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pacio my website what on earth is happening.com and i'm in a fairly serious mood this evening as i've been for the last pretty good amount of time because of what i see going on in america today that absolutely is disgusting and anybody who's not completely disgusted and outraged is an unconscious being period i want to talk a little bit more about the techniques of cults that are used on the zombified brainwashed population of cult members out there in the police and military you know i want to talk a little bit more about the people who support these people if you even want to call them people the justifications that they make for their behaviors or what what i would call the fundamentally false axioms that they believe in like they're not all bad they're not all bad all order followers are bad folks the dynamic of order following is bad that's what makes somebody a bad person they're willing to follow somebody else's orders by definition that's bad that's immoral this is what people can't understand because they can't logically process knowledge they can't think you can't make the conscious realization that if you are taking an action without actually weighing whether it is a right or wrong behavior first and you're just following an order from someone else you don't understand that's what makes somebody a bad person you have no idea what spirituality is at all at all how about this fundamentally false axiom it's not them that are actually bad or evil it's just their behaviors or their actions that are bad or evil that's like saying oh nazis weren't bad people just what they did was bad now that doesn't make them a bad person oh really you can't be defined by your behavior well what better way of defining whether a person is a good or bad being than their behavior huh you want to come up with some different better criteria for that i mean just think about how logical this is it's insanity it's brainwashing it's mind control to spit out this garbage totally flawed axioms that people don't even think because it's just wrote coming out of their mouth like verbal diarrhea then you have all the absolute mental midgets who don't understand moral culpability or responsibility they want to think it's all the politicians fault well the politicians ordered these police to go and shut down the illegal sales of lucy cigarettes on the street god forbid how dare we do this against our masters we certainly have to send armies of people to choke people into unconsciousness and death most certainly to put this absolutely horrific behavior to an end you know we can't have people interacting you know through uh voluntary interaction on the street with goods uh without the approval of their owners and lords how dare we you know and people want to say that's the politician oh i don't write the law i just enforce the law that's called i'm just a mindless drone robot dog who does what i'm told whether it's right or wrong it's a joke it's a disgrace and the people who still don't understand this dynamic are completely unconscious and asleep and that's the fundamental nature of the problem folks is too many people support the actions of this cult and support the members of this cult personally well what you gotta say to evil is it's all a crock of crap you gotta say no definitively to evil you gotta say i'm not having any of it i'm not gonna tolerate any of it and you gotta get up in people's face who engage in the dynamic of evil and say this is unacceptable behavior and it will stop we will stop it because this is not going to continue to go on in this country unchallenged and i'll guarantee it if it's the last thing i do in this life i will whip people into action to stop this dynamic or i'll die trying we're real short on time folks you don't understand what time it is it's 11 59 59 and you better start to understand it people who can't get angry you're not angry now what would it take for you to stand up as a real man or a real woman what would it take nothing because you're a slave who likes being a slave that's all comes down to you don't have a drop of courage inside of you that's what somebody who never gets angry is a coward a coward so what happened with this eric garner situation is a politician gave an order we can't have these slaves on the street voluntarily interacting with each other because we're not getting a cut how dare they think that they can keep the product of their exchanges with each other without paying us a a duty without paying us our extortion fee slaves might get the idea they're no longer slaves so get out on the street and harass them and put this practice to an end and stop them by whatever amount of force called violence that you don't actually have a right to engage in that you need to engage in to make them stop doing what they actually have a right to do there ain't no human being that interacted with eric garner that he physically conducted violence against and anybody wants to say that he was conducting a wrong behavior you're talking out your ass and you don't know what you're talking about because you don't know the difference between right and wrong behavior if that's what you think and if you think that and you think what was done to him is somehow justified you're a nazi lover and you're a cult member supporter choked to death over selling somebody a cigarette this is where we're at in america folks and the fact that people are outraged is an even bigger outrage than the act itself now there is outrage i mean there are people who are outraged are out in the street over this it's somewhat of a healthy sign you know but the fact that the average person in america isn't absolutely turning their life upside down because stuff like this in general is going on i'm not just talking about one of these incidents i'm talking about the general state of things the fact that they're not actively engaged in putting this dynamic to a rest it it speaks volumes about the total loss of morality in this nation the total loss of morality i'm just sick to call the people around me countrymen anybody that i even live around because they're just disgusting absolute immoral trash [Music] your calls on the other side of the break i've been informed we have a cult member on the line we'll pick this up on the other side you're listening to what on earth is happening we'll be right back i've got one more we don't need no education we don't need in the classroom [Music] welcome back everyone you're listening to what on earth is happening i'm your host mark pacio my website what on earth is happening.com before we go to the phones i just want to address this issue of moral culpability when it comes to order followers people insist it's the politicians that are the problem it's the order givers that are the problem well there would be no death in the eric garner situation okay if it was just a politician saying we don't want you selling those lucy cigarettes they told an order follower who went out and was willing to give his energy of his body into doing a violent behavior order followers are the ones who actually carry out the orders therefore they have brought the resultant harm into manifestation in physical reality this is what people cannot seem to understand that's what it means to be personally responsible for the causation of that harm not the one who ordered the harm carried out the one who actually did the harm that's what blame is for ascribing culpability that's what the word culpability means culpa in latin means blame who is at fault who is the one who actually caused this harm to come into manifestation in the physical reality well of course it's the one who took the behavior not the one who said that the behavior should be done or wrote down that it should be done the one who did it is the one who is the most culpable the most responsible am i telling people that politicians and order givers have absolutely no moral culpability no never ever ever ever once made that statement and never would once make that statement you'll never hear you cannot go to any place in any interview or podcast or video that i have ever done where i have said that an order giver bears no moral culpability for their behavior for their immoral behavior because i have never said it and never will make that statement what i have always focused on is that the order follower bears more more emphasis added more moral culpability than the order giver because through their actual behavior they're the ones who caused the harm and brought that into physical reality and if people don't understand that i don't understand what's wrong with them there is something wrong with their thinking there is something fundamentally broken in their ability to analyze and logically think if you don't understand that an order follower is more morally responsible for harm that results in the world than the one who spoke the order to them i think most of the people who listen to this radio show do understand that that truth so let's go to the phone lines and see what people have to say about this entire dynamic that we're seeing play out in our world cult members and their family members and supporters will go to the top of of the queue ron who is a police officer i mean a cult member uh you're live on what on earth is happening welcome to the show what do you have for us this evening um i've been a police officer for 10 years mark have been or still actively are still am how do you enjoy your cult well i found your work um do you like serving satanists you like serving six the satanic elite of the world who are pedophiles you want to have a conversation or not no i want to ask you if you enjoy serving the satanic elite because you don't know who you serve you think you do but you don't see i definitively know who you serve it doesn't matter whether you don't sir you don't need to even know it in your own mind for it to be true you think that what you understand about the world is true you have no idea who you serve none bad none you can continue now i wanted to make that statement first i first found your work on natural law and what i do is try to enforce natural law again what you're trying to do versus what you're actually doing are two different things if you're still involved in this cult what i'm trying to explain to somebody oh meet the caller for a moment so i could explain a point what i want to explain is that the intention of what someone thinks that they are involved with versus what they are actually involved with are two different things what if you would have asked a nazi in germany what are you actively involved with they would have told you well i'm trying to bring about this result in society i'm trying to do this i'm trying to uphold the laws of our culture that are made by our politicians it wouldn't have made the nazis any less evil would have made them any less evil what you can't see because you're too close to the the dynamic ron is that that's you you're still involved in the cult of ultimate evil doesn't matter whether you don't understand it doesn't matter whether you perceive it differently it doesn't matter whether your intention is honest meaningless all of those things are meaningless and i'm just it's just i can't even believe we're still at a point where people don't grasp this in the year 2014 going on 2015. i still can't believe that they can fundamentally confuse intent with actuality of bringing harm into manifestation by what they support and condone people in your cult are murdering people with impunity on a daily basis in this nation and whether you understand it or not you're part of that dynamic finish what you want to say on mutum yeah how nice of you to mute me it's easy when you're behind the microphone yeah that's correct because it is my radio show and if i'm going to make a point on the air i'm going to do it sir finish what you have to say let's see in some cuffs and make that same move buddy i don't do anything that's against natural law so anybody that wants to try to put me in that situation will have to come and do it with the proper amount of force because if i haven't done anything wrong to another human being no one's taken my freedom so you're still in the satanic mindset i'd love to see people like you come out of it but you're committed to it for a reason you can't admit you're wrong you're not man enough you're not man enough to admit one fundamental thing you've been duped you've been duped see that's what makes me infinitely more of a man than most men out there because i could look at myself in the mirror and say i was duped i figured out that i was duped and then i had to take a long hard look at the soul go through the long deep hard night of the soul and say to myself how do i let myself get duped like that and now what am i going to do about it but i went through that process and i came out the other side of that process and then became a force for truth and goodness in this life because people don't want to hear that hard truth of who they're really serving because they want to fundamentally believe that they're doing something good with their intentions when they don't really know who or what they're involved with at a higher level because they don't have enough knowledge they don't have enough knowledge and they haven't done enough reading and seeking and discovery in their lives to understand what they're really involved in and that's the fundamental dynamic nature of the problem we'll pick this up on the other side folks you're listening to what on earth is happening here on rbn we'll be right [Music] destroys back night night divides the day try to run try to hide break on the view to the other side to the other side welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pascio my website what on earth is happening.com we're taking your calls till the end of the show this evening let's go to another caller and hear from zach in chicago zach you're live on what on earth is happening welcome hi it's good to talk to you again mark thank you i uh i heard the little jab the last caller said he was like oh you wouldn't be saying that if you were in handcuffs and even though i would have liked to hear what he had to say you're completely right that he is still stuck because of that little jab it just goes to show that he's just like intimidation once again so few people are ever going to come out of a cult mentality because as i said they can't admit that they've been duped i often think about how many people who were involved in satanism at the level i was involved in it with will probably hardly ever if ever come out and expose it and talk about it because they stay in that mindset for life most people can't ever break out of that mindset in multiple lifetimes you know they it's too painful for them to admit that they were wrong and duped this is part of the problem when it comes to the dynamics of people who are supporters of order followers you know they don't want to admit that they've been duped into an ideology and supporting something that is ultimately evil and ultimately destructive of human freedom now these people don't even understand they're not only enslaving other people they're enslaving themselves and they're enslaving their own family members simultaneously they don't get it even if he thinks he's you know trying to uphold natural law he's still driving around in a vehicle that's been provided by the state just you know intimidating people let's put it this way how could anybody possibly uphold natural law if they are a believer in authority and following other people's orders it doesn't even make any logical sense that that statement makes abs there's it's totally inconsistent with itself you know you can't possibly be upholding natural law if you're following orders and you believe in authority which is what the state is period you know agree completely and i have just a few things i'd like to uh bring up to you sure about natural law um in this day and age you know there's a lot of things we could focus on and uh and i love all your work and i've kind of realized that the three most important things at least from what i have found is the understanding of natural law the real holy trinity and the trivium and that's right kind of like a nine-fold system um where like you have to categorize your thoughts emotions and actions into the grammar stage right you have to logically process all your thoughts emotions and actions and then you have to act with your newly processed thoughts emotions and actions that's right yes exactly i mean that that's it that is what the the trinity within us is all about and the three fold methodology to discover truth to understand it and then to act upon it exactly a very accurate uh understanding okay thank you um the next thing i'm jumping over to symbolism um because i always see the stars on the police cars i'm just like those stars should be pointing downward and going off of that i was watching full metal jacket a while ago and i noticed that at the very end when the soldier that goes crazy kills the real sergeant and then himself right there are two downward pointing stars on the wall behind him and then as the credits start rolling you see two broken pillars in the background amidst the fog this is a very deliberate symbolism thrown in there by stanley kubrick of course who was you know the maker of that film uh his his work is just unparalleled if people watch kubrick's films you will see a whole lot of hidden occult symbology he was obviously involved in some capacity with the dark occult no one who made the film eyes wide shut could not have had involvement with the dark occult in some capacity to understand that it operates the way it does um very highly accurate rendition my level of involvement was certainly not anywhere that high level and certainly not in in those types of environments it was a lot less um you know elaborate and uh you know in in extraordinarily rich aspects of society as portrayed in that movie my level of involvement was much less so um but kubrick in general portrays it accurately in that film and i i believe that's because he had direct involvement yep and uh people just seem to they don't want to even they're too afraid to even think that uh you know these things are put in there deliberately like i saw an episode of smallville and two girls were turning the corner of a hospital and then center frame in the background with a planned parenthood poster and like wow and i told my friends that he's like do you think that's deliberate because stuff in movies is you know some of it's really random right like yeah maybe some of it's random but that was definitely there on purpose throwing in a little nod to the eugenicists in society but uh and so i have three more small things one is um trying talking to my friend's fiance actually trying to understand and convey self-ownership which is self-evident to me and a lot of other people she just doesn't get it and i i'm still working on the rhetoric stage of working out a logical proof for it but a morning um just throwing it out there if you could um work on a simple if then therefore logical proof for self-ownership because i'm trying to work it out and i can't find one on the internet so it doesn't require any kind of extensive intellectual debate either you own yourself or someone else does and is there any legitimacy for anyone else owning anyone else that's it i mean it's really that simple if you can't sit down and logically see the truth of that again my statement is just simply there's something fundamentally broken in the individual they're fundamentally brainwashed to a level of being broken i don't just mean like broken like to a point where something doesn't work anymore broken is also the word we use for the slavery of animals when you put an animal into deep bondage and slavery such that their actions just immediately react to your commands that's called breaking the animal and that's what's been done with somebody like that if they cannot understand self-ownership from just a simple perspective of looking at the natural world and saying either i am my personal owner i own my body my consciousness directs the actions of my body and therefore i own it or someone else owns me and if there is a claim of ownership against me or against anyone it's illegitimate because that's called slavery and slaveries are always illegitimate self-ownership doesn't need to be intellectually debated or analyzed or broken down or you come up with a proof for it it's inherently true it's like trying to say please give me a total and absolute proof of gravity when i can throw a bowling ball on your foot yes and there you have it you know her proof will come when they're taking her to a fema camp that's when the proof of self-ownership will dawn upon her we started a conversation with gmos and stuff and she's for the gmos because you know she believes the mainstream and i talked about eugenics a little bit and she's like you know people uh you know there's dumb people and they should be sterile i'm like well what if they think it's a satanic ideology it's a satanic mindset see this is what i mean by you're giving me a great uh us a great example here zach of someone who's trapped in what i call the ideology of quote mini-me satanism she's not a satanist she doesn't wouldn't even understand or be able to articulate the satanic ideology but she ascribes to it nonetheless by what she espouses in her life okay this is deep left brained over into intellectualization believing in eugenics believing in the negativity of human nature etc these are all satanic postulates and this person doesn't know what satanism is would not describe herself as a satanist to any other living being but nonetheless behaves and takes on the ideology of the satanic tenets so this is what i call mini me satanism in quotes because this is the form of satanism that the real satanists and dark luciferians want to propagate to the everyday man and woman to get them into a mindset where they could be easily ruled if i can i have two more little things one just a little example of something i've come to realize and then just throw something out there for you to elaborate on without me needing to say anything else yeah absolutely um so i've realized in my discussions as well as with those two people my friend and her and his fiancee and just other people in general so many people refuse to distinguish between force and violence they say oh it's the same thing and right well you know like i understand that there's a difference and we eventually do get to a difference but they don't want to just say okay there's a difference in the action and the intention and everything so why don't we just call it different words and i've heard people use the phrase initiation of force and so i kind of took that and i was like okay well if you refuse to say the initiator of force or you know the person using force i would just add one word to that definition zach i would say the initiation of coercive force okay if you are initiating coercive force against someone else who has not caused harm that's violence that would be my personal definition for it but continue and i agree with that completely but the way that i just kind of went about i was like okay so let's just go with that so we're going to have initiator force meaning the person committing an act of violence and then the reflector of force and that's i feel like that's really good because you don't have to go over the line you just have to reflect the amount of force and maybe a little bit more back required to defend yourself from the initial act of violence exactly the last thing was if you can zach i'll hold you over till the next segment just hold on [Music] welcome back everyone last segment for this edition of what on earth is happening this evening taking your calls we're talking to zach in chicago zach i'll let you finish up your last point before moving on to another caller all right um when talking to people about responsibility you know i'm one of the people who is totally fine with saying ability to respond or able to respond but many people seem to just go no responsibility or being responsible just means you have an obligation or you're accountable or culpable so i just want to say thank you for all your work and just if you could delineate or you know talk about the differences and the similarities between the ability to respond or an obligation accountability or culpability and that's all i have to do i would say both of those are part of responsibility of true responsibility uh yeah there is the ability to respond to something that's part of a person's individual responsibility but i would also say it has to do with what are you morally culpable for that you have actually put into manifestation through your behavior in the universe uh what have you done what have you affected whose life have you affected in what way now this is all part of response responsibility you know if you've done harm to somebody else you are the causal agent of that harm and you're responsible for what you've done you know that's what culpability is all about there is blame in this world folks the people who don't recognize that blame exists and is legitimate um there are these new age brainwashed right-brained individuals to think oh no nothing is caused nobody's to blame you know it's just all things that just happen and oh you're placing a judgment down on that because you're saying that it was more immoral or evil or that this person's to blame yes that's exactly what i'm doing we need to judge judgment is a huge part of life you know if you don't have accurate judgment about the objective difference between right and wrong you're never going to be responsibility responsible for your own behavior for your own actions this is what we have people that don't want to have to judge the difference between behaviors and therefore they don't want the responsibility that comes with choosing after they've judged the right action or the wrong action they don't want that responsibility don't they do not yep and they're they're in lies you know that's my basic understanding and definition of responsibility which people really have to get a hand on if they're going to understand what's really going on regarding these uh this dynamic of order following zach phenomenal points that you've brought up great call thanks so much for the call this evening let's hear from selt in the united kingdom you're live on what on earth is happening welcome to the show hello mark can you hear me yes i can go right ahead hello yes i'll be very quick i'll be as quick as i can because i want to allow another caller to get through as possible but basically in keeping with the statement you made in the past about one of the best things that can be done is art and i want to basically give one of my songs that is a translates well as a poem which is about all the followers called armed thugs sure you sell your soul don't sell your soul to the devil don't you know you'll get a better price if you sell it to the army so these armed thugs train and the hail in the rain how to bring about death in a variety of ways and the nation it says is proud to display these idiot a-holes dressed in their berets and so what better commodity can a government have than a myriad of bodies who think that questions are bad and that following orders is the meaning of life and are happy to be killed in the name of a lie so these drones will be told that they're better than us now you're in the army you've risen above those foolish civilians still out on the street who decide for themselves what to think when to sleep how what to eat how to act what to do and believe you'll be happier in our conformist machine so what better commodity can a government have than a myriad of bodies who think the questions are bad and following orders is the meaning of life and are happy to be killed in the name of a lie so tell me the difference between a gangster and a soldier it's just a little piece of paper signed by el presidente or mr prime minister that's all that it takes to make this murder okay and then there's no effing shame in bombing these effing bays from half the world away and there's nothing to pay because we're so big and mighty that they can't retaliate and what better commodity can a government have than a myriad of bodies who think that questions are bad and following orders is the meaning of life and happy to be killed in the name of a lie that's awesome salt i mean really great creative lyrics there brilliant thank you one last thing i want to say before is i really really loved your righteous indication tonight i feel like i am one of the only people i know who gets this angry and i'm that strange person with the strange opinions who keeps kicking off about random stuff you're not the only one so keep it up put the great work out there for others keep being creative uh that's a great expression for it to put it put it out there uh you know in a creative way for other people to absorb so thanks for sharing that with us one last the last thing i want to do is one of my i know you use alex gray's artwork sometimes because it's very very expressive and very very purposeful for what we're talking about well um i'm a big fan of tool and one of the favorite my favorite lines is from a song called the flirt and it just simply is i was wrong this changes everything there it is that line became my own personal mantra for a good while because you know that's the most powerful you know how you said no is the most powerful word that's right but i was wrong as the most powerful phrase exactly right exactly exactly right i'm going to go and let another caller come through so thank you for taking my call and take care so thanks so much uh beautiful lyrics there too thanks for sharing that let's hear from rahul in washington you're live on what on earth is happening welcome hello mark um thank you for taking my call i um i've been listening to your podcast for a little bit over a month and um i'm about halfway through it and it's just uh just an amazing amazing work that you've done and it really has helped me a lot and i really do appreciate it i want to bring up two points um one of them is about the movie the dark knight and it kind of relates back to uh to uh what you're talking about tonight about order followers so the joker he represents the tarot card of the fool so he represents the self and he represents the force of natural law yep and so who does he kill he kills in that in that movie he kills bankers and he goes to the bank and uh the banker tells him this is a mob bank but the real the reality of the situation is that every bank is a mob bank right um and uh he's the agent of chaos he's the force that needs to come in and clean everything and cleanse everything take take it all out burn it all you know they put the words of truth in the villain's mouth paint him as the the ultimate villain but then put the most profound philosophical truths in his mouth that's a big technique in hollywood these guys yes definitely um and so like the people that he kills too he kills gangsters and he makes them kill each other um he burns this giant pile of this giant mountain of fake fiat money um and at the end of the movie he sets up these two boats with civilian prisoners and with uh with which is one belt with uh civilians and one both with prisoners and he gives them the choice to kill each other and that's basically what the natural law conditions are it's like the law of the jungle and in the end a natural order emerges and they both decide not to kill each other and that situation would not have arisen if it wasn't for the joker being that force of natural law that's right he's the prankster the clown the shaman you know and it's amazing how they depicted it in that light by using you know the character of the joker and batman you know the villain in that series like i said bringing in this actual positive dynamic and the voice of truth but painting that you know putting that in the mouth of of the villain again it's kind of like a technique to kind of almost confuse the situation in hollywood uh and the the so-called good guy is the guy who violates everybody's rights in that film and basically you know spies on the entire city simultaneously yeah i definitely yeah uh batman represents the cops right now that's right so everyone um thinks he's the hero and he's necessary to keep joker at bay and joker represents uh everyone's basically their aggression towards this immoral system that's right yup the press for chaos the press to take this system down and dismember it and just completely disassemble it and replace it with nothing replace it with the simultaneous organic order that will come from anarchy that's what it needs to be replaced with uh mark i'm just gonna make one more really quick point and hopefully you can get another caller on the line um uh basically um for the last uh couple weeks i've been um i've i took the uh short uh url the shortened url to your natural law seminar and i uh printed it on a bunch of slips of paper and um when i'm at school like at college when i'm walking to and from class i'll be handing people the flip of paper with the natural law url on it there you go um i don't i don't say anything to him i just handed to him right uh and and if people ask me what what uh what i'm giving it to him i just say you'll see right and what i've noticed is that the people who don't take it um they have a look of fear on their face already on their whole body on their whole like their whole body language their whole aura is just giving out this like this fear energy and um those people are definitely not ready for it it's like that's a very creative way to go about get slipping the truth out there to people literally pun intended thanks so much unfortunately that's all the time we have for this edition of what on earth is happening remember there's only two mistakes you can make on the path to truth ladies and gentlemen not starting and not going all the way thanks for

What On Earth Is Happening Show #179

Topics: *Order Followers as the Creators of the Dark New World Order, The Lie Of The "Moral" Order-Follower, Justification for Order-Following, Emotional Mind Control in Relatives of Order-Followers, Dark Occultists are the Masters of Order-Followers and their institutions, ALL Order-Followers are BAD PEOPLE, ONLY a Non-Order-Follower CAN be a Truly Good Person, Moral Judgement and the Exercise of Conscience, the Inability to get Angry at Injustice is a sign of Mental Illness and being broken to accept Slavery, Natural Law Consequences, the Fundamentally Flawed Axiom of the creation of Police Forces, the Fundamentally Flawed Axiom of abdicating your Personal Responsibility to defend yourself to ANYONE else, Police Forces as Barriers to the Understanding of Natural Law, Nazis and Nazi-Lovers, How Nazis and Communists took America, Mentally sick Police Officers and their supporters mocking the murder of Eric Garner by T-shirt slogans, the Destruction of the Family Dynamic by driving a wedge between the Sexes, the need for the Moral Education of the Young, Firearms in America as one of the only reasons to have any hope for a Free future*

freedom mat that's what it's all about [Music] [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of the choice and now here is your host Marc Pascoe [Music] welcome one and all you're listening to what on earth is happening right here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm the networks website Republic Broadcasting org today is Saturday December 20th 2014 this show is live right here on our VN every Saturday evening from 10:00 p.m. to midnight Eastern Time that's 9 p.m. to 11 p.m. Central Time tonight we have a great show lined up for you I'm going to be continuing to talk about order followers the bane of 21st 21st century earth really the bane of humanity if the truth be told the people who have really caused all the atrocities in every geographic region of the world throughout human history who have been the most responsible for the carnage and death on this planet since human beings have existed on it I call order followers the creators of the dark new world order those are the ones who are bringing it into manifestation we're going to continue to talk about this dynamic of order following how it has gotten so bad in the world today tonight I'm going to talk about the lie of the quote moral order follower there is no such thing and never has been we'll continue to delve into some of the psychological factors which create order followers and the psychological factors which create and keep people as the supporter supporters of order followers which is arguably an even more important psychological dynamic to understand so that's coming up on this edition of what on earth is happening the calling number to join us 800 three one three nine four four three I'll be taking calls in the second hour of the show tonight the calling number if you would like to get into the call or queue 800 three one three nine four four three a couple of quick event announcements before we begin the material for tonight's broadcast the freer mind three conference ladies and gentlemen coming up April 10th 11th and 12th 2015 that's Friday Saturday and Sunday April 10th 11th and 12th at the Sheraton Bucks County hotel at 400 North Oxford Valley Road in langhorne pennsylvania langhorne pennsylvania is just north of the city limits of philadelphia so very very close to philadelphia the speakers lined up for this year bob Tuscan Clint Richardson the illuminated one Curtis Davis Dennis McKenna Derek Bros Ed fortune the new jersey weed men freighter X Freeman Fritz spring Meyer Jay Parker John vibes Josie the outlaw whales Larkin rose luke rudkowski mark Devlin myself mark passio and just added to the bill Stewart Swerdlow pretty excited to see that Seward has signed on for the free or mind three conference talks a lot about mind control specifically trauma-based mind control so good to have him in addition to the other speakers there will also be a panel discussion group at the freer mind three conference and there will also be open mic sessions at the end of the nights where people will have a chance to come up just attendees of the conference will have a chance to come up and give a talk on any topic they want for five to ten minutes an all weekend pass for this conference only $150 and you can enter a coupon code 93 at checkout a coupon code enter the number 93 at checkout if you're going to get the all weekend pass this is exclusive only to what on earth is happening listeners and you'll get a $20 discount for the free your mind conference all weekend pass I highly suggest people buy your tickets in advance it's the best way that you could support this conference because advanced ticket sales go to help paying for the venue and help paying for the speakers travel expenses and the speaker's lodging expenses so please buy your tickets and that is the best way that you could support the efforts of the Fuhrer mine conference for more information on this great event please visit free your mind conference dot-com the Tesla Science Foundation presents the third annual Tesla Memorial conference on the anniversary of Nikola Tesla's death Saturday January 10th 2014 this year's theme is let's come together to create the Tesla curriculum for the young what do we want taught to children in schools regarding Nikola Tesla and his achievements that's what the theme of this year's conference is going to be all about this will be taking place Saturday January 10th from 9 a.m. to 11 p.m. at The New Yorker Hotel in New York City for 81 eighth Avenue New York New York the Tesla Science Foundation is a group that I have worked closely with and I fully support their goals and I think people should definitely come out and learn all about Nikola Tesla and help to really propagate the legacy of Tesla by really truly informing our young people about him instead of covering up his legacy and teaching about other inventors you know who really didn't do nearly as much as as Tesla did for the world and wanted to do for the world so the Tesla third annual Tesla Science Foundation third annual Tesla memorial conference Saturday January 10th at The New Yorker hotel for more information on this great conference please visit Tesla Science Foundation org there are still several what on earth is happening t-shirts promotional t-shirts available as a gift in return for a voluntary donation to support what on earth is happening you can click the link at the left hand side of the what on earth is happening comm website underneath latest news the top item is about the promotional t-shirts and how you can get a hold of one of them there is also a donation button on the left hand side of the what on earth is happening calm website if you feel that you've received value from the information that I've shared here on the radio show and on my website through my podcasts in my videos you can feel free to make a voluntary donation to help support my work so that I can continue it into the future so with that having been said I'd like to direct everyone's attention to the radio show of the what on earth is happening calm site of course as always when I'm on the air live underneath the player for the show on the radio show page there are images for tonight's show the first three images are about the two conferences that I announce the four your mind conference there's a couple of posters really cool artwork for the free your mind conference and then image number three is a banner about the Tesla Memorial conference coming up in New York in January and then there's some other images that I'm going to talk about during the show tonight so you can get those there or you can get them with the podcast this will be podcast number 179 so let's jump into the material for tonight again we've been talking about order followers and you know eventually this topic is going to segue really into the support of order followers and how that psychological dynamic is largely perpetuated in our culture and it's going to get into some somewhat controversial material when I talk about the underlying psychological factors for the support of order followers what's going on within their minds so we'll pick this up on the other side of the break ladies and gentlemen you're listening to what on earth is happening stay with us we'll be right back [Applause] [Music] [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening dot-com we're talking about order followers how they are ultimately the people who bring into manifestation slavery they're ultimately the people who bring into manifestation every totalitarian regime that has ever existed on the face of the earth yet people are still attached to people who carry out orders that other people give them emotionally attached because they have a familial relationship with them they'll continue to offer justifications for their behaviors and tell you that the lie tell you the big lie that there is such a thing as a moral order follower and I don't care how unpopular or controversial it is or how much it makes people cringe at me saying it or hate me for saying it once again I'm not here to be your friend I'm not your buddy I'm not your guru I'm not your leader I'm here to tell people the harsh truth so that they could understand natural law and wake the hell up and then do something about what's going on on this planet because it has gotten completely intolerable and people who can't understand the factors that are leading that are underlying what's going on I don't know what it's going to take to wake them up the problem is people are too worried about how harshly I want to attack an order follower and they're not worried about getting out there and actually doing the great work of reaching these people's minds by telling them the harsh truth about what they're involved in now they want to attack the messenger order followers are the people who are bringing the dark new world order as the dark occultus of this world refer to it the new world order in their eyes into manifestation the world of total slavery of lockdown of people having no rights and government being God and granting people whatever rights they feel they should have and then revoking whatever rights they feel they shouldn't have completely turning natural law on its head and putting people in a cage that they're never going to be able to escape it's going to be worse than death folks if we don't turn it around and it starts with understanding that there is no such thing as an order follower who is a good human being deep down inside a truly moral human being oh they can do good things to certain people but that doesn't mean that they're a truly good being there's a difference and this is where people who know order followers are involved in familial relationships with order followers think totally purely emotionally about this topic they can't think about it from a logical perspective and secondly then from the perspective of pure experience within the dark occult I have to realize I have experiences that many other people will never have not many that mutt the vast majority of people will never have in their lives I know who these people are really serving definitively without any hesitation without absolutely any doubt whatsoever for people to get to that point without having gone through the experiences that I've gone through can be very difficult you know it's I liken it to being in war the people who haven't been in war not going to know what that experience is like unless they are actually within it you know and it's why I kind of laugh about the whole situation when I try to explain to people that dark occultus own these people you know my experience being in the dark occult with the psychopathic lunatics it's like when you're trying to tell people that you know who they're serving it's similar to and they want to say no it isn't that way it's similar to somebody who's been to a particular city this is another little analogy I give you know if imagine three people okay try to look at it this way imagine somebody who's lived in the city of Paris their entire life they were born there they grew up there and they've lived there from the minute that they were born then imagine somebody who went to Paris on vacation for a week and then imagine somebody who's never been to Paris ever in their lives never even seen a picture of it you know except maybe you know on the nightly news or something like that seeing a picture of the Eiffel Tower have no idea what the whole city is like at all now which one of those people would you say would probably have the best idea of what the city of Paris is really like of course is the person who's lived there their whole lives who was involved in it who was there and then people want to turn that on their head and say well you've never been a cop so you don't know what it's like I don't need to have that experience to know who you serve because I was in with the people who owned that institution who run it and directed you know so it's like if you're going to go to the person who's never been to Paris and ask him what it's like you know good luck with that and then they'll try to say I know what it's like more than somebody who actually lived there their whole lives which is why all I could do with somebody like that is laugh at them the and it's sad because they'll never have those experiences so they'll never know that that's the the total truth they'll never understand it and all they want to do is keep order keep offering justifications for order followers and keep all offering this lie that you can be a good person be an order follower simultaneously when there is no such thing and never has been I made a simple post about this to Facebook this week and I'm gonna read it on the air tonight there and here here it goes quote there is no such thing as an order follower who is a truly good person all order followers are bad people by definition get as offended as you want by that statement but nothing in the universe will ever make it untrue by definition order followers are those who carry out actions which they have been commanded to perform without first critically judging for themselves whether those actions are morally right or morally wrong that is the actual definition of an order follower and that is exactly what all police and military are people who carry out their orders by definition otherwise they wouldn't be in that job a truly good person will strive never to perform an action unless they have first determined the morality of that action for themselves in other words under natural law right and wrong objectively looked at the action and said this falls within the parameters of objective right or objective wrong and that is the hallmark of a truly good person the willful exercise of conscience order followers never perform such moral judgment or they will willfully act against that judgment by following immoral commands which they've been given and here's where I go I go even further okay people don't understand this a lot of people don't understand this part of it following any order is immoral is an immoral act by following any order regardless of reason or intent and I would go so far as to say whether the resultant action is good or bad you still performed an immoral act by following any order regardless of reason or intent from any other person or group order followers have attempted to abdicate their personal responsibility and duty to engage in moral judgment and to exercise conscience for themselves we'll pick this dynamic up on the other side of the break I'll continue reading this post so they wear this everyone you're listening to what on earth is happening we'll be right back [Music] [Music] the Coon decides that we don't dare speak it's a while between us little whip so we can treat it dear that there's nothing wrong the cold of socks welcome back everyone you're listening - what on earth is happening here on our bien I'm your host mark passio my website what on earth is happening calm want to continue reading this post that I posted to Facebook during this week about there not being any such thing as a moral order follower no such thing as an order follower who is a truly good being and people can get as offended about that as they want I don't care who you know that was a cop I don't care who you know that was a soldier I don't care who you know that in any capacity their job is to follow orders I don't care how they're connected to you I don't care what familial relationship they have to you get as offended about it as you want to get like I said I'm not here to be your friend I'm not your friend period I have plenty of personal friends in my life I'm not I don't do a radio show for popularity purposes I'm here to tell people the hardcore truth about what's going on in this world so we can get to work doing something about it and get to work trying to morally educate the idiots out there that are continuing to create this hell hole world in their unconsciousness so by following any order regardless of reason or intent from any other person or group it doesn't matter whether the order is go and feed the homeless go and do this that's a kind act to a stranger or whatever doesn't make a difference what the order is if you follow it unquestioningly for weighing the action in your own mind against natural law against the definitive understanding of the difference between right and wrong behavior then you are not following conscience by definition so by following any order by any person or group order followers have attempted to abdicate their personal responsibility and duty to engage in moral judgment and to exercise conscience for themselves since order followers will perform actions that they have been commanded to perform without determining the morality of that action for themselves then by definition they cannot be truly good people regardless of their so-called intentions by definition if you are following orders you cannot be exercising conscience and that is the hallmark of what a true good person is the willful exercise of conscience the knowledge of the objective difference between right and wrong behavior under natural law and it's exercise is wilfully choosing the right action over the wrong action our followers do not do that step they do not do that filtration process of weighing the action against natural law it's called moral judgment moral decision-making they say the law says this I've been ordered to execute this law or to uphold this law or to enforce this law by the politician who signs my paycheck and therefore I'm going to do that action that I've been commanded to do by definition that's what they do that is the definition of their job if they don't do that they don't do that job anymore they'll be fired from that job which is why I'm I'm trying to say every person who considers themselves a virtuous small human being should quit the job of doing a following orders period because there is no virtue in following orders and there never has been it is not a virtue anybody who has been told that anybody who follows orders has any virtue has been lied to and has bought my there is no such thing as virtuous order following and that's an oxymoron they are diametrically opposed concepts there is no virtue in order following it is virtue less so the last sentence of this post I'll just finish reading this the eternal truth is that all order followers are and always have been bad people and will continue to be bad people until they cease to be order followers period now that doesn't mean that someone who's not an order follower is automatically a good person you know someone who willfully exercises conscience on a continual basis is a truly good person and they can slip up and do something bad but no one who is actively performing the the behaviors of an order follower in that moment is a good person no.10 blanket statement you know is another thing people hate the human ego hates absolutes ladies and gentlemen they hate absolutes when you say 100 percent no exception to the rule always works this way people people in deep ego hate that because deep down inside they hate truth and when they hear hardcore unwavering indisputable eternal truth they hate that most of all because the ego hates the absolute it wants everything to be relative the ego wants to find the tiny little exception always searching for it endlessly when there is no exception to an absolute law doesn't exist cannot exist will never exist that's the power of the ego ladies and gentlemen it gets in the mine it takes root and it says there has to be this can't be this way it has to be a different way because that would mean that everything I've been led to believe is a lie and I was wrong and I can't admit that the amount of years it took me to get to this understanding to keep saying I was wrong I was wrong over and over and over again not just once multiple times hundreds of times and I got an email recently I can't remember the person's name but they said when I listened to your show mark it makes me so angry because you keep saying things that I think and saying how wrong they are and he's like I just want to thank you for continuing to say them because it takes me time after time listening to say really hear what you're saying not what I want to hear in what you're saying to really hear what you're actually saying and rect make the recognition that I was wrong about how I previously felt about that and all my thinking was bit wrapped up in an emotional attachment an emotional attachment to an idea which wouldn't allow me to see the truth I I just thought it was to me something like that is a compliment not you know it's great people thank right and say thanks thanks for teaching thanks for taking your time to do this one wonderful see something like that makes me realize that it's reaching people who were resistant to change at first very resistant to change that's the people we have to reach folks you know don't worry about me getting a little bit harsh a little too harsh or cutting off a supposed order follower you know that's the least of our worries folks believe it or not you know get out there and teach natural law to the idiots out there who are making the world a living hell that's what you need to be doing you the listener and teaching people that is the solution to stop doing actions that are violent to stop doing actions that are coercive to stop following orders it's about the entire lesson of this world is what we need to stop doing not anything new that we need to do again people want to say I want to hear solutions first of all I gave you mix of solutions a grassroots solutions that people can get involved in to turn the entire dynamic on this planet around the whole show is a solution from the very beginning it's solution oriented because it's about changing the way you think and when you change the way you think the external manifestation follows the problem is people are too attached to erroneous ways of thinking they want to continue to offer justifications for all this immoral behavior because of some familial connection they have to an order follower the Nazis did the same thing folks they thought oh my father is involved in the party my grandfather is involved my cousin's involved my brothers involved my son's involved it can't be bad yeah it's how every totalitarian regimes begins with support from family members that don't want to admit that they were wrong and they got duped we'll pick this up on the other side of the break folks don't go anywhere you're listening to what on earth is happening [Music] [Music] [Music] [Music] welcome back everyone you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening com we were talking about the lie of the moral order follower in the last few segments we were talking about the justifications the people offer because they're somehow connected in relationships to order followers and how their ego has them thinking emotionally regarding these people instead of logically instead of from a natural law perspective natural law does not care what justification somebody offers for a moral behavior it's a computer program folks I don't know how much more clearly I could put it the other thing people don't understand the universe is based on law unwavering law that doesn't care why you did what you did it only says did you did you do this and it was immoral it was based on coercion it was based on violence and you had no right to do it yes or no well if yes here's the consequences if no here's the other consequences that's it it's a computer program of pure logic and law and that's why it's not called natural suggestion the laws of nature are not suggestions they're unwaveringly their unwavering absolute laws that work 100% of the time flawlessly at all times in places everywhere in nature everywhere in the 3 dimensional space-time continuum that we refer to as the universe and people don't want to understand that because they want their mind to be God they want their justifications to prevail they want things to work the way they want it to work instead of the way it actually does they can't get their ego out of the way because my father or grandfather was an order follower and like I said before the break the Nazi said the same thing folks so did every other totalitarian regime you think those people didn't have mothers and daughters and sons and fathers etc that that somehow offered justifications for all the things they did people can't see they're in the same situation you're in no different situation than that as a matter of fact it's a continuation of the same people from the Prussian schooling system that became the Nazis in Germany they came over here as part of paperclip and settle them throughout the whole United States tens of thousands of Nazis being brought in to avoid war crime try tribunals so they would come to work for this sick criminal government the OSS which subsequently became the CIA brought all these thousands of Nazis over here to work for for us and they they settle in major cities in the United States and we wonder why they're taken over by totally draconian Nazi and communist laws same thing happened with the Communists came over and exported their whole outcome-based education system over here the Frankfurt School and Antonio Gramsci his plan the long march through the institution's we think we've defeated these regimes of Nazism and communism they shook hands behind our back and so we're takin the america down together we're gonna crush their cultural institutions we're going to make them immoral we're gonna drive a wedge between the sexes breakup the family dynamic so we can get the children in the government indoctrination centers pollute their minds with collectivist propaganda nonsense and people are too stupid to see the plan they're too stupid to see it because it's a chess game that they're playing and we're not even playing checkers it's too psychologically sophisticated from a perspective of mind control for most punked idiots out there to figure out because they don't read they have no long view of history and they're still out there making excuses and justifications for murderers which brings me to the images I want to go through for tonight's show image number four with this podcast slash radio show is showing a so-called rally that police and their family members had outside of City Hall in New York City and they are wearing t-shirts that say I can breathe I can breathe that the the disgraceful nerve of these human vermin please scratch that take the word human out of there they're just vermin these are verminous scum whose mothers didn't raise them whose fathers didn't raise them absolute trash and I'd say it right to their face and so should anybody that sees any part of this dynamic supporting a murderer images four and five show these Nazis wearing these shirts that's what they are Nazis you want to take a look at what a modern Nazi looks like images four and five they're right there iron six and seven shows show it to we'll get to that though mocking Eric garner who was choked to death for selling loose cigarettes you know that that warrants you getting choked to death in in modern US si in this in the united socialist states of america you know it doesn't make a difference whether you're talking about the national socialist kind or the nazi variant of socialism or the international socialist kind which is worldwide communism they ultimately work through the same methodologies it's ultimately the same system when you strip it down no different people who think that it's different or just idiots who don't read books who don't understand that these systems are basically the same thing it's all about just total control they think Nazism or fascism you know so different than communism when it's the exact same thing it's all based on socialism you know it's just the only differences in how we're going to divvy up these resources for ourselves you know that's all how we're going to take and steal we're gonna we're going to do it through Corp corporations we're going to do it through government we're gonna do it through political parties we're going to do it through you know labor unions that's all it's just a different disagreements in the methodology a little bit but ultimately behind the scenes it all creates the same thing which is serfdom slavery the state owning everything the people having nothing abolition of all property period all property including the self including the body and people are too stupid to understand that these entities shook hands behind the scene came in here and said we're going to take this country from the inside since we couldn't take it from the outside militarily folks if you can look at these pictures and not get angry you are fundamentally broken as all and that's all I have to say and there are people out there I know there are people out there I know I'm talking to some of them right now that cannot experience the emotion of anger because this is the over feminization of both sexes through hormones that's pumped into the food some of the same hormones that are given to animals before they go to slaughter and because of the atrocious diets of people they are incapable of getting angry the actual instinctual urge to protect and defend oneself from injustice and violence that's taking place against the the individual and the society cannot be felt it has been selectively actually chemically bred out of a lot of people out there and the New Age religion is another big part of that dynamic that you can't look at a Nazi telling you I'm happy that another one of my Nazi order following scum choked a human being to death because he was following his orders don't allow anybody to sell loose cigarettes themselves without paying us our you know slave tax our extortion fee we'll pick this up on the other side folks stay with us you're listening to what on earth is happening [Music] yeah [Music] welcome back everyone you're listening - what on earth is happening we're into the second hour of the broadcast for this evening I'm your host mark passio my website what on earth is happening comm was going through some of the images with the broadcast for tonight and we were on image four and five for people that aren't familiar with the reference I should just clarify that by saying you know this is about this man Eric garner who was choked to death in New York City by a New York police officer that for the unimaginable crime of selling loose cigarettes on the streets of New York City without giving a extortion tax to his feudal overlords god forbid I mean you know we really need to bring back the gallows for people like that you know and hang them high he was choked to death by this cop who didn't have any action taken against him and is just out free who murdered somebody on the streets of New York for refusing not to sell cigarettes loose cigarettes murdered and there are people defending this action saying well he was breaking the law as if like a voluntary exchange on the street between two individuals for something deserves to get you choked to death I mean if you think like that you are an immoral piece of garbage and anybody that cannot get angry for seeing that this is taking place right in our midst you are a broken individual you're there's something psychologically damaged inside of you you need help there's something wrong with you if you're not angry about what's going on in the United States right now and throughout the world for that matter the ability to feel anger is a totally natural human response to tyranny and the people who can't feel it and there's people out there I know they can't feel it in any aspect of their lives are so brainwashed they're so brainwashed the chemicals in their food they're probably taking chemical drugs pharmaceuticals SSRIs SNRIs screwing up their brain chemistry hooked on junk media hooked on sugar hooked on alcohol whatever they can't feel emotion its numbed out of them they're broken people I mean broken in many different ways not only is the brain not working right they're broken like a slave because only a slave won't get angry at injustice then image six more readily explains this Eric garner whose crime was selling loose cigarettes was killed by police his last words were I can't breathe activist has been activists have been using the phrase I can't breathe as a reminder of the murder and now this there's an image here on an image six this you know of a cop basically in front of a t-shirt that says breathe easy don't break the law police officer jason Barthel of South Bend uniformed company thought it would be funny to mock this man's dying words by selling t-shirts to fellow cops which say breathe easy don't break the law apparently the implication is no matter how ridiculous the law you can expect to be killed if you don't follow it and that's your fault cops are buying the shirts by the Dozen it should say Nazis and Nazi lovers are buying the shirt by the Dozen because that's what the people of this country have become Nazi lovers same thing the immoral scum of the country of Germany that allowed a complete utter lunatic psychopath to take over their whole nation and his whole party his whole regime of dark occultists of course he wasn't that the head of it the puppet Hitler you know but the Black Sun order was certainly the head of it and the occultists who ran that you know all the occult orders that led up to the creation of the Third Reich and the subsequent Fourth Reich here in America now but people don't know about the occult origins of Nazism I should do uh you know we did a documentary series as part of TFP documentary night here in Philly on that maybe I should do a whole series on that a series of podcasts on that you know because people don't understand these things are one in the same totalitarian regimes are all underlay by religious institutions dark occultic religion is what ultimately underlays all the drive toward totalitarianism people don't want to understand that Satanism and dark occultism uh sure in the so-called New Age movement to make people docile that's what the whole plan is to make you docile to make sure there's no real men in society to make sure there's no real women in society and I'm going to be getting the very controversial material and future shows talking about the directed mind control tactics that are employed against women in this society and how they've largely fallen for them specifically the types of targeted mind control techniques that are directed at women because if you can control that dynamic you control who breeds it's a form of eugenics people are too stupid to understand that that has been controlled by the social engineers and the think tanks and the dark occultists of this world the whole modern femme so-called feminism movement the modern variant of it not classical feminism simple equality under natural law for women I'm talking about the modern feministic movement all came out of dark occultism and people can't grasp it they can't understand it again it's a chess move there - psychologically non sophisticated unsophisticated mindset they can't even understand the move that just been played against them they don't have enough long view of history they don't have enough understanding of the occult world they don't have enough understanding of human psychology the last image that I want to talk about for tonight is these other shirts that have been made by cops and Nazi supporters Nazi lovers that love the Nazi regime that has taken this country it says it's image number seven it says hate cops question mark the next time you need help call a crackhead I have wrote a little response to this meme or this image on social networking and I said how about if all the Nazi lovers out there stop perpetuating the absolute BS lie that someone's personal responsibility to defend themselves should ever be abdicated in place in the hands of any other person or group because that's the implication first of all the entire creation of a police force is a completely flawed fundamental axiom it's a flawed idea from the inception that's people saying I wish to put my right duty and responsibility to defend myself into the hands of any other person or group just think about how stupid that is really that's what you want you don't want the the right duty and responsibility to defend your own person you want somebody else to do that for you what I want no-one else to do that for me ever am I asking for it I don't want that sir I've never asked for it I don't want the help of a cop in any situation we'll pick this up on the other side of the break you're listening - what on earth is happening [Music] [Music] [Music] welcome back everyone you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening calm talking about order followers the continued justifications that people want to offer for their behavior and how people are lashing back against people that are tired of all of the crap that is going on with order followers in the modern world and starting to push back and these people are out there defending the Nazis saying hey cops call crackhead the next time you need help on a shirt in image number seven and I was reading my response to this subject just basically saying I don't want the help of a cop in any situation and I've said many times if I'm dying I would rather die than accept the cops help yeah is that an extreme attitude yeah I don't want cops to exist period I think it's a completely flawed axiom that anybody ever anywhere in the only earth started a police force because what a police force is is a barrier against the understanding of natural law and I'll say that again all police forces everywhere on the earth at any time in history are barriers against the understanding of natural law because by attempting to abdicate the response the responsibility and duty to defend yourself and the people around you in your community from totally immoral behavior and you're saying I'm gonna place this into somebody else's hands what goes on then is the immoral behavior builds up in that society and we expect these other people to sanitize it and remove it and take it away from us and we want to live just having these people segregated from society in prisons and then we go on still to not teaching morality to our children and they think that they're the solution they think that more cops are the solution and they think they're doing something good when in effect what you're doing is preventing the learning of natural law which is why I've always been an advocate of don't have any prisons don't have any police forces we need to find out just how bad humanity is let's find out what we have become and then stare it in the face and do something about it without fear and embrace the chaos that will happen as a result see that's the ultimate psychological factor that lies underneath people are afraid of chaos because you're going to find out just how much you shirk your responsibilities and then you're going to have to look at the room and realize it is completely a a mess beyond our wildest imaginings and it's nobody else's responsibility to clean it up than us this house is a wreck it's in ruins and we still want to try to pass off the responsibility to somebody else by saying it's your responsibility to protect me it's your responsibility to you know defend me when I need self-defensive force it's nobody's responsibility but themselves specially in an age where firearms exist because then neither sex can say I don't have the ability to defend myself and that's what they what they've successfully done throughout the rest of the world largely through the rest of the world not entirely they haven't been able to get it done here to take firearms out of the so called slaves hands and you'll never get it done here mark my words that's one thing I know like I know the sun's gonna rise on the eastern horizon tomorrow no government's taken the guns of American citizens bet on it boys and girls bet on it it's the only reason I feel there's any hope at all because of the amount of firearms that exist in this nation and will never be removed from the American public's hands is the only reason I feel any hope not because we're moral people not because we're an educated people because we're not but there's still at least enough red-blooded 'no sin this country to understand when hot tyrannies going to be approaching you're gonna need that weapon and they're not going to successfully take those weapons out of our hands it's not gonna happen i don't care how many false flags they pull you ain't getting that done without such a cost of blood that even if you did somehow succeed it will be as if you failed so I I said you know is the stance of let me die rather than call a cop for help is that extreme enough for you because I'm an extremist I wear the badge of extreme is proudly with honor I am an extremist the truth is extreme and I said by the way I wouldn't call on the help of a crackhead although a crackhead would probably be a better choice than a cop I personally call on the help of a springfield XD or a Mossberg 500 personally you know I think those are much better choices for self-defense than a cop or crackhead I place the crackhead as a distant second though so all the Nazi lovers you know take something like that and shove it up your rear end three people aren't interested in your nonsense your garbage your justifications for your Nazi loving you know and then people want to get angry because I call a cult member a cult member and I call a Nazi and Nazi Gettys I'm angry and offended it means you want to get like I said I don't care about your emotional response to what I say that's your karmic consequence for ignoring truth you want to think what your emotions like an idiot go think what your emotions like an idiot I'm here to tell the people who have the capacity to understand who have the mind of an adult who don't need it sugar-coated or watered down and and if they want to go and teach it like baby spoon you know baby feeding you know baby food feeding spoon-fed to other little infantile people well then they could do it that way it's not my style and it's never going to be get over it get over it instead of critiquing my style go teach yourself how about that now you don't want to do that you don't want to put your name on anything because you're too cowardly to damn cowardly god forbid you go start a site or a radio show or a podcast or whatever now we can't have that we got a critique Marc who's actually doing something go critique the other truth tellers out there whoever they may be and just incidentally folks I wasn't on the air last week to you know announce this I had a personal commitment that I wished to attend and did so last week which is why I was off the air but the caller who called in a couple weeks back who claimed to be a police officer was in fact not I won't say who it was if the person wants to reveal who he was he's free to do so but it was a gag call so they got me I freely admit it and my response would be the same nonetheless and it would be no less harsh because I do know who these people serve definitively even if they do not and I'd say that right to their face in person we're going to go to your calls on the other side of this break folks you're listening to what on earth is happening stay with us [Music] [Music] welcome back everyone you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening calm last half-hour of the show I'm going to go to your calls toll-free number to join us 831 394 43 let's go to the phone lines and hear from Helen in Washington Helen you're live on what on earth is happening welcome to the show thank you mark I'm absolutely delighted to talk to you thank you so much for speaking the truth for all of us out here I discovered your podcast about two weeks ago I am sorry to admit I never heard of you before that and I've been kind of obsessively listening to them and I've got as far as number 28 so I've got a long way to go and I'm sure that you're gonna answer a lot of my questions as I listen through all of those anyway I I just wanted to say that um I was a little afraid to talk to you because I'm kind of ignorant I've started this voyage of discovery about natural law and trying to raise my consciousness about four years ago and my family and my friends I think I met they tell me that you know it's depressing that it won't hear about it and I'm obsessed and then paranoid and conspiracy theorists and I was telling you know it's only a theory if it's not true but anyway I have a little story to share with you I moved to a small town in Washington State from Southern California when I was pregnant with my first child about 33 years ago and we moved here is about 19,000 people and it's geographically isolated and it's beautiful it's the Olympic Peninsula anyone familiar with that area we're about 18 miles by water from British Columbia Canada and we're the town that had the famous footrace through town where the border patrol caught guy trying to smuggle explosives into the United States in his car by ferry from Canada and he was planning on taking it to Seattle and blowing up the Space Needle during the millennial celebrations but you know they caught him and we had a handful of customs security people at the time now they've built this huge gulag in town and we have over 50 Border Patrol agents with dog kennels it's like a kind of an SS compound and it's very centrally located so that if you drive anywhere in town you're constantly reminded you have to drive past it and every day you're reminded of this sort of militaristic presence really it's pure mental illness I mean that that's what's really infected our society is total mental illness they're the ones who are mentally ill and paranoid they're they're so worried about some kind of chaotic event happening that we need to give up all of our freedom in return for the false illusion of security and protection which doesn't exist you're absolutely right and now from a sleepy quiet little rural town we have these patrols on if you have a car accident or you call 911 because you're having chest pains not only the fire department come and and cops but the Border Patrol comes and I don't know what it is they're looking for but it's very scary and it's an intentional militaristic presence and the whole tenor of our Police Department has changed no more officer friendly they all have those cuts they're all Bluff stuff when testosterone panto and I quote my question to you is where do these people come from where know these pleas come from recruiting them actively from soldiers who are in the military right now in the Middle East when they go out of their way to recruit them into LA I understand that but my question is where do they ultimately come from don't they come from our communities aren't they someone's children in the United States but but nonetheless they are the sons and daughters of people who live in this country and that means those parents did not morally raise their children and that's all this comes down to that's all this comes down to I agree with you so wholeheartedly and it's such a validation to have been listening to these podcasts and to have the opportunity to talk to you and have some voice of reason saying you know that this is not crazy to believe that what's happening is in moral and frightening and totalitarian how long you're absolutely on the right path and never feel as if you know because you don't know it you know the totality of what's going on that somehow that makes you you know in any way lesser than anybody else the bottom line is you're at least striving for the answers you have a desire to know and the only stupid question is the one that goes on asked right on I all out and with a story that I guess can be considered funny if it wasn't so sad about ten years ago now so you know that it's worse now but ten years ago I was painting my living room the day after Thanksgiving and there was a knock on my front door and when I answered the door there was a cop standing there and you have to understand that I'm in my 60s and I have five grown children I mean I live very middle-class life I'm not a cat or a threat or criminal but anyway I open my front door and there's a cop standing there and he says doctor car parked out front and I said oh my god yeah did somebody hit it was there an accident he said no I'm issuing you a citation and I was really taken aback I said well how can you do that I'm not even driving he says well your wheels are not turned perfect oh I mean you had everybody kidding I'm serious in my resort this is America a big crime wave did you happen to catch the guy that busted the window of my car and broke into my car a few weeks ago and he says oh I don't know anything about that but your wheelchair doctor did occur no robots robots but you know what we made them ladies and gentlemen we're the ones who made them and now we're the ones who are gonna have to deal with these amoral pieces of trash these robot order following Nazis until you get up off your rear end and start getting up in these people's face and telling them that what they are doing is unacceptable and start educating the children of this country about morality and natural law nothing's gonna change I don't want to toot my own horn but I have five kids and we homeschool them so soon when it was very rare and kind of unpopular right and interestingly enough we had many friends over the course of doing this that came from a religious point of view and we're not a member of any religion and people would say well you know the public school suspenders Oh left-wing and and we want to give our children our you know conservative religious values nice laugh because we homeschool because we thought the schools were too lightly oh it's a fascio communist system or calm you know fascist system however you want to word it again they shook hands they brought in their variants of outcome based education in through the back door in this country took over the cultural institutions took over the government took over you know set up all the think-tank it and intelligence agencies and you have the world that exists today because of these two political totalitarian ideologies coming here and setting up camp in the one country that they knew they couldn't militarily defeat so they took it over culturally ideologically you know in all the institutional aspects Helen thank you so much for the great call great points that you raised and ladies and gentlemen that's what it's all about it's about morally bringing up your children get them out of the government education centers get them out of the government indoctrination centers I should say home school you know instill moral values and you know again that's gonna take a family dynamic that's why the family dynamic is so vehemently attacked you know that's why they want to drive a wedge between the sexes so people are dysfunctional and then you know you end up having single parents who can't raise their children have to set a indoctrination Center by the government and then you have the kind of immorality that's all around us it's a it's a beautifully constructed plan it's a chess move that if you can understand and see and we're going to go into a lot of the dynamics over it over over the coming weeks so let's go to another call let's hear from Sterling in Texas sterling you're live on what on earth is happening welcome hi mark are you doing doing well it's an honor to be on your show and I really just wanted to kind of just give you a an overview of what happened a couple nights ago I had an encounter with a few older followers okay I get really emotional when I talk about order followers and and you know the kind of things that go on because you know I live in a bad neighborhood I was uh you know I hear gunshots all the time and you know I live right next to the projects but uh you know it bothers me more when there's violence happening form order followers and gangsters but anyway I'll continue on with the story so basically uh I totally agree with that statement there because in any kind of a gangster or thug there is no belief that they're an authority figure of any kind of when they just engage in violence nobody puts up with it because they don't think that they have the right to engage in that violence unlike you know a state sanctioned order follow or like a cop or somebody like that right so continue and and so basically what happened all right although did we lose you sterling I'm sorry we lost you there your call seems to have dropped if you want to call in in the next segment I'll bring you back to the front ladies and gentlemen stay with us you're listening to what on earth is happening we'll be right back for the last segment [Music] we go [Music] [Music] welcome back everyone you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening calm in the last segment taking your calls we do have sterling back on the line sterling are you there yeah okay you can continue with your story yeah I'm sorry about that so basically the other day around 2:00 or 3:00 in the morning I was awoken by the sound of order followers apparently harassing a young black gentlemen of course because I live in a predominantly black neighborhood and basically what I heard was you know just a little back and forth I didn't exactly understand the conversation but basically you know I heard him getting maced and what from what I could tell in my apartment was that he he was outside in this sort of Park area between the buildings so when I went out there I went out there with my dog because I wanted to see him you know sort of inconspicuous because earlier that night riding home on my bike in the cold from work I was allowed 10 o'clock at night or so I was stopped at this not you know Nazi checkpoint in my neighborhood where I live and the order followers you know they said it's past curfew and so you know they they proceeded to ask me for my identification they said he's like oh why don't you have it so you know I'm just like you know just kind of shrugged him off like look I didn't yeah I don't respond to you know stupid conversation like that so you know so anyway he's like you know eventually he's like give him my name whatnot he's like okay proceed to your unit you know so I proceeded to my unit and so you know later on that's when all that happened so I proceeded to go outside with my dog and I was walking around a leash and approached what I heard the order followers and I guess they apparently they had taken the young man up the stairs and he was still you know incredible pain from being maced and so I stood there for a while and you know I was waiting for them to come down or something I didn't really want to get up in there and you know I was like I was trying to provoke anything right so you know you know I wanted to be safe but at the same time I wanted to see what was going on in my neighborhood and that's basically what I explained to you know the fat the fat white or the follower who trudged down the stairs and asked me you know what what was I doing and I'm like yeah you know we spoke earlier he's like oh yeah right so I was like well you know I just basically came to see you this is exactly what I said I said I came to see if order followers were committing acts of violence in my neighborhood you know I said exactly like that and just to make it clear and you know who he is and what I was there to do so you know and I said that to his face and so you know eventually a few more came down and so I asked the gentleman up the stairs I asked them sir I basically what they told me was that he broke into an apartment and whether it is he not or whether it did whether or not he did was irrelevant to me because I don't want order followers like you said involved in any situation in my neighborhood at all you know anywhere near me so you know and then the black house slave order fall over I like to call the black ones the house slaves because they remind me of the good old days you know right so he he trudged down the stairs and he he proceeded to you know threaten to shoot me and my dog if I don't if I didn't go inside this is what's happening in the United States of America ladies and gentlemen for being out on the street right now and they're they're setting curfews in areas and then harassing anybody regardless of their age I mean you had any kidding me the thing is in mark you know for the first time I think in history in this generation is people are finally starting to real was really going on in communities because communities like this haven't had a voice until now people who people who live in places like this they they don't listen to shows like this but now that there's there's more populations more technology and now there's a voice now and so now people speak out and now people are seeing it through through cameras to media through radio and it's things like your so to get that allow people like us to have a voice and to speak out against it I appreciate you calling and telling that story I'm sorry you had to go through that yeah well thank you so much for doing what you do Marc and I really appreciate it thank you my story you got it this is what's going on in our country and our name and and there's Nazi lovers out there that love it that'll defend it that'll offer justifications because they'll say my dad was this or that or my grandfather was this or that well who gives a damn right is right and wrong is wrong folks and that's all that matters you need to understand natural law and you need to understand the consequences for ignoring it is the slavery system we're living in see if I could squeeze in one more call let's hear from Miguel in Las Vegas you're live on what on earth is happening welcome hi mark gum yeah unfit just like black collar how much I appreciate work and I'm following it for about two years now and I'm pretty much heard most of it backwards and forwards um help me get out of that New Age David was in for so many years and uh that's a tough one to break right right and and I'm still pushing forward there was a topic that came up on one of the discussion groups on Facebook the other day one of the guys brought up that um whether or not somebody that was being a vigilante was acting in accordance with natural law and I was wondering about your take on that I know you know I plan to bring it up all week calling your show and it's actually pretty interesting because tonight on the news they're talking about some guy that drove to New York specifically to assassinate two police officers you know according to him in an act of vengeance for Eric garner and I'm wondering what your take is on that well I think it's doing something on an individual level like that is not really going to end well you know but at the point that we're at I I personally see a hot revolution coming in America you know that I think it's gonna need to be organized that I think is going to need to have a groundswell grassroots effort behind it just like the first American Revolution had I think this one's going to be a hundred times bloodier and you know it doesn't have to happen if the the consciousness of the people would you know come up to a level where they could understand what's going on around them and they could really deeply grasp natural law and the consequences of breaking it then we could have a revolution in consciousness but do I see widespread evidence of that occurring III can't come on look if I wanted to come on the air you know how many more people I could probably get to hit this webpage and listen to this radio show all I would need to come on the air and do is blow smoke up their rear end tell them what they want to hear tell them they're loved and protected by all the higher angels and entities out there in the universe like so many other crap New Age believers and all these disinfo agents do okay tell them that the outcome is assured it's not going to take any effort on our part you don't have to change the way you think the white hats got this in hand and all the arrests are being made as we speak don't you know you know and you guys all know who I'm talking about the all the clowns out there that actually want to tell people what they want to hear and you know how many million and millions of hits per week these people will get because that's what people want to hear they don't want to hear you're gonna have to be involved you're gonna have to get up off your ass and do something you're gonna have to talk to people not just be a keyboard commando speak to people in real life host events make make media be the media you know put your real name on something and say I'm not afraid that's my real name I'm not afraid of who's coming after me my die is cast I cast my died a long time ago ladies and gentlemen I'm on the right side of history I'm on the right side of truth and that's all of it matters when you do that you stand in your power and there's no force in the universe that will stand against you when you do that with courage courage is the force that the universe respects you know and I if I if I am telling you the truth do I see a grand mass of awakening in consciousness no but you know what I do see I see a nation that has more guns than any of the than all the other standing armies in the world combined and they're not going to go quietly into the night that's all the time we have for this edition of what on earth is happening there's only two paths you there's only two mistakes you can make on the path of truth not starting and not going all the way we'll see you here next week folks [Music] [Music] [Music] [Music]

What On Earth Is Happening Show #180

Topics: *Mark's UFO Sighting of December 27, 2014*

freedom mat that's what it's all about [Music] [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of the choice and now here is your host Marc Pascoe [Music] welcome one at all you're listening - what on earth is happening right here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm the networks website Republic Broadcasting org today is Saturday December 27th 2014 the last show of the year for the year 2014 the year flew by it's amazing that we're already at the end of the year heading into 2015 this show is of course live every Saturday evening from 10:00 p.m. to midnight Eastern Time 9:00 p.m. to 11:00 central to 11:00 p.m. Central Time and we have a great show lined up for you here tonight a very unexpected topic I was of course planning on continuing the topic that we've been covering for the past several weeks on order followers their mindset and the mindset of the people who support them and we will be continuing that topic into 2015 I'll be going into some more controversial material as I talk about the reasons that women support order followers and the role that women could play in the reversal of the mindset of order followers should they decide to step into that role instead of the role that they've been serving that supports the slavery agenda by supporting these individuals so that's coming up on future shows but tonight I have a very very unique topic I had a personal UFO sighting today earlier today and you know people will come down on you know two sides of this and you know you'll have the true believers and then you'll have the debunkers and you know they'll never meet in the middle you know and constantly be butting heads and battling but I just posted the footage online to my youtube channel and website you can see it by going to the link on the left hand side in the latest news and also there is a link underneath the player for tonight's show tonight what I'll be doing is recounting the the sighting that I and a friend had here in Philadelphia earlier today and pointing people to the footage they can go and check it out and watch it and then I'll be taking your calls for people to comment on you know whatever you think that this may have been you're free to call in and make your suggestions but UFOs has always been a interest of mine I would consider it one of the end points of how I really started to change my consciousness and opening up my mind my mindset in general to the acceptance of the possibility of non-human intelligence helped me to come out of the very sickened and diseased world view that I had formerly been in that drove me into the arms of the dark occult when I was younger so that's coming up on what on earth is happening a little bit later now I do have a couple of quick event announcements as a matter of fact let me give the call-in number right here at the top of the show if you want to join us in the next hour the toll-free number to join us eight hundred three one three nine four four three once again the callin number to join us eight hundred three one three ninety four forty three just a couple quick event announcements of course the free remind three conference coming at us in April of 2015 April 10th 11th and 12th that's Friday Saturday and Sunday 2015 of April 2015 at the Sheraton Bucks County hotel at 400 North Oxford Valley Road in langhorne pennsylvania langhorne PA is just north of the city limits of philadelphia a hop skip and a jump from Philly the speakers already scheduled for the free remind three conference are as follows Bob Tuscan Clint Richardson kertus davis the illuminated one Dennis McKenna Derek Bruce the New Jersey Weed Man heed fortune freighter X Freeman Fritz spring Meijer Jay Parker on vibes Josie the outlaw whales Larkin rose luke rudkowski Mark Devlin myself mark passio and Stuart Swerdlow that's the lineup so far more speakers will be added soon there will also be a panel discussion group with the speakers and there will be open mic sessions at the end of the evening from after all the featured speakers are finished there'll be five to ten minute segments for people to get up on the microphone from you know just from the audience and talk about whatever they would like to get out there on all weekend pass for the free your mind conference all three days including the speaker meet-and-greet on Friday night only one hundred and fifty dollars you can get that deal at free your mind conference calm where the best way of supporting this event is to buy tickets in advance because that helps cover the cost of the venue and the speaker travel arrangements and the speaker lodging arrangements so the best way anybody can support this conference is to please get your tickets in advance for listeners of what on earth is happening exclusively if you enter coupon code 93 at checkout at Fir your mind conference calm that's coupon code 93 just the number 93 9 3 at checkout you'll receive a $20 discount on the all weekend pass ticket and you'll be able to get the all weekend pass for the free your mind 3 conference for only $130 you can't beat that deal anywhere for a conference of this size and scope and magnitude so please go to free your mind conference dot-com today and get your tickets I'll be preparing a hard-hitting harsh presentation for the freer mind three conference my presentation is entitled the cult of ultimate evil order followers and the destruction of the Sacred Feminine that is going to be a presentation that people are not going to want to miss because it's going to really get down to brass tacks when it comes to what order followers are all about now another great event coming up here in 23 2015 the Tesla Science Foundation is presenting the third annual Tesla memorial conference the theme of this year's conference is called let's create the Tesla curriculum this is taking place Saturday January 10th 2015 from 9 a.m. to 11 p.m. at The New Yorker Hotel The New Yorker Hotel is at 480 1/8 Avenue in New York New York for more information on this great conference please visit Tesla Science Foundation org great group of people you definitely want to check out their work I highly encourage people to get their tickets for the third annual Tesla memorial conference coming up in New York on January 10th there are still what on earth is happening promotional t-shirts available as a gift in return for a voluntary donation to help support my work you can click the email link that is listed in the article at the top of the news section on the one on earth is happening promotional t-shirts to find out how to get one there's also a donation button on the left hand side of the what on earth is happening comm website if you feel that you've received value from the information that I've shared on the website and on this radio show please feel free to make a voluntary donation to help support my work so that I can continue it into the future with that having been said I just want to direct everybody's attention up to the radio show page of the what on earth is happening comm website underneath the player for tonight's show you can see images for tonight's show listed there as numerical links you can click them to bring them up as a presentation we'll be right back folks [Music] the cool side that we don't dare speak there's a wall between ups it'll rip so we keep very tip dear let there's nothing wrong the cold of sides cackle walk welcome back everyone you're listening to what on earth is happening right here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm before the break I was directing everybody's attention to the website what on earth is happening calm to the radio show page underneath the player for the live broadcast there are images for tonight's show the first three images were regarding the two conferences that I talked about the freer mind three conference and the Tesla memorial event coming up in New York and the last three images four five and six are images I took today of the skies over Philadelphia and they were absolutely riddled littered with chemtrails with chemtrails spray I mean the geoengineering effort is going along full-steam and it's just if anybody thinks this is normal water condensation vapor or any kind of normal jet activity from commercial jet airlines I mean you have to have your head examined that's I mean I don't even know what else to say if you don't understand geoengineering is a huge agenda and it's going on and it's been actively going on for well over 20 years more likely than not probably a lot longer than that I mean I've tracked that since about 1997 going on 18 years and you know been talking about it constantly but just look at these images I mean the skies were absolute covered patchwork of of lines in the sky from this chemtrails spray these pilots were out there all day long from in the until the Sun went down and it's just a disgrace that they'll still fly missions doing things that they have no idea the repercussions of and you know just follow orders again it's all part of the order following dynamic but I figured this would be a good transition into the topic tonight which was my UFO sighting the second major UFO sighting that I've had in my life I recounted my first one on the air several months back and this one was arguably more dramatic there's people who again come down on the skeptical side of things saying these were birds there are people who are the true believers saying you know these are you know our space brothers who are basically lending their help support and guidance etc I mean I'm trying to keep an open mind and just talk about what I feel they very well could have been and what I feel that they certainly weren't and so I'll recount the story as it happened today this is something that was completely unexpected of course I was in my home talking to a friend on skype and I heard my phone ringing in the other room so I hung up the call on skype and I went to pick up my phone and it was my friend John and he said mark you got to get out side of your house and look toward the eastern sky and you'll see a fleet of objects in the sky and I went outside and I couldn't find them I was he was trying to talk me through where in the general vicinity of the sky they were located and I was went out to my corner on my phone and was trying to pinpoint their position based on his description I was not able to locate the objects so he was about three blocks away from my current location and said I'll just walk over to you and point it out so I waited on the street corner for him to walk to my position and when we met up he pointed out the objects to me and I was immediately able to see where they were and I became very interested and these were a huge amount of objects I would probably say close to a hundred of them and they were scintillating and glowing in the sky and they looked spherical and they were staying in one place in the sky they weren't moving they seemed to be hovering in one spot high up I would estimate almost 50,000 feet if I had to make a conservative estimate well beyond the chemtrails spray probably above you know any lower natural clouds which I don't think they're learning natural clouds in the sky think every cloud formation so-called cloud formation that was in the sky over Philadelphia today was a chem cloud you know was chemtrails spray that had fanned out so when I looked at these objects they had a very unnatural appearance to them and definitely looked like they were staying exactly in one position but shifting in their relative positions to each other so they were making these different patterns and formations in the sky and I immediately took out my cell phone and started taking video footage and that's the footage that you see on the news section of the site it's the second item in the new section and you could click the link underneath latest news that says mark witnesses UFO event video footage December 27th 2014 or you can click if you're listening live underneath the player it says video footage of Mark's UFO sighting of December 27th 2014 just underneath the images for tonight's show now the footage is a little bit shaky obviously because I hadn't had no tripod to take it on so I'm just holding the camera and trying to do my best to keep it still we were both you know very taken aback and excited by this as you'll hear in the you know in the footage and again these things did not look like they were any kind of natural phenomenon they looked like they were somehow being intelligently controlled at least that's what it looks like to me now again there are people who will say well these are birds I keep hearing the some type of geese snow geese etc and I have an open mind that it's you know possible that this the phenomenon of geese flying at high altitude could look similar but there is something that happened during the course of this event and I'll keep relating the story and I'll get to that that makes me think that this was definitely some type of intelligent activity whether it be human or non-human is debatable but you know we could speculate on that but my point here is we started filming this and asking other people who were passing by on the street to just take a look up and you know see what they made of it to get some other opinions opinions or impressions and a few people stopped on the street and looked up and some of them said oh I think that's just Birds and some of them said no that looks very interesting and I don't know what to make of that I don't know what that is a couple people came out of their homes because they saw us looking up in the sky and filming and some people walking down the street stopped and some people even in cars stopped and pulled over to take a look at it to see you know what we were looking at and this incidentally was on my corner on the corner of we witnessed this from the corner of where my house is at okay so it was right above my neighborhood and you know initially someone said oh I just think that's birds but then even as he sat and watched it more and realized that they weren't moving at all they did not move across the sky it's as if they were just in that area of the sky and stayed still in one particular area of the sky as they the formation morphed so we'll pick up the story right there on the other side of this break ladies and gentlemen you're listening - what on earth is happening stay with us we'll be right back [Applause] [Music] [Music] [Music] welcome back everyone you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening calm continuing with the relation of the story from earlier today when I had a major UFO sighting we were you know looking at these craft and they did not move in relationship to the sky you know they stayed in one area of the sky and you know people will make the claim well a wall if it was birds there you may be struggling against the wind up there and you know it looks like they're not moving but they're you know making very little progress against a strong headwind or something to that effect it just I don't know how to explain to people who weren't there you just would have had to see it with your eyes you know a camera is going to only do it so much justice and again it's not like I'm sitting there with a camera rig I took my cell phone out of my pocket you know so the footage is as good as it is but when you saw these things through a pair of high-powered binoculars they looked perfectly spherical now you know people will also say well you know birds up at a high altitude can look you know like an orb possibly - but they maintained exact equidistant relationships to each other as well all of them when especially when you looked at them through binoculars and the thing that really you know as mote more people came to observe them most people were coming to the same conclusion that these did not look like birds and it did not look like something that was a natural event happening the thing that really threw me and really made me do a complete double take I mean I was already amazed at what we were witnessing but as we watch this first original set of objects slowly move over toward one direction of the sky they event they hovered for a long time I'd say over 10 to 15 minutes in exactly one area of the sky then started going to the eastern portion of the sky and then it looked like they faded you know they it look like they were rising higher and higher and higher and higher not just getting farther away but they were moving up in altitude and then they faded to a point where you could barely see them it was like they were just barely visible to the naked eye while that was going on almost in the same exact area of the sky that we were watching this first group at and we have been looking at this whole area of the sky like you know often you know trying to find them after like looking away and then looking back up toward that area of the sky you know just as this first group moved off directly over our heads manifested three more objects I three more groups of objects I should say actually it was like four groups of them and they just appeared out of nowhere now in the footage you can't see that because I had actually stopped filming on the first and second groups of film the the films the videos were broken up into three videos as I took them with my camera and nothing is retouched it's all just right straight from my camp my cell phone camera now the second footage there's not much in the way of the these objects because I was had started to look at them through binoculars at that point and therefore the footage gets kind of sporadic there but when it comes back in on the third video you multiple groups of objects these are the ones that appeared directly over our head out of nowhere they just manifested there they just materialized there and what I mean suddenly I mean in a blink we were looking at them in one area of the sky this first group of objects then they slowly moved to the east as it as a group and then suddenly we looked up and all four of these sets of objects were there out of nowhere they did not come from anywhere else they were just suddenly there that's what puts me over the top to think that these weren't Birds they weren't anything natural and there's some kind of a technology or intelligence involved here now if anybody could explain to me how you know birds can suddenly manifest themselves and know the lighting conditions didn't change the Sun angle didn't change we were looking at that area of the sky for almost a half an hour and there was absolutely nothing there and suddenly we looked up and there was these four groups of objects in the sky so I mean you know people will stretch to all kinds of lengths to make a skeptical exponent explanation to propose a skeptical scientific explanation for something that is unusual unknown and that's all I'm saying this was I'm not even trying to make a statement as to what the nature of it was it to me it was an unknown phenomenon I've seen flocks of birds before flying overhead in the city this didn't look anything like that flocks of birds I've seen weren't scintillating like this these were orbs I looked at them through a good set of binoculars they were spherical there was no movement on them to suggest flapping of wings as with geese they are huge and have huge wings these objects also must have been huge because the height that they were at in the sky and the size that they looked you know visually to the perception of the eye means that these objects had to be big you know I'm thinking like maybe 30 to 40 feet each one of them and they were moving fast to relative to each other and you know to me it just doesn't seem like motion that a bird would do to move the way that these things were moving in relationship to each other of course people again will come down on both sides of the aisle in this you know again you'll have the true believers that are you know saying the Arcturians are here and you'll have the hardened skeptics that you know wouldn't make a difference if you know there they were intelligently controlled vehicles from you know beings that weren't from around here and came and took them on the craft themselves they still would say it isn't happening so you know you got the extreme right brain people you got the extreme left brain people all I'm saying is here's the footage this is my impressions of it make of it what you will and you know that's it and you know I'll give people a chance to you know air some of their feelings about what they thought think that this might be but once again the main thing here to me is these things moved in very strange patterns in relationship to each other when looked at through the binoculars they were perfectly spherical they were scintillating scintillating orbs is how I would describe them that they just simply looked like light in the sky lights in the sky I mean they were all bright you know and people will say oh well white geese with the Sun reflecting on them you know look bright like that again you'd have to see it to your own eye the video footage is not even going to do it justice for the people who were actually there and you know I passed around my binoculars and had them all look through it the ones that said that they thought it were

Birds all back down from that position after looking at it through binoculars they said no those aren't birds everyone who looked at it through the binoculars said that so you know that's that's just my explanation from the people who were actually there and saw it through a decent set of binoculars not one of them maintained the position that it was birds after looking at it through the binoculars I mean other than that my take on this is that it could very well be some kind of intelligence that we are dealing with here that is non-human it could be something that is higher dimensional in its nature who knows and it also could be a technology that you very much so humans have developed that are using for some purpose or another that we aren't privy to I mean essentially that's my that's what I think the possibilities are I do not think that it was Birds because of the way that the second groupings of formations came into our presence again somebody could not determine that from the footage but you would have to have been there in person every person who was there in person was shocked when they looked up after watching that first round of them that first grouping of them almost disappear [Music] welcome back everyone you're listening - what on earth is happening here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm talking about the very interesting UFO sighting that I had today and I'll continue to call it a UFO sighting because that's exactly what it was it's objects that we witnessed here in Philadelphia that were unidentified if anybody out there listening may have seen this phenomenon please feel free to call in or get in touch with me go to the contacts page of my website and email me and just put in the subject line you know I witnessed the sighting that you did there's something to that effect I would say at the most we had about maybe 9 to 10 people out on that street corner simultaneously checking this out and overall maybe about 20 passed by and you know we asked some people what they made of it some just you know kept going it or said oh I think it just Birds or whatever weren't really interested but most of the people who saw it were interested in it and thought it looked very odd and again the thing that was consistent is after seeing it through binoculars most people said no that isn't birds those are some kind of objects and they look perfectly spherical when seen through the binoculars the thing that struck me the most is that these things stayed stationary in one area of the sky for so long and simply shifted positions amongst themselves if you watch the video you could see that I pick a frame of reference like Street wires electrical wires on the street and frame the objects around that so you could actually see the area of the sky that they're in and that they do not move they they're not moving they're not traveling from one place in the sky to another at some point they did do that you know and then people will say well the air currents shifted at that time and you know I'm not saying I'm totally closed-minded the possibility of this but these things kept moving in relationship to each other in a very controlled fashion the entire time so if there were high winds up in the higher atmosphere that's very unlikely you know that these that these things would move in the way that they're observed to be moving and again I'm just trying to put out some plausible explanations here for what we're not seeing I again I just don't buy into the this is just a high flying flock of geese explanation again could it be that it could be I'm not going to totally close my mind onto that possibility either but again like I said if you saw it with your eyes and you saw through binoculars you would more likely than not rule that out you know I've I think it's a very low probability after seeing it through binoculars these things maintained exact distances between each other birds don't do that you know they would be drifting in and out between each other and you know separating and coming back together when you saw it through binoculars you saw the evenness of the spacing this was like a flotilla I mean it was like just something you know out of a science fiction movie and the thing again that really really struck me was when multiple groupings of them appeared over our head instantly with I mean absolutely no warning literally out of the blue or out of the milky white chemtrail Laden sky I should say you know we thought also could the chemtrails be playing a dual role here and what they usually do in geoengineering you know whether it's to apply zoomify the sky or you know put tons of metal oxides into the sky for you know weather modification could there be another motive here that when there are possibilities that they pick things like this up on radar they're going out there and using the chemtrails simply as an obscuration mission you know so maybe they were simply trying to blanket the sky with cloudy layers so that people would not be able to see these things I don't rule that out as a possibility for why we had such an unimaginably heavy day of chem trailing here in Philadelphia I have no I mean I've been following the chemtrail agenda since 1997 early 97 I was out there with a cam with an old VHS camcorder taking footage of the sky watching these planes lay down these trails and I'm telling you since 97 I have never seen a day of spring you're more relentless and nonstop than today here in Philadelphia I've never seen one like that I mean just look at those images if you could look at those images and tell me that's anything resembling normality I think you need to check yourself into the nearest mental hospital I mean that's all I can say because what else can you say when you look at those images anybody that is a geoengineering denier at the point seeing something like that right over their own head you have to be out of your mind and I mean I think possibly you know they do know when these sightings are in our skies they obviously get them very early on early warning radar and I think they you know they don't want people pondering any of the issues that come up with this look this is a very popular topic I mean my facebook page when I post these videos lit up with comments you know I post one of my videos it's like a couple comments here and there you know natural law the morality but you post the UFO video and everybody goes nuts and there's opinions you know all over the place that range the full spectrum so you know it's very interesting what people find interesting to them what they want to talk about what they want to comment on you know this is a it's a hot topic definitely and I've submitted it to a couple of people in and will continue to submit it to a few people that I work with in the ufology field of research and you know I've already gotten back a few comments from them on the skeptical side on the you know could go either way side and on the side that they feel that this was a fleet of intelligently controlled craft again I come down on the side of it that more likely than not these objects are under some kind of intelligent control not going to go to the full you know it's definitely alien or other-dimensional although I don't rule out those possibilities either could this have to do with some type of scalar technology you know ionosphere heating or you know something to that effect who knows you know this could be weather modification this could be something to have that has to do with radionics it could also be something that is completely outside of our ability to even comprehend or understand you know this could be this could be something that is completely other dimensional in its nature again I'm not going to definitively come down and say it is this it is that it is that what I'm going to say what I don't think it was is I don't from what I observed today think it was just a flock of birds again many people are going to be hardcore on that because they'll compare to other footage that look similar and you know immediately jump to that conclusion again do i 100% rule that out no but I think it's a low probability based on being there at the actual scene of the sighting and seeing it through a decent pair of binoculars that's where I'm going to say no to that hypothesis for theory but again everybody who was there and who saw it with their eyes and then who saw through my binoculars said that they thought it was some type of craft and not birds with that having been said we're going to go to your calls in the second hour and you could chime in on what you guys think this was so don't go anywhere your calls coming up you're listening to what on earth is happening stay with us you know today disguise at night today welcome back everyone you're listening - what on earth is happening into the second hour of tonight's broadcast I'm your host mark passio my website what on earth is happening calm we're going to go to your calls coming up in the second hour and you could chime in on what you thought this UFO sighting that I had earlier today might possibly be all about before we do that I have a special guest on the line with us for the first segment of this hour is Bob tusk and a former host here on rbn who has a very special announcement that he wants to make and I'll also let Bob comment on what he thought of the sighting Bob are you there with us I am mark thanks for having me for this segment not only I'm very interested in keeping an open mind and looking at all evidence that's out there for extraterrestrial encounters or whatever it might be so bottom line for me is I look at everything and take it with the rate of greatest pinch of salt you know and that's how I go into things with that agnostic perspective I spoke about this sort of thinking and learning during my first for your mind lecture and I think it was Robert Anton Wilson who put it best that you know you have to keep an agnostic mindset but at some point with enough evidence you have to then take that and move into the third stage of the Trivium if you will and go into that wisdom / rhetoric stage and and that's what you did after your observations and I and I commend that and I think we should all own up to our experiences and even our own experiences should be a to a certain extent looked at again through the lens of being an agnostic thinker but on that aside I digress I mean you and I could talk about that forever and I certainly feel that mark is being genuine folks with his claims here not for a second do I think he's doing this for the sake of being hyperbolic I got on the phone with Mark shortly after this half then and he was genuinely moved by this he was genuinely under the impression that he had seen something and I believe that mark whether you disagree with this being a legitimate sighting whether you think it's birds or not is being completely genuine about this and has no agenda in presenting this and I think we need to put aside our egos and our desire to only talk about one thing or only think certain topics are game and other topics are too taboo to discuss and get over ourselves and be able to look at something like this and think about it freely and discuss it freely and not alienate somebody who dares to bring it up so screw you people out there who are hating and want to propose something just because you think that on the surface it doesn't look right all right so that makes sense mark absolutely and you know that's what I was just talking about during the break with you you know so many people in the UFO community don't want to discuss issues that people in the truth movement will discuss like conspiracies or you know the loss of freedom that you know humanity is experiencing and so many people in the truth movement don't want to acknowledge the existence of the possibility of extraterrestrial life or talk about anything having to do with you know something that is seemingly paranormal in its nature and I think these two movements really have to you know solve their their differences and come together and realize all of this is connected you know the whole human condition as I've talked about in the past and past shows during the cosmic abandonment series is connected with this this phenomenon of non-human intelligence operating here on this planet and these groups have to somehow narrow the gap that has widened between them and come together on equal ground and you know start bringing different parts of the puzzle to the table and say hey this is worth looking at and so is this and we need to keep an open mind about all of this stuff there's just too much closed mindedness that goes on within both of these circles as far as I'm concerned and I like to think that maybe I could act as a liaison between these groups at some point I think that might be a necessary move to make mark and I think you would be a great liaison to do so considering you're so rational and so logic driven but at the same time you also have you know a spiritual side for lack of a better way of describing it sure I could I talked about on my show a sighting that I had and it moved me I was driving home one night and there was weird red lights that moved in a way that was on flare like it did not move like a normal flare if it was a flare and I had to talk about it on my show so I think we're in the end of the day what this all comes down to mark is the lack of censorship we cannot censor our minds and turn out boys's on anything if you experience something and that truth is there then by all means do not pussyfoot around it it is the truth or at least it's a perceived action that took place and therefore we should not have the censor that everybody wants the mandate and that's a very much similar theme to that of those in the so-called truth movement whatever that means or does not mean but that being said mark I'm very pleased to announce here first on the air for the first time that my humble show which is not about me at all it's about solutions it's about a revolution it's about cutting this nasty world that we live in into a place that makes it a little bit more sane and and peaceful for my child and my child's child and so on and so forth and it's coming back I'm starting again on Republic Broadcasting Network and other affiliates on Monday that's this coming Monday show will be on at 7:00 p.m. Eastern Time that 7:00 p.m. Eastern Time and Mark passio will be one of my first guests mark and I have been doing this hand-in-hand for quite some time together I brought mark on way back in the day on one of the network's I was on he then went on the next network I was on and we've been trying to follow each other and work together ever since and once again we will be on the same platform and he'll come on my show I'm sure I'll be on marks show from time to time in the future to talk about of course the free remind conference which is so important and I can't stress it enough that if you're not getting involved with the freer mind conference on some level you are really missing out we need all the involvement that we can possibly get with this conference to make it happen financial involvement is important it's a necessary evil but any involvement that you can have in the conference we welcome it and so many people are coming together for this gathering of the minds that I I'm just completely enamored and proud to be a part of it and humbled to be a part of it and humbled that my broadcast the Bob Tuscan show for lack of a better name will be coming back to the airwaves on Monday at 7 p.m. Eastern Time so that's the big announcement on my end mark Bob congratulations on your return to rbn I know the show is going to pick up right where it left off setting high quality standard in broadcast media and I want to congratulate you for coming back on and everybody tune in to Bob Tuscan weekdays 7 p.m. Eastern eastern time right yeah its Eastern Time and I appreciate that mark and you know what I really have this internal struggle they mean that I want to just vet out real quick the bottom line is something you know just like anybody else sometimes I wonder if I'm just doing it for my ego if I'm just doing it for the sake of thinking I'm a part of something and I struggle with that inner dialogue if you will but I think at the end of the day mark what I'm gonna do differently hopefully will bring some change I want to focus on solutions I want to take a real stab at the root of the problem at the root of the issues not the other symptoms that we get so caught up on all these surface level symptoms that become distractions but I want to get to the root of the problems and offer solutions and Mark I appreciate all that you do and absolutely Bob thanks so much for coming on to make that great announcement ladies and gentlemen Bob Tuscan check him out Bob Tuscan calm [Music] welcome back everyone you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening calm before we go to the phone lines in studio I have my friend John who was also a witness to this sighting and who actually made me aware of it I want to bring him on quickly to get his take and his impression on the sighting that we witnessed John won't you give the listeners a little rundown of what you feel that you experienced and saw earlier today sure mark thanks for having me on the show tonight and it was good hearing Bob's voice also so it's great to know he's coming back shortly I could definitely say being there judging from the whole experience that you know I and I heard some of the other feedback from people who posted on Facebook that they thought you know it's very possible it could be snow geese or you know pelican colony you know but I think you could say what it could be or what you think it may be you know it could be these glowing orbs that you know manufacture the crop circles or you could say it could be Palladian ships or some other you know higher extraterrestrial intelligence be it benevolent or malevolent but we don't really know that but I can't tell you exactly what it was but I could sit here tonight and tell you what it wasn't and it wasn't any type of bird geese Pelican you know any type of flying mammal because number one the altitude was way too high you're talking about over fifty thousand feet easy if these objects were probably in the stratosphere and number two I've seen numerous footage of geese flying and you could hear them we didn't hear any birds there was no birds to be heard no matter what the altitude was now being that we're on ground level and we're looking up over 50,000 feet possibly into the stratosphere and we sole individual orbs in equidistance in relationship to one another now they were kind of like hovering and floating in formations that were very similar to the geese formations which makes it very difficult for someone on the other side who wasn't physically there and to just take in the evidence that was available at the time and the only available evidence being there was a good set of binoculars and number two you didn't hear no geese so taking that into consideration you know I firmly believe it was some type of fleet of craft let me ask you a question when you looked at it through the binoculars what was your impression tell people what you saw visually when you looked at it as as clear as you were going to see it with the aid of a piece of technology like that at that moment I was just very you know made it myself for all these years you know I never bought a high-powered telescope I at that moment I wish I had a high-powered telescope but what I saw through the binoculars was quite amazing I saw like bright like specks that were kind of roundish in shape but they were very equally you know distant from one another keeping a very rigid you know tight formation you know they weren't like going in and out they were very you know stationary you know almost almost as if like you had a piece of wood or something and you poked holes through it and there was light shining through that piece of wood how how equally spaced you would see the light coming through that piece of wood that's literally what it was like and even when they move like laterally you know like or upward and downward like you know if they changed altitude they would stay perfectly in formation with each other it was a very non organic movement or aspect of their movement as far as I was concerned if you see birds or animals moving in relationship to each other there's an organic flow to that type of movement there was no such organic motion to that it looked very rigid at least that's what I saw when I looked at it through the binoculars I mean would you concur with that oh yeah definitely definitely and and at most bird you know formations they're they're flying to their destination you know they're not looking to really stay in one section of the sky they're flying towards a destination they all have a route right these formations and there were four formations at one moment that magically appeared out of thin air because we were scanning the whole sky yeah that's the thing that freaked me out the most in the whole thing even seeing the first flotilla or fleet or whatever you want to call it when those four came over our head suddenly and appeared there that's when I felt that this was something otherworldly because there's no way that the ten people standing on that street corner would not have seen those approached from some portion of the sky I cannot bring myself to accept that somehow what all of our minds shut down simultaneously and we suddenly weren't aware of our surroundings just because we were witnessing this event going on in one portion of the sky none of us would have seen all four of these formations approach in one area of the sky directly over our heads and then we suddenly looked up and there they were out of nowhere that's the thing that did it for me say I don't think that this is any kind of a natural phenomenon this is something that is beyond our comprehension or understanding taking place no no and when you're experiencing you know such a you know a daddy ordinary kind of experience like that you're pretty much scanning the whole sky to see if you if there's anything else you know if there might be you don't want to be focused on one ring and we were focused I know I kept doing that I kept looking at other areas of the sky to say hey are there any more of them anywhere else yeah you had to you had to scan the sky even though the one formation that kind of faded out when we were looking towards the south eastern part of the sky that's when I think it just gained higher elevation to the point where it that's what happen obscured by all the that's correct like it's a chem trail that that the whole sky was an utter mess right it was a mess and I mean that is what it looked like to me like they ascended in altitude and literally we're no longer in our in our visual perception range and well when the multiple formations appeared I considered that a second sighting and when those formations appeared they were actually lower there were much more so we were able to get an observe you of it and that's in video three that we're referring does the third yeah I understand folks video one is with the first part of the sighting the first flotilla or fleet video to it you see a bit of them trailing off as they're moving slightly eastward at that point and then you know my footage becomes erratic because I'm looking through binoculars at that point and I'm not focusing on the taking of the video although the camera is still on in video 3 just before video 3 I had shut the camera off for several minutes because we thought the for the sighting was done and then I turned it back on after people said wow look up right over our head there they are again they materialized over our head out of nowhere for formations that's when I and that video I am pointing that camera directly upward it is not pointed laterally in any direction it is it is pointed directly at the zenith of the sky straight up they were directly over our heads and this footage happened right on my street corner practically right over my house ladies and gentlemen your calls on the other side John thanks so much for contributing your input and giving us your your take on this sighting thank you Mark you got it stay with us everyone we'll be right back [Music] [Music] welcome back everyone you're listening to what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm so let's go to your phone let's go to the phone lines and take your calls the toll-free number to join us 831 390 443 let's hear from sadani in Connecticut you're live on what on earth is happening welcome hello mark yes good evening are you doing well I actually got the opportunity to meet you and speak with you at length at the Manchester in Connecticut event back in October yes the demystifying the occult seminar which hopefully I'll have out on video on in the not-too-distant future awesome and I said I did want to address my name as it's an item you've addressed the Donnie is not my legal name but it's also nothing I'm hiding behind and perfectly comfortable my legal forms of my name have changed I just you use it as an initiated name into a spiritually initiated name sure and I appreciate where you're coming from with that and people who are hiding need to not be hiding I actually had called this very early because I wanted to catch you have been attempting to get into the queue for a few weeks I was really hoping to speak you more the order following layer but uh as discovered you transited to the other UFO topic as an experience right from my youth I have what the comments to that as well but even to enter the arena on your show and thank you for having me I know it's with a kind of a trepidation because there are so many layers and strata to everything and the UFO discussion is obviously no exception to that sure are you familiar with the films connect the key no I'm not Mike Hoffman the guy did adaptation okay big Hollywood screenwriter you should check it out I know you'd enjoy films and it's it's pretty immense the setting is an aging director and the beginning that is kind of an eerie take on life and the way things are kind of you know about loss losing breaking down and he creates this masterpiece work where he's got people on set for 20 years essentially they're living their lives they have doubles it's a very macro cosmos of microcosm kind of introspective it's very elaborate very interesting more people might be familiar with his work adaptation that a Nicholas Cage was anyhow it's it's with that kind of a take that we know there are so many layers to everything that's that's going on you know when I was a child I began continually experiencing things where I lived in Connecticut kind of in a woodsy area and even now people who come up to where I grew up you know that doesn't take long at night to begin to see things happening and many different diverse types of people have come to like what's that well give it a few more minutes it'll get stranger and more recently there were again kind of like your collective hallucination statement know that wasn't happening this was a very odd thing it was small but uh it just floated erupt and you've us or four of us who were sitting around in a northern town in Connecticut and we were talking and this thing just floated through and like very tiny but it you're all it was very very weird so these things do occur uh there are millions of experiences around the globe and they are not part of our conventional life at the very least I know I've seen of many different things is it okay to comment on the order following thread a little too sure go right ahead thank you I appreciate that they just want to say to that that deeply appreciate your work and what you do the tone you do it with and the forthrightness that you take in addressing issues from the angles you come at them with I mean dealing with the New Age cult and its particular brand of you know religiosity right what brought to bear is clearly it's just terrible Oh tough one for a lot of people to break out of for sure it is and you know I know for most people it's a shame because they come to their spirituality I believe because of the stress and tension that they live in they come there to find some relief for that the last thing we want to hear is that they have to work and where they're coming to find some peace of mind so to speak but we have obligations be they whirl or what have you here and obviously that doesn't that doesn't really work to not fight the battle in the mind and realize that's not a place to be and I also appreciate the other angle coming at the various forms of brutality that we see in cases like Eric garner cases like the Ferguson case and just generally policed State to deal with those angles we obviously have tons of legislation as it's foregoing since 2011 and the Occupy movement what's come forward explicitly but obviously it's been building for at least 150 years here sure but that's the all the angles you come from very important I agree with so much of what you do and it's kind of with that that I'm reluctant to tamper with that at all so if allowed I would you know I almost feel sorry it's you know listening to you if you feel that the tenure for what you're getting an email or chat or whatever assumes to be sort of assaulting people who insist on remaining ignorant and just wasting your time and but at the same time perhaps to raise the bar in the caliber because they don't would like to constructively challenge you that not abrasively if possible sure as regards the concept that all order following is innately immoral if you want to call it that because as a fellow as a terrorist I question the notion of the body that the body is obviously you know really the most consistent theme woven through all a satiric literature and if we relate the body there is clearly a type order following that every different element of the body in Estrada is working through and there's a kind of order of following it's an undercurrent that I see developing for some of what you're saying that could go awry and I think we hadn't role often to tamper with that because it's not the thrust obviously of what your work is so well aimed at Charlene you know what I'm talking about order following I mean literally like a hierarchical structure of command where somebody is listening to what somebody else is telling them to do physically with their actions so you know it's not anything more esoteric than that it's simply if I command somebody to do something and then they do it you know they you know they've done that only because I've commanded them to do it not because they've fought through the action and whether it's in harmony with spiritual law or not and they just did it anyway because they are okay with abdicating their personal responsibility and letting somebody do their thinking for them that's what I literally mean by order following in the strictest sense of the word and I hear you it's still question off the model of body to some extent that there is I don't more what I call every term to my when I've taught you more or less importance but there is a all of these beings where there are superior and inferior we're in the true sense as you may know or see you're not see is with superior entities they really have more responsibility to the collective to be guiding that ship or the body there is a hierarchy of direction and when you use the word coal and I know what call you are talking about very well even from my own personal background in it in some ways but t just aggressively used the word and I'd be reluctant to because obviously cult is it can be tribal you notice when we say we're dealing with the cult of at on we're dealing with the cult of the black hole son we're dealing with the cult of Saturn so it's a question of who booked up you know who are you serving sure they it's not savor it's not a collective you know benefit to ever you know the all to the all beings you're serving you know the Oblivion called the status right it's the cult of death I mean it's it's literally the cult of the dark Sun you know as I explained in my demystifying the occult seminar that's really the only cult its operating on this planet right now I mean they all feed into that one overarching cult of the dark Sun the Black Sun you know that that's this is one huge Tennessee dark solar material like we're probably dealing with I would say somewhere between what wasn't mentioned area we're going to a break we'll be back folks [Music] [Applause] [Music] the cool side that we don't dare speak is wild between us little rip so we keep dead deer let there's nothing wrong it's cold welcome back everyone you're listening to what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm we're into the last segment of the show for this evening let's see if we can squeeze in a couple more callers let's hear from Glenn in Ontario Glenn you're live on what on earth is happening welcome hi are you talking to me yes I am yeah so would you be able to take a question on self-defense on what self-defense sure absolutely it's okay so what I'm wondering is you know for dealing with murderer or child rapists or something but they aren't actually in the act they've already done it you know lethal force still acceptable early because I sort of would think it is but you know just wondering your thoughts on it yeah I mean people will get into the whole debate of you know do we go and hunt a person down I guess if he's been a pariah on society and you know unrightfully you know killed other people I mean I guess you know people would have to make that judgment call would somebody have the right to defend themselves from somebody from that being in their community I would say that yes they would my my take on that is the best way of dealing with that is that morally educate people from when they're young so they don't turn into people like that you know and then you won't have to deal with that situation again that's why I always advocate for not keeping people in prisons I don't believe in the concept of any prison because all that does is isolate people from the the repercussions of their natural law failure to morally educate the young and if you try to just sequester them out of society then we don't deal with the negative repercussions that they create and we don't learn how natural law works to bring us the experience that we're having based upon what our actions were so it's a difficult one I would say the best way to deal with that is not get into that situation but of course there are people who are you know have grown up in an amoral capacity and murder people so I would say that the community has the right to deal with that in whatever way they so choose to deal with it you know read into that what you will yeah I agree with that and I think you're obviously right about the education you try and make peace on earth first right anyway um one more question ah so you guys were talking before about like the dark called cult icon and all this so I what do you what do you think of Zionism do you do you think that's like a centerpiece and what they actually believe is it's the same it's the same thing but it's the same ideology it's the same cult ideology it's just a different name for it the cult of the Black Sun that you know the the dark side of the Sun whatever you want to call it it's a dark solar cult that basically believes that their God they're going to control and own people you know and they're they're higher than the laws of the universe they're higher than the laws of nature and creation you know it's all the same cult it's it's there's just it's different you know different uh you know masks on the same face basically so Zionism is a part is a part of that people think it's simply a political ideology I would say it's a religion just like other occult religions and organizations and it works toward the same goals of control and enslavement of people you know and many of them were all too happy many who belong to that cult are all too happy to tell you that that's what their goals and agendas are so yeah I've briefly talked about it on a past show when I got into dark kabul ism you know uh the clip hodduk kabbalah i briefly spoke about Zionism in one of those podcasts if you go back and listen to that material it's their robotic okay cool yeah Syrian wrote on that as well the Zionism being the same as the cult of Iran anyway thanks a lot man you know you point you point out the obvious on how we can make peace on earth because that's uh proximity that's correlated to the intelligence of humanity and that's the amount of work the willing to put into that you know so and Glenn you're right on point with that analysis I want to thank you so much for the call and he's right you know it says so much about where we're at as a species in our condition because if the answer the solution is so simple it always has been the Golden Rule it always has been don't treat others like you don't want to be treated the way you wouldn't prefer to be treated you know I call it the apophatic variant of the Golden Rule the Golden Rule looked at in the negative don't don't use the golden rule and say treat others as you want to be treated how about we say don't treat others the way you would you would not want to be treated so if you don't want to be treated that way don't treat others that way then it becomes real unambiguous and so simple that a child can figure it out you know you don't want to be harmed defrauded stolen from raped have your rights taken away don't do that to other people period the end it's so simple it's almost stupid folks you know it can't get any simpler than that and humanity is proven we still can't grasp but we still can't understand it and we want the Associated suffering and death that's going to come with refusing to live according to that basic rule so you know it it it becomes a burden to keep having to get up and say repeatedly over and over things that which I already know and have come to understand that's what the great work is unfortunately everybody has to get we got to get on the same page when it comes to that basic way of treating each other you know then we can be different in lots of other ways but until we have that common sense lay down as the foundation in all of our minds and hearts don't expect anything to change for the better here let's see if we could get a couple more calls and let's hear from Dan in Washington dan you're live on what on earth is happening welcome to the show I'm Marc I with respect for the integrity of all of your efforts I I just wanted to try and provide a little bit of objective input experience concerning your sighting today sure immediately upon hearing the you know the beginning of your claim I did some web search and the only augmentation that I can offer it comes from Stanford study of bird migration from Stanford University they quantified it with you know with data gathering the evidently words have greater lung capacities and mammals and there it comes down to energy and efficiency when they're in the migratory process my experience I'm not I I don't have any hornoff illogical background however I lived 20 years under the Pacific Flyway and in a very pristine part of Washington State and had opportunities to see patterns on countless times of what I saw and I I'm getting just a tiny bit ahead of myself first of all they saying I was not there so he only the only aspect the only argument that I can't that I don't know how to address is the core aspect that you brought up but hopefully I might be able to provide you know we have very limited time because we're coming down to the end of the show let me ask you a question well very well let me ask you a question what I would like an explanation for is how did four groupings of these objects suddenly appear over the heads of multiple eyewitnesses who were looking up at the sky that's the only question I really want answered personally I mean you know no one has been able to even touch that question or provide any kind of an explanation for that all of us scanning the sky for minutes were unable to see any part of their approach now to me you can't blame sun angle on that and you can't say you just have all untrained eye witnesses you know I've been looking into the sky since I was five years old you know what can make that happen I think that's a good place to end the show folks you know on a question that leaves a little bit of doubt and wonder that's a good place to take us into the next year I think that's all the time we have for this edition of what on earth is happening ladies and gentlemen remember there are only two mistakes you can make on the path to truth not starting and not going all the way we'll see you right here next year good night everyone [Music] [Music] [Music] [Music]

What On Earth Is Happening Show #181

Topics: *The Psychology of Order-Followers, Supporters of Order-Followers, Apologists for Order-Followers, Only one side of a dialectic manipulation needs to buy the lie for the dialectic manipulation to work, World War 2 and it's dialectic manipulation, the Police State society of today, the Parallels between the modern American Police State and the Nazi Regime, Order-Followers' need for approval, the Abdication of personal responsibility to judge and discern right vs. wrong, Order-Followers' BELIEF that they are doing "good," the Insignificance of Intention, Supporters' of Order-Followers BELIEF they are receiving "security" or "protection" for their acquiescence, the Abdication of personal responsibility to defend oneself and one's rights, Parental Abandonment Issues of Order-Followers and their supporters, the War between the Sexes, Neo-feminism as a Social Engineering and Eugenics operation, the Emasculation of Men, the Masculinization of Women, Destruction of true Moral Values through destroying family dynamics, America already at War, Police constitute a standing army among us, the Mourning Spirits of the Founding Fathers of America, Nazi covert technology, the Nazi and Communist Infiltration of American Institutions, Authentic Men and Women vs. Artificial Men and Women, Doing the Great Work involves waking up the Order-Followers and those who support them, Free Will Choice and it's interaction with Natural Law*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're listening to what on earth is happening right here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm the networks website Republic Broadcasting org today is Saturday January 3rd 2015 happy new year everyone this show is live every Saturday evening from 10:00 p.m. to 1:00 a.m. Eastern Time yes you heard it right we are back to a three-hour format here on what on earth is happening as I said that we would when the show went to a two-hour format about a month back or about a little over a month so we're back to three hours in the same timeslot there was some initial confusion as to the the timeslot I originally thought that I was pushed back an hour from 9:00 to 12:00 Eastern but I had the time zones confused it was when I got the call from the network regarding the going back to the three hours I was in a very noisy place and there was a little bit of misunderstanding there so I did put that out on my Facebook page the people who follow me on social media so I apologize for that error the show is back to its regular three hour time slot from 10:00 p.m. to 1:00 a.m. Eastern Time that is 9 p.m. to midnight Central Time so we have a great show lined up for you here tonight I'm going to be continuing my series on order followers talking today mostly about the supporters of order followers and their psychology and we'll also be getting into a little bit more of the psychology of order followers themselves and gonna maybe begin toward the end not sure transitioning to some of the material that I really want to begin covering for the next many weeks on what on earth is happening after I kind of wrap up the concepts and ideas I want to put out their own order followers I'm gonna really be getting into the whole eugenics operation that has been going on right underneath our noses for at least of the last hundred years maybe more that involves the dynamic of creating a war between the sexes and driving a wedge between men and women in our society so if I don't get to that material in the later portion of the show certainly I'll be starting that next week so I will be taking calls in the third hour of the show this evening the calling number to join us if you want to get in the call queue is 800 three one three nine four four three once again the calling number to join us here on what on earth is happening 831 394 43 that is a toll-free number of course a couple of quick event announcements before we start the material for today the freer mind three conference the biggest conference of its kind anywhere in 2015 April 10th 11th and 12th that's Friday Saturday and Sunday April 10th 11th and 12th 2015 at the Sheraton Bucks County Hotel the chart in Bucks County is at 400 North Oxford Valley Road in Langhorne Pennsylvania just outside the city limits of Philadelphia the speaker's lined up so far confirmed for the freer mind three conference Bob Tuscan Clint Richardson the illuminated one Curtis Davis Dennis McKenna Derek Bros the New Jersey Weed Man Edie fortune freighter X Freeman Fritz spring Myer Jay Parker John vibes Josie the outlaw whales Larkin Rose just added to the freer mind three line up I'm very excited to hear this announcement because he's one of my favorite speakers and radio show hosts and teachers to the people of the world Lennon honor Lennon honor returning to free your mind 3 I'm definitely very happy to see him as part of this great lineup also luke rudkowski mark Devlin myself mark passio and Stuart Swerdlow rounding out what is looking to be an absolute all-star lineup for for your mind 3 there will also be a panel discussion group at the freer mind three conference and open mic night open mic sessions at the end of each night there'll also be a speaker meet-and-greet for an all weekend pass for the freer mind three conference only 150 dollars if you enter coupon code 93 at checkout at the free your mind conference website when you order tickets for the all weekend pass coupon code 93 just the number 93 9 3 that's all at checkout and this is exclusive - what on earth is happening listeners you will receive a $20 discount on the all weekend pass which will bring an all weekend pass down to 130 dollars this offer this exclusive offer for my radio listeners will end this Sunday night at midnight Pacific time so you have tonight and tomorrow to take advantage of that coupon code for a 20 percent twenty dollar discount on an all weekend pass for the for your mind free conference and getting your tickets now is the best way to support this event because it helps to pay for the venue and for the speakers travel and lodging expenses folks I'm just highly encouraging anybody don't worry about the schedule the schedule is not made yet the the the speakers have to be the full lineup of speakers will have to be completely confirmed by the main organizers and once that's done then they'll make their speaker schedule hounding people for the speaker schedule is not going to get it out there any faster this will have to be determined by the organizers you know in their time and quite frankly it's just Mike my take on this conference is if you support this event and I know there are some peace pull out there who have limited phones to spend but I'm asking people to just buy the all weekend pass you know even if you can't be there let's say on Friday evening or whatever support the event by buying the all weekend pass it's the best way to show your support for this event and for its organizers and for the speakers and it's the best way by getting your tickets in advance and all weekend pass in advance you are helping to the organizers to to pay for an event that is very expensive renting a high top caliber venue like the Sheraton Bucks County Hotel is very expensive bringing all of these speakers from all over the country just think about the travel and lodging expenses to Lodge them for the duration of the conference ok this is not something that is pulled off easily organizing a conference is a gigantic task that largely goes thankless and unrewarded so my appeal to people out there if you want to support this event get in all weekend pass in advance that's the best way you can help fund to support the goals of the for your mind conference for more information on this phenomenal event coming up in April visit the conference website at free your mind conference calm so when we come back from the break I have one more quick event announcement and then we'll jump into our topic for this evening more on-order followers and their psychology and the psychology of those who support them you're listening to what on earth is happening we'll be right back [Applause] [Music] [Music] [Applause] [Music] welcome back everyone you listening to what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm couple more quick event announcements Before we jump into the material for tonight's broadcast another great conference coming up in New York City the Tesla Science Foundation is presenting its third annual Tesla memorial conference Saturday January 10th 2015 it's an all-day event from 9:00 a.m. to 11 p.m. at The New Yorker Hotel The New Yorker is located at 480 1/8 Avenue in New York City the theme for this year's Tesla memorial conference is let's create the Tesla curriculum what information about Tesla do we think should be really being taught to young children and the Tesla Science Foundation trying to get information about Tesla into school curriculums essentially so that's gonna be the theme of the conference for this year bringing education regarding Tesla and what he tried to do for Humanity to young people which is which i think is an honorable effort so for more information on this conference coming up really in only a few days that's coming up next weekend next Saturday visit the Tesla Science Foundation's website at Tesla Science Foundation org there are still what on earth is happening promotional t-shirts available people are really seeming to love these t-shirts they're a great conversation starter it's a good you know promotional piece to promote the website and you know the work that I've shared on the website so if you want to receive a what on earth is happening promotional t-shirt as a gift in return for a voluntary donation to help support my work you can click on the left hand side of the what on earth is happening dot-com website it's the first item under latest news or if you just go to the news tab it will be the first article on the news section of the site and you can click the email link there to find out how to receive one there's also a donation button on the left hand side of my website what on earth is happening calm if you feel that you've received value from the information I've shared on the website and on this radio show please feel free to make a voluntary donation help support my work so that I can continue it into the future with that having been said let's jump into what may may or may not be the final in this series that I've been doing on order followers depending on how it goes this evening but what I want to talk about today is the psychology of the people who support order followers and I guess I'll jump in here and talk a little bit about how people are apologists for order followers and they want to excuse their behavior because they'll make the claim that order followers believe that they are doing quote-unquote good this is one of the biggest psychological mind states that exists out there in our culture that somehow order followers are inherently or overall in the aggregate sense good people it's just that they do things that are misguided because they believe that what they're doing is good and acceptable and I tend to just completely refute that whole argument in general I think a lot of these people really enjoy what they are doing I think they're totally broken individuals with just completely damaged souls who hate themselves and enjoy creating pain for other people that's what a secondary psychopath behaves like and you know people making just complete excuses for these people is part of the whole Stockholm Syndrome that this entire culture is under you know we want to just say oh they're just good people it's just a few of them you know spoil the bunch they're largely good and then there's one bad apple in the bunch you hear this argument continually over and over and over by people who are essentially what I would call Nazi apologists and I want to talk a little bit about my use of this word because you know I get people who are trying to tell me I shouldn't use the word Nazi I shouldn't talk about the Nazis well first of all nobody's gonna tell me what I will or will not talk about or should or should not talking about should or should not be talking about on my own radio show I'm gonna talk about what I want to talk about because I have freedom of speech and if you don't like it shut the radio off shut the internet page that you're listening to to it on off you don't have to listen to me okay you're certainly not going to influence anything I talk about here because I have a very specific set of things I want to talk about and I'm going to talk about them as I see fit and I'm gonna use the terminology that I see fit to use so go on your own show and talk about what you want and you know or don't talk about things that you don't want discussed well you know you do that when you have your own radio show so I'm quite frankly just tired of the the emails like it's like it's bad enough that I have to sift through the nonsense that I get in my email box because I do have to essentially you know look for things that I do need to respond to but you know just if you're gonna write to me and say moronic things like you know somehow the Nazis were just good people or that you know Hitler was a wonderful man and he was completely misunderstood because you watched some moronic documentary that is has its facts completely wrong and screwed up and you want to buy into some nonsense about how the Nazis were humanitarians well go ahead and believe all that nonsense you know and ignore actual facts and reality you know the and people want to say oh the term Nazi isn't a these Nazi apologist apologists for order followers want to say it's not a valid comparison what's going on in today's culture through order followers somehow isn't an equivalent of what the Nazis were doing in Nazi Germany or you have these other complete idiots out there that want to say just that a number is what they want to argue about how many people were murdered by the Nazis or how many Jews were killed by the Nazis I've said from day one who cares it doesn't make a difference whether the number is one or a hundred million does not make the slightest bit of difference the bottom line is you're talking about a culture that put authority on a pedestal and worshipped it as a god bottom line bottom line all based in total authoritarianism all based in collectivism all based in socialism and fascism and people can't see how these are the same forms of control with a different uniform on because they're brainwashed they're brainwashed by their culture they're brainwashed by their racism they're brainwashed by the things that they've been lied to about and then and then people want to say I don't know what I'm talking about when it comes to this dynamic I mean give me a break anybody that would support this sick regime or any other dictatorial totalitarian sick twisted psychopathic regime needs their head examined because there's something seriously broken inside their soul there's something wrong with people like that and they haven't read enough they haven't done enough study into real history that's why they don't understand what's going on now welcome back everyone you're listening - what on earth is happening I'm your host mark passio before the break I was talking about how most people are completely lack a long view of history don't really deeply understand collectivism authoritarianism totalitarianism and want to make somehow excuses or apologies because they have certain likes or preferences or dislikes that you know lead them to look at one group as a bad guy one group is a good guy Wow you know and they want to make excuses for things that the Nazis did or they want to say oh other regimes killed way more people than the Nazi Nazis like Stalin's you know Soviet regime of course absolutely no disagreement you know and people you know have a hard time with well why then do people focus so much on the Nazis because the Nazis came closer than anybody else to completely overtly ruling the world you might have heard of a little thing like World War 2 perhaps in your travels you may have heard of it you know so this is why they are considered the poster children for totalitarian authoritarianism you know they devastated practically the entire continent of Europe and what was it a manipulated war of course of course it was a nebula manipulated war by international banksters and the Nazi dog got off their chain of course they're manipulating both sides but you know this is a good segue into a concept that I want to really try to hammer home with people and get them to understand really listen to what I'm saying here folks because it's gonna it's gonna really carry over into future work then I'm gonna talk about on this show so really try to understand this it's absolutely vitally important in a dialectic manipulation that is being carried out by the highest levels of the control system let's say the people who are the mind controllers the dark occultists of this world the think tank institutions that really want a socially engineer the entire culture the whole world the social engineers the mind controllers of the world how whatever label or name you want to put to them in a dialectic manipulation that they are trying to carry out against the general population when they create the two sides when they create the divide and they pick one side against the other in their divide and conquer dialectic manipulation strategy only one of those sides needs to buy there propaganda and lies for that dialectic manipulation to work to go according to plan and to operate as the social engineers as the dark occultists wanted to operate and there can be no better example of that than

Nazi Germany that was fomented by the dark occult and I mean you know what like after I touch on some of the material that I'm gonna be talking about regarding the vast majority of women's support for statism authority you know the support of dominators through the relationships that many of them are involved in with order followers and dominators how mind control has been very specifically targeted at women in our society I'm gonna get into the devastation of real moral value through the destruction of the family dynamic I'm gonna be talking a lot about neo feminism I'm gonna be talking about about the new form or what I'm calling neo feminism as a eugenics operation the war between the sexes is all these topics are coming up you know how there's a complete lack of respect between men and women in our society the emasculation of the male in society putting women into a more dominating mindset what one in control this is these are all dialectical manipulation tactics now after I talk about that I think I'm going to do a series on the dark occult creation of the Nazi regime the how this religion came into being of Nazism and you know you we can get into how that brought communism into being because if you think that you know it's not essentially the same religion it's the same dark occult religionists priests class behind both of these dialectical approaches to totalitarianism and people still fail to see how they are essentially bringing about the same thing because they're so concerned about labels they think that somehow fascism and communism have different end results it's a name it's a label folks they both are totalitarian regimes based in collectivism where government is God the people become feudal serfs nobody owns property nobody has rights and the world goes into a huge prison society concentration camps regimented mindset unit uniforms you know it's it's there so dramatically different I mean people of a complete childish mindset cannot see the difference I mean cannot see that they are the same it still insists that they are somehow different from each other a childish mindset thinks this way because they've bought into the dialectic that somehow they're different it's all one thing folks I said it last week you want to know who's behind this it's the the cult of the dark Sun period I don't care what name you want to put on it the priest class of Saturn the dark occultists that the mind manipulators the social engineers this is a dark solar cult that is running the entire show and people still don't want to understand that they've been behind all of these totalitarian regimes they've brought them into manifestation they fomented them so maybe I'll do a series on that I think I really should and cover a lot of the connections because then you'll see the crossover of the connections between different social engineers and behaviorists and how a lot of these dark occultists brought some of the organizations that eventually paved way to the NSDAP the National Socialist German Workers Party in Germany that was the Nazi Party and people still don't think that these people are alive and well here in the United States I said it again in the last few weeks the Nazis in the communist shook hands behind the scenes they said we can't really defeat America militarily so we have to break them down morally we have to go in their institutions and we have to work through cultural deterioration and they have done a masterful job a masterful job it is a grand chess strategy that they have played off against the people of this country and really of the whole world and so few people can see how they've done it especially regarding the war between the sexes it's a difficult thing for people to even see because they're so ensnared and entrenched in the roles the whole ego identification the gender roles that they're in that were created for them created for them and once again I'm not saying that there isn't such a thing as a real man real masculinity real a real woman real femininity and there's nothing wrong with either of those dynamics what they have done is created the artificial man the artificial woman the artificial being that is when to the state that is when to the concept of authority that is when to collectivism and they're not operating as a genuine being at all in any sense of the word on the other side I'm going to go back into the psychology of order followers and the people who continue to support them these people with Stockholm Syndrome you're listening to what on earth is happening we'll be right back [Music] [Music] welcome back everyone you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening calm before the break I was talking about a very important concept that only one side of a dialectic manipulation that is set forward by the mind controllers of this world by the social engineers only one side of that dialectical divide needs to buy the propaganda and the lies in order for the dialectic to work in order for that dialectical manipulation to work and I'll just give a couple of examples world war ii is a perfect example okay you can look into the manipulation of both sides you know how that was funded by the same people same international bankers just look at the look at Chamberlain's policy of appeasement to Hitler in the Nazis regarding Czechoslovakia and how he just basically did nothing while they rolled into another area of Europe they clearly were being given orders to allow this to happen and build up but my point here is is if you have one group of people buying into the total authoritarianism is as all just a big manipulation while tanks are rolling into their country oh we understand they're just mind controlled and you know they all bought the dialectic on this side so what are you supposed to do throw your hands up in the air and say well we all understand it's a big manipulation game now while you're being steamrolled you know this is a perfect mirror of a modern example we are living today with a standing army amongst us something that the founders of this country continuously warned us not to allow to happen but no we don't want to think that they knew anything you know that these weren't intelligent people you know that we should have listened to their advice you know and now we have a standing army in the form of police living amongst us in every city in the United States they constitute a standing army whether anybody understands that or not is irrelevant and most people don't understand that that's what modern militarized police constitute they constitute a standing army living among the population which is the one thing that almost every founding father of this nation said do not ever allow that to occur in your midst and that's exactly what we allowed to occur you know people are so all the status out there all the arguers for the state are so worried about what happens if we get in an anarchic 'el environment what happens if we get attacked by a standing army outside of our borders well hey a news flash there's a standing army inside your borders right now how about worrying about that situation how about we we take on that situation first so hey the dialectic has already worked on one side the police have bought that the people are their enemy they've been trained that way for decades and decades bought into the order following is a virtue and and their cult culture their cult culture the the people who are part of the police forces and their family members are members of a cult culture they're themselves that the order followers themselves are a member of a cult and then the surrounding culture that surrounds that cult all the people who support them for whatever reasons they support them for they believe they're doing the right thing they want the secure they want to receive the security or the protection that they're going to somehow receive what by giving up all your rights and letting people run roughshod over your natural rights as a human being now all of these order followers supporters want to abdicate their personal responsibility to defend themselves you know you'll hear this from min arcus and other forms of status well what are people supposed to do be constantly on guard regarding their freedom and constantly having to defend themselves yes that's exactly what people need to do it's been said time and time again eternal vigilance is the price of freedom I would say you need to be on your guard to be able to defend your rights at all times in places otherwise they're meaningless and essentially you don't have any and that's the truth that no one wants to hear because they want to think that it's somehow not a completely horrific idea and a flawed fundamental axiom to say I want to give my right to defend myself over to somebody else and they're the people who are appointed to do it you know what again maybe in the ancient past when there were no you know projectile weapons that could be fired from a human hand were men essentially in the position where they had to take on that role because they were the traditional protectors of the family unit especially when it came to females because let's face it men are the physically stronger of the two sexes just by muscle mass and muscle strength and body frame alone once the era of Technology came in and projectile weapons were invented every it's everyone's individual responsibility to defend themselves and defend their rights you know III went to see the third Hobbit film and I thought that this was actually very beautifully portrayed in it and you saw the coward who didn't want to fight and pick up a weapon and wanted to hide amongst the women and children who were initially sequestered off against you know away from the fight against the orcs in the film yeah you know and whatever wrong have there'll be minor spoilers it's a great film if you want to go and see it I think it's a the whole Lord of the Rings movies in general all the Tolkien movies are brilliant spiritual allegories but you know minor spoilers as the this war goes on and it's becoming worse the women actually come out the real women say we want to stand and fight with our men and they take up weapons and go and join the battle and you see some you know this cowardly man one of the characters in it you know still wants to hide and you know not not fight alongside everybody else it's a good allegory about bravery and what real men and women do when their rights are under attack when their bodies are under attack they're not milquetoast they don't lay down the domination they're they don't have Stockholm Syndrome and make excuses for their oppressors they stand and fight you know and nobody wants to talk about the validity of standing physically against an oppressor you know the Nazis weren't going to be reasoned out of their stance folks you know III like the scene in the movie inglorious basterds which i think is a phenomenal allegorical spiritual film that people really should watch you know that film is really about the mindset of the Nazi and how it should be dealt with and you know if once again if people don't understand this is who were ultimately dealing with you have you have no conceptualization of history you don't understand what happened post-world War two people think we defeated the Nazis we defeated no such entity we defeated the German Vermont the Nazis didn't even surrender to the Allies they in in the in the treaties of surrender there were no people present from the Nazi Party the German military surrendered to the Allies so you know then what happened afterward is the central the intelligence agencies from not only Britain but America as well competed with the Soviets for how would we divvy up the Nazi scientists and we brought all of these scientists doctors engineers and most importantly psychologists over to the United States with the help of British intelligence with the help of our own OSS the Office of Strategic Services at the time which subsequently became the CIA and absolutely most influential II through the Vatican that brought all of these Nazis in the tens of thousands into the United States and they settled largely on the east coast of the United States in New York and New Jersey which is why they're some of the most Nazi totalitarian states in the United States at the current time we'll pick up this exploration of the psychology of order followers and the dialectical manipulation on the other side of this break you're listening to what on earth is happening stay with us [Music] welcome back everyone is happening here on our begin I'm your host mark passio my website what on earth is happening dot-com we're continuing our series on order followers this evening and I was talking about how people in this country really have Stockholm Syndrome and are apologists for these order followers and don't want to call it like it really is and the way that it really is is that a minimum of a thousand people are being murdered by these people every year American citizens in this country being killed by police and people still think that this is somehow acceptable and not a sign that what they are trying to do is condition the people that police have absolutely free reign and do what they want and that their orders must be obeyed and people still put this form of totalitarian authoritarianism on a pedestal and think that you know any or if this order follower calling themselves a cop in this costume is commanding another individual then their word is the lawn you have to do what they say I mean it's just it's it's such slave think it's pathetic it's pathetic slave think and once again the dynamic I was talking about before is only one side of a dialectical manipulation needs to buy the lie for the dialectic manipulation to work successfully and the social engineers the mind controllers the dark occultists understand this dynamic perfectly well and are using it to great advantage in all of their workings in society I was saying about world war two being a dialectic well if people woke up and recognized well the bankers are funding both sides and they're you know appeasing Hitler this territory to make him you know blow up into a huge threat so that then you know other people have to come in and take him out what are we supposed to do just let him take over the world let his troops run roughshod all over the entire world of course then the dialectic is going to work and people are going to have to come in and say whether there's a dialectic going on of dialectic manipulation going on here or not we need to do something about this and that's what had to happen same thing with the police today what are we supposed to do as modern Nazis are advancing on us and taking our rights and constitute a standing army amongst this country what are we supposed to say oh they're just manipulated you know we don't need to take any action or do anything about this situation oh just stand back and observe and watch and just say Oh aren't they isn't it sad that they're so mind-controlled they're going to push the dialectic until there is a blowback and it's gonna be like a bomb going off folks I mean if you don't understand that you know we're well on our way to civil war in this country you're not paying attention at all at all and they're probably gonna get that and again that's what I've said from day one what I'm doing all this work to try to avert and avoid but unless people wake up to the dialectic on both sides it's going to work both sides have to be woken up to it not just the side the we are on as truth seekers and truth tellers the people who the mind control is currently working on would have to wake up as well and there's no indication of that happening no indication of it happening at all it would be happening that people say what would be your criterion my criterion I'm I've said it over and over again when so few people want to become cops or soldiers that what we consider the mainstream media today would have to go on the airwaves and say we cannot find people to fill these institutions the institutions themselves are crumbling because no one wants to do these jobs that's when I'll say there's an awakening happening in humanity and not a minute until so you want to think about how far away from that we are that's the criteria for a real global awakening right there and it we're not even remotely close to it folks hate to burst your bubble but I'm not here to be like some of these other people who say the white hats are all here to rescue us and the and ramen UNS have our back to you know weather getting ready to make the mass arrests any minute now i mean please these social engineers are firmly in control because they have people's minds there's no indication that that's changing on a global scale all they need to do is keep pushing the dialectic on one side on the people whose minds they already firmly have until they're out of the mind control the dialectic will work because water what do you think the American public is going to do as this gets worse and worse you think they're just gonna keep standing back and taking it at some point it's gonna blow up and I understand that's what they want so that they could quote-unquote declare martial law but guess what that'll blow up itself and people aren't going to just sit back and take that the you sit back and do nothing these people take everything it doesn't make a difference whether you know they're being manipulated actions going to be required to either get them out of that mental manipulation or failing that to physically deal with them and no one wants to hear that because both of those things are extremely hard things to do are going to be extremely hard things to do the best-case scenario would be people join the great work and actually get these people out of the mind control that they're under but that's extraordinarily hard work that involves people dealing with the truth and dealing with personal introspection which most people don't want any part of because they're children they're emotional psychological and mental children just let's look at the psychology of an order follower for a few moments what where does this desire to even become an order follower come from they want approval they want to be told oh you're good it's virtuous what you're doing you're listening to what the state commands of you because we say it's good and so what they do is abdicate their personal responsibility to judge and discern the difference between right and wrong behavior for themselves and they make the claim that they can give that up to someone else that can tell them what to do and then they could just perform the action without actually judging it in their own mind according to spiritual law according to natural law whether it is actually a behavior that they have a right to take or not now they don't want to do that judgment they don't want to do that discernment what kind of people don't want to judge and discern for themselves and want to let other people make their decisions for them insecure people childish people children that's a hallmark of somebody who is a child and wants to remain a child who doesn't want to grow up they believe they want to believe they're doing good the semblance of good and they have this need for approval because of their own self-loathing they want the new mommy and daddy see and this all stems from parental abandonment issues folks this goes back to my cosmic abandonment series this is about actual you know human parental abandonment issues because their parents failed instilling true morality in them and in many cases filled them in many other ways whether it be in you know physical absence or not emotionally let them down spiritually let them down didn't instill morals in them largely because of the breakdown of the family dynamic which again as a result of this deliberately created war between men and women that is raging in our society so they're going to go to the new mommy and daddy the state for their approval because they didn't get it from the real mommy and daddy you see how this dynamic works to keep these people eternal children will pick this up on the other side folks you're listening to what on earth is happening we'll be right back [Music] welcome back everyone they're listening to what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm I was talking about parental abandonment issues with in order followers they have this incessant need for approval from others you know because they didn't get enough approval from their real mother and father or their real mother and father were absent or let them down in certain ways whether it even be emotionally or spiritually they certainly didn't raise them with real moral values because there is no such thing as the moral value of thinking that following somebody else's orders is a moral virtue because it can never be such so many people in America buy into this religion this nonsense religion that following somebody else's orders obedience is a virtue I mean give me a break it's the exact antithesis of that it's the diametrically opposed polar opposite of virtue or morality because conscience is the definitive the definitive difference between right and wrong behavior and exercising conscience which is the hallmark of a moral being means you are going to act upon that knowledge and choose willfully the right action over the wrong action once you know the difference following orders is the exact opposite of that it's saying I don't care about knowledge I don't care what the difference between right and wrong is they're telling me to do it they're offering me this to do it and I'm gonna do it the exact opposite of virtue completely logically proven right there what about the supporters of order followers how about their a parental abandonment issues you know as people engaged in this Stockholm Syndrome dynamic they believe that they're going to receive security or protection in this so-called exchange you know of will do what the order follower says and will get protection you don't think that comes from parental abandonment issues they're substituting the feeling that they never got from mommy and daddy security or protection and handing that off to the state people never think about how this dynamic works when it comes to the underlying thing that's going on here in society folks is parental abandonment and then you tack cosmic abandonment onto that the cosmic form of parental abandonment and you have the absolute perfect degradation of a species which is what humanity is undergoing right now the parental abandonment issues of this dynamic cannot be overemphasized and you think about then why that is what's creating the destruction of the family dynamic what's creating the the destruction of the ability of man and woman to get along with each other what's creating total hatred between the sexes and many people will insist and insist it's just the nature of people it's human nature and again as soon as I hear that term I know you don't know what you're talking about immediately I know you don't know what you're talking about you might be able to see the symptom you may be able to see the symptom you may even be able to have an accurate analysis of the symptom but you do not understand cause factors and anybody they wants to just chalk any of this up to just human nature has absolutely no clue what they're talking about because they're completely ignoring social engineering they're completely ignoring mind control they're completely ignoring the stated agendas of think-tanks worldwide they want to put eugenics operations into effect in the world they want to take over society with collectivism and totalitarian belief systems and they're doing this through the destruction of morality and they're doing that through the destruction of the family dynamic and this is a joint operation this is not only a collectivist totalitarian based up but it's also a eugenics up when you understand how it works together you you'll realize it keeps the population manageable and birth rates in this country are down and that's another thing I'm gonna get into two point one percent birthrate needed to maintain a steady population the current estimates are word of 1.85 and dropping but nobody talks about that because we're packed like sardines and overcrowded cities and then people want to say the world is overpopulated the carrying capacity of this world is a minimum of minimum of ten to twenty times what we have on it maybe more not with the current way that we are using technology however with the current way that we are quote feeding populations or growing food or you know living in unsustainable cities using unsustainable energy supplies when clearly much more advanced technologies exist that are willfully deliberately held back the supporters of order followers are also advocating their personal responsibility just like the order followers are the order followers are advocating their personal responsibility to the mother and father figure you know government to that because they don't want to own the responsibility to judge and discern the difference between right and wrong for themselves their supporters are abdicating their personal responsibility to defend themselves their rights and their property they want to leave that to someone else so for all the men are kists out there who say government is set up as some form of a protectorate you know it's there's there's that word security and protection you can never give that away to someone else cannot be given away it's yours whether you like it or not and there they would say well what are people supposed to do constantly be on guard against you know the bad guy who may come at any moment yes correct which is why I advocate for the arming of everyone everyone should be armed you'd have a lot more polite of a society the more armed the population is you know and then all of these people who want to support the state and who think that we need order followers in the form of standing armies once again you already have them among you people are more worried about standing armies coming in and attacking from the outside well if everybody was armed you wouldn't have to worry about that the militia would take care of that again the other thing the only entity that the founders of this country said was necessary for the preservation of freedom said do not allow a standing army if you did need to raise a standing army for some reason like a very well-organized attack on your borders you would do that from the militia you would organize that from the militia it would be able to be organized quickly and organically and when the threat would be dealt with then you would put standing army standing armies were never meant to be kept in this country and people will sell that was in those times not in modern times the founders would never have changed their position on that because they recognized the danger of a standing army and we're in it we're living it folks the example is all around you we'll be back [Applause] [Music] [Applause] the cool science but we don't dare speak [Applause] it's a while between us it'll rip so [Music] there's nothing it's cold aside welcome back everyone you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening calm when are people going to wake up and understand that there is no such thing as giving up your personal responsibility to someone else to either discern the difference between right and wrong behavior or to defend yourself when someone who doesn't care about the difference between right and wrong behavior decides that they are going to violate your rights and freedom that responsibility always belongs to you and you alone and again it's the Sacred Feminine and the sacred masculine combined the personal responsibility to judge and discern the difference between right and wrong behavior is the Sacred Feminine dynamic of the non-aggression principle of coming to an understanding a deep knowledge of the non-aggression principle which I call the Sacred Feminine principle and owning the personal responsibility to be responsible for your own protection your own self-defense is the sacred masculine dynamic but this is what people have been divided you know and ruled as a result of not understanding you have certain people the order followers on one side of the dynamic on one side of the dialectic they want to advocate that responsibility to adjourn to discern and judge for themselves and then you have the people on the other side of the dialectic the supporters of order followers the supporters of authority and you know believers that somehow order following is some sort of a virtue they want to abdicate that personal responsibility to defend themselves in their rights and I would make the claim that deep down inside this comes from deep-seated psychological parental abandonment issues being experienced by people on both sides of that dynamic clearly the order followers are seeking approval that was lacking in their parental quote upbringing and I wrap it in quotes because they weren't raised they weren't brought up they're still morally dead and all the people on the other side of the equation are acting as little children who want to be protected who want to be you know have the strong father figure big daddy government take care of them keep them safe when it isn't anybody else's responsibility but themselves to keep themselves safe people don't like to be told that they're on their own and when they screw up a situation they created it and they're gonna have to deal with it no one is coming to rescue us folks there are no white hats out there you are the person who is going to have to do something nobody's stepping in and going to pick us up by our bootstraps and be responsible for us it it is not going to happen that way get over it so yeah that's that's how you know I'm one of these people that's just trying to somehow exploit other people's confidence you know that's all a lot of these other so-called researchers want to do they want to build a big audience by telling people what they want to hear instead of telling the harsh cold reality the harsh cold truth and the harsh cold truth is more people want the dynamic of the world the way it is then want it to change because if more people wanted it to change it would change we are not at that tipping point we are not at that point of change not yet not even close to it and that's what I'm trying to get people to clearly see what our work is to do the great work is so far beyond where at most anybody conceives of it it's so much more difficult vastly difficult than anybody even has a conceptualization of hardly any one people are stuck in this new age crap dynamic of it only takes a little bit of people to create a mass change wrong wrong incorrect it's a lie it's all about numbers it's 100% about numbers folks that's why it's called a tipping point in a chemical reaction you would need to add a certain amount that's why it's called a quantum shift the word quantum in Latin means an amount you want that balance to tip the other way well then a certain amount of force is going to be required and that means a certain amount of people are gonna have to change how they think and I would say the minimum you're ever going to get that done with is half and if anybody thinks were anywhere close of fifty percent of the people of this world being fully enlightened you really have psychological issues because if you could look out at the world and say half the people are enlightened I mean there's something seriously wrong with your perception I don't know what planet you're living on but it certainly isn't Earth in the Year 2015 I want to talk a little bit more about this whole belief of doing good see everybody is hung up on intention and think that this is another New Age lie the intention is what matters wrong incorrect the action is what matters the effect that you had through your actions that's what matters intention is largely meaningless it's a nice thing see this is a great lie to tell the people who are hung up on emotion they're hung up on how something makes them feel the same kind of idiots that won't listen to what I'm saying or even consider it or even watch a long video that I've put out because you don't like the sound of my voice you don't like the tambaran my voice oh what where's where's your crying towel how old are you that's my that's my answer to people like that how old are you are you an adult you know clearly you may be an adult in physical age but you're a child emotionally and mentally again probably stemming from parental abandonment issues and once again hey I have these issues too I talked about them openly on the air there's a difference between having something and dealing with it confronting it because you recognized it and you recognized it as something that was making you something less than you could be holding you back that's what I had to recognize my parental abandonment issues as and then confront them deal with them and say now how am I gonna move on with my life and what am I gonna do with my time and my life how am I going to make an impact now most people are content to sit on the sidelines and pick apart other people's work but they have nothing to show for themselves you know constantly I put people's names that I get emails nitpicking emails or or confrontational emails and you know where their work is in the toilet bowl non-existent a big goose egg because they're cowards cowards they wouldn't they wouldn't dare put their name on something they're fearful little boys and girls who are total cowards now let me tell you something folks I definitively know who I'm up against and what they're capable of and I've said it many times on this show you wouldn't stop me with a bullet because I'll be right back here because I know that until all are out none are out so I'm here for the long haul so it all comes down to people not wanting to grow up they want to remain in that childlike infantile mindset that says someone else is going to handle that for you well newsflash for you folks were the only ones here nobody's coming to step in to handle our mess for us we'll pick this up on the other side stay with us [Music] [Music] [Applause] [Music] [Applause] [Music] welcome back everyone you're listening - what on earth is happening here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm before the break I was talking about how there's no one else here who's going to help us out of this situation folks I mean if you believe that I think you're extraordinarily naive other intelligences other species while they may exist out there in the universe are not going to want to do our work for us then they'd be responsible for us like a parent would be responsible for a child and we're already someone else's bastard child that has been left at the doorstep of the universe they're not all that anxious to come and pick up that basket and take care of what's inside of it for the rest of eternity they may support us in our efforts to heal ourselves but you know you you have to give encouragement to an adolescent that's trying to become a responsible adult but you know we're the adolescent who is saying we don't want no part of adulthood you know we want to remain eternal children well how do you think other beings in the universe are gonna respond to that well you could stay in your prison there until you get the message of how you need to behave and anybody that thinks that all of these beings they're somehow racing here tripping over each other to get to us I mean it's wishful thinking and the people who propagate that message all they want is listeners they want to blow smoke up other people's rear end to get listeners because people love being told what they want to hear and that's all that dynamic comes down to like I said if I wanted to increase my listenership I'd get on the air here and I'd start saying hey the Arcturians they have our back man there they're coming there hey we have word from channeled sources that you know the craft are on their way and they're all going to come here they're gonna take all the good people away from all this suffering and all this chaos you know I could increase my listenership tenfold by telling people what they want to hear that's how people have gained massive audiences that don't have one drop of information that's even worth looking at know that they won't talk about natural law forget about an analysis of what actual morality is you know break down different actual occult ideologies philosophies symbols help people to understand how they're really being manipulated no it's just all good vibes you know that's all it's all just making people feel good well you won't come to this radio show or to my website to feel good ladies and gentlemen it's about learning it's about knowledge it's about right action it's about getting out of your ego identified mind controlled state and they're all the different religions that hold you back whether they're cultural religion whether it's the religion of authority the religion of money the religion of scientism the religion of the New Age movement all things that just totally hold us back from our real potential as a species you know people have to understand until we decide that we're gonna get past whatever the abandonment issues that were that had gone on you know this is a big dynamic in both men and women and start to develop real self-respect we can't get along with ourselves let alone with each other let alone with anybody else outside of ourselves that is internal work internal work that needs to be done and hardly anybody wants to do that work they want to pass on the buck they want to pass the responsibility to somebody else and they keep wanting to make excuses and then get all objectionable about me bringing up an example of the Nazis as what these people emulate and what they have become I mean if you can't look at the historical parallels of what the Nazis did and what American troops and police soldiers and police are doing in modern times you're blind there is nothing else that can be said about it except you can't see the two plus two equals four it's pure blindness through wanting to believe what you want to believe and not looking at the facts I mean the historical examples abound from how they completely infiltrated the culture of their society through how they work through these think tanks and these dark occult organizations how they took people's rights how they took people's weapons the confiscation that they want to try to put through in the United States the constant infringement on on gun rights and gun gun laws constant infringement by making gun laws which is expressly prohibited by what was supposed to be a limiter on government in the form of the Constitution we refused to heed the profound wisdom of the founders of this country we didn't want to take on our personal responsibilities of self-defense through the militia which means military strength present everywhere is what the word the actual term that militia comes from in Latin means militiaman gharam means full military strength present everywhere which the founders repeatedly said is it is constituted by the people themselves it's not an agency of government the people make up the militia when they were asked they repeatedly gave the same answer to that question and clearly stated it in their writings and they said it was the only thing that was necessary for the preservation of freedom the state of freedom to be preserved and people completely ignore that which is why I need to do more on the Second Amendment as well again not that I'm a constitutionalist or a men are kissed or believer in reply in representative government because I'm not I'm a complete anarchist but the Second Amendment is something that people really can learn from because you could break down every word in that sentence and deeply understand profound principles that the founders understood that they tried to communicate us to keep us free or will allow us any modicum of freedom but what do the people of this nation say there's no wisdom and that we don't need to pay attention to that that was 230 240 years ago where we need to listen to that for ya cuz look where you're at in a jail cell with a standing army living amongst you in every city and again this is all because of the complete breakdown of morality brought about through the cultural march through the institutions of both communism and Nazism religions religions of the state that once again made a deal behind the scenes and said we're gonna have to take this this particular nation down that was too strong for us to take down militarily we're gonna have to take it down culturally and again the main thing that they are doing this through in the modern day is the eugenics operation of the total war that they're fomenting between the sexes which is going to be topics of many future shows the mind control that they specific tags specifically crafted to target toward women in our society because both of these religions of totalitarianism the Nazis and the Communists understood deeply that you have to take the minds of women first before you can get the whole culture because they are acting or were past tense I should state acting as the nurturers and the in stores of morals into the youth and so once you have their minds you have all the men's minds as well we'll be breaking that down in explicit detail in upcoming editions of this radio show your calls coming up in the third hour ladies and gentlemen stay with us - what on earth is happening here on the public broadcasting I'm your host mark passio my website what on earth is happening calm let's go to the phone lines in this hour the toll-free number to join us here on what on earth is happening 800 3 1 3 9 4 4 3 let's hear from Rahul in Washington Raul you're live on what on earth is happening welcome to the show hello Mike a great show today I have a question in a comment I wanted to put forward and before I get to the question in comment actually you know you mentioned on your show many times it's a comedy show and for someone who knows what's going on it really is like comedy gold like I find myself laughing even though it's really serious no I mean but my question is um have you read The Wheel of Time series I have not who's the author the author is a man named Robert Jordan okay and it's kind of like a cult classic and free for someone like yourself I would highly recommend checking it out because it's like a spiritual allegory and the author Robert Jordans was a freemason so so the book is it's just completely filled with symbolism and I don't really don't want to give away too much so I'm just gonna let you check that out on your own but but just from your background I think it's something that you would just just really really love and really get into yes I'm kind of what you've just described there briefly almost reminds me of terry goodkind's Sword of Truth series which was a very profound works of spiritual allegory that I felt dealt with some themes that are in Freemasonry as well um so for the comment that I wanted to I wanted to just make this comment and then just basically go off the air and let you kind of elaborate on air but the so this is very highly related to the topic that you're discussing now and plan on discussing in future shows something that I've found in our culture is that male energy the males are emasculated and then male energy is is a only acceptable for expression under very specific parameters so so like sports um is a big one and then police and military obviously and then also archetypal jobs such as a construction worker doctor lawyer businessman etc and male energy it simply represents decisive action so that energy is always going to be there like any any human being is always going to have the energy within them so if they weren't excuse me if they weren't misdirecting that energy it would naturally dismantle the control system like on its own and football specifically is carried out inside of a gladiatorial arena and it's like a simulated war ritual and the scrimmage line it's like a clash between two armies and you know I don't I don't even watch football anymore but I was in the cannabis market the other day and I heard on their television just the roar of the crowd I live in Seattle and you know CLO Seahawks won Super Bowl last year and it's a really big thing and I haven't watched a single second of football all year because I don't see the value anymore like I see it for what it is but I heard that roar of that crowd and I sent chills up my spine because it like I remember you know all those scenes in the gladiator movie and it's it's almost exactly the same and that energy it's like they're siphoning that energy and they're letting people express it you know in a harmless way in a way that's not going to damage the control systems completely rattled and deflected away from them so I'm just that's all I had and I just wanted to kind of hear your thoughts on that absolutely I think you've made great points there Raul the masculine energy is continuously suppressed and channeled in completely futile directions they don't want any real men in society that's the the entire problem with society right now is that there's actually too much false masculine energy and too little real masculine energy true masculine energy which would stand up against injustice which would stand up against anybody trying to take away our rights and would and take a defensive posture against incursions like that you know this is the reason that the quote again I'm always going to refer to this or I'm going to endeavour always to refer to this dynamic as the neo feminism movement it isn't classical feminism they are creating a war on men essentially through their religion through this religion that I'm going to tag as neo feminism and part of this is the emasculation of the modern male and the subsequent masculine masculine of the modern female but not in the sense of true masculine energy of Dominator masculine energy of wanting to control okay and you see this happening in society and the reason that this is done is you have to look at I'll probably make some slides regarding this or a chart to illustrate it visually you have to imagine real masculine energy on one side real feminine energy on the other side and what they want is to blur the lines between them to bring everybody away from those genuine things and have it all be sort of a competing mixture okay where there's no real men and there's no real women and everybody is a silhouette or a husk that isn't really acting in the capacity of a genuine being there the literal non genuine false being you know the they don't want real men and real women in society real men and real women are not going to be able to be manipulated and well I'll give further elaboration on what I consider a real man and a real woman to be as I explore this topic in the future and I will assert explain what I consider the artificial man and the artificial woman to be or the manipulated man or the manipulated woman and that's who that's what comprises most of human society today the artificial manipulated man and woman that bears no resemblance to the real item to the real thing they can't even conceptualize how this was done to them they were made into beings into creatures by people and think tanks and groups that they never met never heard of and they were turned into golems by these people that are operating on rote response like a stimulus response organism instead of an actual thinking human being and this was done through social engineering and once again I can't emphasize enough folks when I make some of the generalizations that I will make come when I approach this topic I know people are going to call me misogynist they're gonna say oh how dare you say these things you know what I'm trying to do is tell people the cold hard truth about how a dialectic manipulation only needs to be bought by one side for it to work stay with us everyone more of your calls coming up [Music] welcome back everyone you're listening to what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm we're taking your calls this our final hour of the show for tonight's broadcast call the call in number 831 394 43 I want to thank Rahul for his call and great points that he brought up let's hear from said Danny I hope I'm pronouncing that right in

Connecticut welcome to the show doing well then I got the pronunciation of your name right with a little piece I didn't get to finish on last week in Thailand just what you're talking about now the UFO issue sure thank you and so you're getting cut off there is mentioning your time constraints mentioning about you know there's a third option we were talking about the UFO a little bit that there's military very possibly you know obviously there's a ton of documentation and understanding to what our militaries have you know the high quadrants of that was north of ramen Lockheed Martin and the military-industrial complex these around the world and what they're doing with technologies but you know where they begin and where it what their involvement in the whole apparatus is they from the phenomenon of inductions my true line here to connect it back is when we look into the Nazis and what the Nazis were really about focusing say more away from you know a figurehead and charismatic people like Hitler and rather over the multitude a manifold abundant works of going through Himmler's worked what he was really interested in going around in the real life Indiana Jones and hijacking everything that was ranging culture what what about some of the secret technologies that a Nazi that's very rarely ever brought up historically Hans Kammler was involved with you know then you get into the the whole concept of the Nazi bell and you know the antigravity work that they were doing I'm sure they already had very well developed anti-gravity --ks you know and you know people don't even know about all this work that they were doing with free energy technologies many tree lines there as soon as we touched the order of the Bell then you go back into the deeper elements as you've mentioned and so many great researchers talk about with the Thule Society and what it relates to back in ancient decide and you can take that work into those things understand the connections that say the actual clarified bush line the bushes who are actually clearly at the Roosevelts but Prescott Bush himself as sure right the home with Nikola Tesla and the entire work that Nikola Tesla's work was being exploited by sure into the German circles I mean there's an abundance no question Tesla was in bed with a den of vipers you know he woke up to it I believe a little bit later on but it was already too late he had accepted funding from you know these international banksters and you know then they crushed his work once they realized that he had a different intention that they did I don't know if you're familiar with the work of Eric Berman who is dating a daughter of a he was dating a lady who was the daughter of and who towards his death in 1999 exposed himself as Otto Skorzeny who is Hitler's bodyguard and he's the one who provides as much of this first-hand testimony concerning himself and george herbert sharp as he would properly be named her fault in the in prescott bush and how they killed tesla and soldiers work out there not only edison GE but tons of other major corpse or military application that produces wonderfully staggering fireworks of delight in the military that we now have also connected there to everything you were saying before you know it's it's just we could scarcely even imagine how far ahead this quote breakaway civilization through the dark a call i mean you could get involved in the whole lines of research with you know von braun and and coming over as part of paperclip and then the formulation of nasa and then all the different occultists that were involved in that group you know and only then you look into the connections with the NRO the National Reconnaissance Office which I talked about in my demystifying the occult seminar in Connecticut you know and you look at how they're clearly dark occultus all of their symbolism is just right is so out in the open it's practically insulting you know I meant I mentioned it was you can wonder you know it's netiquette is that your seminar there we talked to Roman territory with being a problem basically Luciferian family and tons of background of my own and I've got a expensive Kabbalistic Hebrew background I was sharing with you when you're talking about the integral will one of their patches is probably about the smile reference right and and of course you know these people are there and we can keep looking at things you know monetary things like looking at Martin Bormann existing in Argentina perfectly know putting Deutsche Bank down roots down in 1950 kicking back millions of dollars to Morgan all these but you know and that's just one of the guys that we were able to trace and track and eventually find his where bouts you know you look at somebody like calm ler Hans Kammler was never even discovered we don't know what became one of the highest ranking technological officers within the the Third Reich and absolutely quote disappeared yeah because he's an upper tier and they're gonna provide two one that's a great point because if you're familiar with Joseph dr. Joseph p4 Ellsworth when he talks about Operation Paperclip we know it's not even people who research it come on to the notion that it's handfuls of scientists with Joseph P Ferrell has wonderfully elucidated in his research you're talking of he said minimum ten thousand more like twenty thousand of the upper tiers of the Nazis or whenever they were integrated into anything because influence in mind and professorships to bankers to indicators doctors lawyers and you know Indian Al proverbially and it's direct result of them being brought over here resulted in MK the MKULTRA mind control projects of the 1950s and 60s and all going when we true and also going back before that we understood dr. Josef Mengele was doing all the prelude work to MK or anything before that it really started in nine days in the early nineteen hundred's eyes shifted out there when they didn't feel it was gonna go so well with some of the formative stages then they brought it back which is why when you know that dressing up and they had the one piece of technology that was lacking during the Third Reich after the war you know what that was the television yet it really ramped up into high gear from that point forward and they also were you know experimenting into all the drugs which is how I'm killed still were to create the altars and this is your compartmentalization to the earth what your friend our friend Jamie know we listen to Jay Parker talks about where you cultivate from the 1880s and 90s when these bankers are coming over here this german infrastructure into where you're taking over the minds of people you're taking over their finance you're creating the infrastructure in which this cult of that pom can can have its play through all the drugs and I mean we watched some of the drugs that Mengele burst and they come over and they jump out mean opiates advise has been around forever but street drugs lotin jazz culture with the beat because the Nazis are now flooding over here and you're gonna entertain the populace if this kind of Soma you know so that you now you've got TV you've got the beginnings and heroes and nanos so there's all the things that are gonna make TV even more access it's what we've got a population that's off for mine that well is it Danny thanks so much for the call brilliant points you brought up we got to go to break ladies and gentlemen you're listening to what on earth is happening stay with us we'll be right back

[Music] [Music] you know today this toys a nice 95 today tried to run try to hide welcome back everyone you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening calm we're taking your calls till the end of the show let's hear from Nathan in Arkansas Nathan you're live on what on earth is happening welcome hey Mark how you doing hear me yes okay introduction I had a couple messages for the listeners tonight sure first of all I was happy to hear you talking about world war two because I've come across some hidden knowledge about world war two in in case people don't realize this they're not telling you everything and in school education and there's a whole lot more manipulation and history behind what World War two than what you know and it's all in books it's all there it's just not in textbooks another thing is I wanted to share a story I started listening to you know probably six months ago and you really opened my eyes because it's just helpful whenever somebody is take speaking the truth and taking it all the way nobody needs to want to do that well they're afraid of what other people might think of them I you know maintain the position that I really don't care what anybody thinks about me I'm not here to be anybody's friend or to be liked I'm here to tell people the truth period right and I come to that same position myself because once you see what's going on you realize that there's no point in being attached to anything in this life because right it you it can all be taken away from you at tonight that is a profound point right there that I am going to very much explore on future shows especially when I talk about some of the mental manipulation that has been targeted against women in our society that is a profound point another thing once I started listening to your show I realized that I had to become in balls so I found a group that that's kind of like a debate club it's called Socrates cafe they do them all over the country you can find them on on meetup but if you basically vote on a question to talk about for two hours and I just go in there and I start talking about the truth and I figured figured I would get a pretty positive response because the people who you would think would show up to this thing would be you know more intelligent people who at least care enough about about issues like that to talk about them but after speaking to the same group for six months it's almost like they haven't learned anything and they're completely in the opposite direction of of where they should be like they are arguing for their own enslavement and they're arguing about what what's the best way to do eugenics and you can't even get them to admit that something as simple as taxation it's stealing you can't even get them to admit that that they're slaves you know religion is a powerful thing and the religion of authority is the second most powerful religion on this planet yeah the amount of cognitive dissonance there is just absurd and it's reading about nineteen eighty four right now and it's a book they call it double sink where you're able to magically do the mental gymnastics and everything and I'm at the point where he reads gold books gold Birds book I mean the character makes a comment that all that Goldberg is doing is telling you kind of what you already know it's just that nobody has ever called you that before they didn't realize they didn't realize how simple it was exact of it the truth is simple it isn't complex now that doesn't mean that it's easy to follow it if you're totally culturally conditioned to ignore it or to look the other way or that society is so screwed up that following truth is going to actually be a painful thing because of how many people are you know in complete and utter oh you know obliviousness when it comes to what the truth is it may be a difficult thing to live but the the actual understanding and existence of truth is quite simple right I mean it's just shocking how how long it can take you to convince a small group of people that you regularly in with just to change their minds who and they all have the arrogant attitude that they're you know the great thinkers of the community and just getting to admit they're wrong about anything it's so shockingly difficult that you're like totally right about how much you know huge myths we are like we're in serious danger here when when even the people who claim to be smart can't even admit that they're you know just most obvious the truth the house is burning down the the the house that we live in proverbially this planet is burning down all around us with us in it and we're arguing over like you know details of like you know the patterns on the wallpaper or something to that effect oh you know when we argue with nitpicking little things in people's work you know we're not getting on the same page when it comes to morality we're not getting on the same page when it comes to the illusion of authority the non-existence of it in nature we're not getting on the same page when it comes to what real freedom is about and we're certainly not getting on the same page when it comes to all the different dialectics and you know divide and conquer strategies that are being played off against us and seeing those for what they are all their means of control I I got an eerie feeling about a month ago I don't know where it came from but I just got the feeling that the mouse trap just was snapped like at a specific moment I remember it and it's ever since then I've kind of realized that we're we're actually in a civil war right now and that every society is breaking down and pretty soon gonna be driving tanks up to your house and so it's it's also very profound what you just said there war against the people of America has already commenced it's ongoing now it has already begun the problem is most people just don't understand that that war has already begun so yeah and you know it's too late for a lot of people like Justin in my experience with these people I'm gonna still speak the truth and and plant seeds everywhere I go but some people if they can't if they don't see it it's too late for them and the people who do see the truth has to come together and form some kind of network to deal with these problems because you can't wait on forever because for some of them it's just not gonna happen again I can't remember the name of the individual who said it I'll have to look it up or perhaps someone can give his name on the air someone made the statement there's a special place in hell reserved for those who remain silent during times of moral crises and we are in a moral crisis right now and the vast majority of the human population is both ignorant and silent you know there it's not that they're incapable of understanding it they are ignorant they are ignoring what is taking place in their myths because of their cowardice and they are just you know sitting on the sidelines watching it happen as if there's some kind of spectators you know life is not a spectator sport people get involved get on the battlefield do the great work engage your fellow human beings that's what this is all about Nathan absolutely brilliant points that you've made up that you made there anybody doesn't believe that it's that bad yet just get on YouTube and type in UC Davis police brutality and you'll see the Ferguson riots from about a month ago and you can see the cult mentality of the police work they're literally stormtroopers and the boss is Darth Vader and they're just they might as well just be raping people on the street I'm getting that bad I wonder what it's going to take to wake up the slumbering American public how much longer are they going to take this the founders are just absolute their spirits are weeping and you know Nathan I want to thank you the call because it it you know brings up this point I'll just give a little anecdote here I went to a gun show in Oaks Pennsylvania just outside of Philadelphia last weekend and or it might have been two weekends ago and I took a route to get there that I don't normally take and it took me through Valley Forge and I regret even taking that path to get up to the show I wish I would not have done it I don't want to even drive through that area anymore because so tangibly and palpably in my body did I feel an energy of mourning that I almost had to pull the car over to the side of the road and just break down in tears when I think about what the American revolutionaries had to endure to secure the modicum of freedom that they did for the people of this land and how we have absolutely squandered that sacrifice that they made it sickens me to the core of my being [Applause] stay with us folks final segment on the other side of this break [Music] [Laughter] [Music] [Laughter] [Music] welcome back everyone final segment of what on earth is happening for this evening we're taking your calls let's hear from Tom in Toronto Tom you're live on what on earth is happening welcome hi mark um today pretty good show thank you I just wanted to talk about the ego of order fault how it works through my observation no come on it's like a concept I referred to as perceived side you know people perceive not only size but they perceive quality of things that don't actually did like they'll perceive that a queen like she's just an old lady sitting on a chair with a metal hat they first see that there's some sort of combined ability about them and you know that works on the ego and it happens both ways like to say a real object like say a dollar bill has some magical power to it and a not real object has some physical power to it you see what I'm saying yeah you know it's like it exists only in their construct rely dia in their mind but it doesn't exist actually innately in nature yeah it's like a cog in it's like a sort of miscommunication between the left and the right brain the left brain sees the reality the right brain sees the creative imagination and it gets those two confused like oh this isn't actually completely real it has these sort of non realistic qualities to it like give an example like how do you kill a vampire right like oh so you get a steak some garlic some holy water but in reality you know doesn't matter vampires aren't real right people will fight about no dialectic in politics works you know do you want this side to rule you were you want that side to rule you it's all the belief in something that doesn't exist which is Authority and they just get people to identify with one aspect of it and you know then they're involved in a religion of believing in something that doesn't actually exist in nature yeah and think about order falling they think that they their boss or they're higher up authority has some divine power like in reality he's about the exact same height as you he's anatomically the same he probably has most the same education that you do and here he is running your life like you like some sort of tool like turn a person into a tool as if they don't have their own soul and a caller called in I think I don't know a week or two ago and he's talking about good order following versus battle the only good order following is when something that doesn't have a soul it control basically if you have intellect you have a soul you have the fifth point on the pentagram head full and you are not to be controlled none of your things are to be controlled if they belong to you whether it's your body or your home or your possession yeah we have free will to choose the behaviors that we will and you know people saying that you know they can somehow abdicate that freewill choice or it's a cop-out you know pun intended you know that they are trying to give away something that cannot be given away to someone else that they're personal you know yeah Lavery isn't intrinsically real can't it's not possible right even after they give you the order you still have to make the choice all that boy right that's correct you're still choosing see it comes down to like that scene in in the matrix you know where the Merovingian is talking to the the three heroes are you know morpheus and neo and he's trying to get them to dismiss the concept of free will where he's talking about causality and you know causality is natural law it's it's how the universe responds to our choices and Morpheus says everything begins with choice and that's where Morpheus is completely correct but the Merovingian as the dark occultists says no wrong it's only all about causality no it is not we are not just pure and total slaves to natural law we have free will and are gifted with the ability to interact with natural law natural law is always going to bring us the consequences are of our behavior but we are free to choose which behaviors we will put into effect in the universe what we cannot escape are the consequences of that choice yes we influence cause out and you know I want to say that all the order followers they're listening the Box does not have some divine crown of gold on his head he's just another guy found himself in a position where he can tell you what to do and you're only listening to him because think Lavery real whatever well what about the magical green pieces of paper or whatever color they are and in all other countries you know the the plastic slips of paper up there in Canada Tom you know there that's what's that's what's ultimately guiding their decision-making processes I have to do that for those because then where am I going to get my my you know daily bread from I have to you know chase these magical pieces of paper that enable me to do things and have energy in the world you know there's there's the ultimate religion that works hand in hand with the religion of authority but that one's gonna be even bit more difficult one to break down until we break down this authority religion first yeah toilet papers I mean those pieces of paper are intrinsically just toilet paper exactly but it even less than that because they wouldn't be too comfortable to use them in that capacity and/or sanitary for that matter it's an it's amazing where people's minds are at when you come from a purely natural perspective and looking at things as they really do exist in nature without the constructional ideas of man you realize how utterly ridiculous the mindset of the vast vast majority of people actually is it's sad it's a sad thing it like the previous one of the previous callers said it is it does become like a comedy like it's such a grand joke and the jokes all on us the punchlines on us we're the punchline you know when none of it has to be this way and we have potential that we can scarcely even imagine to do incredibly creative and wondrous things as beings and as a species you know in the aggregate sense and what are we doing we're fest we are absolutely festering in a prison of our own making it's all ego we we put this vision of the world over the actual world and no you know then we wonder why everything doesn't make sense like I call it like like a schism you know like I call it the dark world this is the dark world where you spend your time when the real world seems too hard like a schism is precisely what it is you know that's what I was kind of describing before when I was describing how you know all of these different dialectics work you they create a schism and they pit one side against the other and unfortunately only one side has to go along with the schism you don't even need both sides in full schism you know you only need to separate one side from the other side and you know pit them against each other in pit that group against the other and then it takes on a dynamic of its own that's why they don't have to reach out and educate these people who have bought that mental schism who have bought into that mind control in that propaganda unless enough of us step up and get involved on that spiritual battlefield and do the great work we're not going to reverse this dynamic that we're experiencing yeah also well no worries Tom great points that you brought up there and you know that is what it all really comes down to is deep ego not being able to admit that we were wrong or we were duped and you know that's what we have to get these people ultimately to see who are giving their energy and their mind over to something that's ultimately leading us down a completely evil path that leads to nothing but destruction and slavery so I want to thank you for your call great points that you brought up as always everybody who calls in to this show brings up phenomenal points constantly you know I want to thank everybody for calling in and offering their points of view and I want to say you know stay tuned because we have really really profound topics coming up on future shows that are going to be controversial to say the least but without any question they will be enlightening remember everyone there are only two mistakes that you could ever make on the path to truth not starting and not going all the way you've been listening to what on earth is happening thanks so much we'll see right here next week [Music] [Music] [Music]

What On Earth Is Happening Show #182

Topics: *Mark Receives Tesla Spirit Award, Solutions, The Great Work, Alchemy, Critical Mass in Consciousness, Epigenetic Eugenics, Belief vs Gnosis, the Illegitimacy of ALL Government and "Authority," the Importance of Gun Ownership, the Disarming of Slaves, Goetia "Demons" and Self-Knowledge, the Socially-Engineered War between the Sexes, Mind Control Techniques that specifically target Women, the Deliberate Breakdown of the Familial Dynamic in Society, Waking the Unconscious Masses, "Maven-Targeting," How Police and Military Constitute Cults, the REAL Male and Female vs. The Artificial "Male" and "Female," Doing The Great Work to influence others to change, Order-Followers need to walk away from their "Jobs," ALL Order-Followers are Cowards, the State's Glorification of Order-Follwers as "God-men," Order-Followers are always bear MORE Morally Culpability than Order-Givers, How Order-Following Institutions loathe individual thought and Conscience, Believers in "Authority" are Religious Extremists, Alcoholics Anonymous and other "12-Step" Programs*

freedom man that's what it's all about you've got to groove on freedom like the good book says welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio welcome one and all you're listening to what on earth is happening right here on republic broadcasting radio network i'm your host mark pacio my website what on earth is happening dot com the network's website republicbroadcasting.org today is saturday january 17 2015. this show is of course live every saturday evening from 10 p.m to 1 a.m eastern time that's 9 p.m to midnight central time tonight on what on earth is happening we're going to do an all call-in show and the topic is going to be on order followers i know i said i was going to jump in with uh some new material starting this week unfortunately uh life kind of intervened and i really haven't had time to pack that information out and organize it so i'm going to uh start that next week definitely but i figured tonight would be a good opportunity to open up the phone lines and let people give their take on the series that i just concluded on order followers ask any questions that they may have for clarification on this topic and uh just put out their own uh you know ideas or insights uh regarding what we can do to reverse the trend of people uh following orders for a paycheck or for a petty sense of power or whatever they feel is the need for them to do it the psychological abandonment issues that underlie uh this condition and uh you know we'll we'll do an entire show on that to let people uh put their viewpoints out there so uh the call-in number to join us tonight is 800-313-9443 once again the call-in number all call-in show i specifically want your take on the information i just covered on order followers any questions that you may have on that topic and any comments that you want to make regarding order followers or how we can turn the situation regarding order followers around in this world once again the call-in number to join us 800-313-9443 i have several event announcements that i want to make tonight the for your mind three conference of course is coming at us very rapidly it's going to be taking place uh here uh just outside of philadelphia on april 10th 11th and 12th of 2015 at the sheraton bucks county hotel at 400 north oxford valley road in langhorne pennsylvania the speakers confirmed bob tuskin clint richardson curtis the illuminated one davis dennis mckenna derek bros the new jersey weed man ed fortune freighter x freeman fritz springmeyer jay parker john vibes josie the outlaw whales lennon honor luke rodkowski mark devlin myself mark pacio and stuart swerdlow there will also be a panel discussion group um and there will be open mic sessions at the end of the evenings for the conference five to ten minute segments will be given to people uh from you know the attendees that just want to uh get up and speak on any given topic an all weekend pass for the freer mind 3 conference the biggest conference of its kind on the east coast certainly coming up in 2015 an all-weekend pass for this great event only 150 dollars you can go and get your tickets immediately it's the best way to support the efforts of the organizers of this conference is getting your tickets in advance because it helps to pay for the speaker travel expenses it helps to pay for the venue it helps to pay for the speaker lodging expenses and all the other ancillary things that need to be paid for as part of a conference of this size and scope so get your tickets at freermindconference.com i just learned that the organizers are extending the promo code that i had been giving on this show exclusively for listeners of what on earth is happening you can put in at freermindconference.com when you go to buy an all weekend pass the promo code 93 just the number 93 at checkout and you will receive 20 uh a 20 discount off an all weekend pass for the conference that will be ongoing until sunday evening at midnight okay so into monday you know sunday night into monday morning at midnight uh that is when that code is no longer going to be valid or working at all so if you're listening now and you want to discount on the all weekend pass which is the best way to support this event enter coupon code 93 at checkout at freermindconference.com i will be speaking at a monthly meetup group uh here in philadelphia called philadelphia liberty on the rocks i just confirmed this this tuesday i'm going to be giving a special presentation on the true meaning and purpose of the second amendment this will be taking place on tuesday february 10 2015 from six o'clock p.m to nine o'clock p.m now i will not be speaking that entire time as a matter of fact this is going to be sort of a short presentation for me the presentation itself will be approximately half an hour maybe a little bit longer but um we're shooting for about a half an hour and then followed by a discussion question and answer session and discussion on the topic which is the true meaning and purpose of the second amendment i will be extensively breaking down all of the language contained in the second amendment and attempting to convey to people what the authors of the second amendment truly intended uh by putting this provision into the bill of rights tuesday february 10 2015 6 to 9 pm at the cafe that's the name of the venue it's at 2011 walnut street 20th and walnut just off the corner 2011 walnut street philadelphia pa 19103 this event is free to attend and for more information on this event you can check out philadelphia.libertyontherocks.org and if you're local to the philadelphia area and you want to come out and have some lively discussions with a great group of libertarian activists some of them even anarchists you could check out their meetup group philadelphia liberty on the rocks i was the proud recipient of a tesla spirit award this took place on last weekend last saturday january 10th in new york city this is the reason i was not on the air live last weekend but we played a replay instead of rebroadcast i went to attend the tesla science foundation's third annual tesla memorial conference at the new yorker hotel in new york city it was a great event lots of awesome speakers got to meet a lot of great people and interact with them and i uh got a very very pleasant surprise actually as i was uh heading up to the conference i got a call from the tesla science foundation's president nicola lonchar and he told me that i would be receiving a tesla spirit award at the conference which was very very uh again pleasantly surprising to me so um the tesla spirit president's award for continuous dedication to tesla's legacy is the award that i received that's pretty much the highest uh most prestigious award that the tesla science foundation gives to individuals at the um tesla memorial conference and and spirit awards each year i'll tell you a little bit more about this on the other side of this break remember folks your calls coming up all show on this edition of what on earth is happening stay with us we'll be right back there's a cold silence but we don't dare speak there's a wall between us and our rivers we keep pretending welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pacio my website what on earth is happening dot com i was just telling people in the last segment about uh me being the recipient of the tesla science foundation's most prestigious award that is given to individuals at the third annual um tesla memorial conference at the new yorker hotel in new york city this year you could check out the photos of this it's in the photo section for this show you could go to the radio show page tab of what on earth is happening if you're listening live right now if not this is podcast 182 and you could check that out on the podcast section the photos show me receiving the award at the podium and then taking a picture with mono divina who was one of the other recipients and barb who received michael falcetta's award michael falcetta was instrumental in helping to organize and uh basically raised funds for some of the first tesla conferences that were hosted by the tesla science foundation so he was another recipient unfortunately he was ill on that day and was unable to attend the conference so uh barb received the award in in his honor uh there's a picture of the bust of tesla which i received it's image number six uh the um the other images of course on on the site right now are the free or mine conference posters a poster for my uh liberty on the rocks presentation coming up on february 10th and then the last three photos online uh four five and six show me receiving the award and the award itself which is image number six the tesla spirit presidents award so i was very very honored and privileged to receive uh this great award i want to thank nicola lonchar and the entire tesla science foundation uh for um offering this award to me and it was really a great honor to receive it uh live at the uh tesla conference so if people want to check out more about this uh great group of people who are trying to bring tesla's uh name and legacy to the prominence that it so rightfully deserves please check out their website at teslasciencefoundation.org there is currently a pledge drive a donation pledge drive going on uh here at rbn uh the network is looking to raise some funds and uh in order to keep a great content on the air uh occasionally from time to time they do need the the help of listeners so if you are in a position to do so to make a donation to the network uh you can go to their home page and click on the donations tab and do it there or you can call into the network at a toll-free number 800 800-724-2719 this is an ongoing donation pledge drive going on at rbn right now the toll-free number if you want to call in and pledge a donation is 800 720 or you can go to the rbn website at republicbroadcasting.org and click on the donations tab okay so a couple of other quick uh things the what on earth is happening uh promotional t-shirts are still available as a free gift in return for a voluntary donation you can click the link that is listed in the uh news articles at the top of the news section of the waternearthishappening.com website it's also the top item under latest news on the left hand column of the webpage the shirts are really great people seem to be really enjoying them they're good conversation pieces and they're just a good way to promote the website and the ideas and concepts that are contained on it there's also a donation button on the left hand side of the what on earth is happening dot com website if you feel that you've received value from the information that i've shared here on the wall on earth is happening radio show and on my website please feel free to make a voluntary donation to help support my work so that i can continue it long into the future so with that having been said um the phone lines are already full they're lit up and i really appreciate that so let's go right to the phones it's uh you're the the callers are going to make the show today and i figure this is a good way to end a uh entire uh series that i've been uh doing over the last several weeks here on the show by just opening up the phones and just getting your reaction to it uh getting your questions your feedback and any comments that you want to make on the order follower series that i just conducted here on the show because we're going to change gears a little bit and go in some new directions on future shows and we'll we could talk about that a little bit too so let's hear from zidane in connecticut zadani you are live on what on earth is happening welcome to the show hey mark are you internet doing well so obviously that's a third call i'm calling to your show with and topic is a big topic um we're talking last week i was talking to you adding to the show regarding a lot of the german influences uh with project paperclip and all that kind of piggybacking off the ufo issue and a lot of the high science that we have around here um so that's actually where i was going to go is you know pose the question to you before you even put the topic out there to round it up that way uh where's this we know what the solutions are i mean obviously a ton of your work is geared toward that but you know i mean what you know just bouncing real quickly off you before it comes back like what do you how do you see the the simple end of solution besides just education besides education and becoming aware of the tactics and techniques and everything going on what do you see as really the solution well the solution is for enough people a critical mass of people to become so enlightened regarding truth and morality that they step into the true courage uh of what is known as the great work and the great work is actually reaching out once you have transformed yourself and your worldview and most importantly your behaviors and then teaching other people and influencing other people to help to transform themselves that's what alchemy is really about the it's the vehicle for the great work is alchemy it's actually the influence for being the influence for other people to step into their own courage and their own transformative capabilities you know that's what the great work actually is you know it's it's yeah it's it's first changing your own mind and behaviors and then helping other people to do that same process to go through that same transformative process the problem is is that we not only don't have enough people who are willing to step into that level of courage mostly because they don't have that knowledge developed enough within them uh themselves but you have a lot of people who are so attached to the current completely immoral western civilization paradigm that they would fight to the death to protect it because they don't know anything else and they're so trapped in a fear-based mindset and they're so trapped in a satanic mindset the one of the biggest problems is that we have a propagation of satanism throughout society and the vast overwhelmingly vast majority of human beings do not even understand not only what satanism is but they do not understand that they are living satanism they are actual satanists at a low level and do not understand that that is the ideology that they have already signed on to and subscribed to in their daily choices in their daily living in their daily behaviors they don't understand they already are satanists by every definition totally agree with you um no so when you're talking about a tipping point you know i don't know if i agree that this is high i know you spoke to their you know masses of numbers so donnie hold right there we're coming up to a break i'll hold you want to let you get to this part of your question on the other side ladies and gentlemen you're listening to what on earth is happening stay with us um welcome back everyone and listening to what on earth is happening here on republic broadcasting i'm your host mark pascio my website what on earth is happening.com we're taking your calls throughout the show tonight call and number to join one us 800-313-9 four forty three we were talking to zadani in connecticut zadani uh you were um talking about uh the critical mass point or the amount of people that you thought was necessary to create a cascading change throughout society regarding order followers you want to continue with that line of thought yeah thanks mark um i mean obviously to for the you know any tipping point obviously you got to get over 50 the question is what what generates that you know if it's worth spending time on a large scale you know audience for i mean classic philosophical type of question but i believe it's far more that there's that people are not equal that people are not at all created equal that through lifetimes some of us have accumulated far more interior power and as i said maybe the first uh three weeks ago the three shows two shows ago that it's not with greater superiority comes greater responsibility it's the inverse of the the mayor domina male dominated uh world that we perceive now the greater the superiority of the being the greater the responsibility is the collective um you know so some of that in that idea of the collective i want to come back around to but you know we i believe there is a core uh group let's say of individuals that have the power to be those catalysts to sort of be something like michael tassirian's uh you know well illustrated and elucidated uh version of once upon a time uh culture that existed the italian culture the great giants who you know the the beings that could harmonize uh the rest of society around them um so you know that gets into the alchemy of the great work and alchemy right down to what foods we're eating and how we're balancing our bodies and what's going through each of our souls really our psyches and and how all that's you know there's a lot less covered in the nature of your work uh that was great referencing back to say uh a type of that fault that's brought out by morpheus you know most people are so addicted to this system that has been infrastructured around them that they're going to fight for the very thing that's tearing apart their soul absolutely and you know there's a big difference between what i'm talking about regarding a critical mass of people doing the great work to push more people toward the the transformative change that i'm talking about versus the actual numbers of people that do need to transform their behaviors for a solution to be affected in our world that is a very large number i think the people who need to do the great work in order to get us there is not quite as large but in order for society really to change for the better truly in a sustainable long-term way uh certainly over half of people would need to change from the current uh you know mindset and world view and behaviors that they're uh enacting in the world right now and that then we would we would be in agreement there'd be tears in on that russian doll sort of core of like what's emanating those rings right at the very core of the movers and shakers you're gonna kick that out but obviously for any tipping point to happen you need fifty percent just for joining that now then the question would be i'd ask you what happens if that doesn't what do you see as you know maybe we're going a little higher minded and say that you know your well-rounded work covers but if that doesn't happen what are the large-scale consequences if we do not make the tikkun if we do not make the repair that's you know required infinitely worse slavery than what we're already experiencing now because there are degrees uh to the severity of slavery you know from 100 percent totally physical hot slavery to the type of mental slavery that people find themselves in now which arguably could be perceived as you know more intolerable especially to people who are not under those mental chains i mean i'll just be honest with people and you know come out and give you a little bit of personal information regarding where where my emotional uh makeup is at these days i mean i feel depressed regarding the state of the world and where people's minds are at i i all i i just have to lay my head in my hands and almost weep on a daily basis for how completely and utterly destroyed the minds of most people of humanity uh are it's almost incalculably unfathomable to me the things people believe the the sick world views that they are in people are so mentally ill that they have absolutely no idea how mentally ill that they actually are none whatsoever you know and i feel depressed about that on an ongoing basis that's not to say that i'm not continuously doing the great work to attempt to change that condition you know i feel that despondency as well you know um the thing is though mark i mean i hear what you're saying and it still seems a little on the ground you know because with the infrastructure that say these high german and otherwise the dark occulted scientists have laid out it would seem that it would go a little bit beyond just being more terrible slavery i mean obviously i would yield sort of more towards being like the matrix literally because that's because we have the transhuman aspect that's right that these uh you know psychopaths have laid out in our world to affect and they're obviously working with even higher entities which is a lot more the material that you know you begin to you know stick your foot into with the cosmic abandonment that we there are things that are much bigger than we see here and the consequences are much larger we have technotronic weaponry that's leading people's minds in these states where they can't process a damn thing where you know you said the last show you you had the one weapon that comes out the scalar weapon television that's you know crippled people's organs crippled their brain and their processing ability across the globe creating a faraday cage that leaves them incapacitated you know you add crap food to that and you just have a recipe for disaster of where you can create a society that is existing as a battery to fuel these other entities with luch or whatever you want to call what this this field that they're giving off so it's far more than just we're going to have a bunch of people do back to the middle ages and their surfs it's going to be converted to hell on earth literally yeah a health plan a literal hell world silicon hell unless unless there's something and i mean it goes deeper and deeper i know if you're familiar with nigel kerner i'm not he does a really nice job i mean he's a little bit of an eccentric british side i guess he actually was acquainted with arthur c clarke and then some of that cabal insider group he's alive now and he really does a nice job at rounding out what the ones and zeros of the silicon entity are tracing it back to newton you know it's pretty amazing i've never heard anybody really uh put it all together like that so you know where it comes down to that for me mark is expanding the principles of natural law and maybe even getting beyond a little bit of what's rigidly laid out by the beings that so to speak in my opinion control physics is what i've labeled and had other catalystic teachers of mine called the jacobian principle of jacob you know father yaakov's that you know when he looked at the situation with if you know the the the story of the archetypal story of laban the the wicked laban who he went to that when you're playing with luciferians at a certain point you can't play nice and you can't just play by what would be simple integrity you have to know their game and play their out game their game you know that you know it's not always stay within the lines because if we stay within the lines we could it's too easy to lose and they're ch and it's too predictable that there's a certain risk absorption factor you know you might connect to the buddhist concept of the bodhisattva of eating some risk to step into their karma and absolve of that because you know their game is going to continue on as their game and you know when you're dealing with them you need to out game their game i don't know how you you would respond to that if you see the laws you know that you've laid out it's too fun to feel very fundamentalistic but well sadani i want to thank you for the very interesting insights that you've brought up regarding that and i want to say you know i just think that's why it's all the more important to help people to understand that the techniques of manipulation that these so-called sorcerers dark occultists are using uh for the absolute degradation of the human mind and soul when we understand those things and we can teach those clearly to other people we're helping to create a defensive shield mentally it's a form of psychic self-defense that we need to really erect within the population and part of the problem is that there's this eugenics psychological warfare going on in society i i'm going to term in coming weeks i'm going to coin the phrase epigenetic eugenics okay many people will never have heard that worded like that but really this is what we're actually talking about we're talking about eugenics operations that are being conducted psychologically not even having to be done chemically not certainly not having to be done physically anymore energetic energetic rituals that get into the whole nature of kaiserville home back to the castles of the bath and going back to babylon and beyond what the bath but but not even just that by getting people to do these things to themselves by getting people to actually call the population themselves in ways that they don't even understand that they're doing so that's that'll be coming up on future shows but is it donnie thanks so much for the call great points and insights that you brought up we'll continue with more of your calls on the other side stay right need there education we don't need control in the classrooms welcome back everyone you're listening to what on earth is happening we're taking your calls throughout the entire show this evening the topic is order followers any comments or questions that you want to pose regarding my recent series on order followers toll-free number to join us 800-313-9443 let's go back to the phone lines and hear from tom in toronto you're live on what on earth is happening welcome hi mark i want to start off with some green language today sure so on the word believe it's made up of the words the lie which means to be in contradiction with or to falsely represent and the word e which means life so to put it together you get to contradict or falsely represent life on the word believe pretty accurate yep and the second one which i forgot uh two weeks ago i was going to say that government is the material manifestation of the ego especially with um what um uh what's his name he wrote the satanic bible answer anton lebaye right said about the number nine anything you add or multiply it by the number nine you get more nine right anything you do to the government they just ask for more money in order to deal with it so whether it's war sickness or peace you also they present a great deal of official they appear very official hear what i mean yeah i mean and you know still far too many people uh still believe in this concept of government as being legitimate you know and uh actually having a place in the world in any capacity in any uh you know uh level whatsoever you know miniarchus or still have a belief system have a religion that's all it is it's it's it's the religion of authority it's a belief in the legitimacy of something that has never and never is not now and never can ever be legitimate the right to rule over other people it's a total fraud and people still believe that we should in any way uh interact with this complete fraud you know and you know until people understand that there's no legitimacy to the violent things that they conduct on a day-to-day basis and you know ultimately develop the resolve to exercise their right to defend themselves against that violence ultimately nothing's going to change yeah they belie which is why the presentation i'm going to do on the second amendment is so important and you still have so many absolute um milk toast people let me just put it that way is as least offensive as i could say it on the air okay because if you uh talk to me personally i'd have a lot you know more explicit choice words for what i really think of people that are unwilling to defend themselves and don't believe in gun ownership you know uh i have put posted a recent video on my facebook uh page of me shooting a sniper rifle and in the video i have a shirt on that says free people have guns slaves don't anybody that still doesn't understand that only a slave a perceived slave by their master prevented and prohibited from owning the ability to defend themselves from violence in the means of a firearm okay they're slaves themselves if you don't people don't understand that you are already in the mentality of a slave which is why some of the founders of this country tried so hard and made such an effort to try to convey the importance of never ever giving up the right to keep and bear arms and it's something that i feel so strongly about and too many people absolutely don't understand it whatsoever it's a topic i'm going to revisit on this show even after i do the presentation hopefully hopefully get a video out uh you know from that uh but um i'm going to revisit uh the concept of gun ownership on this show uh probably after the next series that i uh go through yes and as a side statement to that in china with the martial arts they actually have um the sickle and the um uh num chuck as martial arts weapons because it was so bad for the chinese people that if they were actually caught owning any sort of weapon their government would kill them on the spot so they basically had to turn their hands into what you have to use your hands your feet your head their body right the weapon and your farming tool numchucks were actually farming tools right uh they would use them to beat the grain out of the rice and you know it actually came to that like soldiers would just come to their houses and just you know i think people really you know uh the video innocence betrayed because it's a really great documentary on the importance of firearms and why never to give them up you know too many people especially in uh you know in uh countries other than the united states really i mean most countries other than the united states the people there have been turned into subservient slaves that actually believe that there's no proper role for the ownership of firearms and they are literally mentally ill they're mentally ill by taking that position because but i can think of no better definition for mental illness than a slave who loves being a slave that's what somebody who stands against firearms is yeah um also one one last question sure um it's more of an alcohol question but uh aleister crowley made a statement once that the demons of the croatia are actually parts of the brain you know anything about that a very very very interesting interesting concept there and i would have to say that i completely concur you know the these entities dwell within us and they control many parts of our behavior and personality until we understand how to free ourselves from those influences from those negative quote-unquote demonic influences i think it's a profound understanding personally not everybody will agree with that point of view but um the the types of ideas and concepts and personalities and influences and energies that are contained within galatia for people who have looked into this topic and studied it i i also feel are different aspects of the the human mind and psyche you know the personality the deeper aspects of of the self and we can either choose to work with those forces and master them or we can be mastered and owned by them it's it's a choice it's a it's an exercise of will and it's about self-knowledge another individual other than crowley that you can look into to check out things on that is uh lon milo duquette who does some great work with galatia as interpersonal indwelling forces um i would recommend some of his work on that as well so i i definitely agree with that uh take on uh the the quote demons of the galatia okay thank you yeah sure you got it great call so um thanks for that call tom and let's uh go let's continue and go on to kevin in pennsylvania kevin you're live on what on earth is happening welcome to the show hey mark it's kevin i just want to say hi but i'm actually here just to let you know that this isn't a crank call and my son wanted to speak with you oh sure absolutely i'd be glad to hear from him what is his name what is his name maximilian that's right max hey max are you there you're taking my homework sure hey what do you have for us today um well before before i go on each one is it go ahead are you there all right um don't be nervous just go go right ahead like you're talking to me like if we were hanging out okay um well this isn't necessarily a question but i believe we should end the federal reserve because it pays for for the wars absolutely people get evil slavery we i like we pay the debt to war sure and debt is a huge part of the whole slavery system that has been erected all around us you know um that's how they keep these order followers in line you know by constantly having them appeal to what would happen if i didn't do this job what would happen if i didn't uphold these laws and get that paycheck in return hey kevin and max stay stay with me through this break i'll let you continue on the other side ladies and gentlemen you're listening to what on earth is happening don't go anywhere you know the day destroys the night night divides the day try to run try to hide break on the view welcome back everyone you're listening to what on earth is happening we're into the second hour of the show for this evening it's an all-call-in show on the topics that i covered in the order followers series that i just completed call toll-free number to join us 800-313-9443 looks like we lost kevin and max during the uh break there but if you guys want to call back in i'll bump you back up to the top of the call queue so let's continue to take some other callers and let's hear from brandon in boston brandon you're live on what on earth is happening welcome off guard there a little bit but i'm ready um first of all congratulations on the tesla spirit award oh thank you so much no one that i know i mean i talk about tesla a lot i always bring up your name and tesla foundation um science foundation in philadelphia and they have a little place here in boston too and stuff so it's very cool and really congratulations i must have been fantastic in that oh it was great yeah we had a good time all right um get real uh to the point here this order following it's uh it's really pretty heavy because um oh man because what we have essentially is that and and it's really interesting i love how you put it is um uh intelligence uh eugenics or whatever whatever it was epigenetic eugenics it's a way of people to be mind controlled into calling the population themselves without anybody having to do it externally yeah and you know how that's done i think and this is what i was going to bring i think selective greeting of order followers um yeah i would i would say it's even you know about diminishing um the uh the whole sociosexual cohesion between the sexes in general and that's what i'm going to be talking about in the in the future is the wedge that's being driven um through social engineering in between male males and females and most people are totally unconscious of how this manipulation is being done and it's actually resulting in declining birth rates in all the civilized countries of the world basically all the you know the western civilization countries and you know some people would say oh that's a good thing because we're the ones who are completely messing up the world i mean at the same time they want a population reduction they want a eugenics agenda because the more manageable the population is the easier it is to control you know the smaller it is the easier it's it's manageable and they certainly don't want real men rising up in uh society they don't they want the emasculated man that will lay down to the state and then they want the only masculinized men they want in positions of quote authority within the police forces and the military forces that's where they want to channel any testosterone or any traditional male um you know role roles they want that channeled into the state and you know uh they're doing this epigenetically by the female support of the entire system the targeting of females for mind control the targeting of females in marketing you know i mean the latest um you know uh not to jump ahead of myself but you know the latest um figures are that almost 80 85 percent of the entire u.s economy um is is basically pushed forward by females in our in our culture they're the ones who are actually doing the buying because all of the mass marketing is largely geared toward them i mean you don't have to take my word for it or believe me or even think it's my opinion just go out into the street look at what the marketing targets it clearly targets the female mind and it's a it's an unpopular thing to say and get into and when i start talking about neo-feminism as compared and contrasted with what i would term classical feminism it's they're 100 complete opposites of each other and neo-feminism is a eugenics agenda without any question in my mind and i could also tell you that it comes out of satanism and it's things i'm going to be talking about in future shows actually i'm going to start this next week i can almost promise that i will start it next week because i will have some time this week to really uh organize some of these ideas and put them in a uh a coherent format of some kind not sure whether i'm going to actually go full bore and make a full presentation with slides or not but it's something that really has to be discussed and i can no longer stay silent on it it is something that i feel i have an absolute moral obligation to tell what i understand about this agenda and you know again i talked about in the order followers section and in the part on you know just the non-supportive dominators in the solution section here a couple of years back um how females could really step into a very empowering role and position in society by not supporting people who uphold the immorality of this system they could step into real personal power by doing that because in many ways in in all ways really they are the most oppressed by this dominator system and culture and yet in their support they don't even of that culture they don't even understand how they're driving their own enslavement and ultimately their own um eugenics uh population reduction they don't understand that the neo-feminist agenda is actually a war not only on men but certainly a war on women as well and when i bring up these topics one of the caveats i want to give for you know when i'm going to explain this and it's going to tie into the um you know supportive dominators the support of order followers as well i will tie it all back into that when i do get into this i want to be very very clear that i am not doing this to try to further divide or pla further play into the dialectic i am trying to do this to bring attention and heal the divide that has so obviously been manifested in our society throughout the last uh you know i would say at least 30 to 40 years and rapidly growing worse and worse and worse even as we speak so um that's a little preview for what may be coming up but i'll let you get back to your your questions well thank you that that was that was awesome but like my my point is i guess is that like you have these red bloodlines like uh t h huxley and alba huxley these uh the book sinister forces the trilogy's financial force like yeah great books which is first is about my family is the nine arthur young my last name's young um that's my family ruby i'll maintain that's like ssm right for them that way it's weird so we've had like my own family um goes back to kiki hands like a long time they've been following wars they've been orders okay so like how do i when i'm surrounded and i'm and people are put i'm carrying out epigenetically and morphogenetically probably uh through memories like uh rupert shelter proposes right i'm carrying out the same service um to the elites or whatever you want and they're not so called um you know uh whatever you want to call them um you know like that's enough that's in my family you know and that's like that i think like there are certain bloodlines that are bred for a certain purpose and that it's funny that these bloodlines meet and guess what the other oh oh you know you're just like you're just my friend right and then oh who is your grandfather we happen to be the founder of the oss you know i mean like you know what i mean you know regarding your question of what you can personally do uh this is also a topic that i think i want to get into on future shows um because when talking about solutions um a lot of people uh don't ever formulate some sort of a strategy for dealing with the quote-unquote unconscious you know they're content in many ways to let them live in their that unconsciousness and you know let me just say this i i think a big part of the solution is that educate children whose minds aren't so totally taken and so totally uh calcified and like as if held in a concrete block they're a little bit more malleable and you know there's this you know there's a concept in general that it's easier to educate a child than to try to fix someone who's already broken and already mentally enslaved that may be true but i think we there's still something to be said for working on people who simply don't have the knowledge that they need to understand the dynamics that are playing out in front of them so i'll continue with my answer on the other side of this break ladies and gentlemen stay with us you're listening to what on earth is happening we'll be right back welcome back everyone you're listening to what on earth is happening i'm your host mark pascio my website what on earth is happening dot com we were talking we were talking to brandon in boston and i was uh giving my take on uh you know what we can do to help um kind of decondition and deprogram some of these people who have basically been raised their entire lives in the dynamic of uh believing that order following is some kind of a virtue and that we need this dynamic in our lives to somehow maintain order in society um it's something i'm going to probably get into in a big way uh in future shows and it's something that i want to formulate uh ideas on a little bit more in a uh you know kind of formal manner to try to put out a strategy out there for people because i think we have to organize truth seekers and truth speakers among us and identify those truth seekers and speakers in our local communities and then work together literally like tactical teams i mean literally like a tactical team i i'm going to in the future lay out this strategy and i'll tell you what i'm going to call it i call this maven targeting okay it's a new concept i'm going to coin a few new things uh in the future regarding my work and you know certain strategies that i want to put out there for people um a maven m-a-v-e-n is a person within any type of a social structure that is perceived to be the go-to person the expert on a particular topic or the person that people listen to for advice and direction a maven does not have to be per se a knowledgeable individual they only have to be perceived as a knowledgeable individual so i'll just give an example here and i like to give personal examples uh i am not a maven okay people would say oh yes you are yes you are people come to you for this that that and the other thing uh one advice on this one knowledge on this you know want you know to know what resources to go to okay what i'm talking about is in my interpersonal social circles in my everyday life i'm not a maven okay in my family there is a maven there's probably a couple i'm certainly not it i'm not that dynamic i'm not that person i'm not that individual in my family my mother is the maven of the family therefore if i wanted to try to change the dynamic of the family uh thoughts the the direction the advice that they take who they listen to the person that would need to be worked on the heaviest would be my own mother because she's seen as the quote matriarch of the family if you will okay um so this this is why in giving information to anybody else in my family i have focused on that person the most now i'm not in that person's physical presence very much so it really doesn't make a difference uh you know what i would you know speak because i don't really spend a lot of time on the phone or and since we're not really in each other's physical presence or company um you know i don't really engage in that when i was in her presence a lot earlier on years ago i would heavily try to give this information even if it wasn't well received or the person said i really don't care i don't want it i would speak it anyway in their presence and do nothing else you know this is the kind of result people will say well this is almost like just being a uh you know um an annoying person to somebody else somebody else it's like saying you're not really having respect for that person because you're doing what you want regardless of what they want uh yes in many ways that's exactly what it's doing it's because this isn't about uh babying people this isn't about um listening to an immature unconscious person saying i don't want to know that's not you're right tough tough if it affects my freedom that's not your right how about that this is what people who are too and again i'll use that term milk toast you're just too passive you're not aggressive enough you lay down when somebody else says no i don't want to know about that you back off immediately and i'm telling you that's what's killing the world that's what has killed the world because we're almost dead as it stands right now you know i'm not in any way saying that the the caller who brought this topic up is like that by any means i'm just saying most people you know who do know the truth are loathed to speak it because it creates uncomfortableness it creates discomfort among the dynamic that you're involved in well i don't care whether my family will hate me because i i want to speak the truth and tell them it's not acceptable that you're not moral enough it's not acceptable that you accept things that are immoral okay you need to get up in people's face and say it directly to them in plain language sugar-coating it is not going to help anybody folks it's a new age deception to say it always has to be worded in the positive in the affirmative you know taking such special care to people's delicate sensibilities and never talking about the negative and never telling them they're inadequate in any way absolute bunk new age nonsense garbage okay anybody that buys into that is has bought into the new age religion okay this is about finding the person who is the most influential within any social dynamic group okay if there's you could just think about this on your own there's a friend that you know who holds more sway with the rest of your friends there's the person whose mind you have to change and if what you need to do is get many truth seekers to team up on that person if possible you know i've offered to people my time energy information and effort to say if you have somebody you want to awaken take me into their presence and we'll work on them together you know but plan a day out and we'll just totally you know while we're out with that person we will completely do nothing but speak truth in their presence to a point where they have no choice to listen to us or just absolutely literally leave the dynamic walk actually have to walk away you know that's how you really need to do it and people will say oh no this won't work it's never been tried the problem is we've never done this you know people who know what's really going on they back off and they don't say anything to anybody else and therein lies the the bulk of the problem when it comes to order followers these people are sequestered they are sequestered they are walled off from the rest of society and if you could identify people that are the mavens within the their groups we might be making headway in helping to somewhat transform their behaviors i call this maven targeting okay and i'll be expanding on it a lot more in in the future in future shows and presentations okay so you know i mean you look at order followers uh as a brief aside here before we get back to the calls they constitute a cult they are people who are completely sequestered from the rest of society cops for example only hang out with other cops i know of no person who knows a cop that hangs out with average people with a normal everyday person none zero never met anybody that hangs out with a cop ever cops hang out with other cops people who do jobs like being a meter person you know like get writing tickets all right at uh you know so-called illegally parked cars they hang out with their kind because no one else wants to be with them nobody else wants to hang around with them and they know it so many of these people won't ever even admit what they do and they lie about what they do you know how many people you've probably asked you know what's your profession what do you do for a living and they've been cops and they've lied to you about what they've done in your life that you've encountered personally if you knew the number you'd be shocked and appalled because it's so way beyond what you think it is i'll pick up this dynamic on the other side and we'll get back to your call stay with us welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pascio my website what on earth is happening dot com so in the last uh segment i was talking about how police generally constitute occult all order followers really do and they hang out with only their own kind they congregate with their own kind and they are completely sequestered from the rest of society and that is why until we can infiltrate that wall get past that wall that they have used to sequester themselves and basically not hang out with anybody that doesn't think like them and you need to do that by identifying people within your family dynamic who act as the maven again this is the concept i call maven targeting and it's it's really answering you know the the question that was posed by uh the caller brandon in boston um you know that this this concept of you have to get into the minds of people who are influential in a family unit because these are the people who are ultimately holding some kind of mental influence with the people who are acting as order followers and i'm going to tell you it's these mavens usually are the matriarchs of the family okay you know when when you look at who people go to for advice within a family unit you'll usually see it's you know the female who is the mature in influential type within the family okay it may be you know the the grandmother of the family or you know just uh the strong female influence in general and you know in some families it's it's a male as well but um in general why i'm going to emphasize the mind control that's perpetuated against women so much in future shows is because for us to break down the um dynamic that we see playing out with order followers the strong minded and um you know traditional type women are are going to have to come out of their mental conditioning that they've been placed under to see you know order following as some kind of a virtue and influence and nurture the men in these families in in the family dynamic that they're a part of in order to make them understand it's not okay what you're doing or from a very early age never get involved in following anybody else's orders because it's immoral from the get-go and the problem with that is the family dynamic is under attack because of the mind control that women are under so you know it's a it's like a catch-22 you know until we can repair that family dynamic by breaking them out of that mind control they're not going to come out of that mind control you know it's a very complicated uh set of factors that people have to understand is going on and again the neo-feminist agenda which is a eugenics agenda is a huge part of that mass mind control targeting particularly of the female mind because what they want is an emasculated society of men that can't ever rise up against the state physically and um you know they want uh women basically wed to the evils of the state without even understanding that that unholy wedding has been performed has been accomplished so um i'll bring brandon back on and just wrap up his thoughts and then i'll move on to some other callers but brandon are you if you're still holding with us i don't know if that addresses some of the dynamic that you were talking about about how we may eventually break down this whole you know a mindset of the the quote respect or admiration or seeing order following as a virtue within a family dynamic that's right that's why they go after the women and children first not the men that's right you beautifully illustrated that two weeks ago when you brought up the hobbit three um and where the women of lake town take arms over the coward who just stays there and um is the perfectly shown dynamic it's a beautiful allegory i highly recommend people to check out you know that whole series but particularly the third one i found not only visually striking because i saw i saw it in hd 3d uh but um and the 3d effects were just outstanding i thought and uh but not only that the allegory that it uh brought up with you know what a how a real woman will back you know the the strong men in a society uh you know and you know turn their backs on the emasculated man men who are really cowards uh and stand up against domination you know and let me tell you something folks the the the what i am calling the neo-feminist agenda is 180 degrees in the opposite direction that agenda will have women running into the arms of their very oppressors if the truth is told and understood about how that dynamic works there's a lot of people who are putting out a lot of good information on this topic there's a lot of people who are putting out some disinformation or imbalanced information on it i hope to be somebody who can come in talk about this topic when it comes to the mind control methodologies that are have been and are continuing to be directed at women to get them to support order followers dominators and the state and bring some balance to that bring some healing to that and i'm going to say things that are going to be very unpopular or going to be very difficult for people to accept and in many cases because this dynamic is complicated it's going to be very difficult for some people to understand how it works and and fits together as a tapestry of of this agenda but uh i again cannot remain silent on it uh because i feel that i have a moral obligation to try to help people understand it and i think i may be able to do it in a way that people really understand not only how this has been done but why it was done for the ultimate purpose and agenda that it's serving which is eugenics make no mistake about it that is the ultimate end goal when it comes to what's going on with uh the the mind control of women in society and healing that dichotomy and healing this wedge this divide that's been driven between the sexes is a huge part of the solution uh and a huge part of really manifesting true freedom on this planet uh because again as i've been saying and you know i'm gonna lead in with this dynamic next week when i start getting into this in a big way only one side of a dialectic needs to buy the lie in order for the dialectic to work only one side of a population being targeted by a dialectical manipulation i should say needs to buy those lies in order for the dialectic to work and be accomplished both sides don't have to buy into it only one side does so it's a very important concept to understand and you know when i go into this in depth i know it's going to be controversial for some people but again uh the intent is not to further drive a wedge between men and women it's to heal the divide that has been driven in there by this communist fascist marxist you know um uh absolute satanic agenda that has really waged the war uh on really both sexes not just men but women as well because they're ultimately the targets of this as well just as much as men are so brandon i want to thank you for your call and uh congratulations absolutely be a part of this alchemical show absolutely thanks so much for calling in and a really great point that you raised that allow me to go into that little tangent there and i'll give a little preview for what's to come on this show so uh let's let's hear from uh arthur in indiana now arthur you're live on what on earth is happening welcome wow man can you hear me good absolutely you're coming through loud and clear all right awesome uh first of all i do want to congratulate you and uh on top of that man i just want to thank you um for all the work you've done and for all the insight you've offered for everyone and uh i'd have to say you don't believe you called it your four portion of the apocalypse you would definitely be one of mine so uh first time i've ever called an any radio show and it's want to thank you well i appreciate that so much arthur thank you all right well um you know we're talking about order following and i really wanted to get into uh some solutions for the order following sure go right ahead um yeah i recently had an experience at work where um i got fired for that exact reason and um you know i was called into my supervisor's office and i put into another position um to be on first shift so i could start pursuing other things uh you know outside of work that were more actually in this kind of area that you know uh of uh of things to do to you know to help people underneath you know and stuff like that and um just hard started talking to me very disrespectful you know he had uh he had started to put words in my mouth you know he called me a victim and i spoke him and said you know oh man you know and he told me to shut up and i i you know said you're not going to tell me to shut up and then uh you know long story short man um he got physical and uh you know i went up to hr and unfortunately there was no witnesses so i ended up losing my job but what i've learned really the essence of everything uh is that i learned that um stay with us we're coming up to a break i'll let you continue on the other side there's a wall between us and it can't go on welcome back everyone you're listening to what on earth is happening i'm your host mark pacio my website what on earth is happening.com we were talking to arthur in in indiana before the break got to us and arthur you were describing your encounter with a uh order follower slash dominator of some type uh you want to continue with that yes yes um uh basically the essence of my experience uh was that um you know work for a molding injection company you know factory type work that um being myself and following my heart and and you know following that middle path not being abused but not being an abuser it basically led to me being terminated because they don't value um an intelligent individual with heart what they value there is uh somebody with the um uh who keeps their head down and this is what i found my experience there and i you know you introduced uh me personally to natural law and i've really been um expanding upon that and i really learned that you know the law of attraction the energy you emit the energy you attract i realized that you know just recently uh this has happened um i put myself in a very challenging situation um so i could learn some of this um psychological um you know like distorted uh expressions of this type of dynamic to get me out of there and into something else and i've had just some amazing things um start happening um here and it's been kind of uh very synchronistic and leading to something and uh so that's that's the whole thing of of you know of of the balance because uh what i really learned is uh the the really a lot of what's happening in in the world around us that we see is uh the degradation of of gender and it it really is about um keeping people on a lower vibration through you know the food we eat you know you cover car um carnalism um you know eating fearful food pretty much and the workers are treated in you know very poor manner themselves and then the heavy metals and the air and things in our water to keep us on a denser um you know a consciousness level because uh something else i've learned through meditation or been feeling because this information you know there's nothing new undefined it's always been around is that your mind is not the totality of everything we are you know we have like you know your gut feeling your heart and and what's really happened is that we've been disconnected from these organs from these parts of ourselves that actually have intelligent um you know um like a communication if we would only tune into it so uh you know that's why people's compassion or the sacred feminine has been targeted you know so much to keep people where you know well i don't care what can i do and what i wanted to um to provide uh tonight on the whole order following dynamic and everything um is you know it all has to come back internal um you can't yell at someone and tell them how fucked up the world excuse me i don't know if i could say that online yeah we have to watch our language because we're going out and fm affiliates also i will not do that again but um basically you can't force someone to change i mean you definitely have to have your voice because just as you said you know lies propagated 24 7 um you know truth has to have the defender um but you know i've seen people try to drop very heavy stuff on people and it just kind of scares them and it's good you know i'd rather hear the truth uh so i know you know where where things stand so i know what what what work to put into um but it all starts with you know the individual you know or you call you know the maven to spread this influence and a tool that that i've used that has really helped me has been uh just a simple one two three um discipline honesty and productive imagination so on discipline you know um it really is like you know through uh um like if you uh have a one-night stand with a woman um then what you're really doing is you're kind of degrading your sacred feminine because you're telling your mind that that kind of interaction is okay that's just kind of one example but just disciplining your mind to uh disciplining your body you know developing your willpower so that way you have more of that you know internal uh monarchy uh demanding over yourself and then the honesty is a huge one because that's that's honesty to self and if you have an experience and in the moment you may you know act one way but if you do some introspective work you know that respect thing and you really look in at yourself that's how you're going to develop your intuitive faculties um you know really gaining knowledge about yourself going into your own thoughts and judging your own thoughts before you judge externally because when you're judging externally you know that's what's at external so you need to bring it back in and then really look at yourself and do that work and then the productive imagination i mean you know all is every you know there's only the all so before any problem ever exists there's the solution right you know there and now i've heard you touch on this before if you cannot imagine or see the solution then you know we're stuck we're tracked so you know a productive imagination if you have a negative thought then think about what you can do to solve it i mean you know on the simple on the simple level because before we go out there and really you know have this collective huge uh you know shift and i i want to say this too i really appreciate um that you do have such a um you stand so strongly and how much work needs to be done because there is a lot of people propagating that you know that there's this ascension and everything's gonna happen but we have to do the physical work we have to you know express our spirits through the body and really do some physical work to get things done um but you know do you have any comments about my last training i mean absolutely i mean i think one of the most uh you know critical things uh in this entire dynamic to understand is that once we do this introspective work and we have um worked upon ourselves to such an extent that we've brought our behaviors into alignment with natural law that's the beginning of the process people think that that's the end you know a lot of times the new age movement will teach that you know just getting yourself uh in some kind of a blissful state or a state where you understand what you're you what you wanted to understand and become comfortable with grasping is the be all and end all of it that's the end of the process it's this concept that enlightenment is only about the self is only about changing oneself that's where the great work begins no one is suggesting that before you've worked out a lot of the issues and the mind control that you yourself have been under that you go out and just try to completely you know push something off on onto somebody else because if you don't have your own mind freed what is the point of you know going and propagating that knowledge and information now i'm not saying wait forever either but you know you have to get yourself to a point where you know you're in a healthy balanced state and you're not acting as uh an integral part of the problem dynamic okay once you can do that and you could propagate that information in a way that is coherent and makes sense to somebody else i feel that you have a moral obligation to engage other people and like you said you you you don't have to worry about sugarcoating it but you don't have to do it in a you know a vicious way there's a way that you could do it that is forceful yet accurate and yet is um done in a way that is unapologetic yeah just on that level too um what i've kind of learned is because i've been i've been looking up the uh conspiracy stuff for for you know a long time but then i've really gotten into um the spiritual side if you will but not the new age you know uh head and cloud spirituality but really you know okay this is what i need to do to myself to uh bring this solution into the world but what i've kind of learned too is that when communicating with people you can definitely drop some heavy truths but you know you don't just go in on on that because then you might scare someone and that creates like a fear so they're honoring that fear you know but to provide some the genuine heart connection to connect with someone a heart-to-heart level and be kind of inspirational and maybe in some manner and then say you know implied that you know bring these darker aspects up in a tactful way you have to try to find a common point of interest that you could work your way into that person's mind and even into their confidence and you know people will say well are you talking about manipulation are you talking about you know getting things in through the back door of their mind i would say absolutely you know i think that you know you have to use whatever methods are at your at your disposal so your influence over somebody else you know it's like helping a child ride a bicycle with training wheels or with supporting them from behind by holding their shoulders so that they don't fall over i mean you can do that until they get up the um you know muscle memory and ability and dexterity to ride the bike for themselves and then you have to know when to let off you know it's not about controlling them indefinitely it's about basically helping them to see and understand and then you know then you you can back off and then that when that person has the will to do it for themselves we'll pick this up on the other side folks stay with us you're listening to what on earth is happening we'll be right back welcome back to the show you're listening to what on earth is happening i'm your host mark pascio my website what on earth is happening.com we're taking your calls we're into the third hour of the show for tonight's broadcast the toll-free number to join us 800-313-9443 once again the toll-free number to join us 800-313-9443 the topic is order followers your comments on the recent series that i just did on order followers any questions that you might have any clarifications that you want me to speak on or just uh you know any anything that you want to get into regarding that entire topic uh wrapping up this series on order followers so um let's uh go back to kevin in philadelphia who we lost on the line earlier kevin are you with us yeah yeah mark come back uh max was still hoping to be able to speak with you sure go right ahead here hang on a second hey mark hey max good to have you back great point that you brought up about the federal reserve system it definitely needs to go we're in full agreement with that yeah you have anything else you want to bring here here's a future and the fed guy folks uh you know nothing better than that i mean this is what we need to be teaching our children without any doubt go ahead max you can continue okay um i just wanted to say that um if someone is in the military that person should clearly say i quote i retire i'm returned and um um they gotta quit their job right max hey that's who's blocked or her boss and like clearly walk away and like three things are wet there it is you know from from the mouth of of children ladies and gentlemen you know children can understand this with clarity and simplicity and yet full-grown adults have such difficult time with it walk away i mean there's words of wisdom you know i am i am completely blown i am blown away by by how i am on this podcast hey it's my it's my pleasure to have you here max yeah it's my pleasure to meet you definitely well you you keep learning and reading and you know you got a good teacher there with your dad so keep it up and you know then you'll be doing what i'm doing in the future all right all right all right you take good care of their max take care keep up the great work hey thank you bye-bye see there that's what it's all about folks teaching the next generation of people the truth you know i mean what can you say about that you know there there's a child who already gets what's going on in the world you know and i'm sure he'll learn and grow in his knowledge and you know do incredible amounts of reading and you know he'll be an influence with other people as he gets older and that's what it's all about so uh kevin and max thanks so much for that call it's definitely an inspiration absolutely kevin you're still there if you have anything else you have anything else for us do we still have them yeah no okay kevin is gone great so kevin and max thanks so much again so let's hear from derek in pennsylvania derek you're live on what on earth is happening welcome to the show uh one second one second i got him what about arthur hey mark how are you gonna take my call how are you tonight i'm doing well good to hear from you yeah great to hear from you as always um no i know you don't do this for the recognition um and you know it's kind of um to me you getting that award is kind of the universe saying in its own way thank you yeah i was i was blown away by it and you know i i thanked the tesla foundation from the bottom of my heart for the uh recognition that the award represented uh it was a very nice thing you know because i have put a lot of work in to try to help people to understand what tesla tried to do and i think more people need to do that as well and i i applaud the efforts of the tesla foundation i mean they had a lot of people out there at that award ceremony they did some good promotion for the conference there was great speakers there um overall i think it was a very well done event and uh you know i hope that they continue the work that they're doing well into the future and i'll be glad to be a part of it into the future for sure and like i just think the universe is thanking you with kind of that outward sign um regarding order followers um your presentation as always is a pristine on point and uh it packs a a knockout punch and uh what i wanted to discuss tonight i i was the movie american sniper i didn't see it i don't know that much about it i know that it's getting a lot of uh publicity and press and stuff like that but i came across a an article a short article that i read about um the author chris kyle and um how he fabricated a story about knocking out jessie ventura and it actually went to court and um it was actually proved in court that jesse ventura um won and this guy made up the story now the crazy part is so so kind of piqued my interest so i looked more into it and uh today i saw a show on his band i believe i don't want to ruin anything but i i just want to kind of tell basic themes about um the author chris kyle they had moana i guess it was uh in march or i just let's say with the spring of 2012. and um you know they had callers in on the show and they asked him uh you know would you recommend your children be in the military and he said i he kind of didn't take any stance what he said was i wouldn't recommend doing it but i wouldn't recommend them not doing it and he said it's a total volunteer status he also one of the themes he touched upon was that he didn't understand the public's protesting of wars he said you're protesting you should not be protesting against the military you should be protesting against the president and the congress yeah now targeting the order giver you know as if they're the ones who are actually doing the actual harm and you know these are just some of the themes that kind of kind of just really resonated with me that's what order followers always want to do they want to pass on the responsibility to the people who are giving the orders you know no you're not the it's like a video i i put i linked on one of the former podcasts i did on on uh dominators it was a cop basically saying he was posed the question if uh uh he was ordered to uh you know follow racist laws to enforce racist laws you know like um you know if you know racial segregation came back in through law would he obey those dictates by by the politicians and the state and enforce you know racial segregation and he said as a black man as a black cop he said that he would enforce it because that would be the law and his job would require that he enforce it now that's evil incarnate evil incarnate with no apology that person is evil period anybody that doesn't understand that that's what evil is you don't know what evil is you have no clue what evil is and that's exactly what it is right there that's embodied the embodiment of evil is doing what you know to be wrong and taking those actions anyway even though you know them to become you're basically spinning in in the truth's face that's it and he's saying that if you wanted to would want to take that up with somebody take it up with the politicians who passed the law not with me wrong pal we're taking it up with you because you're the one who's putting that harm into manifestation by following that order not the person who scribbled down some nonsensical crap on a piece of paper and called it a law derek stay with us i'll let you wrap up your thoughts on the other side of the break ladies and gentlemen you're listening to what on earth is happening we'll be right back with more of your calls we don't need no education we don't need no such controls no dark sarcasms in the classrooms teacher leave their kids alone welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pacio my website what on earth is happening dot com we were talking to derek in pennsylvania derek uh you were highlighting the uh concept uh in the previous order follower series i just wrapped up that the order follower most definitely bears the overwhelming majority of the moral culpability for the harm that results by them following the orders of the order giver the order giver of course is morally culpable but certainly not as much morally culpable as the person who carries out those immoral harmful behaviors i'll let you wrap up your thoughts yeah like just piggybacking on that it would never been a brought into existence if you just said no there it is um but if i can just make one last segment and then get your insight on other things let me just briefly comment on that before you go into your last statement um that's why i would say that all order followers are cowards all order followers deep down inside are cowards because if an order follower had any real courage they would say no i will not follow any orders the actions that i'm going to take are going to be of my own free will accord once i have decided whether that behavior is in compliance with right under natural law first then i'll do the action because i know it's right not because someone told me to do it and that is why i would say that blanket statement ladies and gentlemen you let get as offended about it as you like because the ego hates blanket statements and those who are completely trapped in ego can't hear a blanket statement and understand that it's true when a blanket statement is true you know because the ego hates absolutes 100 of order followers are cowards everyone that has ever existed in the history of the universe get as offended as you want to get by that if you're an order follower you're a coward period okay um go go ahead derek and bring up the other thing that i was kind of um taking back it was um or you know kind of just prove the point of being on this journey is that the guys in in the military or that are seeking to join the military right um chris kyle said that he goes anyone who joins or is in the military now he goes i guess this was one of his lifetime he goes you will be going to war so it's like these guys want to have perpetual war on this earth instead of trying to heal the earth which is a human sacrifice it's a it's a for their agenda it's a beautiful ritual of human sacrifice keep giving blood to their dark soul or deity that they worship and believe in you know keep calling the population you know keep our surplus resources down you know uh keep throwing that people's money and resources into a total black hole that's a beautiful thing if you're a dark occultist and keep the industrial military-industrial complex to keep on going but mark real quick and i know you'll get another call if you you know when something happens to quote unquote a police officer or a lawman they unleash like you just say a crime happens against them whether they were beat up you know whatever you know killed or in the line of duty and all that right they unleash everyone in their resource to go find a perpetrator when a civilian or a commoner has a pro like someone perpetrates their natural law right right kills their murders and rapes them it's like oh a good a good friend of mine was shot they they've never even bothered trying to catch the guy you know well what is that i i just oh well clearly the police are god men derek i mean don't you know that i mean that they have way more rights than you they're more important than you they're god's among normal mortals if they are under the controller's thumbs and they're viewed as kind of like you know our dogs so to speak why why do they do that you know what i'm saying is it more to try to is it a recruiting mechanism is it tried to you know people that are insecure to say look someone cares for you we all care for you is it kind of long nose line no it's basically trying to get the population to accept that these people are literally godlike and they are just you know the regular population are on mere mortals you know and and they're infinitely more important than us their lives matter more than us you know because they are the upholders of the agenda of the state you know so therefore of course they're more they're they're more valuable as beings you know their lives are much more valuable and it's just to reinforce that in the idea of the absolute idiots that watch mainstream media and pay attention all that pomp and circumstance nonsense that goes on when one of these people one of these cowardly order following nazi trash something happens to them karmically you know yeah and it's just like i have no sympathy for that ever i'm absolutely zero sympathy for them because they're not real human beings get as offended about that as you want a real human being doesn't follow orders period that's an artificial being they're trapped in mind control i don't make any excuses for people who are trapped in mind control i'm not an apologist for immoral people you know they deserve what they have coming to them and they're going to get every bit of it well thanks so much mark for for all your work and i just want another shout out to all your listeners i'm learning just as much from from you as them with their questions and the dialogue back and forth so your callers i mean i know you said absolutely you're kind of depressed but tonight i'm kind of like energetic and like pumped up because i'm like wow a lot of people like are bringing more to the table there's great dialogue back and i'm kind of happy without a doubt the callers bring up great insights and i have the best callers in all talk radio anywhere on the earth as far as i'm concerned you know uh the callers never cease to amaze me uh derek i wholeheartedly agree i want to thank you for your call on the points that you brought up thanks peace to all you got it yeah um you know uh definitely never ceases to amaze me the quality of calls i've stated that many times on the show and uh that trend continues uh and i'm glad to see it continuing so um and i think it's because the people who are actively seeking the truth and listening to a lot of the things that i've put out here on the show and on my website you know they're thinkers they are readers they don't just absorb nonsense information in the mainstream media and don't question it and challenge it they do critical thinking for themselves and you can hear that in their thoughts that they uh you know elucidate on the air i mean it's just it's it is an encouraging sign that more and more people are coming on to this understanding and you know uh talking about it so clearly you know we get more people doing the great work we're going to be making a lot more headway toward affecting a real solution so um that's ultimately what it's all about so derek thanks for the call uh let's hear from swami shivananda geary in illinois agape swami i got paid my very self playing the role of mark pacio so well thank you you're welcome my friend how are you doing very very well and you know mark you okay it started when i was invited into your home and then sitting around your kitchen table you invited me to speak at the free your mind two conference and then i was allowed to leave meditation sessions at free your mind too i remember it like it was yesterday swamy but just hold that thought for a moment until the other side of this break and then i'll let you pick up from right there okay my friend great ladies and gentlemen you're listening to what on earth is happening here on rbm rbn stay with us we'll be right let's back you know the day destroys the night night divides the day try to run try to break welcome back everyone you're listening to what on earth is happening here on rpn i'm your host mark pascio my website what on earth is happening.com we were talking to swami shivananda geary before the break hit us swami if you're still with us i'll let you continue with uh your your story that you were telling well you know i was describing our introduction and our interaction and our association anyone who's been listening and following the podcast perhaps has heard the swami's name pop up a couple times but um what i wanted to ask you mark as a friend would you allow this swami your airwaves to make a public confession regarding order following absolutely without any doubt the floor is yours in the year 1984 this swami was a member of the united states air force and in that year this swami was discharged for asking why too many times and received a general under honorable conditions discharged for a pattern of conduct prejudicial to good order and discipline so i was kicked out of the order following society because your tendency to ask why before performing an action was against their version of order and discipline yeah see that yeah amazing it's called having a conscience people with with a deeply developed conscience don't to do too well in those capacities swami no not at all uh now um i wanted to ask you if you would care to make any comment regarding the kalika war party um no i'm not really very familiar so go ahead and explain oh oh okay well uh it seems that john lamb lash oh i am familiar yes okay okay yeah i mean he he is talking about um you know this concept of uh standing up to the psychopath in a physical capacity is i mean is this part of what uh is is contained within this well it would seem that what their what he is attempting to do with the formation of the collegiate warfare is to get hold of warriors who are willing to utilize subtle strengths against those who would use subtle strengths against us and this is a about in an energetic capacity right not a physical capacity but in a subtle energy capacity right right you not not physical right but utilizing ritual utilizing various subtle psychic attack we're talking about so we're talking about psychic attack yes yeah it's an interesting concept i mean i could definitely tell you that many dark occultists um believe in the direction manipulation and transference of energy psychically and practice it as well ritualistically so it's it's certainly something that i know for a fact goes on within dark occultism um it would be interesting to see what type of results you know could be brought about as a result of something like that i i will tend to reserve judgment one way or another but uh i would say it's kind of an interesting concept and i'd like to see where you know he takes it yeah exactly that's that's right where i'm sitting i'm sitting in the sky box going oh let's see the game you know because i am neither an attacker nor a defender i'm an observer but and then you know it's my dharma to assist others to raise from wherever they're seated to wherever they can reach you know it's not there is no it's just about assisting that's all you can really do you know you do it in in your way this swami does it in this way many others so many in in your chat room tonight are involved in in in things that are physical things that are spiritual uh kevin leading that young man to truth i mean how old i mean is that great or what you know i would love i would love to be in the room watching young max smile when he listens to the podcast you know but i mean that's what it's all about is teaching the next generation so they don't follow you know the mistakes that the previous generations have made well very much looking forward to the next for your mind uh this swami will be leading meditations once again this year and if called upon to speak will speak on the topic of freeing yourself from the mind the next step so we'll see what happens i think it's going to be a great event and i'm really looking forward to you know having you be part of it once again yep yep and well for those i'm i'm so happy i get a crash on mark's couch we'll have a blast all right we'll see you later swami thanks so much always a pleasure to hear from you all right let's hear from brandon in california brandon you're live on what on earth is happening welcome mark it's a pleasure to speak with you thank you um so yeah i guess i've been listening uh since the beginning i'm on uh october of 2014 at this point and uh your uh podcast has really changed my life but i'd say for the better but uh for some friends and family probably aren't you and see yeah i can understand that and you know it's tough dealing with uh people who are still in the matrix so to speak oh totally and uh it's funny uh you're you're talking about the maven uh uh sort of a deal in some families and that's my family is totally has amazing it's a very matriarchal family a lot of women in my family we're always very tight-knit growing up and the maven of my family is actually an ex-homicide detective she was a cop for many years and although she's a very liberal in a lot of reviews she's also almost blindly pro pro authority and pro cop especially uh we had there was a lot of hated discussions at family gatherings over this last holidays about the whole ferguson and all these things because it just boggles my mind how liberal she could be and she's a lesbian she has a you know she's married so she enjoys you know the benefits of a lot of liberal views and uh and legislation that has been passed recently but at the same time she can't pry herself away away from the mindset that the people in ferguson that are that were doing this unrest were doing it because of reasons that weren't necessarily unjust you know it's just uh it blows my mind how how set in her way she can be despite being so forward forward-thinking in other areas well what you're understanding there in that dynamic is that this person has a religion and they are vehemently attached to those religious beliefs we have to start trying to explain that the belief in authority is religion it is a religious belief system and most people will not see it as such and they will not say that person is a religious extremist that's what they are they're a religious extremist and that's what how that has to be explained to them as such that you are a member of not only really a religion but a cult they're they're it's a cult following they are following a cult and when i when i what i mean by that is they are giving over their belief to something in an unchallenged unwavering way and the thing that they're giving their belief over isn't true it's an illusion that does not exist in nature or reality at all and the belief in something that does not exist in nature or reality constitutes religious belief and that's what that they have they have religion and it really needs to be deeply explained to people more how the belief in authority constitutes a religion because most people don't see it as such or understand it as that even when it's explained to them we need to get these people to understand that they have fallen for a false religion right and uh yeah it's just that really blows my mind and i guess to add to that um i've been curious for a while what your views are on uh the organization of alcohol that's anonymous uh i guess that can be uh loosely tied into this topic because there are a lot of order followers in there i mean there is a lot of agency in there as well but at the same time a lot of people follow it blindly to to the letters as opposed to the spirit of the organization and uh it's interesting the founder bill wilson experimented with the entheogens and lsd specifically towards the end of his life and advocated for it but if you were to tell a lot of members of aaa that lsd could have positive effects they would you'd be laughed at basically by the majority of people in most meetings so i don't know i guess i was curious what you're uh if you have any views on the alcoholics anonymous program absolutely that's a great question and i will answer on the other side of this break ladies and gentlemen stay with us you're listening to what on earth is happening we'll be right back i've got one more dollar welcome back everyone final segment of this edition of what on earth is happening this evening we're taking your calls and uh the previous caller asked me a question about alcoholics anonymous before the break caught us and my take on this and in general most quote-unquote 12-step organizations to deal with addiction is uh while they may provide some some decent methodologies for dealing with addictions and working in group therapy when it comes to addiction uh i do agree with what the caller said that you know many of them could be somewhat cult-like in their rigid uh belief system according to the letter of how they do things instead of the spirit uh of what the uh organization was originally intended to be i find that my biggest problem with these organizations is that they externalize power and say that you are powerless over the addiction uh when in fact the exact opposite is true the only one who could defeat an addiction is the person who is suffering from it through the use of their own personal willpower and no one wants to hear that because they want to pass on personal responsibility that's what people who are stuck who are in a religious mindset who are you know um basically still operating as children uh want to hear that they're powerless that somebody else has to do it for them and so they bring up this concept of you know uh look externally to a higher source of power they never worded as higher aspects of the self but you know it's always something external to the self well while there is a higher power than the self and it's called natural law uh and i'm you know i make no bones about the fact that i'm comfortable with the use of the word god you know i believe in a creator of the universe i wouldn't even use the word belief i know that there's a creator of the universe a creative intelligence that underlies everything i don't look at that as uh the way any other religion looks at god i think it's transcends all of those you know childish viewpoints that religion portrays god as but um to say that uh god's gonna somehow be in control of whether you have an addiction or not is uh you know certainly passing the buck and it's not standing in your own personal responsibility and it's externalizing your own power um i think the very first thing that should be done with any person suffering from addiction is to tell them you and only you are 100 in control of whether you continue to suffer from this addiction or not or heal it you and only you you know and that's the truth you know it's not my belief that's the actual reality over who's capable of breaking an addiction the person suffering from it that doesn't mean they have to do it by themselves you know they can absolutely have help from people but that isn't coming from anything external okay it that they will make the freewill decision as to whether to accept that help and whether to follow with follow in the footsteps of knowledge okay and for anybody that disagrees with that you absolutely don't know what you're talking about okay you have no idea what you're talking about all right i and i don't care who that offends get as offended as you like bang your head against the desk crying your milk okay there these people are lying to people when they tell them that they don't have any power over their addiction okay they're clueless clueless anybody who buys into that has a religion you have a religion and that's your religion there you go you know continue to believe in it all you want believe in it you know and i know so much about addictions that i mean i could write books on the topic i can write books on the topic okay i could totally help people with addictions if they want help this is something i've studied so in depth that i consider myself i consider myself somebody that knows more than just about anybody on the earth on this topic quite frankly okay because one of the things that i had to wrestle with was addiction to thought forms you know to break out of my mindset the previous mindset and world view that i was under that's the most difficult addiction of all and you know what folks nothing external to myself except my own willpower got that accomplished it was called hard work it was called the desire to know it was called the desire to transcend my weakness which most people don't have and they want to blame it on something external and say that's in control it's all a religion as far as the techniques that some of these organizations use i have no problem okay there there are some techniques that are effective and again as the caller pointed out even the the uh founder used therapeutic uh psychedelics in helping to break addictions and you know one of the best ones and one of the you know heaviest ones is uh iboga you know which you know is then um extracted to create ebo gain which is a drug that has been used therapeutically when treating addictions of course that's illegal here in the united states we can't have that you know you know we might cut into the pharmaceutical cartels profits you know or i should say pharmaceutical mafias profits but you know um addiction is maybe a topic that i'll cover in the future as well it seems like a good thing to talk about i'm gonna be tackling in the future the neo-feminist agenda uh i'm going back into uh you know deep philosophy when it comes to the right of all people to own firearms gun ownership rights will be discussed in the future um uh the concept of a solution that i want to talk about maven targeting you know and maybe i'll break into this uh you know more on um addictions and how to wrestle with them and and ultimately defeat those quote-unquote demons that are all indwelling aspects of the psyche and the only way you could do that is through knowledge gnosis making a diagnosis of the underlying causal factors that lead somebody to want to hurt themselves like that because it's all about self-loathing and that's self-loathing invariably if you do psychoanalysis on the underlying causal factors just like order followers and that's why they drink and and and drug so much too trying to numb out the care and the remainder of conscience that is left within them so that they could just work robotically like the good order following house slave that they are you know um you know uh it ultimately stems from deep-seated abandonment issues and you trace any of these people i guarantee it like i guarantee the sun is going to come up on the eastern horizon tomorrow morning ladies and gentlemen i guarantee you trace the causal factors of addictive tendencies and order followers back to their source to their causal factors you are going to find a lost little boy and a lost little girl whose mommy and daddy did not pay enough attention to them childhood abandonment issues parental abandonment issues whether physical meaning the parent was not present or whether emotional abandonment mental abandonment spiritual abandonment psycho spiritual abandonment issues lie at the heart of that so you know people who want to say that you know these groups hold all the answers they don't talk about a lot of this stuff they don't get into those causal dynamics and causal factors in many instances i'm really very glad that the caller asked me this question because it is actually something i do uh feel strongly about and should get into talking about more and more um because the ultimate addiction that's going on in society is the addiction to completely erroneous belief systems religion in other words religion is the causal factor of the entire problem ladies and gentlemen i pretty much said it since day one the great work is about breaking people and their mind out of religious belief systems that do not serve who we are and i'll leave this episode right there thank you to all the callers who made a fantastic show remember folks there's only two mistakes you could ever make on the path to truth not starting and not going all the way we'll see you right here next week thanks for listening good night don't you ever

What On Earth Is Happening Show #183

Topics: *Mark Interviewed on Infowars Nightly News, the Absurd Naiveté of fake "Christian" Religionists and their pure garbage Salvationist Dogma, the Neo-Feminism Agenda, Epi-Eugenics, How Neo-Feminism differs from Classical Feminism, Poisoned Worldview and Erroneous Conceptions of "Human Nature," Generalizations, Female Support of Order-Followers, Think-Tanks' involvement with the Neo-Feminist Agenda, Tavistock Institute Of Human Relations, The Frankfurt School, Marxism, Socialism, Communism, Nazism, Long March Through The Cultural Institutions, Antonio Gramsci's Plan, The Fabian Society, Incrementalism, Satanism and Dark Occultism's ties to Neo-Feminism and Androgyny, Schools as Indoctrination centers for the Neo-Feminist Agenda, Prussian Schooling Model, Outcome-Based Education, Social Engineers and Behaviorists, Eugenics, the Imbalanced Ratio between Men and Women in the "Truth Movement," Most Women trapped in a Satanic Mind-set of Ego-Gratification, Breakdown of Familial Dynamic and classical Gender Roles leading to the Destruction of Morals in Society, the deplorable mind-set of most young females in our society, the Current Generation and State of Society as the by-product of modern women's breeding choices and propagated system of "values," Being "Raised" from "The Dead," Men who chase "corporate status" to garner favor with women, the Authentic Man and Woman vs. the Inauthentic Man and Woman*

freedom mat that's what it's all about [Music] [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of the choice and now here is your host Marc Pascoe [Music] welcome one and all you're listening to what on earth is happening right here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm the networks website Republic Broadcasting org today is Saturday January 24th 2015 this show is live every Saturday evening from 10:00 p.m. to 1:00 a.m. Eastern Time that's 9 p.m. to midnight Central Time we have a very enlightening show planned for you here tonight we're going to be talking about what I consider to be one of the elephants in the room so to speak mind control that is specifically designed for and targeted against women which has fomented the war between the sexes that is raging in our society and I'm going to specifically over the next many weeks be getting into this topic and I'm going to be exposing the Neo feminist agenda as a eugenics operation a phrase that I began to coin last week which I'm actually going to give a a new phrase coining this week for I I said last week that I was going to call this operation epigenetic eugenics meaning eugenics that is waged epigenetically through mind control against an entire population well I'm going to shorten this I'm going to truncate it a little bit and I'm going to come up with a new phrase for this a new catchphrase word I'm gonna call this operation epi' eugenics many people will never have heard that term before because I think I've just coined it and that's what the whole neo feminist agenda really is it is an operation of epic eugenics something that goes beyond eugenics because it is not eugenics that is being waged directly against a population but it is actually mind controlling the population and socially manipulating a poppy Latian enough that that population actually wages a eugenics war against itself and it is going to take a lot of explaining to help people to understand how this operation actually works and how deeply it's entrenched in our society and we'll get to that in this show and in future shows I may or may not have time tonight to get two phone calls hopefully we can take a few in the later part of the show but for people who want to call in and get in the caller queue I'll give the call-in number right here at the top of the of the show the call-in number to join us eight hundred three one three nine four four three once again the call-in number eight hundred three one three ninety four forty three I have few event announcements so bear with me before we get into the material the fur your mind three conference is going to be the biggest conference of its type coming up on the East Coast and 2015 for your mind three is going to take place April 10th 11th and 12th 2015 at the Sheraton Bucks County Hotel at 400 North Oxford Valley Road in Langhorne Pennsylvania just outside the city limits of Philadelphia the speakers lined up for the free ermine three conference Bob Tuscan Clint Richardson Curtis the illuminated one Davis Dennis McKenna Derek Bros the New Jersey Weed Man Edie fortune freighter X Freeman Fritz spring Meijer Jay Parker Janis barceló John Bush John vibes Josie the outlaw whales Laura Eisenhower just added Lennon honor luke rudkowski Mark Devlin myself mark passio and Stewart Swerdlow there will also be a panel of anti-media personnel and activists there will also be a panel discussion group with many of the speakers from the conference there will also be open mic night sessions at the end of the evening for five to ten minute sessions from attendees of the conference who want to get up there and speak their mind an all weekend pass for one of the biggest conferences this year on the East Coast about consciousness mind control and the occult only 150 dollars for an all weekend pass that's Friday Saturday and Sunday April 10th 11th and 12th you can get $15 off your ticket purchase with coupon code 93 the number 93 at checkout through January 25th I believe the organizers have extended this until tomorrow evening tomorrow at midnight I think Pacific time if I'm not mistaken I could be incorrect about that but I believe that's when they extended it to January 25th that's tomorrow evening Sunday evening at midnight Pacific so $15 off with coupon code 93 at checkout you can get your tickets now it's the best way to support an event like this is to get your tickets and in advance because that helps pay for the venue costs that helps pay for the travel expenses for the speakers and the speaker's lodging expenses that's where all the costs to host the conference of this size and scope and magnitude go into okay you have to bring all these people in you got to fly them out there their travel expenses are expensive they're coming in from all over the country they have to be lodged all of them have to be lodged for four days at the hotel I mean think about how much money that is you know this is not something that it just happens easily so the best way to support a conference like this don't think about it folks get your tickets in advance get the all weekend pass you know people are so worried about the schedule of speakers all the time with conferences like this first of all the schedule isn't made until the whole roster of speakers is completely confirmed and it's set in stone so don't expect that way in advance get your all weekend pass that's what you could do to help support the organizers who are shelling out tons of personal money to host an event of this kind you know so get the all weekend pass put in the coupon code get your 15 dollars off the you know with that coupon code and go there for the whole time or even if you can't go there for the whole time I still encourage people to get though the all weekend pass okay so you can get your tickets right now at free your mind conference calm visit the website check out the speakers it's going to be the biggest event of its kind on the East Coast and 2015 I will be speaking right here in Philadelphia for the first time in over a year at Philadelphia Liberty on the rocks there a local activist meetup group that meets monthly here in Philadelphia I'll be giving a special presentation called the true meaning and purpose of the second amendment this will be taking place on Tuesday February 10th 2015 from 6 to 9 p.m. my presentation will start shortly after 6:00 p.m. it won't be maybe around a half an hour or so it's gonna be a condensed presentation I'm gonna be breaking down the second amendment all the words in the second amendment okay breaking them down I call this the field-stripping okay I'm gonna field strip the second amendment and then we're going to reassemble it at the end to explain to people its exact meaning and purpose so this was going to be taking place at the cafe the cafe is located at 2011 Walnut Street xx and Walnut Street in Philadelphia it's free to attend check out more about it at Philadelphia dot Liberty on the rocks org stay Weathers folks we'll be right back [Music] welcome back everyone been listening to what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm couple more quick event announcements well not even just event but just happenings that are going on with me I was on the Infowars Nightly News this past week it was a really great opportunity extended to me by Liane McAdoo and I accepted it and I went on the nightly news on Tuesday evening it was a pre-recorded interview I did it Tuesday late afternoon and then it was aired Tuesday night January 20th at about 7:00 p.m. Eastern Time I think the interview went really really well I condensed a lot of information into the short amount of time that I had to be interviewed and the interview was essentially on the occult it was on my background in dark occultism specifically in Satanism it was on what Satanism really is what the tenets of this dark religion really are all about and how our society is completely reflective of the Satanic mindset we also got into what occult knowledge really is versus what people erroneously believed it to be because of what religion tells them that it is and I want to say something about that after I you know finished explaining about the interview we talked about occult symbolism and I gave a case example being the the Betty Crocker egg incident that I broke down in my demystifying the occult seminar and then we talked a little bit about solutions namely the understanding of natural law as the ultimate solution to the current human condition of slavery and how we have to understand the law of freedom that as morality increases in the aggregate in any given society the freedom of that society also increases proportionately and as morality decreases in any given society the freedom of that society decreases portion of Li that's the law of freedom that's what natural law is ultimately all about if people haven't understood that that's why we're in the situation that we are in we that they have learned nothing as far as I'm concerned you know if you haven't made the connection between morality and freedom yet you don't know what's going on on this planet and you don't know why we're in slavery the causal factors that have led to this condition so for people interested check out that great interview I thought it really went well I think it probably opened up my work to a whole new audience of listeners and I was invited back soon so I'll probably go and do a part two in the coming months and who knows where that may lead so I want to thank the Infowars team for inviting me there and you could check out that interview on my website in the news section it's also linked it's the third item right now under latest news so I was also on deadline live with Jack blood this week just yesterday Friday the 23rd Jack blood brought me on and interviewed me it was also a really a good interview and that will be probably posted live on my site within the next couple of days just as soon as Jack edits it and gets that up on his website so look for that in the next couple days on the one on earth is happening comm news section there are still what on earth is happening promotional t-shirts available as a free gift in return for a voluntary donation you can click the email link that's listed in the article at the top of the new section about the promotional t-shirts on the water on earth is happening comm website if you're interested in getting a t-shirt there's also a donation button on the left hand side of the what on earth is happening comm website if you feel that you've received value from the information that I have shared on both this radio show and on my website feel free to make a voluntary donation to help support my work so that I can continue this work into the future that being said there's also a fundraiser effort going on here on rbn right now our vn needs support from its listeners so that it can keep funding the work that it's doing and hosting all these great hosts here on this network if you are in a position to be able to contribute to our BN to help continue the network going please call 800 tall free eight hundred seven two four two seven one nine and you can make a pledge to make a donation to help out the rbn radio network so images for today's show are always listed with the podcast and they're also listed on the radio show tab of the website if you go to the radio show tab underneath the player for the broadcast you'll see images for tonight's show when the show is live only three images up there tonight they're all basically flyers for events the free remind three conference I have two Flyers out for that feel free to share them on social media websites or wherever else you might want to post them and print them and post them in your area and also the if your local to Philadelphia the third image is a flyer for my presentation coming up on February 10th at the Liberty on the rocks meetup group on the Second Amendment so those are the only images I don't have any images for the material that I'm going to be presenting tonight because I really I'm where I'm so busy working on other projects right now I haven't prepared a slideshow for this material I may do that at some point in the future when if if and when I forum formally present this material in the form of a condensed presentation right now I am working on a book and two presentations so I'm working on the second amendment presentation and I'm working on my presentation for the freer mind three conference which is going to be called the cult of ultimate evil order followers and the destruction of the Sacred Feminine that's my presentation title for the free or mine free conference and so those efforts have really been taken the bulk of my time therefore I do not have slides for this material as of yet again there may be in the future but right now now what I'm going to do is slowly unpack this material over probably many weeks there is so much to understanding this tapestry of mind control and how it works and again I call it an epoch eugenics operation a eugenics op that is being waged epigenetically it's being waged through the subversive subversion of consciousness to actually weaned and call the population to get the population to wean and call itself so that the controller's of this world and their order following dogs don't even need to do that themselves and it's it's working brilliantly actually it's going to take look there's so many things I want to say about this that I'm just going to gently ease into this topic because first of all I like like I said is the elephant in the room that most people don't even know is there because they've been living with it for so long okay they see this as something that is somehow normal okay they see this as just the way things are and that's because of the incremental ISM associated with it okay you know um one of the other things I wanted to mention before we even get into the topic of the mind control that is specifically targeted against women you know the the war between the sexes neo feminism as a eugenics operation I want to say a few things and this fits really hand-in-hand nicely with the concept of the divide and conquer agenda okay related to that Infowars interview that i did you see how many people come out and say absolutely ridiculous asinine things I mean you know from people who don't agree with Alex Jones on a particular topic or think that you know he doesn't cover things that they think should be covered said of them going out and becoming the alternative media that they should be you know they want to say people are shells you know I've been accused of this you read the complete asininity going on in YouTube comments which I don't even understand people who post alternative information even allow YouTube comments on their stuff and give idiots a platform to voice their total dribble you know we'll get back to this after the break folks and I'll continue with that line of thought stay with us [Music] [Applause] the cool science that we don't dare speak is wild between us it'll rip so we keep there's nothing wrong there's a cold of sighs welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm and I was talking about the clown's out there that you know because somebody doesn't cover something the way they want it covered or doesn't talk about a topic they feel as important or should be covered oh then they must automatically be some kind of a show or a disinformation agent or somebody trying to hold back the truth from other people I mean just grow up people I mean it's just such utter nonsense garbage you know first of all go do something yourself how about that okay how about that now no no no then everybody shuts up right quick you know is they can't be bothered to get involved in the great work now they just want to complain about somebody else who they don't know you know people talking about me like they know me trust me you don't know me you don't know who I am you don't know what I do on a daily basis you don't know what goes through my mind you don't know what I go through at all and people should stop trying to pretend like they do because I'm quite frankly tired of it I don't really care who's offended by that statement you know I'm not here to be liked I said it since day one I'm not your friend I'm not your leader I'm not your guru do your own research do your own due diligence and then go put the word out yourself now because that might take some time and effort in your life to do that you want somebody else to do that for you then you want to complain that they don't do it like you would do it well please by all means set the example and show me how it's done there are people like this or a bunch of morons I just I almost slipped and like let let loose with something that you know uh with bad language that would have gotten me probably in trouble with the network because that I'm on the brink of like just totally going off you know when I hear some of this garbage out there you know I have to really try to restrain myself because you know at some point I'm gonna let slip and let people know what I really think and it's gonna come out in South Philadelphia Street language okay because I'm on the edge but folks I'm tired I've had enough quite frankly you know and some of the biggest idiots out there are people who are absolute fake-ass Christians and will claim that they're Christians and they don't know the first they know not one iota of the meaning of the word you can wrap it in quotes Christian you know Christian in name only in name only okay they're nothing of the kind at all and they're a bunch of Know Nothings who know nothing about what's going on in this world because they know absolutely nothing about the occult manipulation that is working on their minds and then they want to have something to say about somebody who's actually trying to tell them about it from firsthand experience that has the game plan of their owners that has all the manipulation tactics of their owners and is laid it out for them to understand and they still don't want to understand how their minds are being owned and ruled now you're you're selling your children into slavery and you're a bunch of immoral people who Christ would have looked at at whether you want to look at that as an archetype we'll figure I don't care about what people want to say about Astro theology whether the person is real or not it's not the point okay whether the the actual man talked about in the New Testament is real okay that concept the Christ the Christ consciousness whatever the being the teacher the group of teachers okay the astra theological allegorical mythos of the christ whatever you however you want to look at it i don't care saying that energy would look at somebody like these complete fake christians and it would spit at them it would spit on them okay because they are doing nothing nothing to try to actually wage a war against tyranny nothing because they don't understand any causal factors and they've bought into this salvation it's ocultism which is where it comes out of salvation ISM comes directly out of satanic occultism all right and anybody that thinks that you're supposed to sit here let all the tearing and evil completely run them up and take over this world and all you need to do is believe on something and believe in a concept or an idea or a person that some externalized power or externalize Savior and you're not gonna actually take any real world action in this world you are part of the tyranny you are part of it and that makes you evil these Christians are Satanist and think that they're Christians salvation is embark occult folks directly out of the dark occult and all the so-called Christian morons out there who think that that's Christianity you're a bunch of children and more over than that you're evil tire you're even evil tyrant supporters you are the people who are supporting the tyranny in the world and they want to say God has ordained this government and it's it's trying to Mathare 'ti to the government to try to reel in all the evil of the world I mean you know what you are you're Nazi supporters that's what these stupid right-wing so-called Christians that are just nothing but absolute fake fake Christians and believe in salvation ISM you know I mean that they don't even understand how own their minds and souls are and they would have the nerve to put a label of Christian on themselves your garbage is what you are garbage okay and I'd like I said I'm coming out no-holds-barred because I'm done with people I'm done I'm done even talking about it nicely if people can't see how completely mind controlled and ignorant this race of Gollum's called humanity is in the modern world you're sick if you can't see it and you don't understand how religion is played into that and the New Age movement is no different all of them out there teaching submission teaching submission because of some absolute crazy what you know false notion of what karma is and they'll say oh well all this tyranny might be going on because of stuff we did in past lives as if there's somehow excuses all the evil that's going in in the world I mean yeah you have to be kidding me these people are children they've bought into utter nonsense complete false pseudo spiritual teachings and I told you where that came out of when I did the New Age BS seminar and all that material it comes out of the dark occult it comes out of Satanism dark occultists put out the whole salvations belief system they put out all this nonsense about waiting for extraterrestrial races that are going to swoop in here and save us and there's gonna be some big ascension you know they're gonna come down in there crafts and save us they've given us this completely false new-age garbage spirituality that has nothing to do with real spirituality they put that out through the loosest trust publishing house and other fake publishing houses to spread pseudo spiritual garbage into the population of absolutely ignorant naive slaves that are willing to buy that crap and then spit it back out for other people I'm just tired of it people I'm just tired of it man I'm tired of how ignorant this world is if it feels like it's an avalanche of ignorance that's out there it's an avalanche of ignorance and it's just drowning the people who have any semblance of what's really going on in the world so I just wanted to give that rant real quick before I move into the actual material for tonight because you know III pop my head into the YouTube page where my interview was that just to check out how many views it's getting and you just see the absolute drivel nonsense that is going on in the comments to a point where you know I course I don't go back and keep reading this garbage I mean seeing it once is too much you know you know you just want to say say let me just check in real here real quick and see how humanity is progressing and the answer is we're not progressing we're degrading further and further and further degrading and religion is one of the biggest problems with it you know and they can't understand that that's all you're believing in and a belief system that was invented by your enslavers dunce it was invented by your enslavers especially the Salvation assertion of it you know the other version is all a straw theop theology about the uncommon conquerable Sun Sol Invictus you know from the Roman Empire written by the Flavian dynasty and the Pizzo family you know the last Flavian emperors you know but they don't want to research any of that history you know no because that might involve knowledge we all need knowledge let's burn all the books in the world you know all we need is this one you know just like the good Nazis that they are you know they're no different than the Nazis were let's burn all the books we only eat our ideology you're a bunch of clowns you're clowned by your owners [Music] [Music] welcome back everyone we're listening to what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening dot-com just gonna wrap up you know my take on these religious followers these empty-headed religionists you know essentially commenting on something that they don't understand when somebody's trying to explain how a cult manipulation is accomplished in society and they want to say asinine things you know like you know I couldn't have gotten out of the dark occult you know there's and there's no such thing as reforming once you're that way you're that way forever you know it showed it just shows their sick worldview it shows their view of quote-unquote human nature which is a big segue of what I'm going to start talking about tonight and into the coming weeks you know how people are convinced that human nature is a certain way they don't understand the human nature is programmable and therefore changeable they they show they're completely sick twisted poisoned worldview about people's ability to change and that's why they're part of the slavery system because their mind is wholly owned by those worldview dynamics and as long as that worldview doesn't change there they are absolutely incapable of creating any positive change in the world certainly not by the sick twisted religious dogma that was given to them by their enslavers because that's where that came from okay that's where those elements of biblical teachings came from certainly the elements of the Neo Christian salvation astiz absolute Satanism and and if they don't understand that look I - I don't need to say anything else I was a priest in the Church of Satan I know who's putting out these agendas they don't period I was there from firsthand experience I'm trying to explain to you things that they told me that they were doing and one of the things that I have remained silent about all too long but I'm done with even trying to maintain any um niceties anymore because where this world is going is to utter hell we're already in hell folks if you don't understand you're in Hell now okay you don't know what's really going on you're not on earth you're in hell I should I should call this show what in hell is happening instead of what on earth is happening because there is no more earth anymore it's a hell world it's a hell planet okay and it's just people are too stupid to understand that we've put ourselves into a hell world we've created hell you know hell is something that doesn't need to exist we're building it we've built it past tense I should say it's these idiots don't understand they've been given a cage a mental cage and they're all happily living in it happily living in it saying my religious mental cage programming head cage programming is the best and it's better than all the other head cage programs that are out there you know it's their joke they're children there are children who is played on them like I said they're clowned completely clowned by their owners their owners are dying laughing at them it's just that they can't get the belly laughs out you know they're it's they're just choking themselves from laughter like I said I consider this show a comedy show because the the Satanists who run the world the dark cultists who run this world they're laughing at my efforts to try to get any modicum of understanding out to the Golem population these people are brain-dead they're incapable of understanding it's like trying to teach mathematics to a dog you're never going to be able to do it the capacity isn't there I mean that's really what I'm beginning to think you know that this that the effort is entirely wasted because we have a population of absolute dumbed down animals that are beyond animals most animals have more intelligence than most humans you know and I just think they don't have the capacity to grasp it that's how completely golem eyes they have become turned into an absolute flesh robot a golem this segues nicely into what I am going to be talking about as a dynamic of dialectics specifically the Hegelian dialectic which I've been trying to explain over the past many weeks that you do not need two sides to both buy into the lie the Hegelian dialectic gets is successful as long as only one side that you are trying to divide within the population takes the bait and buys into the lie then you can get that side to attack the other side and wage an ideological war even if the other side didn't buy into the nonsense and doesn't want a war I gave the example of the modern police state are the people who understand the police are mind controlled zombies you know robot zombie dunces who never read books who are just people who who have absolute mommy and daddy issues in their lives weren't paid enough attention to by their parents were given garbage parenting by garbage parents grew up with absolutely no moral upraising no moral upbringing don't care about right or wrong don't care about truth are empty-headed just sewage filled brains just empty heads you know it's eight inch thick bone behind the forehead there's no prefrontal cortex okay these are absolute cavemen idiots wearing a uniform you know because we understand how brainwashed and mind-control these morons are does that mean we just sit back and say oh well they don't understand what they're doing oh well oh god forgive them they know not what they do we should just let them run roughshod all over the population take all of our rights and kill us of course not so if one side buys the dialectic and they're going to see that people as an enemy that they're gonna go to war with what are we supposed to do lay down lay down in the street and die hardly and trust me that won't be happening least not it not here I'll tell you that much not in this not not in this population they think they're going to make that be able to happen and get that done and I'm telling you there's still enough real men in this world they're gonna physically fight back and I'm telling you they're gonna be unprepared for what they face when it starts they're gonna be unprepared for it they think they can do all your calculations and their actuarial studies but what they're not counting on is what happens when an animal gets backed into a corner and has nothing to lose they're not counting on that and they're gonna find out when that rattlesnake strikes so let's get into the actual topic of what I am intending to talk on for the next many weeks and that is the dialectic of the mind control that has been specifically targeted toward women in our society the first thing I want to say about this this war between the sexes that has been fomented by the Neo feminist agenda which is a eugenics operation is that I am in no way trying to further create a divide I am trying to bring awareness of how this tactical social engineering manipulation has gone to work against a significant segment of our population in order to attempt to heal the divide that has grown between the sexes not to try to further divide it that's number one number two if I didn't know a significant amount of the truth of this entire agenda from actually first-hand experience by being told that this was actively being done when I was involved in the dark occult not really understanding it then and as they say site is 2020 folks I was told so many things about what would be coming and I did not even understand what I was being told at the time because I wasn't really awake then I was in a sleep idiot like most of these other people you know it took me years of deprogramming myself to come out of that satanic mindset to even understand what they meant by certain things when they told when they use words like the Dead Eye I looked at them and just nod nodded like okay as if I knew what it meant because I I didn't want to say hey could you explain what you mean by that term that you're using why are you calling people the dead you know until I understand that was their name for completely unconscious human beings that they owned in control you know because they don't have any aspect of their consciousness developed not their thoughts not their emotions not their actions and therefore for all intents and purposes they don't have consciousness so they're dead they call people that dead the average human dumb human being I didn't understand what they meant by that till years after I left the dark occult just like I didn't understand how they were telling me that they were in charge of so many of these agendas that they're running now until the hindsight of deep study and wisdom that I gained later showed that to me they picked this up on the other side of the break folks stay with us [Music] welcome back everyone you're listening - what on earth is happening we're in the second hour of tonight's broadcast the topic for tonight is the elephant in the room as I like to call it the mind control techniques that have been specifically targeted toward women in our society fomenting the war between the sexes and the Neo feminist FA eugenics operation that is waged against both men and women again as I was saying in the last segment I am NOT attempting to further divide people this is not a divide and conquer strategy it is being this knowledge is being put out there on the table which I can no longer ignore or stay silent on because I want to try to heal the divide and conquer aspect that has happened in our society and it's probably you know going to be a paltry effort in that because so many people are infected by this virus but I have to try you know I wouldn't be willing to alienate or alienate a large portion portion of my own listening audience by talking about this very topic if it were not real if I didn't understand a significant amount of how this agenda works and exactly why it's put into effect and what they're looking to try to do as a result of it and if I didn't think it was critically important to understand how society in the Agora aggregate is being completely manipulated and controlled this has to do with human freedom and that's what this show talks about you know trying to become more free and to destroy slavery of all kinds and let me tell you something the Neo feminism agenda is slavery plain and simple now I'm going to talk about a lot of the think-tank groups and a lot of the occult organizations that it comes out of so I wanted to give that as a caveat I also want to say I'm not going to make this whole show meaning the whole what on earth is happening radio show not just this particular show about this topic anybody that expects that I'm going to make my whole radio show about one given topic any given topic in particular you're holding your breath and good luck with that okay this show is about eclectic topics you know a lot of people say oh I want I want them to talk about this more and more and more you know only focus on the natural law stuff only focus on the mind control stuff only focus on you know the religion as a deception no I'm going to cover everything you know I'm not going to make one thing the sticking point issue that that's all I talk about because then I'd be ignoring a whole lot of other important things I'm going to be covering a whole lot of topics coming up on future shows not only the Neo feminist agenda but Gunn I'm gonna go back into and go over gun rights ownership and the importance of I'm sorry gun ownership rights and the importance of gun ownership rights how so many other absolute milk-toast morons in other countries don't understand the importance of gun ownership how many New Age dupes don't understand gun ownership you know just because they've gotten you to accept your slavery and servitude and disarmed you slave boys doesn't mean you're gonna get that done here in the United States punks you're not gonna get that done you're not going to get that done without the enormity of blood that has never been seen on the earth before and I'll personally personally swear on my grave and on the grave of all my ancestors that I'll do everything in my living power to stop anybody from taking any guns away from American citizens you're not going to get it done okay so that's coming up on future shows I'm gonna do whole shows on the occult history of Nazism where Nazism came from and how deeply infected the United States is with both communism and Nazism these ideologies did not were not defeated they did not go away they they they rule the United States they shook hands behind the curtain and they said we can't conquer this land individually so let's work together and we'll sort out the spoils on the other side of the conquering let me tell you something folks if you don't understand that Nazism came directly out of dark occult ik belief systems and came out of directly from dark occultists themselves you have no idea what that you think that that's a political ideology you're a baby child if that's what you think a naive child thinks like that because Nazism came directly out of dark occultism and that's gonna be a huge topic that I'm going to cover in depth in the future we're gonna get into all the people and the groups that were responsible for that the the rising of some of those ancient occultic belief systems in the modern world I'm also going to put out a solution tactic that I call maven targeting I think this is also a phrase or a word that I've coined going after the influential members of a social dynamic or a familial dynamic directly teaming up on them to try to change their mindset and then they're the people who hold sway and influence with other people of that social dynamic you know that's what needs to be done so I'm not gonna make this whole neo feminism agenda the bulk of my work this isn't gonna become a show that this is all I talk about we're all I take calls about it's gonna be a series on this of the next many shows that I do and how long will it take the answer is it will take as long as it takes that's it I will unpack it in my time it's going to be like a stream of consciousness unpacking because again I don't have it I have a general outline but I don't have a formal presentation that I am following as I was when unpacking the what on earth is happening information or let's say the you know occult mockery of police or a cosmic abandonment you know these are full full-length formal presentations that I worked on and and gave publicly and had slides for this is still in its formative stages of being outlined and you know this is something that I'm fully waking up to myself over the last probably four years of my life because again hindsight is 20/20 you become more and more aware and you understand how a lot of these agendas are working and there's many people who are doing good work talking about this this particular topic you know so the first thing so those are the caveats that I wanted to get out of the way before we really jump into things okay so again this material is gonna take as long as it takes I will take as long as I need to to get through the material that I want to cover on this topic and you know we'll take calls on it as well and questions and let people you know bring up their their comments on this topic and you know they could even flesh things out with me and you know ask me my take on certain things as questions about it to clarify okay so the first thing to understand when it comes to this as I've said already and I will repeat because it's worth repeating in any dialectical manipulation only one of the sides needs to truly buy into the lies that are being propagated to try to bring about the outcome that's desired that's what the head galleon dialectic is you're going to polarize two sides to try to bring out a predetermined wanted outcome when if you didn't create divisions and fighting you would not be able to get that agenda through and it's often done through incremental ISM and this is what what I'm calling neo feminism has worked through now that one of the first things I think that we should do when opening up this area of discussion is hoping to people understand what I mean by neo feminism okay as opposed to classical feminism so when we say the word feminism we're not talking about one thing that's the first thing okay many people want to say my view of what that means is courage the correct one you know that's like saying what you think Christianity is or what you think the occult is is the correct definition many people have varied perceptions of that so we need to be clear about our definitions first we'll pick this up on the other side of the break stay with us you're listening to what on earth is happening [Music] [Music] today welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening dot-com we are talking about the neo feminist agenda and how it is a an epic eugenics operation this is a new term that I am coining I believe for the first time it is eugenics that is based on epigenetics epigenetic eugenics okay in other words eugenics waged through mind control getting a population to call itself by buying into dialectical belief systems and doing it through epigenetically pressuring the species through things like food media the destruction of moral values you know radionics pollution of the water supply you name it I mean so many different ways and we'll be talking about all of those methodologies when we get into this deeper but before the break caught me I was talking about the definition of feminism in most people's minds and many people have different definitions for it so what I wanted to do is to try to clearly delineate what I am going to be talking about which is called neo feminism or what it's just what I'm calling it what I'm labeling it that's what I am choosing to label it okay you could call it socially engineered feminism alright you can call it really whatever you want as long as you understand what it what I mean by it okay so I'm calling this eugenics operation neo feminism and I'm delineating that clearly from what I would personally call classical feminism classical feminism would be simply women wanting equality under natural law okay being treated with fairness I have no problem with women being paid the same amount for the same job that a man would do okay that's not what we're talking about all right all right being treated as an equal when it comes to rights is what I would call classical feminism and I have no issue with that at all neo feminism is something altogether different and we're going to be getting into what it entails okay so we're it's like we would delineate between classical conservatism conservativism or classical liberalism versus what we have in the world in the form of neoconservatism can conservativism and neoliberalism the neo cons the Neo lips okay well this is that those divides are just as large as the divide between what I would term classical feminism and neo feminism I would say this divide between the two forms of feminism we're talking about is even bigger okay - they're worlds apart absolute worlds apart so what the Neo feminist agenda has done is it has sparked off a war between men and women in society it has created androgen II within our society to a large extent and it has led to the direct manipulation of both the female mind and the male mind it has wed women to the state in a very big way it has destroyed the moral fabric of our society it has destroyed the value system of our society it has largely put people toward a value system of only thinking that money is of any actual value it has destroyed the family familial dynamic the family dynamic the familial dynamic whatever you want to call however you want to word it it has demolished education it has demolished true parenting you know we didn't even have great parenting as it was but it was better before this agenda even came in and it has destroyed all the more it has led to the enormous rise in moral relativism in our society and let me tell you something folks the Neo feminist agenda has come directly out of Satanism directly from the dark occult and Satanism if people do not think that this is a satanic agenda they're fooling themselves they're kidding themselves now I'm telling you directly from working with the Satanists not only did they say that they were going to be waging ideological warfare against the public through putting out all kinds of nonsense spirituality pseudo spiritual belief systems that were going to be wrapped under the banner of the New Age movement because they own these publishing houses that put all out all that work they also said we are going to foment through androgen II an upcoming war between men and women the war between the sexes that isn't going to be a shooting war it's going to be an ideological war that's going to put pressure and press society in certain ways that they're going to become more easily manipulated and they've done it they've done a masterful job of it because when these occultists say that they are going to do something they follow through with their will and they get it done because they're on the same page they are united in dark care as I've talked about many times they care about getting their agenda in place and they actually put their will behind it they put their mind behind it and then they get it done unlike us who sit there debating on whether this person who we're gonna sit and listen to instead of actually become involved in doing something in the world and helping to change other people's minds is genuine or not or whether he's a shill or whether you know because he runs some advertising oh you know he's owned by corporate Overlord masters or whether because I have a couple of skulls in a case in my in my you know work area here by my computer to remind me what should I be spending my time doing because life is the time of life that we have this spend is limited and the skull simply acts as a reminder that you are mortal and you will pass from this mortal world at some point so you know when I feel like getting up from this computer computer doing the work that I know I need to be doing I take a glance over there and I say you know maybe I need to get back to work you know because I've given up my life to actually do the great work instead of that the complete idiots that are out there looking to somebody else to do their work for them and saying oh he might be a show cuz he doesn't talk about this and not just shut up morons because you're the shells that's what it really is you are the shells if that's what you do okay you don't have to be paid by anybody you're just a useful idiot doop it doesn't understand what the great work is because you're not doing it you're not doing it and people want to make stupid asinine comments about oh he's wearing some kind of a satanic emblem it's called the seed of life dunce you know it's sacred geometry that represents the generative principles of creation in other words how we actually create reality through what we believe and then put into effect through our actions you know what we've accepted into our minds I'm not shouldn't even use the word belief through what we know through the knowledge we've come to understand but you know again it just betrays people's worldview and you know this is a big part of the reaction to the Neo feminist agenda that I'm going to get into but you know a lot of people have seen how manipulatable women have become in society they've seen that you know their value systems have just plummeted and into an abyss and then they want to react by thinking that that's just the nature of women and all just women are just evil you know and that there goes the poison worldview you know oh there's this is just the nature of people and they never want to talk about social engineering you know they never want to talk about the wider societal engineering through mind control that's going on in this culture now it's just that's their nature we'll pick this up on the other side stay right there [Music] [Laughter] welcome back everyone we're listening to what on earth is happening here on Republic broadcasting I'm your host mark passio my website what on earth is happening calm you know we're talking about in the unfolding of the explanation of how this neo feminist agenda works what it is and how it has really driven a wedge in society between men and women a lot of people will react and say well that it's just this is women's nature you'll hear this a ton in people who are discussing this and I would say that this is a complete lack of understanding this is absolutely incorrect wrong reactionary and immature and naive and it shows how little some people have actually studied the causal factors of what's going on they have very little historical knowledge you know they're just reacting from a visceral point of view and there's nothing wrong with you know getting angry there's nothing wrong with being vitriolic about what's going on but get your grammar right first you know and understand causal factors first you know before just spitting vitriol out there and you don't even have knowledge to back it up you know that's a belief system this whole thing about human nature as soon as I hear someone use the words human nature I become immediately suspect of their knowledge level let's put it that way soon as I hear somebody say that's human nature almost immediately I start thinking of them like here's a person who hasn't done their homework fully they might have bits and pieces of the picture but they haven't figured out what human nature really is because if they did they'd never blame behavior - human nature behavior is largely socially engineered except for the few people who have come out of the mind control of that social engineering and their behavior is not owned and directed by that manipulation the vast majority of the human species mind is however and I would make the argument that many many more of a percentage of woman's mind is still in that dialectical manipulation and I would say the young women of our society are taken all the more and it's becoming more and more blatant and apparent to anyone who's paying even a modicum of attention and again many people will be offended by these statements I don't care I'm not interested in whether you're offended or not I'm interested in telling the truth about what's going on as I understand it and I do understand it very well ladies and gentlemen you can get as offended about that as you like I understand it from a perspective that most people will never experience in their lives from the people who are actually putting this into effect so you can ignore my words and think that you understand what's going on and that's fine I don't tell anybody they have to accept what I'm saying but I'm going to speak it and no one's gonna stop me from speaking it short and put a bullet in me and like I said before that won't even get it done because you think I haven't vowed to come back here until slavery's ended on this world then you really don't know who I am then trust me nothing's stopping me because I have a will that isn't owned by any earthly intent or any earthly you know faculties it is preternatural is directed by the Creator it's not directed by any three-dimensional elements so good luck trying to defeat that that's what directs my will you know and believe me every day is a battle to crawl out of the bed in this dark world surrounded by total sickness and ignorance everywhere you turn and look and I'll continue to do it anyway because you're dealing with a will that is not of this planet and that's what other people have to develop and allow to guide them most of them aren't there yet because they're too afraid to die and they want to be comfortable you know they're too worried about what other people think of them they're too worried about their creature comforts you've got to be willing to give it all up you want to make any change happen in this world so the fundamental problem that I think people have to look at first when looking at this dynamic of the mind control of women is to recognize I'm putting this out there day one okay this is not the nature of people that we're seeing folks if you believe that you're part of the problem you've bought into the poison world view that the Satanists and dark occultist and mind controllers and social engineers want you to believe in because you're not doing anything to heal that dynamic if that's just what you think that's just like saying oh this is they're just all primarily psychopathic you know absolutely not the case they're dealing with unimaginable amounts of programming that have been specifically directed at them since the minute of their birth now does that absolve somebody from the bad behaviors that they're conducting no I'm not an apologist for humanity being so spiritually weak that they've accepted all forms of mind control I said that from day one of this radio show that I am NOT nor will I ever be an apologist for humanity's bad behavior it's an influence you still have free will it all begins and ends with a choice you're putting the effects of natural law into place consequences don't just happen they are caused the underlying causes is what we think that leads to our behavior in the world then natural law works upon that and brings us the consequence consequences of those actions and people still don't understand how that simple dynamic of consequentialism or natural law works they still have a problem understanding it they can't understand it because of the language you know that they think natural means that Darwinian natural order you know we'll think of it as spiritual law then then they have a problem with that because half these morons are atheists you know and they're stuck in the scientism religion they don't want to understand there's a higher power that's directing what happens based upon the behavioral decisions you make and you're not in control of those consequences you're in control with the choices that's what freewill is that was the gift the creator gave all the beings the beings with the capacity for holistic intelligence in this universe and you know what we're doing with it we're totally squandering it and stepping on it and spitting on it and throwing it on the ground and trampling it that's what we're doing with freewill because we want to give over our personal responsibility to somebody else to do our thinking for us you know we want to do what's comfortable instead of what's right is most people have become garbage that's not our nature but that's what we've chosen to become just like the manipulated mindset that the vast majority of women in our culture are in isn't their nature it's what they've chosen in the level of spiritual weakness that they've been raised in and manner this is a very same way not absolving them by any stretch of the imagination and they fall for tons of manipulation and you know what one of the things I want to say besides helping people to understand this isn't the nature of the female it's not human nature it's mind control it's social engineering it's the current conditions that have come about as a result of the social engineering that's been done to humanity they've made this like our nature that's why so few people can understand that this perpetuation of these social engineering dynamics through countless generations has slowly worked our nature to be like this it doesn't mean it can't change you know what's really inherent nature isn't changeable that's why I don't want to call it human nature it's the current human condition there's a difference between the current condition and human nature we've talked about that and I've talked about it in my natural law seminar as well I recommend people go back and check out my explanation of that with slides there it's a fact of the matter ladies and gentlemen an absolute fact of the matter that most of the order followers who are in fact the creators of the dark new world order the creators of the slavery system here on earth are men the vast overwhelming majority and here's another thing that you're going to hear a lot of in this series over the next many weeks and once again get us offended about this as you like you know crying your milk beat your fists against the desk bang your head against the wall I don't care I am going to use and make generalizations in the explanations that I intend to help people to understand generalizations must be used if you can't handle the concept of most were almost every or the overwhelming majority shut the show off right now we'll pick this up on the other side of the break stay with us [Music] [Music] Oh [Music] welcome back everyone you're listening - what on earth is happening here on Republic

Broadcasting I'm your host mark passio my website what on earth is happening calm in the last segment I was saying how the vast overwhelming majority not you're gonna hear me use that probably about 10,000 times that phrase when I go through this series okay and it's because there's no other way of saying almost all the vast overwhelming majority meaning that the only ones who are not affected like this are a tiny percentage okay so the vast overwhelming majority of order followers who indeed are the creators of the dark new world order as I call the slavery system that we're already in it's not being built it's already here it's already built it's just a matter of how much are they going to tighten the thumbscrews you know that's all it really is you're already in it the vast overwhelming majority of the order followers who are responsible for the building of this immoral slavery system that we are living in are men vast overwhelming majority I would say probably well over ninety five percent if not more of the order followers who have basically done this to our society our men however okay in what we talked when we talked about this in the non-supportive dominators and in the order followers series how many women interface and interact with these men on a daily basis throughout their lives just think about that for a minute and instead of being in the role of moral nurturer which women traditionally played throughout human history they have grown up without being raised with moral values and therefore they're sitting there and thinking it's totally fine what all of these men are doing following orders for a paycheck you know how many of them just love what they're doing think it's so necessary and just like all the other supporters of statism and slavery which is slavery you know know that you'll ask them for the reasons why do you think it's necessary that they do a work they're protecting us there would be chaos without them doing what they do advocating for violence and coercion all the time no imagination and there we have the influence of the school system the indoctrination system and you look at how the school system has been taken by these think tanks that I'm going to talk about and you study how that was done and how Nazis and communists came together on that plan and took the schools of America first of all even putting schooling in the hands of the government through public education funded by tax dollars it was a huge mistake in the first place and people you know will say oh we should be spending the government should be spending more money on education government should be involved in education at all first of all there should be no government let alone having government is ban of enough idea then you want to give it control over what children learn I mean god help us folks I mean what what a brilliant idea that is let's let these totalitarians in the form of Communists and fascists and Nazis teach the minds of our children I mean just absolutely great great plan yeah it's called it comes right out of the Frankfurt School of Marxism and and the plan of the fascist the Italian fascist Antonio Gramsci you never even heard of these people or were these think tanks half the people out there because you don't read books you know study the Fabian Society that's incrementalism you know Graham she's plan of a long march through the cultural institutions to bring in socialism and eventually communism and fascism into you know all of Western culture and people are helping them do it all these absolute amoral trash teachers that are running the education system purposely indoctrinating the children because you want a paycheck teaching them outcome based education they came right of the Prussian educational model that that brought the the Nazi regime into manifestation through how they indoctrinated their children in their school system and then taught the future generations of what would have been the future fascists of Europe in the form of the Hitler Eugen in the Third Reich all outcome based education the same schooling system was taught by the Soviet communists all comes out of a perversion of the Trivium of the ancient world you know people don't even understand that was all imported over here to take the minds of our children to start with waging a war between boys and girls so that would continue later in life indoctrinating them mentally breaking the boys when their real young teaching the girls to worship the state teaching the girls the only were worried about you know appearances are only worried about money as a value system and teaching men to go along with that corporate fascist rule you know we got to groom these people for being more role model citizens and good corporate slaves teaching them training and obedience that's where it starts folks that's why so many people are so retarded in our society there absolutely retarded because their minds were molded by a fascist and communist plan of subversive indoctrination from the minute they pop out of the womb waged incessantly in the school system that's why they call it a school a big gaggle of fish going along with each other you know follow the leader pack mentality herd mentality like one getting them to school so it's like one entity that you could easily control as Michael - sorry on says one neck in one noose you know that's that's how they're looking to collectivise us how many women in society support order followers they think it's so wonderful hey like I said folks I don't need to go any further than home okay let's talk about my own family I'll tell you an anecdotal story okay cuz I like to make it personal and I like to target people and talk about people who I know I'll give you plenty of examples but here's just one my own mother okay a old friend of mine you know who I haven't seen in a while comes to visit me one day and my mother stopped by my place as well she didn't know he was even gonna be there I won't mention names and um you know me and him were talking and catching up and you know she comes in and you know says oh hi good to see you haven't seen you in a long time you know and he has a son and she says to him you know how's her son doing how's he been he's e a single you know separated parent you know divorced parent the worst from the birth mother of his son and she says how's your son been and he says well he's not at home anymore he joined the Air Force okay so became an order follower and the first words out of my mother's mouth is isn't that wonderful you know I mean I just want wanted to like you know go over into the corner of the room sit down in the chair put my head in my hands and weep for a few hours because that's wonderful it's absolutely wonderful that you turn the child over to the state for further cult indoctrination and order following what awesome and this is what I mean and that's part of what I'm talking about and don't get me wrong a lot of guys will think the same thing I'm just saying it's overwhelming in the female population the support of order followers they think it's so great at least hey 99% of the women I'm around on a daily basis do I mean so few women who I know have their minds out of the matrix so few women you could just think about how many women are involved in the truth movement speaking the truth we'll talk about that on the other side stay with us folks we'll be right back [Music] [Applause] [Music] [Music] [Applause] [Music] [Applause] there's a community science don't dare speak as wild with lead-ups it'll rip so we keep pretending that there's nothing wrong it's cold of sighs welcome back everyone you're listening to what on earth is happening we're into the third hour of the broadcast for tonight I'm your host mark passio my website what on earth is happening calm tonight on the show we're talking about the neo feminist agenda as a eugenics operation the type of mind control that is launched as part of this agenda that specifically targets women in our society and foments the war the ever increasingly belligerent war of division between the sexes and I was talking about how many women in our society support order followers because they've been taught somehow that that's an epitome of masculinity and that's how men should be behaving you know they should be authority figures you know and that government is good government's looking out for our interests it cares about you you know as an entity as an institution the people in it they're all good-hearted caring people the police all have great intentions oh they're just good people you know I just completed an entire series of shows on order followers and how there's never been an order follower in the history of the universe that has been a moral human being get as offended about that as you want blanket statement 100% eternally they are antithesis of each other they are polar diametrically opposed polar opposites for someone to be a truly moral being they cannot follow orders they must exercise conscience the definitive knowledge of the difference between right and wrong behavior and exercising conscious is taking willful action to choose right action over wrong action once the definitive difference between right and wrong behaviors is fully understood an order follower never engages in that judgment process ever that judgment process is wiped out its abdicated they say to someone else oh you tell me what's right and wrong and then I'll perform the behavior and by definition if you are acting in that capacity you are engaging in immorality now you won't hear Christians talking about that though these fake-ass Christians you won't hear them talking about that you did they're pieces of garbage is what they are Christians and name only you want to talk about I have to believe in Jesus salvation ISM garbage that was given to you by your satanic masters but you'll never talk about the immorality of order following no because you order following as a virtue just like your garbage religion you know just like all the other garbage religions out there like Islam and Judaism and Hinduism and Buddhism and all the religions it's all garbage it's all there to hold you back from truth for all the dunces that haven't figured it out yet the New Age movements one of them modern science is one of them so-called science which is nothing but government backed grant money funded scientism it's gonna find the results that Big Daddy government who gives the grant money to do that so-called science once out there money's the biggest religion in the world folks the New Age movement is right up there with all the other religions just another cul-de-sac so Christians and named only Jews and named only Muslims and name only Buddhists and name only 99.99999 percent of them are actual garbage human beings that wouldn't know one thing about morals haven't ran over them like a freight train and these are all the people in society that would be some of the first to tell you following orders as some kind of a virtue and people wouldn't be raised like that if they had any kind of decent parenting and we're parenting used to have a nurturing influence was in the feminine influence within the family not anymore women want to be men now you know they said one of the big pillars and tenets of neo feminism is women are men there's no difference between the sexes we need to blur all the difference between the sexes and cut out any kind of traditional classical roles that women or men played in society women as nurturers men as protectors we can't have that we have to blur all of those you know natural tendencies bring everybody into an androgynous glop because they're easier to control that way that's the reason it's done let me tell you something folks I was involved in an organization firsthand as a member of the Whitehall Church of Satan in Whitehall Pennsylvania and I'm telling you one of their main agendas in that satanic organization was the propagation of androgyny masculinization of women feminization of men emasculation of men and hyper-masculine of women to bring into to bring people into an androgynous pool from which they could be morally more easily directed and manipulated and if you don't think think-tank mind-control is behind that and the occultist that work through these think tanks and these satanic organizations you don't know what's going on on this planet at all and all the people who want to cling to their release just garbage dogmatic belief lies systems okay buying in all those dogmatic lies about you know what religion is telling you is morality they have no idea about the occult they're some of the most asleep people in the world they don't understand how Satanism is run and works and operates in every institution in this society and I'm telling you that's what's also behind this neo feminist agenda you've got to look into the involvement of all these things tank mind-control organizations the Tavistock Institute of human relations in London is one of the biggest ones to research and look into and understand the agenda that they're pumping out there and why they want this neo feminist agenda broadcast everywhere they need to break down of the familial dynamic they need the destruction of the strong man in society people want to whine and complain about patriarchy the Neo feminist agenda wants the destruction of the ability of men rising up together to stand up against the tyranny of the state that's one of its biggest overarching agendas and most women are to mind-control to be able to see that because all they hear are the things that they're being promised it's like all the idiots that voted this clown actor Obama into office oh he's gonna give us a phone wha hey let's give up all of our freedoms to get that phone that's it's so great what he's done with stolen money he's given everybody free phones with stolen money taken by coercion and violence isn't that so wonderful he's such a wonderful man he's a great actor I'll tell you that much great actor he pumps out the N L pity the neuro linguistic programming pretty well he doesn't design any of that stuff you know he could act it out pretty well he could speak it pretty well I'll give him that let's look at the dynamic of how many women truth speakers are out there and folks look I am NOT on the attack I am NOT trying to set and once again I said this from day one I said this from a few weeks ago all right I'm gonna be labeled a misogynist because of what I'm talking about here on the air over the next few weeks I already get it I get that and I don't give one damn how anyone perceives me I don't care about how I am perceived my job is not to be a good PR person for myself my job is to get up here on the airwaves and speak the truth stay where those folks will continue this analysis on the other side of the break [Music] [Music] welcome back everyone you're listening - what on earth is happening here on Republic Broadcasting under host mark passio my website what on earth is happening calm I'll decide depending on how this segment goes whether I want to go to the phones or whether I want to continue to delve into topic material so in the last segment I was you know talking about some of the think tanks that have been involved in the propagation of the Neo feminist agenda for purposes really of eugenics when it all comes down to it this is what this is really leading to and you know I mean if we're going to look at like birth rates that are dropping and just about every you know civilized country on Earth you know we'll look at socio sexual dynamics going on in both Western countries and the Far East this is all coming up on future episodes I mean you have to understand how prevalent these think tanks influences throughout the world people who haven't studied the Tavistock Institute of human relations and its mind control techniques don't even know what's going on at all and most people have never heard of it Chatham House and Wellington House out of England you know their connection with the British crown and the Royal Institute for International Affairs which is directly underneath the crown you know that most people will have never heard of these organizations you know you look at the social engineers who were directly tied in with those groups like Edward Bernays and Horace Mann and John Reese you know and walter Lippmann and Huxley Brothers Julian Huxley Aldous Huxley carroll quigley you know what about the behaviorist that worked with all of these people john b watson BF Skinner ivan pavlov how about a huge behaviorist in the field of mind control through indoctrination wilhelm vote you know look up look up votes Verte work when it comes to when it came to bring in the Prussian model into the United States the outcome based education system in the US his connection with dark occult orders like the order of death Skull and Bones how about the Rockefellers Foundation involvement in all of this the Rothschild dynasty's involvement with it through their ownership of publishing houses all over the world the Council on Foreign Relations as a think-tank propagating it and then you get to what I would say it might be the high the top of the hierarchy when it really comes to the propagation of eugenics period and namely the Neo feminist agenda of how the Neo feminist agenda is propagating this what I call epi eugenics operation and that thing tank is known as the Club of Rome that's directly works directly with the Vatican and I mean you're connected him with some of the highest levels of Satanism and the dark occult right there first of all let me tell you something folks when I was involved in Satanism the organization that they continuously said that they wanted that they looked at me as ideal for was the Club of Rome and that if I work to be worked up into higher levels of the the hierarchical network of dark occultism the Club of Rome is probably what I would have been groomed for and I'll be very open and honest about it folks back then I was a eugenicist when I was a Satanist my ideology was that the people who rise to the top of the pecking order in human society should rule humanity and call the population I wasn't about like I say I wasn't about slavery meaning I don't want to see direct human slavery but I thought undesirables needed to go in order to improve society and that's eugenics that's saying we as a more enlightened group of people get to decide who lives and who dies that's what eugenics is so I was a eugenicist the idea that it's a tough decision but somebody's got to make it and these you Genesis or who own and control the governments of the world own and control the police department's own and control the military own and control the banking system own and control the education systems so-called education systems you look at their ties to other orders like the Fabian Society incremental socialism bringing the idea of the Marxist revolution through the long cult march through the cultural institutions put forward by the Frankfurt School as well Graham she's plan study read about him they recognized the the idea of the the workers rebellion you know where workers of the world unite wasn't wasn't gonna bring in communism into the world it had been tried and it didn't work the way they had originally envisioned it so they said well we need to take over political institutions we need to take over educational institutions we need to take over the media we need to take over you know Hollywood and moviemaking we need to take over you know military and police forces everything we need to especially get our point people into educational institutions like universities now go on the Fabian society's website they have a whole section for women to propagate the Neo feminist nonsense now there's no link for men to do it you know because they're trying to sell this to women they're on the open about it folks it's so blatant they're out in the open with it because they know that the way to destroy a society is to get the minds of women you get their their mind first the men and children follow Hitler understood this perfectly he set it out in the open women don't even understand the power that they have to influence the minds of the next generations and there is all the example that you really need to understand how is the world right now well it's a very good chance that largely through who they decided to breed with and the value system they decided to teach to bring to their children instead of a true nurturing value system that is based on the non-aggression principle it's an inescapable conclusion that women have largely made the world the way that it is you know like it said in the movie Fight Club we're a generation of men raised by women almost all single parents in the world are women I'd say 98 to 99 percent of them are very very few single fathers raising children except in the examples were women pass early earlier than the man these think tanks influence cannot be overstated and most people know nothing about any of them how many people have studied the club of Club of Rome or the Fabian Society or the Tavistock Institute of human relations or social engineering in general or behaviorism in general a paltry handful because they don't understand mind control and they don't understand how mind control is directed by dark occultism it's ancient dark occult exciti and most people just want their comfort level and they want to say I don't want to know about that I want to look the other way because they're stuck in a satanic mindset folks that's where this ultimately comes from it caught it grows directly out of Satanism The Satanic mimimi mindset the mentality of what am I going to do for me today all day every day I'm not gonna look at any wider dynamics go in the world I don't care about any of that mimimi all day every day stay where this folks will be right back [Music] welcome back everyone you're listening - what on earth is happening I'm your host mark passio continuing with what we were talking about in the last segment you know I often ask the question where are the numbers of women coming forward and speaking out against the immoral system there are several but if you look at the totality when it comes to how many people are really truth movement activists and teachers and how many women are involved in the truth movement in general it is probably a minimum of a ten to one ratio maybe even bigger maybe twenty to one it's between ten and twenty to one easily maybe larger than that I don't know and I mean what does that say about the value system that most women are embracing the vast majority I don't want to make a blanket statement there it shows you how deep the mind control and fear propaganda goes when it comes to the entire feminine portion of our society clearly they are being targeted to love the state to insist upon the state's protection to think that the state is necessary and this all comes about as a result of getting the children away from the family this is that this is what even classical feminism did very effectively they didn't want women in the workforce decades ago to put them on equal playing ground with men they wanted that so that there would be no one at home in a family dynamic so that the family would be forced to turn the children over to run education and there would be no nurturing influence in the home to teach values to the child the state would teach its values to the child in doing that you you're also going to diminish work value by doubling workforce you know that that was another thing so you know that they could pay people less and you're creating more competition within society further pitting men and women against each other and you're creating a lot more corporate consumers at the same time it had the effect it it worked on multiple fronts for the corporate masters and that's all they're about doing they're about creating the inauthentic man and the inauthentic woman whose value system is the dollar and that's all they think about all day long from the minute they get up til they go to sleep I'm talking about men and women here now but I mean you just think about look folks just do this as a social experiment hi here's my challenge in my homework for the week go and try to talk to any young woman like a teenage girl and just even try to see what type of a mindset that they are in how they have been culturally conditioned the the type of pop culture that they are involved in exposed to their entire mindset of how they they talk to each other what they talk about just try to put yourself around that for a day if you can and just absorb the mentality because most people won't won't do that or don't have access to do that but you do it and you tell me you're not her if eclis appalled I'll call you a liar right to your face I challenge people to just try to do it and you'll see what families so-called families are pumping out there because they're just as asleep the parents of these people if you want to call them matter just as asleep I want to know why people think there aren't more women in the truth-telling world you know I mean I I tried to make a list one day of you know women who are really on the right track when it comes to understanding things holistically it's a handful many of them are afraid to speak to they're afraid to come out and speak because something put in their notion that people aren't gonna be willing to listen to them because they're women I mean it's that's of nonsense it's a ridiculous notion anybody with a mindset to understand partially understand what's going on in this world would be welcome to hear more women speak up on this on these issues not only that but get in the face of men who are ignoring these issues or who are supporting this garbage immoral system of slavery that's the whole problem is that women aren't up in the men's faces in their lives and saying don't partake in this evil I don't care what it would cost you in the way of a paycheck you know I don't care about whether there's going to be food on the table if you're doing something that's immoral and it's the whole concept of a a mob wife you know that stands by her man and dole doesn't ask questions don't ask questions about the heads that I bust every day honey you know it brings food it brings a paycheck home so we could put food on the table and clothe our children yeah Rudolph has said the same thing running the Auschwitz camp he was a wonderful moral man who loved this family don't you know these people are all garbage who think like that garbage you're garbage if you're doing those immoral actions and you're garbage if you're supporting those immoral actions and get us offended about that statement as you like it we'll never make it untrue the problem is they got the children out of the parents guidance they taught the parents only to value the monetary system and that was the total annihilation of moral values destroying familial dynamics destroying proper parenting so-called parents who are actually just garbage amoral human beings raising so called quote unquote raising they didn't raise anything raising children with absolutely no moral values teaching them money's the only value system to be valued let me tell you something folks again I don't need to go any farther than my own family this is how my family thinks they're not exempt from it I was raised by immoral people with who had really no value system I became the person that I am in spite of that in spite of that not because of it my family didn't raise me strangers raised me from the dead strangers in many cases people have never met who took the time effort and care and willpower to preserve their wisdom through words in some format in some media and put it out there into the world because they cared about making the world better not one member of my family was responsible for raising me from a state of immorality to a state of morality not a one zero strangers helped me to do that my willpower and the will of strangers did that who actually even shouldn't call strangers they're my real family they're my brothers and sisters in truth up two up top folks you know let's make it real personal let me tell folks I thought I don't know if I ever mentioned this on the air before so I may have but if not here goes my own mother said to me one day you know the same person who said isn't it so wonderful it's well what's so such a wonderful thing my buddy some went into the Air Force and became an order for dropping bombs on people for corporate overlords and and dark occultist overlords it's so wonderful this person says the same thing to me in the past when I think about what you could have become versus what you did choose to do with your life I'm disgusted and appalled my own mother looked in my face and said that to me one day once again I don't harbor any ill will will or resentment you know I could just say that truthfully as it as a statement that happened you know because I understand how totally unconscious and dead a person like that is and whatever you know but you know mene mene Jay Parker often joke around and say you know she'd probably been real happy and would have said isn't that wonderful if you stayed with the dark occult Satanist that I was with I could have been a senator by now maybe you know I could have been a senator getting a lot of eugenics legislation passed through you know and stealing from the American public and I would have padded a nice you know bird's nest for myself and you know I would have been it would have been so wonderful don't you know you know but again you have to look at the level of consciousness than other people are at honestly I could let that go we'll pick this up on the other side folks you're listening to what on earth is happening here on rbn stay with us we'll be right back for the final segment [Music] today folks we have to break on through to an accurate understanding of the labyrinthine agenda that is neo feminism that has grown directly out of globalist think tanks mind control institutions and ultimately from Satanism and dark occultism itself it has led to the emasculation of men in society I mean there's barely a man out on the street that I see with hardly any bass in his voice anymore you know who God forbid if it does come down to a physical shootout you know these are gonna be the men they're gonna be out there I mean particularly in cities it's very very bad because they're very well behaved emasculated animals you know they are well trained and broken pets of the state who think that obedience to Authority is a virtue they love being part of the whole corporate structure they think that's somehow representative of responsibility in life you know when nothing could be further from the truth what you're really doing is compromising your values by taking part in that system constantly and most people won't say most men won't say no to that lifestyle because most women want that lifestyle let's just call face it and call it exactly as it is folks because they've been groomed since the time that they were out of the womb to think of money as the main value system and look once again let's bring it right back to my own family there's not one woman in my entire family that I could speak of that doesn't think that money is the most important thing in the world that's what most women are groomed to one that's their value system how many people care about truth we did it we did an experiment where I think it was like I can't remember the exact number but it was like 2% of people or 3% put down that they cared about truth in life out of you know what things do you actually care about give me three things three words that represent something you care about and hardly anybody ever puts down truth well of what they want in life knowledge forget that you know wisdom knowledge forget that you know I want success me me me I I should bring into this the slides from the natural law homework results the natural law seminar homework results because they were highly enlightening and we should go back to that for the mindset you know I should do it exclusively with women and then exclusively with men and see what the breakdown is what the difference is most people are conditioned from childhood to be the inauthentic being the corporate variation of the human being which is a golem that's all too flesh robot that you're good to be inserted in the cog in the machine as a cog in the machine of the corporate world and you know be productive for your master and sadly that's what most women want men to be what's going on as a result of this the Neo feminist movement going into hyperdrive is there are more men who were waking up and saying I'm not going to be part of this anymore you know I've had that mentality since I was 15 years old you know so I stepped into the at workforce for a very brief amount of time and as soon as I'm was shown any level of disrespect as a man I quit on the spot because you know the the people who showed me that level of disrespect are very lucky that you know they didn't suffer extreme physical harm through some of the things that came out of their mouths toward me I I have self-control so I was able to restrain myself but if they thought and from that moment forward I would be doing anything else to help them that are out of their minds you know I mean I can put in an honest good hard day's work I'm not a lazy person I'm extraordinarily driven I have willpower I have focus you know but when somebody starts treating you like a slave you got to be gone and it doesn't make a difference whether you have anything else when you start becoming involved in something that's immoral and is conducive to slavery you got to get gone from that situation you've got to extract yourself from it no matter what's going on otherwise consider yourself broken and consider yourself no such thing as a real man and that's the problem we have too many little boys out there with no guts they're too afraid people will say oh you have a situation right now where you're you're you're living in a house and and you're comfortable enough folks let me tell you something I don't care what my situation would be I would be dying homeless starving in the street before I went into any avenue of work that uses my body as a gear in the apparatus of slavery you want to test that assumption let's put it to the test trust me what it wouldn't matter what happened to my body so you know another part of this entire agenda is wedding women to the state and the only way you can really do this is by making the state essentially favor them in many many areas of society and you see this through family courts you see this through you know divorce you see this through all kinds of legislation that is being put into effect and you know a lot of women like that because they think it's increasing their social power when in fact this is being done to completely eliminate the authentic man the man that is strong and capable of standing up to the state so by proxy what ends up happening is women end up in bed by proxy with the state I call this the unholy wedding or the unholy union of modern women to the state you know this comes about as a result of the mentality of people who are in a socialist mentality that somehow the state should provide for this or that or the other thing that it should act as a nurturer or provider those are the kind of women with mommy issues the kind of women with daddy issues are the ones who want to be with the controllers the dominators because they think they're going to get protection in that respect they're the kind of women who gravitate toward you know the Dominator type of male the so-called alpha male they're not the real alpha male of society the real alpha male of any society the real alpha woman of any society is the one who is fully conscious conscious and aware of what's going on that's the alpha male and female nothing else determines that it isn't that the biggest the strongest the the most attractive looking these are all misnomers you know that's that's the concept of what people want you to think as the quote alpha being it's if there's only two heids when it comes to the men and women in society it's the authentic and the inauthentic the real article the real item and then the proxy of the real thing the image of the real thing the husk of the real thing it's an imitation and what I'm talking about the vast overwhelming majority of women please understand what I mean is the authentic woman the inauthentic woman I'm sorry the inauthentic woman and the inauthentic woman 99.9% of the time is attracted to and gravitates to the inauthentic corporate man the vast majority of inauthentic women in the world who have been culturally conditioned and mind control since birth to value money as the only value in society are going to gravitate toward the type of men who want to prop up this slavery system we're going to talk about many more controversial topics along these lines in coming weeks folks folks the you're between the sexes wage through the mind control deliberately targeted against women that's all the time we have for this edition folks remember there's only two mistakes you can make on the path to truth not starting and not going all the way we'll see right here next week thanks for listening good night everyone [Music]

What On Earth Is Happening Show #184

Topics: *The Neo-Feminism Agenda and the War Between the Sexes, Epi-Eugenics, Neo-Feminism as an example of the Hegelian Dialectic, Neo-Feminism vs. Classical Feminism, Neo-Feminism's embrace of Statism, the Social Divide that has grown between the Sexes, the Authentic vs. Inauthentic Human, Involvement of Think-Tanks in the Neo-Feminist Agenda, Incrementalism, Fabian Socialism, Neo-Feminism's roots in Satanism and Dark Occultism, The Satanic Witch as a handbook for the manipulation of men, the Me-Me-Me Satanic mind-set is where most women and men are trapped, the destruction of the Family dynamic, broken Parenting in human society, the Non-Moral "raising" of children leading to Moral Decay on a mass scale, why the Emasculation of Men is so important to the Neo-Feminism Agenda, the Corporate Door-Mat "Man," the Socially-Engineered Attraction of the Inauthentic Woman to the Inauthentic Man, the Control Dynamic and the Dialectic of "Dominator or Door-Mat," the untrue Myth that we live in a Patriarchy, Human Society is an Occultocracy, The First Question a Woman asks to a Man in a first encounter, the Psychological root causal factors of WHY Women immediately ask men the question "What do you do for a living?," most women caught up in and chasing the Illusion of "Security" and "Safety," Money as human beings' God and Ultimate Religion, Men seen and used by many women as a "resource," Hypergamy, very few people care about the difference between Right and Wrong, the danger of thinking that the Socially-Engineered Condition of most human beings is actually "Human Nature," the Imbalanced Ratio between Men and Women in the "Truth Movement," the inane and vapid mind-set of most young women in our society, the "Hipster" Epidemic, why modern Males are so emasculated and feminized, Neo-Feminism as a Divide-And-Conquer strategy, some Women stand against the Neo-Feminism Agenda and see it for what it truly is, Neo-Feminist opposition to Gun Ownership, Pedophilia at the highest levels of Government and its cover-up, the Unholy Wedding of the Woman to the State, Unresolved Psychological Parental Abandonment Issues, the Abuse-Victim Cycle, Worldview Poisoning*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host mark Pascoe [Music] welcome one and all you're listening to what on earth is happening right here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm the networks website of course Republic Broadcasting org the show is live every Saturday evening from 10:00 p.m. to 1:00 a.m. Eastern time from 9:00 p.m. to midnight central today is Saturday January 31st 2015 we have a great show lined up for you here tonight we're going to be continuing to talk about what I call the elephant in the room a topic that many people do not want to bring up and discuss because of its controversial nature mind control specifically targeted at women to foment the war between the sexes that we're witnessing in our society I'm going to be discussing neo feminism continuing to discuss neo feminism as we started last week this will be an ongoing series neo feminism as a eugenics operation what I call epic eugenics I believe it's a term that I have coined myself it's epic genetic eugenics it is genetics that is waged through mind control of the population essentially getting them to call their own numbers and we are indeed seeing that take place before our eyes if people don't understand that that's what's going on they really need to set up and pay attention to what I'm talking about in this series I'll give the call-in number right here at the top of the show I may take calls in the third hour of the show last week I did not get around to taking calls because the I wanted to stay focused on the information hopefully we'll have some time to take some calls in the third hour the call-in number to join us here on what on earth is happening 800 3 1 3 9 4 4 3 once again the calling number to join us if you want to get in the caller queue now 800 3 1 3 94 43 also I may go to the phones to ask the listening audience a question during tonight's broadcast so if you're willing to you know maybe answer a question that I would like to pose just to put some some food for thought out there for the listeners tonight call in the calling number and I may go to you to get your take on something so a couple of quick event announcements before we jump in with the topic for tonight the free or mind three conference of course coming up here in the Philadelphia area April 10th 11th and 12th of 2015 at the Sheraton Bucks County Hotel at 400 North Oxford Valley Road in Langhorne Pennsylvania just outside the city limits of Philadelphia the speakers lined up for this great conference coming up in April Bob Tuscan Clint Richardson Curtis the illuminated one Davis Dennis McKenna Derek Bros the New Jersey Weed Man Edie fortune freighter X Freeman Fritz spring Myer J Parker Jenice bar cello John Bush John vibes Josie the outlaw whales Laura Eisenhower Lennon honor luke rudkowski Mark Devlin myself Mark passio and Stewart Swerdlow there will also be an anti media panel there will be a panel discussion group with many of the speakers that are taking part in the conference and there will be open mic night sessions at the end of each evening an all weekend pass for the free your mind three conference coming up just outside of Philadelphia in April $150 you can get your tickets online at free your mind conference calm the best way to support this great conference that's coming up here in Philadelphia in April is to buy your tickets in advance there's this is the biggest conference of this its kind on the East Coast coming up this year most certainly with a who's who speaker line up so that if you want to support this event get your tickets in advance that's how the organizers are able to pay for the venue that's how they're able to pay for the speaker travel arrangements and this speaker lodging arrangements for this great event freer mine conference calm get your tickets now Philadelphia Liberty on the rocks presents a special presentation by myself mark passio on the true meaning and purpose of the Second Amendment this is going to be taking place Tuesday February 10th 2015 from 6:00 to 9:00 p.m. Eastern Time at the cafe the cafe is located at 2011 Walnut Street in Philadelphia 20th and walnut this event is free to attend and I will be what I'm going to be doing what I call field-stripping the Second Amendment I'm going to break it down into its all of its constituent elements and explain to people exactly what was meant and intended by the founders and the co-authors of the Second Amendment and I'm going to then reassemble the Second Amendment on the other side of that field-stripping to help people to very clearly see its true meaning and purpose as it was originally intended instead of these new interpretations that people try to ascribe to it that have absolutely nothing to do with its intent so this is coming up February 10th Tuesday February 10th 6:00 to 9:00 p.m. the presentation will not be all three hours there will you know be a question and answer session and a discussion after the presentation so for more information on this event you can go to Philadelphia dot Liberty on the rocks org they also have a meetup group Philadelphia Liberty on the rocks I will be taking part in what is called a counter protocol of light event this is going to be held during around the time of the halftime show of the Superbowl tomorrow Sunday February 1st 2015 at 6:30 p.m. Eastern Time this event will be hosted by Scott Bartle and Debra punch of shift is happening tv.com the website is shift is happening we calm the other members of the panel of the discussion panel will be Sean stone Freeman John Ramirez Jamie Hanshaw Sarah Adams and Patrick Henningsen so a really great panel discussion group and they're also going to do like energy work as well during this event the counter protocol of light there we're gonna be basically breaking down what they do during these Super Bowl halftime rituals which is what they are why they do them and what the intended effects on the mindset of the population is that's basically what this panel discussion is going to be on and the hosts intend to basically counteract that dark and negative energy with an event like this to raise awareness and to help people to basically shield themselves against you know this type of ritualistic energy that is being sent by these dark occultists that organize rituals like this the the Super Bowl halftime shows are very clearly ritualistic and they're they're definitely put together in order to steer consciousness in a certain direction so once again counter protocol of light event Sunday February 1st 2015 6:30 p.m. Eastern Time and we'll go through the Super Bowl halftime show and you could check that out at shift is happening tv.com one of the panel members Freeman will also be hosting me he has put together this question and answer session because I just appeared on his show the free zone and I'll be doing a question-and-answer session with him on Monday February 2nd I'll tell you a little bit more about that on the other side of this break stay with us let me empty [Music] [Music] welcome back everyone they're listening to what on earth is happening here on our DN I'm your host mark passio my web site what on earth is happening calm before the break the first break headus I was talking about an event I'm dealing with Freeman of Freeman tv.com he'll be hosting a question-and-answer session with me called ask an ex eight inist anything and this came about as a result of me being on his show the free zone just yesterday so he wanted to put together a question and answer session for his listening audience and this will be taking place Monday February 2nd at 4:00 p.m. Eastern Time 4:00 p.m. Eastern Time Monday February 2nd you can get more information about this Q&A session that I'll be doing with Freeman and his listeners on Freeman tv.com check out Freeman's website Freeman tv.com there are still what on earth is happening promotional t-shirts available as a free gift in return for a voluntary donation to what on earth is happening you can click the email link that's listed in the news article at the top of the news section on the what on earth is happening dot-com website to get more information about how to receive a what on earth is happening promotional t-shirt there's also a donation button on the left hand side of the what on earth is happening website if you feel that you've received value from the information that has been shared on my website and on this radio show you could feel free to make a voluntary donation to help support my work so that I can continue into the future with that having been said I'd like to direct everybody's attention to the one on earth is happening calm radio show page underneath the page during the live show there are always images for tonight's show listed the images there tonight are just about the events that are coming up the free or mind 3 conference my second ammendment presentation at Liberty on the rocks coming up on February 10th the counter protocol of light event at the halftime of the Super Bowl and the ask an ex satanist anything event that I'll be doing with Freeman on Monday so I don't have any images for the material that I have been covering and will continue to cover because I haven't really organized this officially as a presentation I will more likely than not do that at some point in the future and have slides prepared for such presentation on this topic but for now this is going to remain sort of a stream of consciousness type thing where I'm basically going along with a general outline of topics that I want to touch on when it comes to this dynamic of neo feminism as a eugenics operation what I call an example of epic eugenics you know eugenics could be carried out a number of ways it can be done physically it could be done chemically you know it could be done basically through forced sterilization things like that but I think the social engineers have ratcheted up their game to a very significant level and they are doing it epigenetically they're not doing it physically anymore eugenics is being waged through mind control and if that's what I call epic eugenics epic eugenics the concept that you can get a population ultimately to want to call itself and this is what we're really seeing happening there's so many people want to basically transition into this going back into all the topics we were touching on last week is to reiterate that when I bring this up the war between the sexes and mind control that is specifically targeted at women in our culture especially in Western culture I'm not trying to further divide the sexes I'm trying to heal the divide by bringing awareness about how this is a Hegelian dialectic that a mechanism that has been put into play in our society and in any dialectical manipulation only one ultimately needs to take the bait they only one side needs to buy into the the lie of the dialectic in order for the dialectic manipulation to work to have effect on the whole society you know I give the example often times let's say let's say a student in a classroom wanted to start a conflict be to between two other students okay and the two students are sitting next to each other in the class well one student may be going by one of them and and smack them in the back of the head and then you know quickly pass and you know the the one student that got hit in the back of the head turns to the other student and looks at them as if they did it you know and really what the student who struck the the first individual in the back of the head was trying to do is to get that person to think that the other student did it well the second student does not have to be involved in the manipulation you know only the first student has to buy the notion that that other student hit them in the back of the head when in fact it was the person who walked by you know and then a conflict can start between those people and that person who got hit will think the whole time oh that that person did this and you know I'm just responding to that you know and then oftentimes if they do something harsh or you know violent to that other person then that person's going to respond even though there they didn't intend any any harshness or any conflict with that other person you see that's what I mean by only one side of a dialectic needs to by the life or the dialectical manipulation to be accomplished you know if the the the first intended target of the manipulation doesn't see through the lie the conflict can easily begin and that's what we've already seen in our society as a result of neo feministic beliefs so we started breaking this down last week and I tried to explain to people that I would not be willing to take a chance on alienating a huge portion of my listening audience and people that I've tried to get to understand the dynamics that are really happening in the world if this topic were not real and critically important if it were not something that is absolutely essential to understand okay so last week we touched on a whole lot of different dynamics when it came to this problem that we're facing in society of what I call neo feminism and I laid that to distinguish it from classical feminism which is simply about equal rights under natural law and women being respected as much as men in in society being treated as equals I don't have any problem with that I think both sexes should be treated with fairness and dignity and as equals as far as our rights are concerned our rights under natural law this does not mean that the sexes are the same of course and this is the the part of the Neo feminist agenda is to end Rajan eyes the sexes too masculine eyes women and to feminized men so that there is a blending and a indistinguishable aspect when it comes to the sexes that's what they want they want androgyny and what this does is it weakens the masculine instinct in men and it makes them into what I call the inauthentic man okay the corporate man and then what it does is it also makes women more masculinized and more wed to the state the idea of domination having to be present okay having to have a part in our lives government the acceptance of government and you see this so prevalently in modern society when it comes to the fact that most women are still status now that doesn't mean most men aren't okay most men are still status as well but I asked people as an introductory and introduction to this topic just think about the ratio difference in the so-called truth movement between men truth seekers and truth tellers okay who are putting information out into the world and part of the alternative media versus how many women are involved in that and it's not to say that there are no women involved in that process of doing that great work but it's the the ratio is so overwhelmingly imbalance that I think anybody being honest with themselves can easily see that and I think we should be asking ourselves the question why is it that way we'll pick up right there on the other side of this break you're listening to what on earth is happening stay with us [Music] welcome back everyone listen - what on earth is happening here on Republic broadcasting I'm your host mark passio my website what on earth is happening dot-com continuing to get into the topic for tonight we're talking about neo feminism as a epi' eugenics operation as a way of ultimately calling the human population by getting people to war between the sexes and we're seeing that already play out in our society and it has been playing out in our society for decades since this agenda has been brought in by think tanks and Marxist and socialist movements you know we talked about that briefly last week all the different institutions that are part of this you know a lot of this neo feminism was ushered directly into our society by the Frankfurt School part of Graham she's plan of the long march through the cultural institutions people should look up Antonio Gramsci and understand incremental socialism creeping socialism you know the total creeping incrementalist control of the state look up the Fabian Society you know that's another thing tank organization that is all about slowly bringing in the destruction of the authentic man and the authentic woman in our society so that the and Rajan eyes diversions that the the husks or shells of the former authentic man an authentic woman can basically be cannon fodder for the state and are easy to manipulate and control at that point though all the other think tank involvement you know goes up higher than even these organizations these are like the political aspects of it you know you have like the Council on Foreign Relations and the Rockefeller Foundation you know again aspects political driven aspects of this here in the United States and then you have things like the Tavistock Institute of human relations which is all about mind control and social engineering and eugenics those organizations grew out of Chatham and well in house in England you know and then of course you have the Club of Rome which to me is probably one of the highest thing tanks that's directly involved with this agenda because that they are entirely about eugenics and population reduction you know then you have to explore the connections between all of this and you know organized religion so it has very deep roots and it's ultimately all about control it's not about anything else it never has been about anything else it's about control and making the population more manageable through reducing its numbers another thing you have to understand is dark occultism plays into this directly the Neo I'm gonna make a statement here and get it folks get as offended about this statement as you want the Neo feminism agenda is derived directly out of satanic ideology it comes out of Satanism and one of the books that I highly recommend people to read when it comes to understanding the direct manipulation of the male mind in society is the Satanic witch by Anton LaVey a very little-known book hardly anybody I know ever has ever read this book and I think it's absolutely critical it's a critical book to read to understand what's really going on in society you know this is a it's a guidebook if you will it's an instruction manual for the Neo feminist agenda as far as I'm concerned you know and you know look here's all you really have to deeply grasp at first the social engineers who have constructed this agenda want the vast majority of women and again I'm going to make generalizations when I talk about this all right I'm going to use terms like the vast majority of and if you're uncomfortable with that like I said last week turn the show off now okay I'm not interested in whether people get offended by you know generalized statements to understand this you need to use generalizations so I'm going to use moe almost all almost every the vast majority of and if you're uncomfortable with that tough okay so the the the vast majority of women are being manipulated by this agenda by them being essentially told and buying into the idea that what life is really about folks is pleasure and comfort and you know your daily pursuits you know the idea of the whole pursuit of happiness very ambiguous terminology okay rights are left at the door when it comes to this mentality all right it's about me me me me me all day every day I try to explain to people that if I could explain to you what Satanism really is when when you say the term everybody's mind goes to the idea of the Christian devil you know the red devil and with the horns and the pitchfork and the tail okay this has little to zero to do with what I am calling Satanism okay ideological Satanism which in which and maybe this is a good time to explain this because we're talking about the connection between the Neo feminist agenda and Satanism Satanist shows the name Satan because of the archetypal connection to the Christian adversary or opposer that which is the adversary or opposer which is what Satan means in Hebrew to the Christ consciousness to the higher consciousness the higher mind the connection to the higher self the real Savior of the world which is making that connection to higher self and higher consciousness and really being aware of what's going on within us and around us okay Satanist chose that image because what they are trying to do is destroy that higher consciousness keep people in a state of low vibratory consciousness so that they can be route controlled and therefore ruled and put into slavery and bondage you know as such they're the adversaries of that Christ consciousness you know they don't want that type of consciousness rising in our society they want to keep it quelled so that's the reason they chose that however the ideology of Satanism has nothing to do with the worship of the Christian devil the concept of the Christian devil it is about pure selfishness being the highest aspiration in life if I could encapsulate what satanic ideology is in a nutshell it's waking up in the morning and from the minute you wake up until the time you go to sleep that night you aren't thinking about anything but yourself and what you could do to improve your own situation and you never ever think about anybody else's situation you never have any compassion for the suffering of other people in the world you don't look at the world in a wider sense you don't look at the in justices that are going on in the world in the what in any kind of a wider sense all you are doing is focused on me me me me me all day every day that is Satanism that's what Satanism is and I'm not asking you to believe or accept that's what Satanism is I'm telling you definitively and factually as a former priest of this religion that that is in fact what Satanism is period the end and it doesn't make a difference whether you accept it or believe it or not you know I like like I've said if you want to know about any religion you would probably want to go to the priest of that religion and ask them about it well I was a former priest of Satanism and I'm telling you that's what the religion is the period now when you think about that how many people in society qualify as Satanists and out of those people how many of them are women and III admit just about as many or probably men but I'm telling you this is heavily heavily heavily marketed and peddled to women in society and there's a reason for that to get the moral decay of a society going you have to get the woman's mind first you absolutely have to get their minds first because largely they're the people who are quote unquote raising children and I say quote unquote because the parenting in our society is a joke it's a joke and women want to bear children but they don't want to raise them properly you know because they weren't raised properly and largely neither were the men that they're associating with at all and I'll tell you that just from my perspective I talked about this last week I wasn't raised properly by my parents I wasn't raised by my parents period like I said last week my real family the people who really truly raised me are people I don't know personally in my life in person they were people who communicated through their writings and through other forms of media what real morality is about and we have way too few quote unquote parents doing that job they're failing miserably at it and that comes directly out of the mind control that most women undergo we'll continue to talk about this dynamic on the other side of this break you're listening to what on earth is happening here on rbn we'll be right back folks stay with us we don't speak wall between us I'm so neat welcome back everyone in Michigan - what on earth is happening here on rbn on your host mark passio my website what on earth is happening calm before the break I was talking about how neo feminism grew directly out of this satanic ideology and there's no better evidence of that than the book The Satanic witch by Anton LaVey which I highly recommend everybody reading to understand a lot of the manipulation tactics that are really being used against men and how men are really being emasculated in this society controllers don't want any strongmen in society because strong men are the only people who strong informed and enlightened men are the only ones who are really going to wage any kind of physical resistance against tyranny of tyrannical government in society now it's not to say that women would not be able to ideologically come out of their trance and understand the tyranny that's in place you know but when it comes to any kind of possible necessity for physical action certainly men are going to be more likely than not the individuals are going to be taking that action that's why it's so important to get men completely emasculated in society and this whole idea of the destruction of all moral values in society starts with taking the woman's mind over okay because they're they've been in the traditional role throughout history as the nurturer and the one who is going to instill moral values into the child okay by teaching them especially since traditionally women stayed with the child now with women in the workforce there's nobody except the state schools - basically in still so-called values into the child and what's getting instilled in those schools social Darwinism you know the the worship of money the worship of the state that's what's getting instilled into children scientism you know a total left brained so-called education which is a total indoctrination system of fifty thousand hours of compulsory schooling with a child away from both parents when you have parents who have not been raised with moral values and their only thing that they've been taught to value is money that's the value system money you know where do you expect society to go you expect it to become more free you expect people to to do great things in a free capacity expect it to go into chains into chains which which is exactly where it's at and you know I tell people let's make it personal I don't need to go to anybody else or talk about anybody else as an example let's talk about my own family my own family are completely ensconced and entrenched in satanic mindset every member of my family except me maybe with the exception of one or two others who I would consider is very semi awakened aware and not really active but in general the entirety of my own family are in a satanic mindset never focusing on anything but me me me me me me me all day long every day the women of my family don't care about rights they don't care about freedom they don't care about what's going on around them and the only thing they tell their children is go out and make enough money the only thing that I was that that my own mother was ever concerned with is whether I was making enough money or had a quote job that's it no involvement in any aspect of emotional or spiritual life whatsoever certainly not trying to rate raise me to an accurate and deep understanding of morality at all zero never mentioned it now just go along with the program go along with the system follow the rules because you have to come out on top because you have to make enough money that's all physical creature comforts yes you're taken care of you know as if that's all there is to the raising of a child and you have millions and millions hundreds of millions of people doing this so-called raising their children like this thinking that physical creature comforts are the only thing that a child needs met that's it nothing else so why do what surprise is there when we have totally inauthentic men and women in society that we're never raised that have no connection to the true self and what I want to talk about is what women have been socially conditioned to desire to one because that plays a huge role in what's going on a gigantic role what the inauthentic socially conditioned women woman which is the vast overwhelming majority of most women want the the corporates inauthentic man that's what they desire in society and so the corporate inauthentic man the ones that will go down that path and play ball with the system you know most women will grab take toward that toward the guy who is compliant has been emasculated by the system by government and is completely compliant with all the rules and regulations because you know will basically make themselves make their image into what their corporate masters want them to be and then follow in and fall in line whatever behaviors their corporate masters want from them and most men will just do it because what most men in our society one is for women to be interested in them and paying attention to them and that's what they're they're living their lives to try to accomplish not trying to get at the truth not trying to understand what's going on in the world they're chasing the inauthentic woman for the vast majority of their lives and so they want to reinvent themselves into their corporate masters version of what a man should be to look like they want them to look to act like they want them to act it's pathetic and these aren't real men they don't resemble real men in any way and neither do the women who want men who are corporate doormats and in general that's what modern women want they want either either they want a corporate doormat that they can use as a resource or they want a total dominator you know and this all stems from either wanting to be in the position of control or wanting to be controlled the vast overwhelming majority not all there are some genuine authentic women and genuine authentic men left in this world but the numbers are waning and dwindling folks and that's what the social engineers want and how they put this idea into into women's mind you know this idea of you have to get the person who's the most successful in society you know I have a question for listeners I'd like to pose a question that is a social experiment I've the to try to highlight this dynamic and folks I realize how controversial this is and guy I said it from the beginning I'm not going to shy away from this what I'm going to say needs to be said and I'm going to say it anyway okay it doesn't make a difference whose offend that are alienated by this if you think this paints some kind of negative light on my work well turn it off don't listen to it anymore it doesn't make a difference the truth remains the truth and this is still going on I'd like for people to call in because I have a question to pose somebody wants to answer an off-the-cuff question you know a blind question that I want to put out there to try to highlight a dynamic I want people to understand the call and number to join us is eight hundred three one three nine four four three once again the callin number 800 three one three nine four four three we actually have a caller on the line I'm going to go to them in the next segment after the top of the hour because I have a question that I want to pose and I think it will highlight this dynamic of why there's such a absolute degradation of moral values in our society and how women have largely played into that as a result of social engineering I'm not saying men haven't either but very much so this dynamic has targeted women these social engineers know exactly what they're doing folks stay with us you're listening - what on earth is happening [Music] [Music] [Music] and welcome back everyone you're listening - what on earth is happening here on rbn we're into the second hour of the show for this evening I'm your host mark passio my website what on earth is happening calm we're continuing our series on the neo feminist agenda as a eugenics operation what I call an example of eppy eugenics eugenics that is carried out through mind control this is about the mind control specifically targeted at women to foment a war between the sexes and that is the elephant in the room that hardly anybody wants to really get into and talk about on any kind of a deep level help people to understand the think tanks and occult groups that are directing this agenda how it works the type of conditions that it has led to in our society and what we can do about it but again I said I've been studying this dynamic for years now and I finally felt that the time was right to bring this information forward because I consider it a moral obligation to talk about this when I understand the dynamic that is going on so well and very very few people do you know neo feminism constantly wants to tout the notion that you know the sexes aren't equally as oppressed in our culture that our freedoms aren't being destroyed all around the board men and women you know they put out this notion at every you know everything is because of patriarchy well ladies and gentlemen boys and girls children of all ages we don't live in a patriarchy or a matriarchy I mean if you believe that you've bought into the dialectic we live ladies and gentlemen in an oak autocracy that's the nature of the ruling class that generally completely dominates and controls and enslaves the rest of the population you know people want to call it a patriarchy a matriarchy this and that a corporate ah cracy you know an oligarchy it's an oak autocracy maybe people have never heard that term before well you have now it means rule by the occult rule by occult means and folks if you think the occult the dark occult as I refer to the twisted variation that the cult aspects of occult acknowledged being used against people as a weapon okay the dark occult and darker cultists are comprised by both men and women and they're comprised by people from every culture every walk of life every age you know both sexes and even just about every social income class you know people think it's only the ultra-rich know the occultists are not all rich you know there's people who are involved in generational bloodline families of occultism and they're not necessarily rich and powerful people they're powerful when it comes to what they understand about the mind we're not living in a mate of patriarchy folks it's an oak autocracy ruled by dark occultists and what I was talking about in the last segment is that you know most of the inauthentic women in our society want either a doormat or a Dominator you know because again they're in one form of brain imbalance or another the vast majority of them are being conditioned and left brain imbalance because that's masculinizing the woman and it's also getting the woman to align her so-called values to the state to the state and it's so-called values put all this stuff in quotation marks folks and again you could put the word woman in quotation marks so you know maybe that'll make it a little bit more palatable I'm not really talking about a real woman here you got to understand that I'm talk I'm using the term woman when I connected in with a neo feminist agenda you have to understand I mean the inauthentic mind controlled woman that has nothing to do what what a real woman is at all zero and unfortunately the inauthentic woman comprises the vast majority of women in our population yes that is a generalization but it is a true generalization the social engineers have done their job well and they know what they're doing and they know how to do it you know this is done through movies television magazines media the news the the daily news that people absorb you know you just look through society and I'm telling you right now all you have out there is television watchers folks you got people who sit in front of that garbage device day in and day out rotting their brain and they think it's telling them something that resembles truth the genuine being the genuine human being the genuine man the genuine woman is not involved in in any aspect of the game of control whether on the side of being a Dominator or being a doormat and no genuine man or woman who would want somebody to play either one of those roles a real relationship involves control not being involved in it and unfortunately that's what modern-day relationship relationships have all become about control but I have a question I want to ask the listening audience I did I've done a social experiment over the last several weeks or on my own time where I asked approximately 75 people 75 individuals this question that I'm going to pose to a caller blindly right now okay and out of well I won't tell you what the results are okay let's actually go to the phone line so I could pose this question and I'll tell you a little bit more about the social experiment that I did let's let's hear from Phil in Oregon Phil I know you may have called in to pose some other question but I want you to hold off on that question for now and I want to ask you a question okay and if you still have a question or a comment that you want to make I'll bring you back on later okay you could hold and I'll bring you back in but I'd like to pose a question blindly to you and could you just confirm I haven't asked you this question have I know I'm kind of excited okay we didn't talk at all or pre rehearse this in any way okay I'm just bringing fill in because he's the first in the call queue and I just want to ask you something okay I've asked 75 people so far this question all right as a social experiment in a modern-day interaction between a male and a female after the social niceties and pleasantries are exchanged at first could you tell me the first question invariably that the woman poses to the man in that interaction man we think almost invariably the first question that a woman in modern society will pose to a to a man after you know that the general pleasantries are exchanged like you know what's your name where you from you know what's the next question that comes up oh I got it go ahead what what do you do for demon coin slavery points Thank You Phil now now ladies and gentlemen ladies and gentlemen this deeply deeply explains the dynamic that I'm talking about here okay Phil I'm gonna let you go I want to thank you for giving that answer okay and I want to tell people the result of this experiment if you want to hold on the line you're welcome to do that and I'll bring you on for a question or comment after when I go to the phone if I go to the phones but thank you thank you for allowing me to ask you that question blindly okay thank you so of course the answer to that question is what do you do for a living what do you do to make money okay that's the first question now that's person 76 that I've posed that question to in the last several weeks and I'll tell you the result of that little social experiment on the other side of this break ladies and gentlemen you are listening to what on earth is happening stay with us [Music] [Music] [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm now before this last break I think we've hit people with something that is a cornerstone in what I'm trying to explain and I want to thank Phil from art Oregon from answering my question live on the air blindly okay not knowing what I was going to ask and the question was that I've done a social experiment with this over the last several weeks and I've posed this question to 75 people phil was number 76 and the question was in an interaction in the modern world between a man and a woman who have just met each other after they you know if they're talking and they exchanged pleasantries at the very beginning of the conversation what is invariably the first question that the female will pose to the male in that interaction and he answered what do you do for a living he worded a little bit more colorfully he said what do you do for a demonic coin of the realm or something to that effect you know for fake Fiat Federal Reserve notes you know but essentially the question remains the same what is your the occupation that you make money doing okay now this being the primary front foremost question that is posed what does that say about what is going on in the modern conditioned female mind well what we'll get into that in a minute but let me give you the results of my little social experiment that I've conducted here over the past few weeks 100% of people that I posed that question to 76 out of 76 answered the same way what do you do for a living 100% now ladies and gentlemen of the listening audience okay if I went out on the street corner here in South Philadelphia and I went on the corner and I just said I posed the question to a hundred people as they walked by could you please tell me what color the sky is on a cloudless weather 'less day during the day when that what you know not at night time but during the day on a cloudless weather 'less day what color is the sky what color does the the sky refract to the human eye I will almost guarantee you guarantee you that you will not get 100% of people to answer with the word blue I will almost guarantee it yet 100% of people you know how difficult it is to get 100% agreement on any question on any question you go out on the street corner and ask people what planet is this that you are standing on I guarantee you 100% of people won't respond with the earth I will almost guarantee it as crazy as that sounds trust me you will find somebody that will give a different answer to get 100% agreement on asking that many people anything is unimaginably extraordinary and says volumes about this social dynamic it speaks volumes and the reason for this is because the utmost thing in the mind of most people and I'm I will say this is true for both men and women but it's overwhelmingly the case for the conditioned woman in society and everybody will make excuses for this and they'll have justifications you know till the end of time because they won't want to look at this dynamic honestly they won't want to look at it honestly what this means what this says societally is going on psychologically within the minds of the vast overwhelming majority of socially conditioned socially engineered females what they are saying is my value system is based in money get is offended about it as you want I don't care what anybody says about that it's the truth that is what that dynamic is saying psychologically now let me ask the listeners out there this question okay could you pose a hypothetical reason for me to contemplate and for the other listeners to contemplate could anybody out there tell me why the first question that does not come up in conversation between a man and a woman interacting socially in our society that the women the woman would ask to the man or that the man would ask to the woman for that matter is do you know the difference between right and wrong behavior definitively or in other words are you a truly more being why isn't that the first question that's asked why is it that the first question that's asked ladies and gentlemen wanna know why cuz most people don't give a damn about that at all at all that's why that's the truth I don't need anybody to hypothetically answer the question I know what the answer the question is because their values aren't based on anything that is a real value it's based on an illusion called garbage nonsense fake fiat money there is nothing but a control system for the mind and behaviors and emotions and I guarantee you will get tons of excuses and tons of justifications about that you know I'm a misogynist for bringing that up don't you know you know it's because money is the value system that they have been taught and that's the value system they've retained morals uh who gives a damn I don't need to know anything about that you know do you condone or support violence against other people by your support of the state now we don't a I don't need to know anything about that because it variably 99.9% of these people all do support the state their status now here's my mic question folks let's get to the underlying psychological factor that's going on there let's get to the under underlying psychological causal agent the causal factor of what's taking place in the female the manipulated conditioned female psyche again folks one of the things I want to re-emphasize that I talked about last week is we have to understand that this is not human nature and many men are are absolutely just as brainwashed and condition and mind controlled and socially engineered my contention would be that more men are out of that conditioning than women are by a small percentage well we have to get to the underlying psychological reasons for this we picked this up on the other side [Music] [Music] welcome back everyone you're listening - what on earth is happening here on our BN on your host mark passio my website what on earth is happening calm you know we've pretty much struck a nerve when it comes to the dynamic that I'm talking about regarding neo feminism and the socially conditioned mindset of the overwhelmingly vast majority of women in our society and the value system that that really shows that most people are in which is no values at all you know it's it's the worship of money and more over than that it's it's deeply beyond that because we have to get past just the symptoms and understand what the underlying social psychological factors that are really going on in most people's minds okay especially the female mind which is part of an overwhelmingly important part of what perpetuates statism in our society and perpetuates everything that goes along with statism which is that continued condoning of violence and oppression and slavery in our world and I'm going to put out there the argument that the overwhelming mass of females in our society want that to continue they love the state they cannot get enough of it and I'm not saying that most men aren't status as well because they most certainly are but I'm saying it's almost entirely has a hold over women's minds as opposed to men who seem to be coming out of the status mindset a lot faster I know that's a controversial statement to make but look the numbers are there in the observation just go out and look at who's out there telling the truth about statism as being a complete illusion how many men are doing that versus how many women are doing that I mean I don't think anybody would call into this show or try to debate at all anywhere that the overwhelming numbers of people involved in the truth movement are men the ratio is wildly skewed if I had to guess I would say it's a minimum minimum of 10 to 1 and I'm probably being extraordinarily generous in that estimation I'd say more likely than not it's actually closer to 20 to 1 you know which it speaks volumes all you have to do is go out in any group of activists and observe and I'm talking about for like you know really things that are anti the state of course there are activist groups that are comprised largely of when women I'm talking when it comes down to telling the real truth about this entire corrupt immoral system because most women gain benefit from that system from being in place and wanted to continue they don't want the state to come down that's why the state is constantly you know trying to justify their existence in their minds and and tell them how much they need them because it is like the state's trying to prop itself up as the the actual real masculine man image you know and say you need us and here's here's the underlying psychological Diamont dynamic that I'm talking about what are we really talking about folks why does a woman in a in a first interaction with a male ask the question what do you do for a living what's being actively sought psychologically what are they revealing about their condition that they're in you know just let me just say this as an aside do you there are people who I know and have known for years that I still don't know what they do quote for a living I hate that term what do you do for a living as if you wouldn't be able to live without doing this you know as if they somehow all of life is dependent on the flow of money and whether you're in some corporate slave job I hate the term what do you do for a living for a living what do I do for the fake garbage Federal Reserve notes that people so believed in as a religion as a false religion we're that morons believed in as a false religion you know so I lost my train of thought there I was saying you know the underlying psychological dynamic that you know is going on here and how wildly you know skewed truth-telling is in in the in the truth movement and you know there the ratio that exists between men and women the this dynamic of you know what do you do for a living where where is that coming from you know I mean I would never I was saying I never I there are people who I know who I have never even asked that question - I've never posed the question to actual friends that I have people that I've known for years you know I've actually gone up to and said you know I've know how long have I known you you know and someone replied to me oh about five or six years now it's gotta be and I said I have no idea what type of job you do during the day at all never asked them one time because I don't care about that well why would I care about what fake nonsense that somewhat is made to go through is coerced really to go through okay by this society to make you know absolutely fake nonsense money that has isn't backed by any real intrinsic value what so why would I care what someone who's in the same basic slavery position as Amin when it comes to having to have an amount of that dynamic in your life to be able to just get any food or services at all okay and why would that be somehow the term determining what how I interact with that person I'm not concerned about what somebody does for their job at all in any way because that's not what makes somebody a person I want to know or not at all in any way I honestly don't care what they do as long as I know that they're a good person and they're fighting the good fight of freedom and getting involved in doing the great work in some capacity that's what I care about I want to know whether someone's awake I want to so want to know whether someone knows what's going on in the world I want to know whether someone is conscious I want to know whether someone cares about what's going on in the world not how many fake Federal Reserve notes they can accrue there are people in my life who I've known for years I've never even posed the question to I don't know what they do and I don't even want to know and yet this is the first and foremost things on the minds of most people because what they are trying to get at is how much money do you make and that there's a reason for that psychologically what's going on in their mind now I want to go to another caller and ask them this question okay so I'm going to go back to the phone lines and I'm going to bring somebody else on and I want them to try to answer the question what psychologically is going on in the minds of someone who poses a question the first first question they ask somebody else because they think there might be you know some kind of interaction or attraction or whatever and you know in pursuing some sort of a any kind of a relationship the first thing that they want to know is what do you do for a living okay I want to know the psychological dynamic that is taking place there what psychologically is going on so I'm going to bring on Donna from Los Angeles and Donna if you have another comment or question I'm going to ask you to hold it for now I'll go back to you if we go to the phones tonight and I want to ask you what do you think is the psychological dynamic that is going on there with the vast majority of women who posed this question and again I'm not trying to debate whether that is the answer to the question 76 out of 76 people answered that question the same way so clearly that is a dynamic that has taken place whether you want to argue that it's you know that's happening all the time everywhere is not the point here what I want to ask you is in that dynamic that is taking place what do you think psychologically is going on with socially conditioned people who are answering who are posing that question can you tell me what you think they are looking for okay well I think when a woman says I want to know what this guy does for a living you know if he's gonna be my potential you know partner in life or my husband they're looking for some type of financial stability I think so now what what what was that dynamics psychologically financial stability translates psychologically to what in the mind maybe having someone to help take care of you someone who will you know make the you know take away the problem what am I is all forms of to get to the get to the actual word tell me what this is all a form of seeking I'm not really sure if you want financial stability if you want somebody to take quote care of you okay if you want you know there to be resources present when you need them tell me what your psychologically seeking are you psychologically seeking goodness and virtue are you psychologically seeking morality are you psychologically seeking freedom no no and no okay correct correct the answer to those questions are no well then what is being sought well you know it's almost like in exchange people with women who buy into this and believe me I'm not one of them the women who buy into this it's basically their exchanging their liberty and their freedom for a false sense of security a false sense of oh it can all work out I just said it thank you Donna you just said the word I was looking for security or in other words safety security or safety that's what's psychologically being sought yeah yeah now let and I'm gonna let you go on that note and I want to thank you for calling and allowing me to ask you a question blindly and thank you so much for you know exploring that dynamic with me hold on the line if you want to get back to asking a question or making a comment if and when I take calls later in the show so thank you Donna you got it so there's the dynamic folks safety now the question the next question becomes psychologically what kind of people first and foremost are looking for safety over any higher values we'll explore that on the other side of the break folks you're listening to what on earth is happening stay with us we'll be right back [Music] welcome back everyone you're listening - what on earth is happening here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm so before the break I talked to Donna from Los Angeles and we were trying to get at the route psychological dynamic that is going on in the minds of people that of women in society who are focused on simply you know what a guy does for a living you know and we talked about that I did a social experiment of this being the asking 76 people with the first question a woman asks a man in you know an in an in an encounter between a woman and a man who have just first met after the initial pleasantries are exchanged what does the woman invariably ask the man first and 76 out of 76 people answered what do you do for a quote living you know you can't get that kind of agreement on what color the sky is during the day and so I you know I asked the question well why is that what are they seeking psychologically what's going on in the psyche that would make someone be so conditioned and so focused on that dynamic first out of all the other things you could possibly know about a human being and the answer is what they're seeking is safety security because in their minds in their socially conditioned Minds money translates to security in society now that obviously is not true because we're going into a police state you know where violence is everywhere you're not safe just because you have a lot of money you know we're losing our freedom and that makes you not safe and in this condition of chaos when you don't have freedom money's not going to solve that problem Hey natural disasters can happen you know natural disaster that does a tsunami rolling in off the coast say ho that person's house is you know they clearly make you know a couple hundred grand a year I'll skip over that house a tsunami doesn't say that and most certainly neither does an asteroid or a comet that's barren into the earth you know it's not going to say well I'll take out all the poor people and you know when I strike but you know what we'll let the rich go we'll let them you know we'll let them continue and you know we won't affect them you know people don't understand there's no such thing as safety there's no such thing as guarantee of safety doesn't exist it's an illusion and there you have what I'm trying to establish here socially engineered people like this and particularly this extraordinarily socially engineered aspect of society namely modern inauthentic conditioned women are chasing an illusion they're chasing something that does not exist because of an ingrained belief system that somehow money will make you secure for your life how about all the wives of all the people all the men who were part of Enron I'll bet you they all were asked in the situations that they were in with women what do you do for a living and when they said I'm part of a really new awesome energy company that's gonna storm the world it's gonna it's gonna take the world by storm I'm sure yeah you had plenty of them that were so ecstatic about that they were beside themselves you know what happened with that where was the security that could happen to any company any company could go down money doesn't create security in a society folks you believe that you are under mind control and your religion of choice is the monetary system because that's that's where all of this is coming from folks getting people to make their religion the monetary system and you know what that's satanic because that's all about what where's my personal power since this is believed in as power in our society and the ability to do things even the ability to have basic needs met like eating you know the monetary system the god of this world the ultimate religion the religion that even people who have kicked statism still buy into and it's all equally sewage it's sewage for the brain it's sewage for the emotional makeup and it's sewage for the soul and yet that's where these people's mindset is at that's where their mindset is and I'm telling you it's the vast overwhelming majority I'd say it's well over 99% of women think that way and I'm not just making a wild estimate or trying to be harsh I'm just being honest in my assessment if 76 out of 76 percent of 76 people out of 76 people answered the question the same way you have to understand that this dynamic is totally widespread its omnipresent it's beyond just widespread it's everywhere chasing the illusion of safety and here we go folks just extend that outward and we then we have the acceptance of the state by the vast overwhelming majority of women well of course if you're going to accept the monetary system as your main value system well what it's a logical progression that you're going to accept it accept the state the state as you're a quote protector to keep you quote safe quote unquote safe yeah they'll just control you with their form of quote security you know like Ben Franklin said those who would give up Essential Liberty for a little bit of temporary safety will lose both and deserve neither only bringing our behaviors into alignment with moral law with natural law can ever ensure the safety of a society and let me tell you something folks people who say well others still be natural disasters and this and that I firmly firmly look at it exactly the opposite I think nature is responding to bring suffering to a community a society when they become more and more immoral I think that natural disasters are totally connected with consciousness and that's what's invariably going to bring a comet down on this world or now a huge asteroid down upon it because that's going to be nature's way of saying these people had their chance to learn and come out of their garbage belief systems come out of their total mind controlled belief systems that doesn't serve any part of who they are or who they say they want to be and they've had enough chance they've had enough chances they've had enough time so let's see what you make of this huge space rock now we're gonna leave the guard in a little bit we'll pick this up on the other side of the break folks don't go anywhere we'll be right back [Music] folks sorry about the mix-up with the UH with the bumper music there clearly that's not supposed to be in my bumper music cue hall see if I can get them to take care of that on the network side but no worries you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening calm we're into the third hour of the show this evening and we've been discussing as we have over the last couple of weeks the Neo feminist agenda as a eugenics operation an operation that I refer to as an epic eugenics operation which is eugenics being waged through mind control and through social engineering in society I do want to take some calls in the third hour of the show tonight and I'll give the call-in number to join us for your questions or comments on this topic the callin number to join us eight hundred three one three nine four four three once again toll-free 800 three one 394 43 I do want to wrap up some things in this first segment then I'll probably go to your calls in the next segment but we were essentially talking about the degradation of moral values in society and how people don't really care whether somebody is good or bad as long as they make money once again let's just bring this dynamic home to roost okay I don't need to go outside of myself and my own experience to prove that this is what's going on in society my family members did not care about whether I was growing up as a moral being or not which is why I didn't grow up as a moral being until much later in life I didn't grow into a moral being until way after I stopped listening to the programming the indoctrination that my family was giving me about what's real in this world I had to get out of that whole dynamic because that they were making me into more of an immoral person and you know some of them will hear that and they'll say oh how could you possibly say that I'm not saying they were evil evil people who told me to go out and hurt people but the real difference between right and wrong behavior was never effectively communicated to me and it's largely never communicated to other people by their family members and this is because of the propagation of this no values system in our society and it is my contention that that has really gone into hyperdrive as a result of neo feminism coming in and taking the minds of most women in our society I'm not saying it wasn't bad before that it was already on the decline but the think tanks that have put an occult organizations that have put neo feminism into place in our society in the big way that it is now it is done to completely destroy the value system of people and put them into a satanic mode of thought which is me me me only only worry about my safety my security my comfort and is this not worry what what you see most especially young women talking about and obsessing about I mean folks the in anus and the the the the vapid form of consciousness that is out there all you have to do is go to any public place and just eavesdrop in on a conversation that's happening and I'd suggest it'll work with equally with men and women but in particular you will hear women only talk about you know their creature comforts you know their clothes or you know what they are gonna do with their friends or you know the soap opera that they watched or the celebrity who's getting married you know it's it's vapid inane banter that goes on there there's large you know and you know men have the whole sports dynamic going on everybody's talking about the Super Bowl as if this matter is in your life you know I mean this whole concept of dumbing people down and taking away their morals you know just totally in infringing on any moral sensibility that they had at all and destroying that the monetary system is a gigantic part of that and almost overwhelmingly the vast majority of modern conditioned women have totally bought into that system as their value system I know my family has I don't look folks I'm like really the only awake being in my entire family man or woman I'm telling you there are zero zero females in my family who deeply care about and understand the difference between right and wrong they are concerned about money and whatever they have to do to get money and and whatever they're the man in their lives has to do to quote make a living and that's all they care about they don't care about what's going on in this world they don't know anything that's going on in this world they have no knowledge and this this and this entire concept is totally omnipresent and widespread in our culture totally widespread and omnipresent the desire for security a total illusion it's a product of the Satanic mindset ego gratification me me me thinking no care the destruction of care the cremation of care you know nobody actually caring on any kind of a wider level you know just worried about my creature comforts and this leads to women who want men to be around them for nothing else but a resource to explore to some form of a resource you know which is why they're so largely concerned with asking that question immediately you know it's like a it's like a algorithmic response going on in the brain there it's it's you know a sizing up it's a you know a filtration process well there's this amount of money gonna be good for the lifestyle I want to live you know cuz I'm not worried about anything that's going on in the world or whether this person is a good person or not you know the desire for people to be used as a resource and I'm not telling you that doesn't go on the other side of the equation too with men doing that with women but it is deeply ingrained in our culture for women to do that and for that to be somehow acceptable you know like I said they're not asking the question do you know the difference between right and wrong behavior they're not concerned with that but they ask that question what do you do for a living that this all ties into a concept known as hypergamy Hyp ERG a my a lot of people may never have heard about it but it's the installation of this cultural indoctrination of you have to go the woman has to go out and find a man that can be used as a resource that makes enough money to act as the provider you know and of course the state is the ultimate form of this the state is the ultimate form of Big Daddy provider in 99.9 percent of woman's mind you know they're going to provide safety and security it would be chaos without them around you know this idea hypergamy is this idea of what the woman will marry up to get a guy that has a lot of resources and money at his disposal because that translates to to power and ability in in that person's mind they're not concerned about really what's going on in the mind of that person like I said my family would be ecstatic ecstatic if I was a multi-millionaire evil Satanist who was trying to murder people through eugenics operations which is where I probably would have went had I not come out of the Satanic mind said that I was in in my youth but I'm sure my family would have no problem with it as long as money was rolling in you know and to be honest most women have no problem with whatever immoral activity their man is doing their husband the man in their life whatever it's doing they don't care if they're hurting somebody else the vast majority I'm making a generalization yes I'm saying the overwhelming majority not all certainly and you will not hear me say the word all pretty much in this whole general discussion for weeks of course none of this fits into a blanket statement but that the general mass of people are they like this absolutely so folks stay with us we're going to get to your calls on the other side of the break you're listening to what on earth is happening we'll be right back [Music] [Music] welcome back everyone Christian - what on earth is happening here on our VM I'm your host Marc passio my website what on earth is happening dot-com I think I'm going to leave the presentation portion of the show for tonight right there as it is and we will continue talking about these topics on next week's show I'll be continuing to delve into the Neo feminism agenda the mind control that is specifically and the social engineering that is specifically targeted toward women to control their perceptions and their ideas of what they want and ideas of attractiveness etc you know we'll talk about a lot of these things and we'll get into how this is completely really driven a wedge between men and women in our society and also eventually beginning into some of the lash back that's starting to a car when it comes to different types of you know men's reaction type movements to this and that'll be coming up on future shows in future weeks I'll also be going back into the importance of gun ownership rights and why it's so important to arm yourself and to know how to use arms and I'll be you know getting into the Second Amendment like I did before and you know talking about that and really also talking about how a lot of people still don't grasp and understand this importance especially in other countries thankfully here in America you know people still are very much into gun ownership and fighting hard every day to retain those inherent natural rights on future shows also be talking about the occult history of Nazism I think I'm going to do an entire series on this and explain a lot of the personalities and groups that were involved in bringing Nazism out of the realm of the occult and turning it into a political ideology you know in the 20th century but we're gonna go to the roots of where that came from and I'll be breaking that down how that was done and fomented through a lot of different dark occult orders I'll also be going into solutions again to try to bring a social dynamic to waking people up you know a social technique for waking people up this is what I call maven targeting I believe it's a phrase that I have coined as well I haven't heard anybody else use it but I will explain the concept of what the maven is and why we should try to essentially focus in a group setting on changing the mind of the maven of a social dynamic particularly a family if possible which would probably be the most effective instead of trying to you know just wake individuals up we need to target key people when it comes to waking them up and then that influence will have a greater effect on other on other people because the maven is the person who is essentially their opinions are listened to okay so that's all coming on future editions of what on earth is happening just a small you know sneak preview of what I'll be getting into in future weeks right now let's go to the phone lines and I'd like people to comment or talk about you know the Neo feminism agenda and aspects of it that I've talked about and covered thus far I'm not gonna totally limit it to that if you do want to go into other topics or areas of inquiry or discussion that's fine but I do I would personally like to see people ask questions or make comments regarding the material I'm talking about in the current show and last week's show so let's go to the phone lines it looks like we have full lines let's hear from Phil in Oregon Phil you're live on what on earth is happening welcome to the show hey Mark thanks got me on again I had to reach for that answer earlier had to go into slaves think to pull that out yes and certainly is isn't it yeah man hey first of all I got to thank you you know thank you for suffering man we wouldn't be here without it some of my I want to talk about the masam men aspect of the how they're targeting men is in a sec but I want to say I noticed that what on earth is happening is a piece of high magic I've noticed or I want to thank you for that I mean IIIi considered that this is all about alchemical transmutation from lower consciousness base consciousness to higher consciousness and true awareness so I kind of like that assessment and you know I kind of like that comparison to you know real magic because III do consider it that it is a piece of high magic it finally hit me uh kind of weird you say transmute because I noticed when I'm in the process of suffering it's a game changer when you thank the suffering of gratitude during in that process it gives a purpose and changes it's a trip it really works but anyway I want to talk about I don't know if you have a hipster epidemic in Philly but oh god yes oh all right let's all right man the emasculated hipster manchild right there they're everywhere it's it's pretty bad I mean you know that's that's what they want you know they want somebody who you know isn't a strong person physically or mentally they want someone who doesn't care about gun ownership they want somebody who doesn't really care about rights who wants to be trendy they want somebody who wants to be popular instead of being moral you know they want somebody who's going to just take on pleasure pursuits in society and try to go along with the flow and fit in instead of really standing on their own as a true nonconformist and really going against the flow of this immoral system that we are all enslaved by they don't want that you know and so the hipster mindset is absolutely perfect for that you know it's about pop culture it's about popularity and it's about as you know the same type of vapid mindsets that I was talking about earlier you know yeah totally they're like spiritual manicures spiritual invalids and soulless and they're worried about like fashion and who can wear women's clothing it's ridiculous and that they're just testicle that's man children in idiots it gets even a lot of it I absolutely love it and I agree continue yeah me and my roommate ever see if we can get you laughs tonight but uh anyway uh the BPA the book by spicy hauling though he say oh yes bisphenol A yes the bps in the polyester and your clothing people the petroleum products estrogen in the beer plastic food containers all these are endocrine disruptors and gender-bending chemicals and estrogen mimickers if you can get away from that stuff as much as possible I mean throw here clothes petroleum or a polyester man it it totally turns you into a feminized man you don't want to fight back you just like you said that the voice even the voices are like raising and it's really spooky I mean I know many women have actually pointed that out and and said that to me that you know you just hear modern men talking it's like it doesn't even sound like a masculine voice anymore you know they sound like you know high-pitched and you know a lot of it is the hormones also in meat and dairy you know that's pumped into the modern you know meat and dairy diet huge it's a huge part of it as well you know but absolutely things like bisphenol A and plastics and you know they even put that in printer ink and you know it's in the plastic containers and cups and you know mning as you said it's a widespread attack I'm actually going to get into that probably next week to talk about a lot of the ways that you know they're turning people into these genderless you know slaves they're destroying the sex drive you know through food water radionics chemtrails is a part of that we'll pick this up on the other side stay with us everyone we'll be right back [Music] [Applause] with doughnuts wall between us there's nothing wrong code of sides along welcome back everyone you listening to what on earth is happening on their host mark passio my website what on earth is happening calm we're taking your calls until the end of the show this evening I want to thank Phil from Oregon Oregon for a phenomenal call really bringing up really great points about what is essentially emasculating and feminizing men in our culture and that's part of this neo feminist agenda of eugenics what I call epic eugenics because they want to eliminate strong male presence 'as in this society not only for father figures to children but certainly they want to eliminate the ability of strong men to stand up physically against state tyranny and that's why a huge interconnection between the neo feminist agenda is the anti-gun agenda without any doubt without any question and that's why you know they Lobby to get so many of these neo feminists to you know promote anti-gun agendas and political political figures so let's let's continue with the caller's and go to Donna in Los Angeles Donna you're live on what on earth is happening thanks for holding oh hi mark again um I just wanted to make a couple points one isn't it um even though women might be in the minority about this there's a lot of us who don't leave in this Neil feminist agenda and we don't actually I done I actually intend to cover that dynamic and explain to people how there are many many women in our society who are recognizing the dialectical lie of the neo feministic agenda and are coming out and starting to speak out against and explaining how this is as much of an anti woman campaign as it as it you know affects the male sex as well you know this is this is completely about the destruction of the femme between human beings so that the state has an easier time dominating controlling and enslaving people make no mistake that is the ultimate agenda and the whole concept here is this is done by the occult ah cracy ultimately and the social engineers to put the majority of women in this mindset again this is one of the reasons I have to use terms like the vast overwhelming majority almost every almost all are they generalizations of course they are but you know language is kind of you know a limited thing and it's like I have to just keep r.e.m ffice izing that so people don't think I'm talking about all women and certainly so that people don't think I'm saying that this is the nature of women I am definitively saying this is not the nature of women this is the socially engineered condition of women in the modern world and until they understand how these mind control dynamics work work we're not going to be able to change that condition and bring about healing between the sexes right well you know those of us ladies who are awake we see it as a divide and conquer tactic you know we know who you know the powers that be what they're trying to do by dividing and conquering on mark I also wanted to mention because we've been listening to your show for a long time and we really are very grateful for all the work you do for exposing you know the hidden meanings and the symbolism you know that people take for granted we appreciate you exposing that I just want to mention real quick because I know there's other callers waiting you know there's quite a few women who are truth seekers and are trying to expose the truth and I don't know if you're familiar with the work of a may Russell she had a radio show in the 70s and the 80s but she was one of the first women to talk about mind control secret societies the organized banking cartel and all this stuff she was a pioneer for her time her name was made Russell you know I'm not familiar with her but I'm definitely going to become familiar with her based on your recommend and it sounds like a person who was quite aware especially at that around that time you know she must have done a whole lot of reading and a whole lot of visioning of of libraries in order to become that aware you know that long ago and I I would definitely definitely check out her work yeah and then there's a couple of women who are pretty active today there's one lady in veterans today dr. Stewart Jean Bramhall she's great kathryn austin fits she's an austin fence is pretty great yes I I'm familiar with her um there's Daisy Luther she's the organic prepper Melissa Melton she's of truthstream media Erin dykes and Catherine from Povich these are all women writers and I really enjoy reading their work and it's good to see some of us sisters our way and you know we want to you know we want to find out what's really going on absolutely Donna thank you so much for those recommendations I will look into many of them especially may Brussels who you mentioned first and I just want to say yes there are some women who are waking up to this agenda and waking up to the overall control agenda and the overall occult agenda and I think those numbers just need to continue to grow and grow and grow and I'll do everything I can to encourage women to step out of their you know comfort zone and develop some courage to look into what's really going on in this world and then start to speak it you know to other people fearless Lee so that you know that they can develop some real security by aligning their behavior to natural law and the great work because that's what really provides real safety and security of any people in a large social dynamic in the aggregate so Donna I want to thank you so much for that call thank you very much mark you got it okay let's continue with some other callers unless hear from Avery in Seattle Avery you are live on what on earth is happening welcome to the show hey Mark hey how are you hear me yes I can all right cool and I've been listening for about a year and I really appreciate it I really appreciate you bringing up this topic of neo feminism sure I thought it was high time I've stayed silent on it for actually years and you know the the dynamics that are going on in society are so completely out of control that I said I can't wait anymore and I don't care who this may offend alienate or make uncomfortable I understand how controversial of a topic it is and how tensions run hot when things like this when socio-sexual dynamics like this are brought up but I cannot stay silent about it any longer and I will not oh absolutely you know and um I must say that you know you always pick up you whenever you come bring this topic up which you know I have in public before well I'm glad to hear from you that um gives you that thing like oh you know you're you're misogynist or you're generalizing women into a category of you know you know you're trying to make them sound like their best but you know I'm really whenever I bring it up to people I try to make it sound like well I think it's been due to you know people like you know mind control kinda like what you're talking about you know we're we're you think on the media you know and then you see things these young women get into you know I've got um you know a girlfriend you know my sisters and stuff and the stuff they get into you can guide you and you like believe it I don't know if you pay attention to you know the general media like you hear some these artists and these young women get into like Nicki Minaj you know Taylor Swift they do and it's just like oh my god you know and they name vapid music and the lyrics you know and it's all about you know me me me accumulation of wealth and status and popularity and it's just it's you know man in the woman you know yeah they have they have the youth focused on junk especially when it comes to pop culture and music oh yeah absolutely and I tell my sisters this stuff too I say you know you know or you know and my girlfriend everybody I say look you know you you know Taylor Swift wanted her stuff right when she's talking about this stuff you know maybe she should go get a new boyfriend but um you know one of the points I wanted to bring up was you know and I want to thank that Phil from I believe he's from if he was from Oregon yes I know I'm from you know a west coach here so you know I mean hit stir hell where I get told every time I talk about gun control I'm a Republican or you know I'm category you know all hey I have a friend who's in the freedom movement he's many people that's really into the 911 thing he was telling me just this week that I sound like Bill O'Reilly I consider gotta be really bad on the west coast I could tell you it's horrible here in Philadelphia and I could only imagine what what cities in California must be like yeah any conscious people there must be going through total hell arguably more so than you know what we're going through here on the East Coast Oh even even it like I'll go to the Theosophical Society I'll go to these kind of places soon you know we got them over here and you know I go in there I start talking about because the guy who works there at the theater workshop he into a avery state stay with us and I'll let you continue this line of thought on the other side of this break ladies and gentlemen you're listening to what on earth is happening we'll be right back [Music] [Music] [Music] [Music] welcome back everyone in listening it's happening feel on rbn last segment of the show for this evenings episode we were talking with Avery in Seattle Avery are you still with us yep I'm here okay you continue your line of thought I think you were talking about you were trying to explain to some people out on the west coast the importance of gun ownership in the Second Amendment and the you know negative responses that you're getting from many of the people there oh yeah and I was actually where I was going with that was even a little further because I was over it you know the you're familiar obviously with the Theosophical Society yes I am oh yeah you know they have a chapter out here and or whatever you'd like to call it and I went over there I go over that a lot you know I have a lot of different books that I'm interested in and I was talking to one of the guys because you know he's known for being kind of like even the you know these satanic groups and stuff like he'll talk about it openly you know so I approached him and I was talking to him about you know I said you're heard about you know the government kind of gets in you know the government is directly affiliated with some of these groups and stuff because you you're that documentary about it was Lawrence King I don't know if you saw that one i from from all of the pedophile scandals that were going on in the Nebraska and his connection with I think what was at Boys Town yeah yeah yeah it's part of it's part of the conspiracy of silence as it was called in the documentary I can't remember the book John de Kamp was the author of the book who kind of exposed that he was in Nebraska state senator who found out about this pedophile ring going on from you know money scandals that were taking place within legislature you know and he you know so I'm bringing some of stuff up you know the government might you know how you know it's been obvious that they have a lot of ties you know in this case someone who talks about it openly and he was telling me that no that's just conspiracy and I'm like huh what do you mean that's conspiracy like you know how about all the stuff coming out about how you know the royal family is involved in in covering up pedophilia and actively involved in it you know the Jimmy Savile stuff that has all come out and the other pedophiles you know that are part of you know

Parliament and in the English government this is all breaking you know and he doesn't think that this is happening you know no no oh god yeah oh the funny thing is I you know I hear I'm talking about this stuff and he would keep meaning his talk before I was talking about how you know the government seniors have a lot of ties you know because obviously I believe that but you know presenting it to somebody I kind of you know I waited for him to say something first so then I bring it up and then he shot me down and looked at me like I was like yelling there was a fire in the pool or something you know he was like he's like what nah dude that's just conspiracy and I'm like you know this is the Theosophical Society have you ever picked up a book by hate huh you know how honorable that you know she she gets you know she talks a lot about things like this and stuff and I was like I couldn't believe it this guy was just I kind of shooting me down like that you know yeah I mean know if he is in the know and he had does take part in dark occultism of course he would want to discourage anybody from looking into material like that the book that I was trying to think of I just realized was on the Franklin cover up by John de Kamp I highly recommend people read that book because it exposes a lot of the pedophilia that's going on within government and how government has ties to satanic networks and you know also I'd recommend the book the ultimate evil that exposes how satanic hierarchies are at work in our society and you know that was about all the disinfo that went around about the Son of Sam killings you know David Berkowitz etc and tells the real story behind that and how it was all directed by satanic networks but the Franklin cover-up is a book I would recommend to anybody who wants to understand the connections between you know pedophilia and high-level government officials and I would suggest that it does a pretty good job of tying that into you know occult rituals and you know the the satanic net Network the hierarchical Network of Satanists and darker cultists I've been talking about since basically day one yeah I mean in it's just you know the Washington's documentaries and just you know thinking like you know how does someone just watch this and walk away you know just like oh it's you know I guess like they don't think about it twice or anything you know cuz that kind of thing you know that's the whole thing too I think with the the neo feminist agenda is kind of telling women you know especially the younger ones that men don't have feelings you know Matt men are like these you know almost like psychopathic characters right you need to avoid and you have to become the man and take a stand against them and the whole the whole men just should suck everything up you know they're there there's no outlet for any kind of emotional turmoil that most men are going through it's like a double standard you know it's like saying that's those types of emotions are fine for women but men should just suck it up and deal with it you know and and not have any outlet for any of that you know it's a big part of you know the the the devastation of real care and compassion within our society you know but most people who are in this mindset don't care about the suffering anyone else goes through you know yeah that's the saddest fact of the matter until we change that dynamic don't expect the external reality that we're experiencing to change absolutely you know and the caring female caring female figures I really you know I could tell you could really try to kill because you know they want the women I noticed this a lot to like when I was hearing you talk about this this is this is real you know you're trying to become the man but you know what it's beyond me just just masks analyzing them and getting them to become the quote man it's they want them to act as robots in our society they want them completely conditioned and desensitized and having no compassion they want that from men too you know that that's going on obviously within the realm of the police and the military and the the dominator figures who are you know total supporters and not just supporters of but they're the people who are holding up the state through the violence and and and through the coercion that they do you know so they want it on both sides but without any question the Neo feminism agenda in particulars to get women into that non-caring mindset oh absolutely and then have the state become the daddy that's what it really hurt that's what I like you said you know the state then just comes in and gives them money and now that you have a list and all you know if it is like the daddy role I really like when you said that last week and it really stuck with me because that's really what doesn't happen I've noticed that sir and so much of this is about parental abandonment issues so many women fall into this mindset because in some form or fashion their parents failed them and did not provide for them mentally psychologically emotionally spiritually and they're falling into this mindset as a result of bad parenting and parental abandonment you know in some form not doesn't have to be physical parental abandonment the the abandonment issue the abandonment issues that are going on in our society cannot be psychologically overstressed we have to understand those abandonment issues work with them and heal them if we're going to transform society for the better generations to I knew this one girl who her mom you know didn't want to be with any guys she hated men and then now she goes out and doing that and she has troubles with man and she gets with abusive guys or guys who are you know you know off or you know sketchy and and you can see how it can move through the generations especially the younger women you know and there really starts you know in the you know you start with those kids the kids parents and then now they're spreading it and now their hands right now a part of it it's part of the abuse victim cycle that we've also talked so much about on this show and breaking that cycle is very difficult because it requires deep introspective knowledge of the human psyche which is part of what they want to continue to occult from human beings and dissuade them from ever looking in to dissuade them from looking into the self Avery I want to thank you so much for your call absolutely great great insights that you brought up there a lot of food for thought let's hear for that Frank in West Virginia Frank you're live on what on earth is happening welcome I really appreciate as many points you've made concerning human relationships sure and how the society works it's a pretty practical sociology I hope it's making sense in a practical way and a lot of the patterns that we're seeing are coming together and people are understanding why this is being done by these social engineers at least I hope it's coming across that way what it isn't very sure or speaking and I've split it on these topics that you have brought up and raised night in number of different forms public forms and I found that is true there is a a particular worldview that is common here in America that you'll find people are raised from little children all the way up they through example frankly unfortunately that's all the time we have for this edition of what on earth is happening thanks so much for your points call back in next week I'll bring you back on the air folks remember there's only two mistakes you can make on the path to truth not starting and not going all the way thanks for listening we'll see you right here next week [Music] [Music]

What On Earth Is Happening Show #185

Topics: *The Neo-Feminism Agenda and the War Between the Sexes, Epi-Eugenics, Neo-Feminism as an example of the Hegelian Dialectic, Involvement of Think-Tanks, Socialism, and Satanism in the Neo-Feminist Agenda, the Satanic mind-set, the Emasculation of Men, Modern society as an Occultocracy, The First Question a Woman asks to a Man: "What do you do for a living?," Chasing the Illusion of "Security" and "Safety," Money as the "Primary Value," Men used by many women as a "resource," Hypergamy, Lack of True Care about the difference between Right and Wrong, the Socially-Engineered Condition of most women is NOT their Nature, the Imbalanced Ratio between Men and Women in the "Truth Movement," Women drive the corporate economy with over 85% of purchases, Attractiveness Studies, Men find 80% of women acceptably attractive while women only find 20% of men acceptably attractive, Eugenics through control of human perception, Control over the propagation of specific genetics and values through Mind Control, Falling Birth Rates and the Lie of Over-Population, Spiritual Evolution, People who side with an Immoral System to selfishly reap it's "benefits" for themselves, Vampire Allegories describing the seduction of women by Psychopathic Controllers, the difficulty of an "Awakened" Human being interacting in a relationship with an "Asleep" Human Being, the Ultimate Sin of betraying Truth and Freedom for lower forms of "love," the various Think-Tanks involved in the "Occultocracy," the Saturnian Priest-Class and its Religion, We are on a Spiritual Mission on Earth at this time to end the condition of Slavery*

freedom mat that's what it's all about welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening to endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascal welcome one and all you're listening to what on earth is happening right here on the Republic Broadcasting radio network I'm your host mark passio my website what on earth is happening dot-com the network's website Republic Broadcasting org today is Saturday February 14 2015 this show is live every Saturday evening from 10:00 p.m. to 1:00 a.m. Eastern Time that's 9 p.m. to midnight Central Time yes folks it is the artificially constructed quote-unquote holiday of Valentine's Day this evening and I think it's quite appropriate because we have been talking about the war between the sexes on this show for the last few weeks and I'll continue to discuss that topic here this evening it's the topic that I call the elephant in the room the thing that really no one really wants to get into and talk about mind control that has been very specifically designed engineered and targeted toward women in our society to foment a war between the sexes this is of course the Neo feminism agenda and I call the Neo feminism agenda an example of an epic eugenics operation this is eugenics that is waged through mind control and we're going to be getting into this evening how this can affect populations how this can actually reduce population and act as a eugenics operation I'm also going to be touching on perceptions of beauty and perceptions of attractiveness and intimacy and sexuality this evening as well so we'll be getting deeper into the whole neo feminism agenda and the types of mind control that are specifically targeted toward women in our society I'll be taking calls in the third hour of the show the calling number to join us 800 3 1 3 9 4 4 3 once again if you'd like to get in to the call and call in queue early in the show I'll be taking numbers an hour I'll be taking calls in our number three so the toll-free number join us here on what on earth is happening is 831 394 43 a couple of quick event announcements the freer mind 3 conference is the huge event coming up in 2015 on the East Coast anybody who is into matters dealing with truth enlightenment human freedom needs to come out and check out this conference because it's going to have the best speakers and it's going to be the biggest event of its kind the freer mind three conference is taking place April 10th 11th and 12th 2015 at the Sheraton Bucks County Hotel at 400 North Oxford Valley Road in langhorne pennsylvania langhorne is just outside the city limits of philadelphia it's a hop skip and a jump from the city the the venue is absolutely gorgeous and we're expecting to see many more people than were even at the first two for your mind events well the first break is coming up folks I'll continue to tell people about the free or mind 3 conference after these words stay with us you're listening - what on earth is happening we'll be right back welcome back everyone listening to what on earth is happening here on rbn I'm host mark passio my website what on earth is happening calm before the first break I was telling everyone about the freer mind three conference coming up April 10th 11th and 12th just outside of Philadelphia in langhorne pennsylvania the speakers the confirmed speakers for this year's for your mind conference are as follows Bob Tuscan Clint Richardson Curtis the illuminated one Davis Dennis McKenna Derek Bros ed fortune the New Jersey Weed Man freighter X Freeman fritz Spring Meyer Jay Parker Jenice barcelÃ³ John Bush John vibes Josie the outlaw whales Laura Eisenhower Lennon honor luke rudkowski Mark Devlin myself mark passio Stewart Swerdlow and the anti media panel there will also be a panel discussion group with many of the speakers from the event there will be open mic night sessions at the end of the night for 5 to 10 minutes each speaker going for about two hours after the conference each night and then you know the the tickets are on sale now and you should go to the website and buy your tickets in advance to support this great event because that's the best way that you could help the organizers to bring the speakers to the event to lodge them for the duration of the event and help pay for the conference venue all of this is extraordinarily expensive I mean I I tell people look into what it really takes to put a conference of this magnitude on you know and you understand that it's not done on the cheap it's something that takes a lot of dedication it takes a lot of time it takes a lot of sacrifice of many many many free hours of work to get that accomplished and takes a lot of money to do it too because there's a lot of expenses involved the best way anybody can support this event is to buy your tickets in advance so go and get your tickets now it's coming up only in a couple of months the the all weekend pass is 150 hours that's the cheapest conference ticket price that you'll find for a conference of this size and scope anywhere and for listeners of this show only for listeners of what on earth is happening I've been informed by the conference organizers that are going to do a new promotional code a coupon code promotion through the end of February so for the next two weeks until the end of this month you could use coupon code path that's pas si oh my last name for $15 off any ticket purchases of $100 or more through the end of February through the end of this month go to free your mind conference calm to get your tickets now for your mind conference calm you don't want to miss for your mind 3 coming up April 10th 11th and 12th just outside of Philadelphia I want to thank John from the Philadelphia Liberty on the rocks group for hosting my special presentation that happened this past Tuesday on the Second Amendment here in Philadelphia I gave a presentation called the true meaning and purpose of the Second Amendment it went really well it was a full house it was standing room only we really packed people into the cafe in Center City Philadelphia and I think they really learned a lot and I think it went overall as best as I could have possibly hoped and it was professionally a video recorded with good audio quality recording as well so I will be editing that footage and posting it to my website and YouTube channel very shortly I don't want to give an exact date but you know what probably within the next couple of weeks hopefully depending on how my schedule and my time goes over the next couple of weeks so look for that coming very soon I think the presentation really hit all the marks that I wanted to hit on and I think people came out who did come out really learned a lot from it also I'll be on the lookout I don't have an exact timeframe but I have been informed that the demystifying the occult seminar is being worked on of the video is being edited as we speak so that should be coming shortly as well although I don't have an exact timeframe on that but that seminar is still going to be coming out and I will be posting that also to my site and my YouTube channel so stay on the lookout for that one as well there are still some what on earth is happening promotional t-shirts available to receive one as a gift in return for a voluntary donation to what on earth is happening you could check out the top of the news section of the website or you can click the first link in the latest news items on the left-hand side of the water if is happening comm website to find out there's a little email link there you could just click that and and it will open up your email client so you could ask about how to receive a promotional t-shirt I'll be making some new t-shirts for the free your mind conference as well a great new design and I think people will really like that and that'll be available at the free your mind conference I was going to attempt to get the what on earth is happening book completed and published by the free your mind conference although I think that's going to be a little bit too lofty of a goal I'm hopefully targeting sometime mid year if I could possibly finish the editing by the time the conference were all you know rolls around beforehand and have enough time to get them printed I'll attempt to do so but more likely than not I will not be able to have the books completed by the conference and we're probably looking around mid-year sometime in June maybe July by the time everything is really ready to go and is finished being printed but I'll be announcing that of course here on the radio show and on the website finally yeah there is a donation button on the left-hand side of the wall on earth is happening calm website if you feel you've received value from the information that I have shared on the site and on this radio show please feel free to make a voluntary donation to help support my work so that I can continue doing this well into the future all right that being said the topic for this evening is what we've been covering over the past few weeks and you know I'll probably continue this for at least through this week and maybe into next week if maybe I'll do an all-call min show at some point as well on this topic because I think that always gets people thinking and their questions you know kind of offer a lot of feedback for how I'm presenting a topic and many listeners will often call in and really bring up topics that I haven't even considered and you know make a lot of very valid points so you know last week we got into this a lot deeper and we're you know I was talking about neo feminism as a prime example of the Hegelian dialectic and this is something that I want to reiterate so people understand where I'm coming from with this I am not trying to further divide anybody or pit men against women or take a quote-unquote side what I am saying is that in a dialectical manipulation it is only necessary for one side in that manipulation between two sides to set them against each other it is only necessary for one of those quote-unquote sides to buy into the lie to buy into the manipulation you know once that happens then you know they go on the attack and then the dialectic works you know it creates the tension it creates that you know offsetting of those two sides off against each other and this is what people don't understand that you know look I gave you know police as an example you know you could see how it's only necessary for the police to be manipulated to think of the public as a threat or an enemy because of some fake terrorist event okay that that was obviously a false flag operation and then if they buy into that manipulation okay and of course I'm referring to 9/11 in this example but if they buy into that mental manipulation the public doesn't necessarily even have to buy the lie that was sold okay the police are still going to have that intention they're still going to have that so in the war between the sexes if just men were manipulated or just women were manipulated the dialectic would still work because they're going to be pitted against the quote opposite side really there are no opposite sides we're all in this together and that's what I'm trying to explain to people by exposing this neo feminism agenda trying to explain that this agenda is to set people off against each other so that they're easier to control through manipulation and what I'm trying to do is offer a healing process of healing methodology and that healing method works through knowledge that's how you make a diagnosis of what's wrong you have to have the knowledge that this is an agenda and it is an example of very very very deeply well planned social manipulation this is social engineering at its finest ladies and gentlemen okay so that's the first thing that we really have to understand is that this is about bringing people back together not trying to separate them further so I'm going to be continuing to get into what we've already covered a little bit as a little bit of a review and then some new material on the Neo feminism agenda coming up you're listening to what on earth is happening stay with us you know today disguise the night 95 today tried to run welcome back everyone they're listening to what on earth is happening I'm your host mark passio my website what on earth is happening dot-com will continue to continuing to talk about the neo feminism agenda has very distinct and separate from what I would refer to as classical feminism which is about simple equality of rights under natural law and being treated as an equal in society which I'm certainly all for for both sexes and for everyone neo feminism is something altogether different with quite different hallmarks which is about largely about manipulating women into pitting them against men in society and it's done deliberately to foment a war between the sexes and we're in the throes of that war make no mistake about it and what I'm trying to do is help people to understand where a lot of this agenda came from what it really is so that we can actually move forward and recognize that this is a divide and conquer strategy that this is a dialectical manipulation to try to weaken the population and ultimately really destroy our civilization it's an example of what I call epi' you gen -- ax it's going even beyond traditional eugenics because it's eugenics that is waged through mind control it's waged through social engineering in past weeks I talked about the involvement of many think tanks in this agenda in the Neo feminist agenda how this is brought about by institutions that have long been involved in mind control and social engineering like the Tavistock Institute of Human Relations the think-tank societies out of London like the Wellington house and Chatham House foundations here in the United States like the Rockefeller Foundation International type think tanks like the Council on Foreign Relations the Club of Rome that's long been involved in eugenics operations Marxist and socialist movement involvement like the Frankfurt School from which Antonio Gramsci you know came and brought his plan about the long March through the cultural institutions in order to bring about a communist society the Fabian Society where we get the term Fabian socialism about incremental creeping socialism you know these this is an agenda that is absolutely you know brought into our modern culture through these types of agencies let's not leave out the intelligence agencies folks because the CIA's involvement in the Neo feminism agenda cannot be overstated you know it's something that I really didn't touch on much but I want to mention that you know that's an oversight on my part not to bring up US intelligence agencies especially the CIA because clearly they've had deep involvement in the propagation of this agenda and you know last week I went a little bit into the involvement of satanic organizations dark occult isms involvement with neo feminism I gave the example of lavas book The Satanic which as an example of the manipulation of men by women in in our society how this whole neo feminism agenda is really a satanic mindset you know it's it's ultimately getting people to think in a satanic mindset a divisive mindset it is not about unity it is not about coming together to create more strength they don't want that in a population they want us atomized and ad2 each other's throats and they always want us in a mimimi mentality not a mentality of what's really going on as a whole in the aggregate of our society are we looking at you know what's really taking place regarding human rights or we just worried about our own stuff you know as as just individuals you know and you know the mindset of the vast majority of people out there folks is me mean me all day long from from the minute they wake up until the minute they go to sleep at night they're never thinking about what's going on on a wider scale they're only focused on what can I do for me you know and that's it and that that is bringing people into a satanic mindset they've done this culturally it's it's not you know something that's oh you know that saw their to accomplish they've accomplished it it's a matter now of how do we heal the psychology of most people so that we can get out of this satanic mindset that's leading to further and further enslavement so you know we got into that a little bit last week and I've been talking about the emasculation of men and why that's so important to destroy strong men in a society once you destroy strong men and you know I folks I go out everywhere and I see the deep emasculation of humanity of men within our society it's appalling it's appalling what most people think an authentic man is today you know there are hardly any authentic men there are hardly any authentic women I mean we've been turned into something that barely even resembles a human being quite frankly now you know people can say that's harsh all they want but it's true you know this idea of the totally social engineered being what the dark occultists often refer to as the new man that's actually one of their names for it you know this concept of we are going to mold people into the golem that we want them to be the flesh robot the flesh Android you know get them only focused on the self and the selfish base interests and you know then they have the mind and then once they have that mindset they own your behaviors people are out there not even understanding that most of their thoughts are not their own and therefore they've been turned into the quote new man the new woman the inauthentic being will pick this up on the other side of this break folks don't go anywhere you're listening to what on earth is happening we'll be right back listening to what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm we're continuing to talk about the Neo feminism agenda as an example of what I call epi eugenics eugenics waged through mind control it's also a good way of bringing people into total bondage because if you put out a form of mind control that tends to emasculate strongmen what could have been strongmen in a society the state takes that much more power because there is no one there that is capable of resisting the state should the state go totally tyrannical which it has and you know most men out there are just content to let this continue to go on and on and on because they're not strong men they're totally emasculated little boys you know that's the truth of the matter and that's why this neo feminism agenda is propagated by the state it's propagated by all the organizations that lie behind the state and comprise what I call the occult Achra see what we're really ruled by is the occult we're ruled by dark occultist you know this whole idea even in classical feminism that there's a patriarchy in the world isn't really accurate there's not a patriarchy there's not a matriarchy you know people think well oh it's a corporate ah cracy we're run by all the corporation's you know even that is a misnomer because it goes so much deeper than just finance you know this is about control of the human soul folks if you haven't figured that out yet you don't know what's going on in this on this planet okay we're living on a farm we're soul energy is being destroyed and harvested and eaten you know and this is we live in an occult ah cracy as I talked about last week and that's what people really need to understand most people don't understand anything about the occult let alone the dark occult you know they have no idea what it even is you know they have all their little religious beliefs you know but they don't want to learn about what's really going on behind the scenes behind the Carver's of power because it's just it's unpleasant it's uncomfortable and most people don't want to hear about what's unpleasant and uncomfortable you know like I said I'm not here to be your friend or be like there to win a popularity contest I'm here to explain people what's really going on on this planet so if they want to do something about it then they're empowered with some information to actually do something and make some real world change so you know we we talked about last week the mindset that most people are in most women are in and have been culturally conditioned to be in to look at a relationship as a resource you know as as a resource for them personally as opposed to just you know looking for certain true characteristics real strengths in an individual meaning morality you know meaning you know care for truth honesty in that true sense meaning true right action meaning a deep knowledge of the difference between right and wrong behavior in other words conscience these aren't the types of inquiries many women are culturally conditioned to make into men know they're culturally conditioned to ask the first question in meeting a new man in their lives what do you do for a living you know we brought up this big question last week that you know the the all encompassing question that is usually the first question a man is confronted with when you know having some interaction with a female in society and I did a social experiment where I asked 75 people what the first question in casual conversation a woman asks a man after initial pleasantries like what's your name you know are you single come up you know after that's done the first question that after the initial pleasantries are exchanged what is the first question that is asked and 75 out of 75 people said what do you do for a living you know I didn't ask people overseas the dynamic might be a little bit different in other countries but here in America that's the satanic dynamic that's that's going on because what it immediately says is I'm concerned up front the the most not with what you're really like you know in your characteristics or personality but I'm concerned about how much money you make because I equate that with security and a good man okay that somehow is value in the majority of women's minds and again I don't want to use a blanket statement there you know I'm using a generality and saying the vast majority not all but the vast majority to be honest okay and for 75 out of 75 individuals and then the caller that I asked that question blind to last week on the air who gave the same answer that's seventy six people for seventy six out of seventy six human beings to say the same answer to a question means that there is such universal cultural agreement to that dynamic that it's overwhelming I joked last week and I'm not reven really joking it's it's actually pretty serious if you went out on a street corner and stood there and a hundred people walked by and you stopped the hundred people and asked the question what color a light does the sky refract on a completely cloudless day where there's no weather where there's no you know perceptible weather you I guarantee you 100 100 out of 100 of those people would not say the word blue I I guarantee it folks okay you'd get some other answer but this to this question there's universal agreement and that's saying something very specific and powerful about what's going on culturally in our world you know so this is the idea of psychologically being caught up in the idea of security and safety and seeing money as that blanket for security you know not harmony with morality not understanding and living in harmony with natural moral law no absolutely not how much money do you make that's going to provide you know universal human security you know it's this idea that value is held in one place in one place only and that's in the bank account in the wallet you know and that this is the problem folks this is the problem that many women have been brainwashed and mind-controlled and culturally conditioned to think of this as the primary source of value and I mean what does that say about where their value system is in the aggregate again not every woman is like that of course you know but in the aggregate is what we're talking about here if that wasn't AG if that was not true in the aggregate sense you couldn't have that kind of universal agreement that that's the first thing that is primarily on a woman's mind and it just goes to show how deeply rooted this cultural conditioning is see the problem here becomes as I've also talked about in past weeks which I also want to reiterate because of how important this dynamic is to understand many men specifically men will get caught up in the idea the erroneous idea the erroneous notion that this is simply the nature of women that this is the nature of a human being or at least the the sexual gender of women in our society that this is their nature this is a problem because that's not the case this is not women's nature to be like this this is how cultural conditioning and mind control has gone to work on the females of our species over countless years to turn them into someone that values money above just about everything else and I'm not saying again please do not put words in my mouth and saying I'm making a blanket statement that all women exercise those behaviors and traits and characteristics I'm saying it's going on so widespread that it is absolutely the rule as opposed to the exception okay so understand clearly what I'm saying I'm using yes I am using a generality but I'm not saying everyone is like this and I'm not saying it's their nature that's what I'm specifically trying to explain to people that this is cultural conditioning this is mind control this is brainwashing and it's not even just done by the occult okra see okay this is done by parents this is done by former generations and passed down to their children and that's why I want to talk about the type of men the type of man in society that women have been culturally engineered to find attractive or appealing because this is so important when it comes to who women choose to propagate their genes with and therefore what the next generation becomes like and how then that's propagated down through the coming that the future generations and we arrived at a point where we are now now you have to understand this long term dynamic these people in these groups think long term they've been planning this for countless generations you know where people have been doing this who will never see the result of this because they're long gone from the world you know they're playing a long strategy game of chess because it's all about their group coming out on top of humanity not them individually they're involved in what I have termed a mastermind you know hundreds thousands even millions of minds coming together and being focused on the same goal and putting things into the world through their willpower and their dark form of care what they want to accomplish their base desires and putting their actions into effect in the field of play in the world to actually accomplish that agenda and this this gets propagated through countless generations you know they're implementing a long term strategy whereas most human beings they don't see what's right in front of their face they don't see down the line in the next five minutes so you know what I would like to really get into here today to take this in some new directions you know I mean you know we talked about last week not only about this whole value system and how there's you know most women are seeing are taught culturally taught to see money as that the primary source of value I won't use the word only but the primary source of value in society you know not real values okay and this expresses through what is known as hypergamy which is looking to quote you know marry up in society you know to find someone who has a lot more money than them okay and to try to you know in other words like marry for money as opposed to marry because you really are genuinely into the qualities and characteristics of the personality of the person that you're you're together with you know it's it's like taking this intimacy away from relationships and just making it about a social partnership like a business you know and it's a very dangerous game to get involved in playing because what it's doing is its weakening the so the moral fiber of an entire nation of an entire people because again air as long as money is propped up and put up on a pedestal and up on a throne as the primary value of a society this is not just done by women when it comes to looking at men this is done by mothers when it comes to looking at children and fathers men are not separate from this dynamic you know many of them are just as guilty of making money the primary value system you know so you have to understand that term and research that term a little bit hypergamy but this is all about really how so few people in our society men and women care about the difference between right and wrong the first question I think should be asked and when people are encountering new human beings that they don't know and haven't met is do you know the difference between right and wrong how about do you know what's really going on in the world and do you care you know those questions you don't hear asked you know and it's often because most people want to ignore reality you know they're brainwashed by religion they're brainwashed by this new-age belief system that's out there that oh bring up the negative you know why do I want to deal with reality why do I want to look at that why do I want to look at all the bad stuff that's going on that empowers it more you know that's not how that dynamic works you know you don't look at what's going on that's bad and negative and disempowering and that is being used to control people you're going to get more of it because you're not doing anything to stop it you're gonna let evil run unchecked in the world and that's where they have people mimimi mindset money is the only source of value and I don't care about the in justices that are going on throughout the world I care about me in my own situation and you know what that's called ladies and gentlemen that's called Satanism I should know a thing or two about it as I was a priest in Satanism for many years of my life you know that's the mentality that's the religion called Satanism you know people want to insist this is about the worship of some Christian archetypal devil beast you know no it isn't Satanism that you could sum it up in a nutshell folks it's worrying about you and yours all day long every day for your whole life or the majority of it that's called Satanism you're only focused on yourself and your own gain you know and that's where they have most people and I mean this is most men and women but I mean to be honest I just see this dynamic really really being sold to and bought by the majority of females in our unfortunately this is why most marketing is geared toward women because they know that traditionally they were the people who you know directed homes and provided the nurturing environments of homes and so they're going into kicking into high gear you know marketing toward women and using all of these our title mind control brainwashing techniques to get into the subconscious mind and make them want in many cases things that they don't need you know it's approximately 85 or 86 percent of the entire economy is driven by purchases made by women I mean that's an amazing figure that's an amazing number it's almost it's about 85% of purchases so they're driving largely not entirely of course but largely the entire corporate economy with their purchases I mean what does that say about how well how effective the techniques of manipulation and marketing have been toward women that number should probably be about equal all things being equal but they're not because due to the cultural conditioning and due to the way women have been brought up by their parents in many cases and the former generations they've entered into this mindset that is about money being extraordinarily important to them and to me what this is saying is not only do they not largely care about what's going on on a wider scale in our society and this is evidenced by how many what by just looking at the ratio between men and women truth tellers truth seekers and truth tellers within the so-called truth movement it's a painful statistic that most people don't want to look at and then they'll want to get angry at me for pointing it out you know I mean compared to how many men are out there doing the great work of trying to expose the evil that's going on in this world how many women are doing that in comparison the comparative ratio if we're honest with ourselves we'll be right back folks welcome back everyone you're listening - what on earth is happening I'm your host mark passio my website what on earth is happening calm and before the break I was asking the question you know why don't you see an equal amount of men and women within the truth speaking community sir clearly there are many women involved but if you look at the ratio the comparative ratio I mean it has to be 90 - 10 % or if not you know even more skewed and you know you have to ask yourself the question why is that so if women in our culture were just as concerned with truth morality equality under natural law again when we're talking about equality here please don't don't make that in your mind seem like I'm saying sameness all right when I say equality I mean equality under natural law all of us being equal in our rights you know so I believe in equal but not the same equal under true moral law not man's law but not the same meaning of course people will always have different characteristics traits of their personality talents skill sets etc nobody's going to be the same you know that's very important to emphasize when you talk about equality between any groups of people when I say the word equality in those instances I'm talking about equality under moral law meaning everybody has the same rights everywhere and at all times at all times and places so you know I just throw the question out there I'd like to hear somebody attempt to answer it you know I don't think it's I think it's part of this whole dialectical manipulation and this social engineering I don't think it really has anything to do with women just being innately you know less courageous than men I think they've been culturally engineered to behave like that I'm not trying to let anybody off the hook either you know I'm just saying when we get into this argument that this is all about just the nature people and this is human nature this is female nature red flags immediately go up for me that that means that person who's trying to make that statement really doesn't know what they're talking about because they're leaving the social engineering dynamic at the door or putting it on the back burner and they want to blame quote nature note the nature of a human being is folks we are programmable species and because people don't understand the programmability of the human mind they're thinking thoughts that aren't even their own there's the nature of humanity until we understand that and understand how that programming is accomplished we're not going to make any headway or progress out of the mess we've worked ourselves into so get used to the slavery and get used to it getting a lot worse until you delve into those areas of human nature and human consciousness you know as soon as I hear somebody say human nature is this or that and they don't follow that by saying human nature is programmable therefore this is the resultant human condition as a result of the programming humanity has already received and the vast bulk of that programming is received in the formative years the first six years of life and it's put there by culture it's put there by the occult controllers and largely it's put there by bad parenting we'll pick this up on the other side folks stay with us you're listening to what on earth is happening we'll be back after this break freedom man that's what it's all about welcome back everyone you're listening - what on earth is happening here on Republic broadcasting I'm your host mark passio my website what on earth is happening calm we're talking about the neo feminism agenda this evening as we've been doing for the last few weeks and we'll probably continue to do for the next couple weeks at least I want to start to shift this in somewhat of a new direction and talk about the dynamics that have made the world the way that it is today because that's a huge part of this and I want to talk about how this agenda is indeed a eugenics operation and how it limits populations but more than just limiting the population slowly over time what this agenda accomplishes is it limits true holistic intelligence within a population over time not only that is it limit true holistic intelligence it maximizes the kind of people that the occult RC is looking for it enables them to breed and pushes out people by limiting the the genetics of strong independently thinking people by through mind control and selective breeding that is done by the people themselves believe it or not because of how much mental influence and manipulation they are under by culture to actually weed that population right out of existence practically of strong independent thinkers of real true free thinkers and people who question things and people who do the research instead of engage in blind acceptance so it's a it's a very critical dynamic to understand how it works and it's also somewhat of a complicated dynamic so you have to kind of follow me through here because it's when you come out the under end with this understanding that I'm going to try to give the people you understand how epigenetics is really I'm sorry epoch eugenics is really going to work on people in the world okay so epigenetics means that you go beyond the genes and this means you're entering into the realm of the mind and consciousness okay and epigenetics understanding epigenetics is a huge part of the solution to the problems that we face because consciousness can trump just about anything that's going on genetically or physically when you combine this understanding of epigenetics with eugenics you have you get what I call epic eugenics okay and to my knowledge I'm the first person that is coined that term I haven't heard other researchers use it I don't know if I am but I think I may be the whole point here is what you're doing is you're waging a eugenics operation which is to control and limit and steer the population and decide who gets to propagate their genes or who lives and then continues the next generation and who does not get to propagate their genes okay so eugenics is basically population control it's not just population reduction it's population control it can be reduction but largely it's determining what kind of traits and characteristics you want propagated in a society through the kind of genes that are going to be propagated okay that's eugenics now what I'm explaining that neo feminism is is it is an agenda that wages eugenics meaning controlling which genes will be propagated in a society but dun epi' genetically epic genetically meaning it's done through the manipulation of the mine as opposed to things like forced sterilization or you know the relocation of certain people or the actual killing off of certain groups of people or segregating people it's not done through physical means it's done through the manipulation of the mind so that the population will actually carry out that eugenics operation upon itself we'll continue with this analysis on the other side of this break you're listening to what on earth is happening stay with us boy those words are truly prophetic and appropriate aren't they you know there's a wall between us and a river so deep and we keep pretending that there's nothing wrong there's a code of silence and it can't go on that's why I've broken my silence on this particular topic even though I know full well going into a topic like I've been covering over the past few weeks on this show I run the risk of alienating a large percent of my listening audience okay I run the risk of being called a misogynist I run the risk of you know saying you're placing all of this blame on females in society and it's none of those things folks you know first of all like I said I'm not here to win a popularity contest I'm charged with telling the truth to people putting the truth out there so people can empower themselves with it you know I'm not on any side I'm on the side of truth and freedom that's that's the side I'm on you know those are my values that's what I find important and indispensable in life you know I'll take those over being liked any day any day so again this is about trying to heal this divide and the only way you could do that is by talking about these issues you know you're not gonna get that by ignoring it thinking it doesn't exist and hope that it's gonna magically go away on its own I'll tell you that much so the direction I want to take this is trying to help people to understand neo feminism is a huge Enix operation an example of what I call epic eugenics and I'm going to kind of seemingly jump from kind of topic to topic from here but you'll see how this all works together hopefully you will see the tapestry about it how it all works together so I'll just jump right in with general attractiveness studies that have been done over the last few decades and I'm not even gonna give any specific examples because there's a ton of them and you could look them up for yourself ok maybe I'll post some links or something with you know a podcast or this week's show or next next week's show who knows but but the main overarching point I want to make here in this section is that the perception of what people find attractive is actually largely not really their own and but many scientists and many people in society insist this is all genetically controlled insist that you can't you know there's no helping that or it's just the way that it is okay and that's just how people are quote unquote we are just like that quote unquote and what I'm trying to explain is this is one of the biggest manipulate ori techniques that is used in humanity against humanity and i think it when you look into studies on general attractiveness that have been done about you know the sexes and what one sex finds attractive in another sex i think it will really enlighten a lot of people as to just how deeply this social engineering is ingrained in our culture and once again you'll have the people in the left brain scientist camp saying this is just Darwinian evolution and natural selection and you know survival of the quote fittest ok and what i'm going to insist is absolutely incorrect this is mind control this is one of the blatant most blatant and purest examples of mind control that you will ever find and I'll tell you how one of the main ways you'll know and you can't always just use this standard okay when things are so skewed to one side you know there's mental manipulation going on folks I mean completely skewed way off the median way off the norm there's nothing natural about that when you get 100% of people to say the first question woman asks to a man is what do you do for a living to answer that question like that that that is so universally agreed-upon you know that's that's not nature that's mind control you know nature strikes a balance and often forms a happy median not so when social engineering enters into the picture that's what pushes things all to one extreme - you know one unnatural direction and I'm gonna try to through you know this section try to explain one of these dynamics and we'll see many other instances of this as we move forward with this explanation of how neo feminism is in fact eugenics if you can manipulate what one gender finds attractive in the other you're well on your way toward being able to steer how a population propagates and let's make mince no words and make no mistakes about it women decide in our society which genes propagate because they are the ones who are deciding who they breed with period I mean it's an inescapable conclusion therefore you have to ascribe responsibility for how the culture has propagated how the how humanity has propagated to the female of the society now I'm not saying they bear the 100% total responsibility for that but a large amount of it has to be placed upon upon their shoulders because they have through whatever manipulation happens to be in place in their mindset decided who to breed with and therefore which genes get propagated in a society and then how those future generations will actually be raised because the value system that is shared between them and the men that they chose to breed with and propagate children with is then passed down to the next generation of children I mean this is just a simple logical inescapable truth you know that that is how genes get propagated in a society and that then that's how value systems get propagated mentally in a society and the occult ah cracy the occult controllers know this and therefore very wisely from their point of view from their manipulative point of view from their strategy it's a wise move then to very significantly target which target women in their mind control methods to try to steer them to choose the type of men that they want them to breed with therefore they can control how the gene pool propagates down to the next and future generations and they only need to get a few generations which they've already done in order for it to just take on a seemingly natural progression and propagate on its own by rote you know then you have that self-fulfilling prophecy you know type thing where the they can even back off a lot of their influence and people will just do it to themselves because they're they think they're thinking their own thoughts and then they pass down those erroneous notions down to the next generation and the next and the next so one of the best ways you could do this is by manipulating what people think of as desirable attractive period however you want to look at that okay what I'm trying to say is it's largely manipulated and it's not a natural dynamic that is in effect in nature in human beings in our culture today in the modern world this is a manipulated dynamic and I think modern attractiveness studies that have been done by many psychologists and social scientists display this perfectly what how these studies generally work and again I you can look these up on your own or I could maybe post a couple of links because there's many of them how they work is they'll take a group of just men and individually they will isolate them let's say you have a hundred men or let's say it's a bigger study there's a thousand men okay and you're gonna isolate them in a room by themselves one at a time and they put a screen in the room you know no other distractions just a projection screen and they project images of women from all over the world every culture every walk of life every just about every age group every social income bracket social status what however you want to look at it it's a wide swath of you know people from all different walks of life of women from all different walks of life and individually the men are asked to simply give a kind of a yes-or-no answer of do you find this woman that you're seeing on the screen except ibly attractive and it's not like for long-term relationship or marriage or anything like that it's just general attractiveness I'll continue to explain this on the other side of the break you're listening to what on earth is happening we'll be right back welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm of course we're continuing to cover neo feminism as an example of epic eugenics as I've coined it we were talking about how perceptions of beauty and perceptions of attractiveness are manipulatable and how this social engineering dynamic is used to the advantage of what I am calling the occult ah cracy the ruling occultists in our society and when you look at some of these studies you could see how much manipulation is involved by the skewed numbers involved which will really really shock a lot of people I know friends that I brought this up this dynamic up to have been incredibly shocked by the figures involved and that's what I want to share with people and explain how this these studies work there it's they're very simple you know again they'll take a group of about a thousand men isolate them one at a time in a room and show them images from of women from all over the world every cultural walk of life essentially you know every a sensible religion background age group you know and just say to them simply gauge any like a yes or no way do you find the image that you're seeing right now the image of this woman that you're seeing right now attractive or not it is not for do you want do you think this person could be your soul mate or can you stay with this person for the rest of your life till the day you die would you want to marry this person you know nothing like that not even long-term relationship type things okay it's just saying physically do you do you like the image of this big period did you find it attractive do you find it desirable do you find it Pleasant please period that's it now what they do after they and they do this with literally hundreds of images if not thousands okay and when that's done they take basically a percentage so they do it with one guy right and let's say he said he found you know out of the let's say they showed five hundred images and he said three hundred or let's say yet he said you know four hundred were attractive and one hundred were not attractive that would be eighty percent okay if he found you know 250 attractive 250 not that would be a 50% okay and then they do this with all the guys in the study and then they average the numbers so you get an average percentage from all of these thousands of thousand people of the average percentage that the men as a group found attractive in in all the women that they saw okay and when they do this with men and show them these images of women the numbers are approximately somewhere between 79 and 80 percent around 80 percent of the women were seen or perceived as attractive by the whole group of men in the aggregate approximately 80 percent so that means in general as a generalization the body of men in a society fine approximately 8 out of 10 females except ibly attractive now you could say maybe the numbers slightly less than that you know you know you could you could it could go you know there's a margin of error that could go either way a couple of percentage points but around the mean of very high 70s to low 80s saying that men in general think that the majority of females are reasonably attractive or reasonably acceptable in their appearance period that's it it doesn't say anything else it doesn't say you know that you know again they would want to spend their entire lives with any particular people that they were shown or you know they thought there's not says nothing about the personality types this is this is a study in physical attractiveness very simply okay now when this is done with women you see an entirely different dynamic emerge so the same thing is done 1,000 women are selected for the study each one is put into a room individually and shown images on the screen of maybe you know a few hundred to a thousand men that are from every single walk of life every cultural background every religious denomination you know every social status income however you want to look at it all ages okay and essentially this then they average up all those numbers okay so they take each woman's percentage of the men that she said yes that person's physically attractive and then they average all of them once they did that with all of the women involved in the study and I'll give you the average percentage on the other side of this break so stay with us and you'll hear what that figure is and I think you'll be amazed by it ladies and gentlemen you're listening to what on earth is happening stay with us welcome back everyone we're listening to what on earth is happening here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm so in the last segment I was explaining how a lot of these attractiveness studies that have been done to determine in the aggregate sense how men and women differ in their perceptions of what they find attractive or appealing or you know acceptable in physical appearance differ and how this is a very specific example of one of the ways that human perception is manipulatable and how this works toward the advantage of the social engineers and I'll get I'll be getting into that but we were talking about the men in the aggregate sense in these groups found approximately 80% of the women whose images they were shown in this study acceptable and when they did the same thing with women and then average the percentage of the amount the total amount of men whose images they were shown that they found physically attractive or physically acceptable in appearance the number was less than 20% yes less than 20 we're not even talking about 50 or 40 or 30 okay the average numbers were approximately between 18 and a half to 20 percent in different studies that were conducted which means less than or approximately two out of ten men in our society are considered by women to be reasonably physically attractive and again this has nothing to do with relationships this has nothing to do with personality characteristics this has to do with simple physical appearance less than two out of ten now I would I upon seeing the results of these studies I don't immediately start my mind does not go to the place where most other people's mind goes to it now I'll tell you where their mind goes to which is completely incorrect erroneous thinking it goes to this whole notion of that's just biology that's just that's just women have to be more selective in the choosing of a partner because you know a man can inseminate many women and a woman can only you know be impregnated once every nine months and then has to carry that baby to term and that's a big concern so they're going to naturally be more selective that has absolutely nothing to do with the results of this study folks zero even if you were taking that factor into consideration which I'm not saying is completely and untrue you would still see a medium being hit and you might see a little bit less than 50% but the number would probably still hover around 50% minimum when you see something that's that skewed there's mine control at work without any question this is social engineering at its finest because what the social engineers want is to be able to control population and more specifically than that what they want is to be able to control what kind of person propagates their genes and what kind does not so one of the best ways to do that is to manipulate what a certain gender namely the gender that propagates the genes through their choice of who to have sex with and therefore who to breed with if you can manipulate that mindset that perception of what is considered or deemed attractive and then propagate that notion socially culturally in a widespread way you're well on your way to being able to mint manipulate who breeds and who does not breed which is what eugenics is in a nutshell and what they want to put forward to most women in society as to what is attractive is the emasculated male this is what you see propagated in magazines this is what you see propagated on television shows this is what you see propagated in many movies not all movies Hollywood is still kind of like a big divide going on between the dark sorcerers who are telling their tales and weaving their mind-control tactics and there are still some you know people who are telling some really powerful positive allegories out there just as a brief aside to this I did go to see Jupiter ascending which I was somewhat disappointed in the direction that they took it I thought this was going to be about the and it there was some info very good info put in there about the real history of her and how earth is a farm owned by beings that are not quite fully human this this notion was interweaved into the end of the storyline but with this good promising storyline they really took it off in the direction of like a you know a romance film kind of what I did find that was very well done or at least somewhat well done is since the main character was a female the Jupiter character not to have any spoil overt spoilers but if you don't want to hear any you know minor spoilers then don't listen to this part she has to make a choice in the film main the film is all about her individual choice she has to make the film about getting out either staying in me-me-me thinking and only caring about her and hurt her own life and her family's lives her immediate family's lives or taking on a wider level of consciousness and a wider perspective about what's actually happening to the human species the human race who are being bred like cattle for harvesting and she has to make a decision whether to stay in that selfish mindset or to come out of that selfish mindset and develop true care for all in other words to come out of what you would consider filos form of love which is familial type love and to move to agape type love which is care for all care for the well-being of all beings she does make the right decision in the film which is you know a positive aspect of it I thought the premise of the film was great I thought the implement the implementation of the film was weak and I was kind of disappointed by the Wachowski

Zhou implementation of it but that's all I'll say about that in my brief aside I think it's still worth kind of checking out so going back to these attractiveness studies when you can manipulate an entire half of the population to only see a very very very limited scope of people in that society as attractive okay whereas somebody you even would want to kind of be around or have dealings with you're already steering the ability of many people within that society to propagate their genes at all and this is borne out in genetic studies this is not just speculation this is not just me saying I think it works like that if you look at genetic studies of about ancestry about human ancestry you find that the human species has largely been propagated by women's genes in other words more women propagate their genes than men propagate their genes I know that sounds strange because you would think I would have to be a 50/50 figure but that's not how it works okay it what it means is that at any given moment in general only about 20% of men are actually in print you know worldwide are impregnating women and therefore approximately 2 out of 10 men propagate their gene downward into the gene pool stream in the future whereas approximately 80% of women are propagating their genes down into the gene pool so when you look at why society has turned out the way that it has again you could say this is a harsh judgment but you have to firmly look at the role of women in who they have chosen to propagate their genes with now when you combine attractiveness studies that have been done between men and women and how they wildly diverged and again there are people who will staunchly stick to this genetics Darwin Darwin ia's Darwinism survival of the fittest crap when it comes to that and/or then go to the false argument that this is just human nature ok they're completely ignoring social manipulation they're completely ignoring social engineering they're completely ignoring mind control they're completely ignoring the role of advertising and placing images before people you know look folks in with in Satanism believe it or not okay I'll bring up a topic here that I didn't really plan on talking about but it comes to my mind when we talk about studies like this there is something that has been put forward in certain satanic groups or certain satanic philosophies called crystallization inertia and when it comes to sexuality this is something that I think people should be aware of and look into when when someone is young and they're exposed to certain imagery it takes root in the subconscious mind and people will think well preferences you know sexual preferences attractiveness preferences things like that are just ingrained and they're just part of somebody's DNA I'm trying to explain to people no they are not they are largely socially conditioned okay they're driven by social engineering they're driven by the types of images people are exposed to it young ages and even if you look into this concept with in Satanism believe it or not you know that's what I'm trying to say is even within any other ideology you could find things that are true you could find things that are worthy of investigation and study just because some Satanists have talked about this concept doesn't mean that people shouldn't look into it it's called it's called crystallization inertia but in some groups like the Church of Satan they use the term erotic crystallization inertia to talk about how sexual preferences are developed through exposure to certain visual stimuli often at young ages okay so I think it's worthy of people looking into because I think it illustrates my point through advertising through so through media okay through television through magazines through movies people are being influenced from young ages to decide what to see certain things as attractive and other things as not attractive and that's that gets rooted into the subconscious and that gets taken with people throughout their lives it's programming this is what people don't want to understand they want to understand that that they don't want to understand that we are a programmable race we are a programmable species and that's a very uncomfortable thing to them to look at because then they have to start looking at while who's doing the programming who's allowing bad programming to come in who's propagating bad programming see then responsibility comes in to the issue and that's why people don't want to look at this you know so the this helps to illustrate the point of how attractiveness gets ingrained into people often at very young ages and that sticks with them subconsciously throughout their life well that imagery has to be being put out there by someone and they're these cultural engineers are using to steer the mindset of human beings particularly women again because they know they're the ones who are ultimately responsible for the propagation of the gene pool for the choice of which genes get propagated through the gene pool and again look into these genetic studies if you don't believe me look into them yourself look into you know genetic studies show that you know more women have propagated their genes over time than men and you'll see that it's true and again maybe I'll post some links with the show ok so this is one of the topics that I want to explain about how this is a eugenics op now how that works then is out of the very small percentage of males that many females even find acceptable mentally ok they the females mentally through their perceptions find acceptable to prop 2 even socially engage let's say okay at all then you're going to have a smaller percentage within that twenty percent or so you know and it'll of course of women aren't just going to interact with those twenty percent okay socially it'll be a much larger number that they interact with but the studies show that they will generally wish to engage any further relationships with about 20% of males because that's what they even physically find attractive then they'll we that down by what they're looking for beyond just looks and then that comes into this dynamic of hypergamy and it brings in the dynamic of well what is their communicated value system that they've received from their parents and the older generations and then you know how are they going to interact with this smaller percentage of males that they you know have already kind of weeded down from the bulk of the male population and then they're going to say well moving forward into the future with more serious relationships or long-term relationships or they're gonna find the people who have those social characteristics that they find a tractable attractive and move forward with those individuals so you're really talking about a smaller even smaller percentage of men so what is happening as a result of this limitation within the perceived value attractiveness and value of men is you're actually seeing population reduction happen and people will say how could you possibly say that the world's more overpopulated and you know tighter numbers of people then it's ever been wrong what the world is not overpopulated this is more social engineering and mind control cities are largely overpopulated and stacked with people because they're concentrated focal points for populations or as we don't have distributed populations over the land this is this could create the perception of overpopulation and they want that because they want people on board with eugenics again it's what I call mini-me

Satanism they want people thinking satanic Lee people who think satanic Lee and agree with the tenets of Satanism are more likely to be manipulated and socially engineered and controlled if they get people thinking in a lower-level way the real local talk receipt thinks we're going to talk about declining birth rates in just about every westernized country on the other side of this break folks stay tuned for that you're listening to what on earth is happening we'll be right back you know today disguise at night today welcome back everyone you're listening to what on earth is happening here on rbn I'm your host mark passio my website what on earth is happening calm so we talked about general attractiveness studies that have been done comparing what men and women perceive as acceptable attractive and how that wildly diverges and I used it as an example of cultural engineering social engineering to divide men and women by manipulating you know what is even perceived as acceptable in both of their mindsets but specifically in women and you know when you when you start to control things like what people find attractive acceptable attractive etc this is going to have a long-term effect and because there's this much more tightly controlled selection that you see happening birth rates are actually falling folks I mean you know people don't even understand this they think like because the world's population in general is going up that somehow that means we're over populating the planet the population rate is rising in destitute areas and destitute countries and this is largely a survival mechanism we're in the mindset of people who are living in in totally destitute conditions they will often think the best way of propagation is to have a lot of children to hope that some of them survive and then maybe come out of this condition it never really usually works out like that but that's the that's what a survival based mindset generally does so you're seeing totally destitute third world countries populations rising and believe me the powers that should not be the occult aqua sea doesn't like seeing that either that they want to conduct harder core eugenics on those people largely through you know the kinds of poisons they want to hit the children with when they're as young as possible or just hit them with genetically modified food that's going to reduce their fertility you know that they're they're going to a more hardcore type of eugenics when it comes to that in westernized societies they're using these epigenetic eugenics techniques what I call epic eugenics which is waging this war of weaning down the population by getting the population to do it themselves because they're thinking thoughts that are not really their own and believe that they're their own thoughts when these thoughts have been socially conditioned into them at very early ages often in their formative years through media and also through the propagation of that those forms of mind control through bad parenting so I want to give some figures at the top of the next hour before we start taking calls just to complete this section and we'll continue this next week on what the actual birth rate here in the United States actually is and you'll understand our population is going down not up we'll pick that up on the other side of this break folks you're listening to what on earth is happening here on Republic Broadcasting stay with us we'll be back freedom man that's what it's all about welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm we're into the third hour of the show for this evening we're talking about the neo feminism agenda how it is a methodology of eugenics and it's what I call epic eugenics eugenics waged through mind control I was getting ready to talk about declining birth rates particularly in Western countries and all you got to do is type into a search engine you know birth rate figures and you'll see that the birth rate is below the necessary requirement to propagate the population to maintain a steady number to maintain you know a population that's neither rising nor falling you need a 2.1 birthrate which means that you have 2.1 births per 2 people and the reason you need a little bit more than 2 / 2 is because there's unnatural deaths that happen you know in society and that accounts for you know a slightly higher death rate so the birth rate has to be at about 2.1 so it's slightly above a natural you know death rate at the same time as people are born so the the the birth rate has to be two point one per two people for the population and maintain a steady number without rising or falling currently the birth rate in the United States is approximately 1.8 for 21.85 depending on whose numbers you're looking at that is well below the rate that is necessary to maintain a steady population so the actual population overall within the United States is falling not rising and it's you look up Everett just about every other quote westernized country okay industrialized country the figures are approximately the same if not worse than the United States some of them are in many cases lower than 1.8 the United States is right about in the middle of 1.8 / 2 people the again depending on whose figures you accept but recent numbers have shown approximately 1.8 5 is the birth rate in the United States so we are not we don't have an overpopulated world we have overcrowded cities and that's how the occult aqua sea wants it that's how the occult controllers want it they want people crowded into regions where they could be easily herded and controlled they don't want them being around nature a natural environment you know and you know that they want to try to wean this population down as as much as they can but more over than that they want to take out the qualities and characteristics within the population that they do not want propagating and therefore they have to propagate the notion of attractiveness to the female who chooses who to propagate genes with down to the next generation they have to make the acceptability or the characteristics for attractiveness be ones that are hand in hand go hand in hand with the propagation of this immoral system in other words men that are acclimatized and go along with and agree with the corporate world ok and this is why they have to ingrain into women that is so important that it's the number one important thing that it is the source of value that it is the source of security forget morality forget ethics you know truth what's that who cares reality couldn't be bothered with it it's working splendidly folks and the population is actually dropping as a result welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm before I go to the calls I want to give the call-in number once again the call-in number toll-free to join us here on what on earth is happening is 803 one three nine four four three once again the calling number toll-free 800 three one three ninety four forty three I'll be going to the phones in just a few minutes but I just want to give people a little bit of a preview of what's coming up on future shows so of course I'll wrap up the topic there unless you know we go into a lull with calls then I'll jump back in with some more material but you know I I concluded there in the last segment with the following birth rates in westernized countries which are easily you know able to be looked up on any search engine and confirmed this is showing how this is a eugenics operation which is very much working it's a brilliant strategy it's a multi-faceted plan I don't expect anybody to understand all the facets or intricacies of the plan by just listening to one show you'll have to understand this section of neo feminism in its totality by listening to all the shows I've done on this topic but then compare it and contrast it and put it in to the larger puzzle picture with all the other things that I've covered since day one on this radio show which is why I always recommend listen to the show in order from number one at your own pace because it is a tapestry of information and you can't build the things in the later sections without building a firm foundation at the beginning so this is a stepwise progressive initiation into knowledge and into the truth about what's really going on in the world and how this society is 100 percent completely manipulated and controlled and that's done through social engineering or otherwise mind control so I'm gonna take this topic into it's so necessary to destroy sex drives you know and propagate a genuine lack of in Tallin intimacy in society that's another big part of what's going on that's fomenting the further war and tension between the sexes in society you also want to take one side what if you're the government or you're the controllers because that's also going to drive a wedge further in between men and women and we could look at some of the ways that you know women kind of are benefited by government and benefited by the whole immoral system that's propagated up around us and how many of them like it like that they like to take advantage of those quote perks and see government as a protector or a daddy figure and this always comes from parental abandonment issues you know just like all the people who want the nanny state have mommy issues the people who want protection by this immoral institution called government often have daddy issues so you know we'll talk more about how this fits into parental abandonment issues as well because that cannot be overstated destroyed sex drives through lack through overworking people the type of pop culture that they're sold and and how that is propagated into their mindset the food water chemicals radionics chemtrails you know all of that goes to work on people's libido as well so we'll be getting into how they actually not only use you know manipulative tactics regarding attractiveness and and values but how they do it often physically as well to make people not want to propagate their genes by destroying sex drives we'll talk about how women have been hyper sexualized and yet in many cases through family and popular culture discouraged to have healthy sexual lives I'm gonna get into sex being used for manipulation social medias role in the further dividing of men and women because people can't see how that's going on in many cases they think it's you know made people more social and and brought people closer together when in fact it's actually created driven quite a wedge between people you know so and we'll talk about men's reactionary movements toward what has been done and how women have been conditioned in our society and men's reaction to that you know what has been we'll look at you know certain attitudes within like MRA men's rights activism movements and things like that the mgt o/w movement which stands for men going their own way this concept called thus exodus which is another big thing about like men dropping out of society not even wanting interaction with women as a result of you know this dynamic that I've been talking about of the neo feminism agenda so this will be coming up on future shows I'll be getting into all of these topics and more probably take at least another couple of weeks to go through it but like I said this will take as long as it takes because I think it's such an important dynamic to deeply understand so I'll stay on this topic for as long as it takes to thoroughly to my satisfaction cover the issues that I want to talk about after that I'll be going into I'll probably be giving my presentation that I just gave at Philadelphia Liberty on the rocks called the true and purpose of the second amendment I will probably take a whole show and give that presentation in an extended form live on the air with slides even though I'll be posting the video of it I'll probably do it as a radio show and extended podcast with slides so that's coming up because I want to re-emphasize the importance of gun ownership rights and re-emphasize the importance of the Second Amendment in general I'll probably be doing an entire series on the occult history of Nazism of the religion called Nazism in in a future show and going into all the occultists who fomented that religion and brought it to the forefront in the early and mid part of the 20th century so that'll be a series coming up on what on earth is happening and then I'm gonna go back into solutions in future shows and talk about what I feel is a a social informational warfare technique a social informational warfare technique that to my knowledge I have never heard proposed by anyone and I have a name for it I call it maven targeting maven targeting I'm gonna try to make this popular I'm gonna try to spread this to as many people that have the capacity to understand what it is and how it might work in society and that's all I'll say about it for now I kind of hinted at it before but we'll be getting into this these and many more topics in coming weeks so let's go to the phone lines and hear what people have to say I would prefer to keep it on the topic of neo feminism in general although there are never taboo topics on this show so you know if people want to bring it in a different direction you know I won't stop them from doing it but I'd like to hear calls on the Neo feminism agenda if pot if at all possible so let's go to the phone lines and let's hear from Ray in Oregon ray you're live on what on earth is happening welcome hey Mark absolutely brilliant it just it really it really was it the you've just you nailed it you're on man this is really good stuff and you looped it back around for me by by hitting the population I just got in a big fight with my neighbor it was a foul population so the first thing I'd say right ask you is we you say you can just get these anywhere where did you get your stats for the population 1 in many many different places you know you can compare and contrast this all you have to do is type World birth rates that's it you know and you can get them for any country you just type into any search engine you prefer birth rates for the countries of the world that's it and you could go to any number an enormous number of sources and see how certain different sources will vary slightly but in general they don't vary vary drastically and the United States I only have one in my notes tonight in the notes that I was taking when I was preparing the show the the the average percentage or number of the birth rate it's not a percentage it's how many people are actually per two people in society are actually having children and propagating their genes period it's 1.84 per two people that's the average again you could see it as there's certain sites that might cover it as one point eight five one point eight six I'm leaning towards a little bit lower and of where most people had it but it was around one point eight five so I've seen many sites listed as one point eight four two point one to propagate a steady population right right I would take it in just a little I got a question and then another follow-up question as I'm as I'm going you know through life and I'm doing my best to to do this great work and I'm trying to wake people up I understand I think enough about it to know it's important I've alienated pretty not very good at it I don't think but it doesn't shut me up I just I I know all I have to do it well sure as I'm looking at this it becomes very apparent that there is a great amount of people that just ain't gonna make it they're just they're calcify i they're harmed they have no spiritual you know place to even touchdown and those people those people will mentally wake up in a concentration camp that's the level of suffering that will be required unfortunately ray-ray stay with me I'll hold you over into the next section ladies and gentlemen you're listening to what on earth is happening we'll be right back Oh how appropriate folks phenomenal lyrics from the great band spear caravan their wake up from your sleep if it's your soul you want to keep I think you know can't be any more synchro mystic or time appropriate with what Rey was bringing up before the break the last break hit us Rey you were talking about how people that you try to bring these topics up to or so mentally calcified and resistant to learning and understanding the truth about what's really going on around them you want to continue with that line of thought they will fight you to the death won't they I thought my neighbor went in his house to get a gun and I thought he was gonna shoot meanwhile we were talking about its population but my bigger question on this is okay so the people that that finally do wake up in the concentration camps the ones that don't when they die where do you think their next wheel of pain is gonna be do you think it's on the earth or do you think there's other planet oh absolutely without it I mean that if you're asking my belief about that dude can I say I know that definitively no but my belief is you're not going anywhere anywhere you're gonna stay here till the lesson is understood deeply and you know it'll take as long as it takes as I say it like it like I say it'll take as long as it takes to cover this this topic it'll take as long as it takes for the souls journey to progress into higher levels of awareness and it may not you know that'll happen for as long as the earth is here you know who knows I mean if we really really go overboard and do something destructive to the earth to affect its ability to carry life you know I don't know if we'll go so far as to actually physically destroy the planet but III think we could do something to the atmosphere and the land and water that makes it toxic enough that we won't be able to live on it and then this species will go away but I think spiritually that the beings the souls will still go to someplace that can carry life and will have similar circumstances so that they have to learn the same lesson you're not escaping the lessons because the lesson is embedded into the fabric of creation you know it's the will of creation to prop to move consciousness to higher and higher levels that's the will of creation that's the sin tropic force that is driving everything ultimately in consciousness and it counteracts and moves against to act as a sharpening grinding stone if you will of that blade the force called entropy okay or the the chaotic force the force that wants to hold that progress of real evolutionary development and consciousness back and it gives it something to essentially work against unfortunately the people that you're referring to have just been caught up in that chaotic and tropic force that force of entropy that force of dissolution the the moral decay the total ignorance you know the apathy the laziness the cowardice etc and they're just swept along by that current they're not engaging the will and they're not engaging the will because they don't have enough care and they don't have enough knowledge and that's the owners are the only forces that absolutely must be developed in order to create positive real change and to change the actual conditions there are requirements built-in requirements to changing what the conditions are that we already have and unless those requirements are met conditions do not just magically change themselves so you do not want to understand that dynamic so you know Diner postulate that and I was going to tie this in with you've heard of the the cult of Saturn right course absolutely the Saturnian cult is one of the aspects of the old cult aqua sea without any doubt you know you see this evidence all over the place in judiciary's you know judges wear the black robes you know the whole education system you're rewarded in graduation with this black robe in black square you know without any question the Saturnian symbol is everywhere in advertising you know they consider this you know one of the gods of the ancient world L you know was Saturn and you know it generally equates with the the disciplinarian the chaotic principal this force of entropy as well Saturn is an adversary an opposer it could be equated to the concept of Satan in many cases but without a doubt this is the absolute control freak that there there's a religion of control freak ism is the way I would put the whole Saturnian priesthood so without any question you know the Saturnian priests class is part of what I refer to as the the network of dark occultist the occult ah cracy as I'm going to continue to refer to it in the future because I personally like that term that's enough now here's what Steiner says he says the ones that don't make it in this turn that that do calcify and turn off and will not have anything of it that is where they go they go there so what do you think about the I where do we go if we if we you know learned our lesson what what's our next step do we you know as I said the word avatar to you would does that mean anything to you um well you know to start with this the steiner reference um did he think that they would go there physically or would this be some sort of a spiritual imprisonment there for a time because I'm not certain that Saturn would have a physical atmosphere capable of supporting our kind of life today is he talking three dimensional or is he talking in a spiritual dimension of some kind I got the impression that it would be spiritual interesting besides that we don't dare speak so while the cold of sides welcome back everyone you're listening to what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm taking your calls for the next two segments until the end of the show call free toll-free number to join us 831 394 43 I want to thank Ray for his call and bringing up the interesting points that he did let's hear from Brandon in Boston Brandon you are live on what on earth is happening welcome hey thank you Mark absolutely yes my grant I think this is a very important topic I'm glad that you're dedicating a lot of episodes to it until it becomes resolved because this is a huge ginormous topic and I kind of got turned on to this through Michael to surrounds work on the females and I what he's talking about nestled on the following one we made it with the women and but what he brings up and of all this literature and mythos that there was no protest on behalf of the limit right and so therefore we have this sort of seducing fallen angel type right sort of literary environmental consciousness media what we call now o in many accounts and many accounts they wanted to quote they wanted to breed with the gods because of their capabilities through their technology and through the influence that they held with the other beings that came here and did what they did to humanity and many of them like you looked at lower that's a better position to be in than just the lowly you know slave species you know it's this whole concept that people in a situation of control or slavery will often participate with their enslaver or the system of enslavement that they are actually in just to have a somewhat more comfortable place within that system of enslavement right yeah it's totally unconscionable you know let's improve it you know but you know he brings up the fact that like you know um well you know why do why is every country named after a woman a goddess Europa named after a goddess but he also says that they probably had that technology and I think it was Isaac Asimov who said that technology at some point becomes indistinguishable from magic that's right nothing you know couldn't impose certain magic that sort of unlock the Mouzone of the tantric stone of the citizen such a woman which comes through us who the vampire now oh that's exactly what those allegories are about that the seduction of the woman by the vampire class you know this is the class of the oak Oak autocracy class the occult controllers who are not quite human quote-unquote they're psychopathic you know they have all these resources and capabilities at their disposal which is almost like magic and then the women are seduced by that want to be a part of that whole system when it's actually feeding off of them and everyone else around them that's a perfect example the whole vampire allegories absolutely bring a great point see and to see how now the good points of further see how it merges into the Neo feminist agenda and by the way I'm loving the the terms you coming up with here like the alcazaba Christie and at all but um the Twilight series huh how we had vampires who are vegan basically have this effeminate vampire right I think that series and it's interesting like I hate it right but interesting this study if you're gonna study the children who are exposed to this stuff and it's like the the kind of Gothic gone to look at superconn right you know it's it's putting this aesthetic out there into society and you know this whole gothic type mindset as well is largely about like not caring you know I was just saying like it's become cool not to care you know you know not to know about what's really going on not to care you know to be to just to be seen as somebody who really deeply cares or as emotional and cares about things that are really going on is seen as oh what do you want to be like that for that just leads to stress and that just leads to you know you being disappointed you know this whole idea of destroying the heart energy destroying real care for the the suffering of human beings and all beings you know that that has to be destroyed and I'd say that's a big part of this whole agenda as well I mean that's all a part of the whole occult agenda in general but it plays into the neo feminism agenda as well yep and one more thing I just think you know as my personal experience okay women reacting to an awakened man I mean I don't call myself awakened but like on the process of being awakened sure I understand you know I mean you know uh you know they go through these stages where they're like way to say they're not waking or whatever they'll say well he's not like I need percent of us man slobs I know horrible father figures and mothers that I've been grown and grew into love Oh a he must be gay or be I'm just deny that you know and they actually go through the stages of grief and then they finally come to some kind of obsessive like acceptance you know it's very fast now I don't think anybody psychologist has really talked about that I've been Carol Gilligan it's definitely a ver difficult thing for people trying to cultivate any kind of a relationship with the opposite sex if one of the members are quote unquote awakened and very aware of what's going on and the other is not and is in that uncomfortable state of not really wanting to be awakened not really wanting to know and I've seen you know relationships either totally broken up over it or in in some cases the the person who is awakened capitulating because they want to stay with that person out of comfort reasons and deciding I'm going to tone down my rhetoric I'm going to tone down my action when it comes to exposing things and speaking the truth and you know what that's the worst place to be the worst place anybody can be ladies and gentlemen if you are in a position where you know you have responsibility to the truth and you shirk it because of the fellows or eros form of love again I explain the three different kinds of love before in the Greek mystery traditions there were three words that were used to express love or love energy there was eros which is romantic love between a man and a woman felis which is familial love or the love shared between friends and other family members right then there was agape and agape is love for truth love for all beings love for justice love for freedom in other words alignment with the will of creation for higher consciousness that is what agape represented if someone shirks agape for either eros or filos meaning romantic or familial or friend kind of love and they stopped engagement in and propagation of truth as a result in my estimation that is the worst spiritual place to be in the universe that's it yeah I wanna I want to really thank you for your call Brendon phenomenal points that you brought up there let's hear from Jim in Connecticut Jim you're live on what on earth is happening welcome to the show hi mark a very interesting show I wasn't aware of some of these things you've been bringing up I have two questions first question is is but do you know what the age range of these male-female attractive studies were yes it was I believe and I don't hold me to this but I believe they were conducted from eighteen all the way up to like 60 or 65 years of age so it was wide swath of people it was a whole age range of adults you know I don't know if they went over the late sixties or not but and again III don't want to say that definitively but there were many different studies so I'm sure some of the age ranges varied okay but it was all adult men and women that were part of it and I would say the age ranges were pretty much all over the board so it wasn't pin to rezone temple no no no it was all over the age spectrum okay my last question is do you have any information or knowledge of who specifically is behind this manipulation I I gave you could probably find rosters of people on any of the given groups that I mentioned you know look up people who are members of the Tavistock Institute of Human Relations the Rockefeller Foundation there's Council on Foreign Relations the Club of Rome lots of other international think tanks members of the Central Intelligence Agency you know I mean yeah look up there the the Bilderberg Group of annual meeting of their their whole membership is it comes out almost every single year look look up just about any name on that and they're people who are involved in these types of mental manipulation you know definitely looking at have a stock institute of human relations I mean if people aren't familiar with that mind control think-tank they don't really even understand where so much of the social conditioning comes from and people want to say that's just a conspiracy theory let me tell you something these are the most advanced psychologists occult psychologists in the world who know all the intricacies of how the human psyche operates how it can be manipulated how it could be steered how it can be directed they're shaping human perception they're controlling human perception once you do that you own people's behavior when you own their behavior you own their soul looking at all of those groups and more I'd recommend going back into my work in the in the past and I talked about many of the different think tank groups in the section on who are the occult controllers in in the podcast early on how do you spell this yes its ta V I s T Ock Tavistock Institute of human relations there's a phenomenal book by John Coleman Co le MA and John Coleman who is a historian who has done brilliant work in exposing the mass nations and the mind control that is put out there by the Tavistock Institute of human relations many other researchers as well but John Coleman's is particularly excellent I recommend it yes absolutely thanks so much for the call Jim and let's hear from Jonathan in Kentucky Jonathan you're live on what on earth is happening welcome mark a long time to see how you been brother doing well yourself ya know there's a lot of doom and gloom we have especially with the way society and humanity functions and I really wanted to give a word of encouragement if that's okay circle Red Hood you know I look at I look at how we all are in this planet and we always ask yourself why are we here why is it like the way it is the only thing I can come to is what better time in the universe beyond this planet in physicality to repel this oppression because if we don't do it here how do we deserve to be anywhere else that's right you know you know I it's funny that you even mentioned that because I was just saying this that well you know people always talk about escape but like what better of a place to be where the action is that you know it's like this is where the work is to be done this is our this is our work this is our goal and not so much spiritually but I highly consider that it has to be in our DNA we are connected to this planet and maybe we incarnate here because of our DNA resonates with it we are the white blood cells of this planet awaken one I kind of like that approach I kind of like what you've laid out there you know I don't think Escape is the answer I don't think looking to other dimensions other times other places it is the answer I think we are here for a very specific reason and that is to accomplish the great work of changing the consciousness of the people of this planet because I fundamentally know in my DNA in my soul in my resonant energy within my being that the universe abhors slavery the universe wants freedom for the different aspects of itself it doesn't want the beings of any particular planet to be enslaved it wants for us to know the truth and be free as a result and we do that by bringing by understanding the psyche by understanding the aspects of the self through self-knowledge and then through knowledge of the laws of nature and bringing our behaviors into alignment with those laws so that we can co-create wisely and consciously and that's what that's what the will of the universe is for us to learn those things it doesn't want slavery who wants to see this condition called the human condition of slavery ended and that's the work that we are here to do that is our mission so John and I thank you for those words of encouragement I think people should take them to heart yes sir I had one one more quick thing asking our they take it off if you like your occulted tactical hat I did receive it and thank you yes I love that it had the flower of life on the front and it had the tag anti Archon on the back which I thought was awesome yeah thank you that gift I didn't realize that that would be who sent that yeah that's why now if you notice my last name is from southern Sicily too and my family crest if we're talking about DNA is that a dog or a pigeon with olive leaf in it now I just wanted to throw that out there Oh interesting thanks so much thanks for letting me know that that was you that sent that folks I get a great little gifts occasionally sent from listeners that are really well very thoughtful and very appropriate as well so absolutely thanks so much for that Jonathan and thanks for the great call let's hear from Sterling in Texas sterling you are live on what on earth is happening welcome I'm mark are you doing well yourself I'm great I just wanted to bring up a few things about going back to parental abandonment sure I think that the perfect movie that or at least that I've seen on that just sums up the human condition of parental abandonment would be king of the Avenue have you ever seen that movie no I have not thanks for the recommendation what is it generally about fantastic movie basically what happens this young white boy grows up and he was adopted by a drug dealer it's black man start starving right there we're coming up to a break I'll let you continue this in the last segment ladies and gentlemen stay with us we'll be right back see when I try to show welcome back everyone final segment for what on earth is happening this evening we were talking to sterling in Texas starting I'll let you continue thank you well I'll try to make it quick for the other callers but basically what happens is the young white boy he grows up with this heroin addict mother and he always has nightmares about it he's haunted by his childhood and he never knew his father and so he was adopted by this black man this kingpin and so what ends up happening he was murdered and obviously he sees all these traumatic things while he's alive but so he grows up to become a kingpin and he he fought he battles in the movie or he's even in conflict in the movie for king of the Avenue is what they call it I guess just to have control over his region so this other guy gets the position for king of the Avenue and he was threatening to kill his family because his father killed his father is this making sense my yes okay so what happens is he was so traumatized and I guess programs somehow right that he has this vision this encounter with the devil in his living room and he makes a proposition a deal as he usually does and he says he promises him safety promises to to allow them to become king of the Avenue if well well I guess he was just he was basically just saying that he needed him to become the king of the Avenue and he would have to summon a demon in order to do so so what he has to do or what he did was he went to the grave of his father and dug up the corpse because the devil said that he needed a conduit so I guess that means like like subconsciously that that traumatic experience would manifest and into you know the demon that he possessed and so I mean it's it's truly amazing how parental abandonment issues that create trauma are truly reflected and carry energy throughout most people's lives and because it works at such a subconscious level in many cases people don't even recognize the power that that kind of trauma has in their lives and don't work to eradicate it because they don't even recognize it it's like this is going on all over society both men and women you know and this is why we have to call attention to issues like this and understand that in many cases this is driven by unresolved trauma that happens during childhood and then the behaviors that we're conducting are actually done subconsciously without people even realizing what the real causal factors of the of those behaviors are thanks so much for the call sterling great points good movie to look into I'll be doing that that's all the time we have for this issue of what on earth is happening folks remember there are only two mistakes that one can ever make on the path to truth not starting and not going all the way thanks for listening tonight we'll see right here next week

What On Earth Is Happening Show #186

Topics: *The Neo-Feminism Agenda and the War Between the Sexes, Neo-Feminism as Epi-Eugenics, Neo-Feminism as an example of the Hegelian Dialectic, Lack of True Care in our society, Women who openly love the State for its "perks," Acceptance of the State as the protective "Father-Figure," Parental Abandonment Issues, Hyper-sexualization of women in advertising, media and pornography, Women actively discouraged to have healthy sexual lives, Cultural Shaming, Disney "Princess Programming," Hypergamy, Sex used for manipulation, the State's favoring of women, Divorces largely initiated by women: almost 80%, Men not living up to culturally-programmed women's expectations, Divorce and family courts ruling drastically in favor of women: over 95%, Falling birth rates in Western civilization, Social Media's role in dividing men and women, the Disappearance of Genuine Intimacy, Destroyed Sex Drives through work, media, pop culture, food, water, radionics, chemtrails, etc., Women say they want "nice" men, but breed with men with the opposite qualities, the Japanese Intimacy Crisis, the Rise of Asexualism, the Rise of Radical Feminists and open Misandry, Men's Re-action Movements, MRA (Men's Rights Activism), MGTOW (Men Going Their Own Way), the "Sexodus," the Satanic Intellect vs. The Christ Consciousness, The Illusions of Control and Security, the Satanic Roots of Neo-Feminism, Morality's relationship to Freedom, the healing power of Distilled Water*

freedom man that's what it's all about [Music] you've got to groove on freedom like the good book says [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio [Music] welcome one and all you're listening to what on earth is happening right here on the republic broadcasting radio network i'm your host mark pacio my website what on earth is happening dot com the network's website republicbroadcasting.org today is saturday february 21st 2015 this show is of course live every saturday evening from 10 p.m to 1 a.m eastern time that's 9 p.m to midnight central time we have a great show lined up for you here today we're going to be continuing our discussion on neo feminism as a eugenics operation an operation of what i call what i've coined epigenetics eugenics that is actually waged against a population through mind control through the control of human perception we'll be talking about some of the mind control tactics that are specifically targeted toward women in our society as we've been doing for the past several weeks i will be taking calls in the third hour of the show this evening the call-in number to join us 800-313-9443 once again the toll-free number to join us in our number three with your calls and comments 800 313 before we start this evening i do have a few announcements of course the big conference coming up on the east coast this year the freer mind three conference biggest and best conference of its type anywhere really in the world uh if if you want to be technical about it i mean this is a conference that really delves deep into the nature of the problem that humanity is facing it's a conference on consciousness mind control and the occult freer mind three will be taking place april 10th 11th and 12th 2015 just outside of the city limits of philadelphia at the sheraton bucks county hotel the sheraton bucks county hotel is at 400 north oxford valley road in langhorne pennsylvania the speakers confirmed for freer mine 3 bob tuscan clint richardson curtis the illuminated one davis dennis mckenna derek bros the new jersey weed man ed fortune freighter x freeman fritz springmeyer jay parker janiece barcelo john bush john vibes josie the outlaw wales laura eisenhower lennon honor stuart swerdlow luke rudkowski mark devlin myself mark pacio and the anti-media panel there will also be a panel discussion group with the speakers of the event and there will be open mic night sessions at the end of each night for approximately two hours an all-weekend pass for the biggest conference of the year only 150 dollars for all three days friday saturday and sunday april 10th 11th and 12th this the uh speaker schedule has been posted to the conference website at freeremindconference.com and uh you want to go and get your tickets in advance that's the best way that you can help support a conference of this type is to buy your tickets in advance as that really helps with the speakers travel arrangement expenses the lodging expenses and the expenses to secure the venue and they have a great venue this year and absolute dynamite uh lineup of speakers so um i've also uh been able to tell you that there will be a coupon code that will continue through the end of february if you enter coupon code pacio into the checkout at freermindconference.com when you order tickets you can get fifteen dollars off for purchases of over uh one hundred dollars or more and that um that special code is valid for listeners of what on earth is happening only and it will be running through the end of february so exactly one week from today uh at midnight february 28th that will that will end okay so um get your tickets now and with that coupon code pacio a p-a-s-s-i-o you can enter that for fifteen dollars off your total purchase so uh tickets are available now don't miss the free or mine conference coming up in april uh april 10th 11th and 12th 2015 the website freeyourmindconference.com so uh i did finish editing my second amendment presentation video that i gave on february 10th in philadelphia and it is now online at both the what on earth is happening dot com website and my youtube channel uh you can see it uh if you go to the news section of the website the videos section of the website it's at the bottom of that listing if you go to the videos tab or you can click uh the second item under latest news it says watch mark's presentation the true meaning and purpose of the second amendment and i'm really happy with the way this came out it was a short presentation especially by my standards i usually give much longer uh video presentations but this one was just over half an hour i think it clocked in at about 41 minutes or so and i think uh you know i did a pretty good job breaking down all the different components of the second amendment and then reassembling it on the other side to help people understand what it was really truly about so you could check that out once again on the news or video section of my website or my youtube channel which is youtube.com what on earth 93 what on earth all lowercase altogether and just the number 93 after that there are still what on earth is happening uh promotional t-shirts available as a gift in return for a voluntary donation to support my work you can click the email link that is listed in the article in the top of the news section item of what of the what on earth is happening dot com website for more information on how to receive a promotional t-shirt and as i said last week i'll be making some new designs for the for your mind conference so uh those will be available and i have a really a nice um uh kind of a vector graphics design that i'm going to be uh breaking out for the free or mine conference on t-shirts so um there also is a donation button on the left hand side of the wateronethishappening.com site if you feel that you've received value from the information i've presented and shared here on this radio show and on my website you can feel free to make a voluntary donation to help support my work so that i can continue it into the future so with that having been said uh let's jump into the material for for tonight again as we've been talking about this topic which is a controversial one and again controversial just means face to face with change often it means face to face with dealing with something that is uh burdensome or uncomfortable and then you have to confront it and deal with it in order to heal it because ignoring it isn't going to make the problem going go away it's going to make it much worse that's kind of how it is with this topic of the mind control techniques that are specifically targeted against one sex uh it's a hegelian dialectic this is a fomented war between the sexes and the dialectic again very important for people to understand uh can work a a um a confrontational dialectic uh that is a form of manipulation as has been it's been called the hegelian dialectic in philosophy it's been called problem reaction solution by alternative researchers only one side needs to buy into the manipulation or the lie in order for that dialectic to actually take effect to manipulate that side and then they attack the other side and you know you're off to the races so this is what i've been trying to explain when it comes to this um it's not about trying to further divide people it's trying to make the people who have bought into this dialectic understand that they've been duped they've been lied to and by buying into it and propagating it they're actually doing more harm to humanity and creating further division and like i said fomenting a war between the sexes instead of them coming together and understand the tactics of manipulation and control that have been being used against them so that's really what neo-feminism is ultimately all about but even more so it's a eugenics operation as i've been talking about over the past many weeks eugenics is about selectively deciding who gets to propagate their genes and who does not and what i call the neo-feminism agenda is an example of epi eugenics that means that it's eugenics that's being waged epigenetically meaning beyond just the physical control of genes they're doing it through mind control they're doing it through the manipulation of human perceptions and uh you know we've talked about many many topics so far that we've covered regarding this this concept this topic in general i'm going to probably either be ending it this week or next week this topic and then moving on to some other issues that i want to discuss but um depending on how things go with the the breakdown of the topics i want to cover tonight and callers you know it may we may wrap this topic up this week it may go into another week but last week we touched on things like hypergamy which is you know the concept of marrying upward um or looking at a a person that you're going to become involved with simply as a resource uh that's really what it is about uh you know especially a monetary resource the lack of true care uh that exists in society the the lack of care about the difference between right and wrong behavior you know so many people are only interested what a person does for money and they're not interested in whether they really know the difference between right and wrong and they're a truly moral individual or not we talked about the the the trap of buying into the idea that the socially engineered condition of a lot of people in society especially the socially engineered condition that a lot of women are in as a result of the type of mind control and manipulation that has been used specifically against them does not make that they're currently um uh engaged in behaviors uh their nature uh it's a trap to buy into this concept that this is just human nature and to not study social engineering and mind control uh as a basis for this condition and the condition is capable of being changed if people wake up to the manipulation tactics so uh you know this as soon as i hear people say i've reemphasized this over and over again this is just human nature this is just man's nature this is just woman's nature i autumn a red flag automatically goes up and i immediately think the person really doesn't know what they're talking about and hasn't really done their homework because to make that statement totally dismisses it's totally dismissive of social engineering and mind control to bring about that current condition that condition can of course be changed it's not just permanently set the way we are what is pretty much permanently set as the way we are is that we were made as a programmable species this is the true nature of a human being and whether good programming goes into the child during the formative years will largely determine whether good output comes out in the form of behavior in that child's life and this also can be changed even later in one's life but it becomes more difficult because that early uh formative year programming is absolutely quintessential for for development and what the the person uh you know later on locks onto and values as real and values as good and values as important moving forward in their lives it's very difficult to get someone out of that mindset if it's calcified and solidified you know over the course of their lives and it's never been challenged that formative framework that was laid down during the early formative years of the child because the mind at that age soaks everything up like a sponge puts it into the subconscious mind and then relies upon it moving forward you know we have to understand how to get inside and unlock a lot of that content that comes through self introspection that comes through working with one's own psyche that comes through doing um deep introspective work to to look at the things that are amiss and awry and are have been put there through programming and through trauma you know and then to deal with it and say hey is this benefiting me and then to say well if it is then okay keep that part if it's not then some change needs to be made it's not okay to stay this way it's not okay to just accept this as just how i am you know work needs to be done in those areas for healing and for growth you know and for moving to higher levels of awareness and understanding what made things like that and if that's not in our better interest then we have the power we have the capacity to change it through working upon ourselves so um you know some of the topics that i want to get into this evening well just to recap a few more things we we discussed last week before doing that you know we talked about the a little bit about the imbalanced ratio between men and women in the so-called truth movement and you know it's a dynamic i really wish we would see come to a level of balance by more women's women stepping up and you know offering the truth as they see it to the wider community it seems like this you know um overall uh there's there's just this huge huge um dispa disparity between you know the amount of men who are doing this type of work and the amount of women who are doing it and i think it it has to do with the topic i'm going to start on today which is that a lot of women in general tend to like statism they tend to like the condition that humanity is in and don't really want it to change that much because they see a lot of the ways that they perceive that it works out in their favor in their favor kind of like the perks of the state if you will and we'll get into some of those things but uh just again as a somewhat of a recap you know we we tried to look at why there's this disparity between men and women in the truth movement last week we'll continue that this week and if there's any people want to call in and offer their perspective on that i'd like to hear that um we talked a little bit about last week how women drive the corporate economy with over 85 percent of the purchases of the american economy an amazing disparity with men in society making only approximately 15 percent of the purchases of all goods and services in the united states i mean that is an overwhelmingly incredibly imbalanced statistic 85 of purchases made in the united states are made by women 15 of all purchases in the united states are made by men you know if that doesn't tell you that the techniques of marketing are working heavily in the minds of women compared with men in society in general again this is a generalization okay but you will hear me making them during you know talking about topics such as this um that that's overwhelming that's an unbelievable statistic as far as i'm concerned you know and people should consider something like that why is that you know hardly anybody even asked that question uh i feel that it's because these controllers and these um occultists directly target the psyche of women you know they know that women are largely relying upon this desire for security we talked about that as well you know and it's an illusion and they they manipulate and play upon that illusion and you know in doing so they get people to buy things that they you know put a perceived need for in their mind even though they don't really need it and it's driving the whole corporate driven economy you know the whole profit margin driven corporate economy very successfully i might add and last week we of course touched upon the uh studies that have been done on human attractiveness to the opposite sex and you know we were talking about the imbalanced statistics that come out of these studies on attractiveness and uh you know this stats say that the overwhelming body of men find about 80 percent of all women acceptably attractive while all women find only about 20 of men acceptably attractive we'll pick it up from there on the other side of this break folks stay with us we don't need no education we don't need in the classroom alone [Music] hey welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pacio my website what on earth is happening dot com so before the break i was kind of recapping what we have covered uh and specifically some of the topics we covered last week on uh the neo feminism agenda as an operation of what i term epigenetics we had looked at some attractiveness studies human attractiveness studies that show that overwhelmingly men find approximately 80 women of 80 percent of women acceptably attractive while women as a whole in general only find approximately 20 percent or less of men acceptably attractive this is um an example of what i call the manipulation of human perception to create a desired outcome on the part of the social engineers by getting women to only look at a certain very narrow slice of male males in society as somehow acceptable and that meet their expectations in any way and this is a way that eugenics can actually be waged through the control of human perception itself and we talked about that a little bit last week we talked about how you know this will allow social engineers to really control the propagation of certain types of genetics and values it's even more important than controlling the propagation of genes is controlling the propagation of values because if they can condition certain people to value simply money or looks etc or social status this becomes the new form of social darwinism and social engineering at the same time and most women don't even understand that this has been done to their mind they believe they're thinking their own thoughts in many ways and these thoughts are actually coming to them through the social engineers through the think tank agendas through the media through the control of the media through the control of pop culture and pop music and what you see on television and reading magazines etc it's a very tightly knit strategy it's a very scientifically um created strategy because they understand so much about human psychology and so much about the the hidden deep-seated subconscious motivations of people and they'll exploit that and they'll send that into imbalanced forms of desires and and drives and motivations they know how to manipulate those things not just understand how they work but they understand how to manipulate them to bring about their desired outcome so we talked about that a little bit last week and how all of this is really resulting in falling birth rates really all over the world and largely in westernized countries anywhere where the society has already been um you know uh industrialized etc uh there's falling birth rates they're all below 2.1 just about um and you know we looked at america's hovering between you know 1.85 and 1.9 somewhere you know depending on whose numbers you look at i've seen numbers as low as 1.84 per two people which is seriously declining but overall uh if you look at the overall population of the world um you know especially in the western world we're seeing birth rates going on the downward curve as we speak you know people are always talking about overpopulation and this is a lie because they're really perceiving overpopulation in cities in concentrated urban areas um the almost all of the western westernized countries uh their population uh index is actually in decline you can look this up through uh just type in birth rates by nation and you know you'll have tons of charts about this um so we talked about that a little bit last week and we ended up kind of talking about how there are people who historically will side with an immoral system to just selfishly reap the quote-unquote benefits of that system for themselves and this is kind of what i want to segue into talking about tonight you know um we also touched on last week about how it's so it can be very difficult for awakened human beings to interact in a relationship if they're in a relationship with someone who still isn't quite awake you know and how you know what i said i considered one of the ultimate uh wrongdoings or sins if you will that anybody could possibly commit and that's not standing within and speaking the truth uh and being an advocate for truth and freedom just to get along with or go along with someone that they're in a relationship with in a what i call a lower form of love the eros form of love or romantic love is certainly not as high as the love of truth which is agape okay you know that that should come before every other consideration including family familial love and romantic love i would say that needs to come even before the love of one's own children because without that kind of care your children aren't going to have a future we'll pick this up on the other side of the break stay with us [Music] [Music] you know the day folks the night night divides the day try to run try to hide break on the view to the other side welcome back everyone you're listening to what on earth is happening here on republic broadcasting i'm your host mark pascio my website what on earth is happening dot com we're continuing to talk about the neo-feminism agenda as an example of eugenics uh as an example of an operation that i term epi eugenics eugenics waged through the control of human perception and um i was getting ready to get into some new material you know what i was talking about just before the break i think is very important that you know care for truth has to really be our first consideration everything is secondary to that because if we don't care about what the truth is then we certainly don't care about what the difference between right and wrong is and then we're going into a prison because there's a law in the universe that has morality which is built upon care for truth increases freedom increases and as morality declines which is the inevitable result of not caring for truth freedom declines and we go into bondage and slavery now that's an absolutely immutable law that exists in nature if you don't accept that get over it you know if you might as well not accept the existence of the sun or of gravity okay because you are affected and bound by the workings of those laws that you did not put into place in creation you know they're part of nature inherently and you know uh this this society is just basically conditioned into not caring about what's right not caring about what's true you know if if we had real morals in society the first question that that would be asked by people encountering each other for for the first time wouldn't be about how much money do you make or what do you do for a living it would be about are you a true moral being that really knows the difference between right and wrong how about the first question being please define a right for me maybe the world would be a whole lot better if that was the first question that pops up in conversation do you know the definition of a right you know it's one of the biggest reasons we're all losing our rights is because nobody even understands what a right is in our society anymore that's how dumbed down and selfish people have become so the the areas i want to take it tonight the topics i want to touch on can again seem unrelated as you know we talked about in the last in last week's program i'm going to just cover some different talk points regarding this and they they you they could seem unrelated but when you see them together in a in the big picture sense you understand how they are all part of this agenda and it's an agenda make no mistake about it to control human population and it's selected it's a selective breeding agenda it's control through the human mind of which types of people which people with particular characteristics and traits they want to be able to breed and propagate those genes characteristics and traits their value system most importantly or their lack of one you know that's what they want to try to keep in place and that's how this this whole neo feminism agenda works folks so you know tonight i want to talk about how there's a lot of women who have been culturally conditioned and again generality statement a lot of most you know i'm going to use terms like that it's not a blanket statement it certainly doesn't mean all there are many anti-statist women there are many women who are involved in truth speaking and you know involved in the truth movement of propagating real information to people to try to wake them up but the vast majority of women in our society have been culturally conditioned to desire the state to want the state like i said this is what this whole agenda is about is ultimately creating an unholy wedding between the women of our society and the state because of the perceived perks that they receive from the state as big daddy okay this is always connected to parental abandonment issues and because so many people in our society have grown up without the presence of a father figure a strong father a strong manly presence in their lives there's a reason for that the state doesn't want that they want the increased divorce rates they want the the um increase increasing fomenting of the war between the sexes because the less strong men there are in society the more people depend upon the state and become subservient to it so this is all happening at a subconscious level through programming you know they a lot of women have bought into the state as this protective father figure and again a lot of it has to do with they themselves don't have a good father figure in their lives and so they're using the state as proxy for that as a psychological subconscious proxy you got to understand this is how the psyche that has been affected by some form of trauma starts to work it looks for something to substitute in there this is often referred to as a psychological proxy and in many many women's lives the state has become the psychological proxy for the strong father figure that may be absent in their lives or may they may have a dysfunctional relationship with that father figure in some way so they're dealing with abandonment issues of some type regarding the father figure and that is so widespread in our society it's unbelievably widespread and you know it doesn't have to mean physical abandonment it can mean estrangement it can mean psychological and mental abandonment emotional abandonment emotional trauma interaction with the father figure in many cases because many men aren't in touch with their emotional aspects as well as they should be and therefore when they have daughters they don't really understand how to interact with them very well and then this leads to this strange condition even in relationships where the father is physically present and then you see the females of the society coming over to the side of the state of course it's more complicated than that because there's outward brainwashing in school systems there's outward brainwashing in the media there's outward brainwashing in in mass entertainment in magazines you know on the nightly news everywhere and you know what is what this has ultimately resulted in is the state taking on the role of daddy in many of these women's minds and it happens the same way for men too i mean they're not exempt from that from all those psychological processes and from not understanding how different traumatic circumstances within their lives leads them to want the state as a proxy figure for the strong parent you know this is this is really universally done in both sexes but it's been very very successful when it's been employed against women and then a lot of men want to step into that role because they want to be part of that perception you know they want to be part of oh the strong masculine figure he's a member of the state he's a member of the the the so-called two-party system which is really one party called slavery that's not how it's going to be seen in the mind of the mind controlled inauthentic woman the inauthentic man is going to go and take up his role within that institution of control you know because he's going to want to be seen as attractive to the inauthentic woman which is this is what we have largely in our society there's only a handful of real people left folks we have the proxies running around we have the you know golems the husks you know the empty avatars if you will that that have nothing inside they're the inauthenticated man and woman the the flesh robot the automaton you know and this is propped up everywhere but it's it's largely due to these subconscious parental abandonment issues because they're undealt with and unresolved and these people aren't doing any introspective work upon themselves to understand where these issues lie as when i talked about cosmic abandonment in that whole series we went through i talked about my own parental abandonment issues on both sides mother and father how i dealt with it and worked through it if you're not looking at it directly and confronting it it's going to eat you alive you have to do that work no matter how painful it is and there's no shortcuts to doing it there's no shortcuts it's called understanding what happened and dealing with it and understanding you're not going to go back in time and change it or how are you going to let it now affect who you are in the moment and most people are just they're eaten up by it they're eaten up by it because they think they're going to somehow suppress all that subconscious matter material and somehow they're going to come out on the other side unscathed by suppressing it all instead of dealing with it well it doesn't work like that folks you're going to get more of the same you're going to get more negativity you're going to get more chaos in your life the more you refuse to deal with issues that are buried down and traumatic traumatizing you at the subconscious level and i would suggest this the vast majority of women are are have these types of subconscious trauma issues and many of them don't want to deal with it and you know they just want to look for a proxy and the state's all too happy to come in and say i'll be big daddy you know it works pretty flawlessly and it's not it's going to continue to work until people really start to come around and understand how this operates so a lot of women openly like the state and are very outward about saying so you know they think this control system is great in many cases again not all please don't say i'm making any blanket statements because i'm not i'm trying to use basic generalities like a good majority a vast majority i feel it's a vast majority personally it's a vast majority of men too but you know women seem to really openly enjoy the quote-unquote perks or quote-unquote benefits that the state gives them over men in society in many cases and again at this subconscious level they've bought the state as the proxy for the masculine father figure that is in some way absent or has abandoned them in their lives you see this big time in um princess programming you know the princess programming by disney and other media conglomerates but specifically is put out there by disney this is part of the concept of hypergamy of looking to that strong masculine figure as the provider you know it's not about whether the person's really truly deeply good it's like you know lavish me with the resources that i want and take care of me as a father or mother would again it's like a proxy for an absent parent more than it is a relationship that's based in equality and again not sameness okay once again equality does not mean just sameness you know if you're thinking about it like that you're thinking about it all wrong that means different people bring different things to the table in the relationship and then there's a blending there but they're they're both being treated with equal fairness and equal rights that's what i mean by equality equality under natural law equality and care equality and what they have as their value system this is the familial dynamic that the controllers don't want they want to destroy it it's largely destroyed make no mistake about it is largely absent the people who awaken themselves to what has been done through this agenda are going to need to rebuild that familial dynamic because as long as that's destroyed you could forget about the proper raising of children you could forget about uh people truly learning morality in our society and that's exactly where the controllers want this dynamic at and they have it there they've they have largely accomplished this you know you look at how sexuality is treated the hyper sexualization of women especially young women in our society through advertising through media through pornography etc but then you know in the same breath they're actively discouraged to have healthy sexual lives this whole cultural shaming of women you know who god forbid have had more sex partners than it seems deemed socially acceptable you know that this creates all kinds of you know cross confusion going on in the mind that crossed signals being sent and again it's it started when they're very young almost pre pubescent years and you see in media and advertising this sexualizing of women and boys as well of girls and boys that are very young even prepubescent you know the princess programming is a big part of it too i mean that this goes on in movies this goes on in magazines and television constantly and again that's part of this you know hypergamy concept that is sold to young women you know just using sex as a methodology of manipulation to to hold over um you know males heads to get what they want is a big part of the hypergamy thing you know this idea that you know again the the male is to be seen and used as a resource and again if this happens on both sides of the fence don't get me wrong folks i mean men do this too but i'm saying it's widespread among women it's encouraged among women by their family members in many cases i mean i know this is encouraged within my family and other friends families that i've spoken to about it they're very open and saying yeah that's how you know parents tell their their uh female children to be in many cases in most cases you know marry up marry for money etc and you know then you see that how this leads to high rates of divorce and you see that divorces are largely initiated by women almost entirely actually i mean the numbers back in the early 2000s were that almost 80 percent of divorces were initiated by women in our society and that was in the early 2000s i don't know exactly the number that it stands out but i guarantee you it's over 80 percent over 80 percent and this is all because of this mental programming that goes on real world men in our society are not living up to the mental programmed expectations that many women hold in their minds about what a man is and you know what many many men are the inauthentic man you know they're getting what they have been programmed to get and women don't see this you know they've been conditioned to want these doormats and then when they're getting these doormats and they're not living up to their their expectations as a quote-unquote man in her mind about what she's been told that a man is then you know they don't want to continue in the relationship in many cases and in many cases it does become an abusive relationship a lot of times because of the dynamic of um valued money is about everything else within the relationship and you know this is on these are going to be unpopular things for people to hear i'm trying to explain to you how these mind control dynamics are going to work to create a totally destabilized society so that controllers can come in and easily mop up the remains and we'll continue on these topics on the other side of this break ladies and gentlemen you're listening to what on earth is happening here on republic broadcasting we'll be right do back like [Music] welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pascio my website what on earth is happening dot com we were talking about how a lot of women in society love the immoral system that we have because they perceive the state as a means of security or something that will give them perks or benefits when it comes to uh you know in interaction between them and males in society we talked about the hyper sexualization of women and the you know putting up of women on you know sexual um pedestals in many ways that you see in uh media and advertising and pornography but then the cross signal being sent to actively discourage women have healthy sexual lives in society this idea of cultural uh shaming when it comes to female sexuality princess programming in the media and in the entertainment conglomerates um sex being openly used as a methodology of manipulation and for hypergamy divorces being initiated largely by women over 80 percent of them because men aren't living up to the mentally programmed expectations that they have for them look at divorce and family courts you know divorce courts and family courts and especially in western countries but particularly in the united states they ruled drastically in favor of women in almost every instance 95 percent of rulings of divorce courts and family courts are in favor of women in our society 95 now that's not overwhelmingly skewed okay i mean you're going to tell me that in all of the interactions that happen between men and women women are have the moral high ground in 95 percent of those instances you know i'm not trying to sound sexist when i say that just seems like a very skewed number to me you know and most women won't look at that and say yeah there's something wrong with that number that's a skewed number the state wants this dynamic in place it wants this tension in place they want they you don't understand anything that's going to lead to basically a child that's not growing up with a strong male presence in its life that's what the state wants guaranteed that is what the the dark occultists want i'm telling you that is part of the entire satanic agenda that we're talking about here because without a strong male presence okay you're never going to see the kind of masculine energy that it is going to take to resist tyranny in society that's what the all the religion is about that's what all the the whole monetary system is to suppress that and emasculate the male and make him into a uh corporate slave in in a noose called a tie okay have all that you know any kind of rebellious angst stripped out of him you know let's let's redirect all that to football you know you know and and looking at our tribe of our team as our our car our our identity our self-identity i was watching a video the other day a a male child maybe about six years old literally crying tears big crocodile tears streaming down his eyes into his cereal as he's sitting at the table eating a bowl of cereal okay videotape this is being videotaped by his mother okay who's trying to comfort him instead of telling him what a complete clown he's being i don't even care if if the child was two years old okay i would never feed into the kind of delusions that i was seeing in this video maybe i'll post it with with this podcast i don't know but he's crying about the seahawks loss in the super bowl i guess he's from families from seattle and you know when he was asked how are you feeling about their loss he said i feel like nothing [Music] oh [Music] powerful words wake up from your sleep if it's your soul that you want to keep absolutely i mean i couldn't concur more that's what's required on the part of humanity because we are losing our soul as i was saying in the uh in the segment just before this last break i was uh looking at a video a child crying in his bowl of cereal in the morning because the seahorse seahawks lost in the super bowl and his mother's videotaping this and asking oh you know how are you feeling and he says as he's weeping uncontrollably he's saying with this face with his lips pounded out like i feel like nothing you know that's how culturally conditioned already at that young of an age at about six years old or whatever he was okay that your identity is to be wrapped up in your team in your tribe this is how inauthenticated they already have a six-year-old boy wonderful job raising that child mom and dad you did so well i mean you got a broken gollum pro golem probably just like yourselves on your hands who's whose entire identity is wrapped up in a football team and he's saying because they lost he feels like nothing he feels nothing yeah yeah he's on the road to greatness in society let me tell you you know but that that's that's the par that's that's par for the course folks that's that's the standard that we're dealing with right now and that's everywhere everywhere and because we're raising children like this in the aggregate sense you know the general population is raising people like this that's why we're going deeper and deeper into slavery see people think making men weak like this or somehow emasculated like this or having all their identity wrapped up in in you know the identity of collectivism the identity of the state the identity of the tribe you know they think oh that's that's gonna somehow only weaken men no as men are weakened the entire social structure is weakened cohesion between men and women are weakened and as a result women are going to suffer the consequences of that as well and largely they're going to suffer the consequences of that through the tyranny of the state because there's not going to be any strong male figures to resist that tyranny that mind control that brainwashing or any of the masculine energy is going to be funneled into the state and all these mind control zombie flesh robots called police and soldiers you know are just going to enact that tyranny out onto the public and you think women are going to be somehow magically exempt from that they're going to be the hardest hit people get bet on it just don't take my word for it just historically look at what happens to women in a society that has descended into tyranny you know they think they're going to receive any protection from this mechanism quite the opposite it's a joke this whole agenda of neo-feminism is a complete joke and it's totally anti-woman has nothing to do with women feminine superiority at all it's the destruction of the female just as much as it is the destruction of the true male you know where one other thing i want to bring up when it comes to this dynamic of driving a wedge between men and women well you know so we talked about a lot of the perks that women see as perks or benefits from the state why many of them will enjoy its continuation you know the continuing the continuance of the life of the state in general but um i mean we can see it's operating as a eugenics weapon the neo-feminism agenda is already in place and operating in the western world as a eugenics weapon we've this is evidenced by the falling birth rates in just about every westernized country i think you know they're ramping this into higher gear now with the advent of social media over the last few many years okay i mean within the last you know less than 10 years i'd say really within the last five or you know six or seven years when social media started coming up you see a very drastically different dynamic between men and women playing out in society people think social media is um actually you know they tend to think that it's actually kind of like bringing people closer together by letting them share all the stuff in reality i feel that social media has acted as a divide between people a big divide between people and then they're they're coming into like just isolated little pockets of people who just talk to each other you know and ignore everything else they're put it's putting people in bubbles but one of the other things that i think it's doing throughout society dynamically is it's helping to drive a deeper wedge between the sexes it's fomenting the war between the sexes at an even greater more accelerated pace at a greater level and a more accelerated pace and i'll explain how i feel it's doing this before social media people interacted publicly in person imagine that you know they went places and did things together now everything's on the on this virtual screen that is people just tapping away tapping away saying nothing 99 of the time okay and it's like they're not even interacting in real life anymore and this is this is actually really created a very wide split between men and women and how they see social media and i've brought this up to some men and i brought it up to some women as well and you could see how there's a completely different attitude about this between men and women and how women like how it functions and men somewhat like how it functions but then when they see what it's actually causing socially they'll seem to think they'll seem to agree yes there's a point here that this is socially divisive um you know and they'll go oh aha they might have an aha moment and realize you know what you're talking about but even if women do see the point that you're trying to make they don't seem to care they like it the way that it is because again it works out like a benefit or a perk in their favor and there you just have the concept of satanic thinking when something is being used to socially divide people don't care whether it works out whether one group is hurt if it works out in their favor you know and this is the concept of the state too being seen as somehow good or that should be there or that should be present because as long as something works out in their favor forget the other person who's harmed by it forget the violence that that's inherent in that system you know i'm not saying there's violence inherent in social media but there's certainly divisiveness inherent in it and you know when you bring up the way that it's been dividing people through keeping them apart you know through you know basically women through can use these social media and dating sites kind of to just garner more and more attention for themselves and then you know kind of almost like a grocery list or you know a shopping line item you know have a whole bunch of things to choose from a whole bunch of men's interest to choose from whereas social media does not work out that way in most men's favor and you know this has actually made women even more completely radical when it comes to what they see as somehow acceptive attractive etc you know appealing and it's this it's the continuation of the type of princess programming that you see in hollywood movies through disney you know this concept that somehow men are not there as equals but they're there as resources to be exploited and to be gone to whenever the the need is is there um and don't get me wrong folks i'm not saying men don't use and look at women as objects in many cases as well that happens at this in the same way what i'm saying is that social media has made it possible for women who previously had to basically interact within society physically and go places and do things okay with men if they wanted to you know forge some type of a relationship now has basically removed them from that interaction to a large extent where they can actually just operate digitally and you know somehow like like i said like some sort of a grocery list or you know a shopping item choose between men that they want you know to interact with somehow and men don't really have that opportunity through social media or certainly it's not there to any large extent and when you bring up this dynamic to people especially young people who are you know in dating ages and etc or looking for relationship ages they will both agree that that dynamic is present but you'll only ever hear men say yeah that's that's true and it's kind of messed up women will say yeah that's true so what you know you'll hear that kind of an attitude i just suggest that people kind of bring up this in casual conversation and ask people what they think about it i just see it as a huge divisive thing that really most people haven't even kind of considered or really deeply thought about at any kind of a level now is are these things planned like that or they just work out you know i would say this could be part of this overwhelming agenda in addition to basically collecting everybody's data and being able to work up psychological profiles on people this is what they're using it for to continue to drive the wedge between the genuine interaction between men and women in society which form higher levels of dynamic cohesion between men and women and get them operating on the same page and looking at the same types of things and developing you know higher level values and care for what's really going on that again that familial dynamic that looking out for each other dynamic and it's become all about how can i use the opposite sex as a resource again what do i get out of it satanic thinking satanic thinking so that's something i just wanted to mention you know that whole idea of social media's role in dividing men and women in in the modern world you know all of this really comes down to what we're seeing throughout our society is a lack of just genuine care between men and women you know you're seeing them just see each other as the enemy more and more and more and more and that's what they want they want any way that they can divide and conquer people you could talk about religion as a divide and conquer strategy class social status and income etc age you know race ethnicity etc nationalism but you know people often don't look at the one biggest one that's staring people in the face gender it's the biggest divide and conquer strategy of all especially with how this neo-feminism agenda is being used in the modern world i think there's a genuine lack of care between men and women and there's a rising genuine lack of intimacy between men and women you know we could talk about destroyed sexuality in society destroyed sex drives do the long oppressive hours of work that people go through and then they don't want to interact with any level of intimacy with their partner you know how about um media destroying the sex drive pornography destroying the sex drive you know the whole idea of pop culture you know and the brainwashing that goes on through mass entertainment painting you know this this hard to reach ideal you know this is what a the perfect woman's body should look like this is what the perfect man's body should look like you know has nothing to do with genuine interaction between the people it's all superficial it's all on the surface it's all what can i get out of it satanic thinking how about the destruction of healthy sexuality and sex drives through just what's in the food through what's in the water do all the chemicals we're bombarded with on a daily basis in cleaning products and you know uh products that we use every day around the home in the bathroom all the the whole chemical society the chemical laden society about the all the spraying they're doing on us you know what's the result of when soft metals enter the bloodstream and get into the central nervous system you don't think that that can have an effect on human sexuality and and you know intimacy in general and again then that acts as a methodology of eugenics of controlling population growth how about radionics and electromagnetic fields all the waves that were constantly bombarded with on a daily basis everywhere if they could they would destroy sex entirely folks you know like the concept in brave new world they want open eugenics like that they just know that if people saw that type of thing being waged like what or um like what um uh huxley put out in brave new world that there be lash back against it so they're not doing it in that straight eugenics type of methodology they're doing it epigenetically and you're going to see whole characteristics whole value systems bred out of humanity this way until we awaken to what's going on folks it's a very very elaborate strategy it's something that only one in a million people are going to deeply comprehend and understand how this is being conducted i don't even expect most of the listenership to really understand this entire tapestry and again i've only been following a loose when i really deeply formulate this into a cohesive presentation maybe i'll make a formal seminar regarding this entire topic and i'll call it epigenetics the neo-feminism agenda you know and maybe that'll be an all-day seminar sometime in the future i don't know what i'm saying is that there's many different components to this and you have to look at it all as a tapestry to understand how it works how these different methodologies of attack work together so many ways they're destroying sexuality and intimacy i mean just there you just look at what's going on in japan right now folks i mean i don't know how many people are aware of this but i've read many articles about that there is an actual crisis they're calling it openly an intimacy crisis in the country of japan right now surveys conducted in around 2011 and 12 are finding that over 60 percent of men and 40 percent of women i'm sorry 50 percent 60 percent of men and 50 percent of women between the ages of 18 and 34 who were single at the time that they were polled that that these surveys were conducted we're not interested in any kind of a relationship with the opposite sex we're not involved in and did not want any kind of relationship with the opposite sex now do you think that that's normal behavior for men and women in the modern society i mean i i just don't see that as normal behavior that's that's those numbers are so skewed that is some type of mind control agenda at work and they actually call this the japanese intimacy crisis i mean if you just type that term into a search engine you will get articles on it i mean i i see that crisis as coming to the united states are already underway in the united states probably just at lesser percentages right now and this is what they want they want a rise in the divide between men and women in our culture they have it they have it going until we awaken to their methodologies of control it's not going to change for the better i want to touch on a few more points in this hour coming up and then we'll go to your calls in the third hour of the show stay with us everyone you're listening to what on earth is happening we'll be right back [Applause] [Music] [Applause] there's a cool silence but we don't dare speak [Applause] there's a wall between us they're really so deep we keep pretending [Music] that there's nothing wrong [Music] with the code of silence and it can't go wrong welcome back everyone you're listening to what on earth is happening here on republic broadcasting i'm your host mark passio my website what on earth is happening.com so before the break you know i was talking about this uh crisis and intimacy that you see happening in the far east in japan and how many young people want nothing to do with the opposite sex anymore and that's just absolutely non-natural that has to be the result of epigenetic programming in other words mind control and the declining birth rates in all westernized countries are an example of epigenetics eugenics that is waged through mind control where the population is actually calling itself and that those figures i guarantee you the figures that i talked about regarding the japanese intimacy crisis sixty percent of men and fifty percent of women not interested in any kind of romantic relationship in japan between ages 18 to 34. those figures are coming to the united states and other western countries i guarantee it unless we wake up to this manipulation that's being conducted against us to weaken us to divide us and to conquer us another thing you see in society that i feel is a disturbing trend is the rise of asexualism and i'm not saying hey if anybody just you know doesn't want to have any sexual life that's their business and that's you know their free will to do so but i see this very steep increase in the rise of asexualism which had always traditionally just been a level thing and engaged in a small uh you know percentage a very tiny percentage of the population it is now extremely on the rise and there's a reason for that it's all of these things working together that i call all components of this neo-feminism agenda which is about the total annihilation of the familial dynamic in society once you destroy that you destroy morality you put people onto moral relativism you put them down the path to social darwinism and that leads inevitably to eugenics and ladies and gentlemen i've just described to you what the religion of satanism is i don't care whether there's satanists out there that want to say i'm a spiritual satanist this and that you know you hear all these different terms thrown around about there's this kind of satanism and that kind of satanism when i talk about satanism i'm talking about the old religion ladies and gentlemen get that through your thick skulls out there okay i'm talking about the ancient hidden religion of slavery of the perpetuation of slavery in the keeping of the human animal as a slave that's the religion i'm referring to okay so everybody wants to rebrand everything and call it the same name you know you want you want to call what traditionally the religion of satanism which doesn't have to be called satanism okay i don't care what you call it it's the old dark occult religion period the old hidden exploitation of the human psyche and the laws of nature if you have that knowledge and other people don't i call that satanism and i call the tenets of only caring about yourself and not caring about what's true or right not not thinking or accepting that there's a true difference inherently between right and wrong behavior thinking that it's okay for the people who are the most ruthless in society to somehow come on top and rule over other people as long as you know we get ours and who cares about the suffering of other people and the the last tenet of well since we're if we're in that position of rulership well let's let's control uh who propagates their genes and who doesn't who pro who or in other words who lives and who dies which is called eugenics these are the general tenets of the old religion i don't care what name you want to slap on it you know call it atonism call it you know dark luciferianism i don't care what name you put on it doesn't make a difference what name you you give it as long as you understand what it does and what its tenets are you know people get too hung up on labels and then they want to argue it's like saying what is christianity well ten thousand christians are going to come together and disagree over what christianity really is you know because there's so many different forms and flavors of it understand that when i'm talking about the neo-feminism agenda i'm talking about it as an extension of this old religion which i call satanism it is a satanic agenda without any question in my mind and radical forms of it are coming up that are just openly openly espousing misandry in our society the radical hatred of men we'll pick up that thought on the other side of the break folks stay with us [Music] um [Music] [Music] oh welcome back everyone you're listening to what on earth is happening i'm your host mark pascio my website what on earth is happening dot com so before the break in the last segment we were covering different aspects of the intimacy crises that are going on all around the world we hear about it particularly in japan i i made the prediction this is coming or already present in the united states we talked about the rise of asexualism which is people with just no sexual preference and just this are dismissive of sex of any kind and how that's on the rise because of a lot of the different mind control that's going on in society and again this is all part of eugenics they they want this present um you know we talked about all the different things that destroy sex drives you know long work hours media pop culture food you know so-called medicines the pharmaceutical drugs pollutants in the water you know fluoride etc radionics and and electromagnetic fields smart things that are going on in smart meters wi-fi networks chemtrails you know soft metals being sprayed on the population for number of reasons and you know this is just uh this all comes together as a perfect storm of eugenics and people can't see how it all fits together how it's all working together you know they can't see the grand scheme the grand plan you know i was talking about before the breakhead is the rise of radical feminism you know this idea that you know men should just die we should deliberately control the the ability of men to breed as if this hasn't already been done epigenetically throughout our society where genetics studies show that already about eighty percent of the genetics is coming from women's lineages as opposed from men's dna which shows that most women only breed with approximately 20 percent of males in society about a fifth whereas four out of five men basically do not propagate their genes through birth through birthing a child you know and this is all done to essentially continue the immoral system that we have and continue the eugenics operation that is already being conducted against the public this whole idea of women are largely being responsible for the continuation of this immoral culture by who they are choosing to continue to breed with women aren't i i was reading another study it's something i guess i should bring up before you know continuing that you know women say overwhelmingly say that they want a nice quote-unquote nice man they want a moral human being in in a partnered relationship but overwhelmingly the same studies that have been conducted about what women say they want prove that then they go and do something completely different to that in their actual actions and their behavior and then they get together with a guy who doesn't have any of those characteristics that they say that they want which again there's cross signals you know you have one idea that is planted there more likely than not by the fat familial dynamic of their family members telling them you should go and get a quote nice guy that will quote take care of you okay but then they're looking at what are the pressures of society what is society saying is acceptable looking at all these different factors that they hear about in the mainstream you know media and culture and entertainment etc and then they go out and pick probably the most immoral the most um ruthless the one that will enter that will accept the chains of the state the most just to get over on somebody else and make as much money as he can regardless of what industry he has to go into or how our moral the profession that he has to go into is just to be considered attractive or desirable by the inauthentic female in our culture see it's a feedback loop the inauthentic female desires the inauthentic male so more men step into the role of being the inauthentic male and this is why women have a huge huge say in the outcome of humanity probably more so than men do because they get to decide what's the next generation going to be like am i going to hold a value system within me that is genuine and true and real and is based on truth and freedom or am i going to hold a value system that's all about money and gain and ultimately satanism because that's where we have it right now folks most people are satanists i don't care who that offends the vast bulk of the human population are satanic in their mindset and therein lies the problem of this entire culture and why we're going into bondage because we only care about ourselves we don't care about what's going on in a wider sense you want to know what satanism is i keep telling people it's waking up every day and never considering anybody but yourself you think about your own crap you think about your own situation you think about what you have to do to be more comfortable that day or the next day or the day after that you don't care about justice in the world you don't care about rights human rights you don't care what's going on globally you don't consider the state as slavery you don't want real freedom you want to know anything about that because that involves deep learning that involves true care that involves real introspection and changing your own mind changing your own thoughts which is the solution which is why things like this have to be talked about because they're toxic and poisonous people are being turned into toxic poisonous people that don't care about real values and as a result what what are those specifically those women doing they're going out they're breeding with the same kind of man that they've been breeding with that has made the world the way that it is and they keep doing it because they say one thing and do another contradiction internal contradiction and consciousness they don't really want a moral man they want a man who comes out on top within the immoral society that they're in that's all they care about the vast majority please i'd want to try to refrain as much as possible from ever using blanket statements okay when it comes to this dynamic i will i will say the vast majority and hey are the vast majority of men any different they'll go into these immoral institutions just to make money to appeal to you know the opposite sex they don't care about what they're doing they're just following orders like going along by rote because this is what's going to get me mine this is going to get me what i want and therein lies the satanic thinking that's going to lead us into oblivion and on top of this now you have the radical sects of neo-feminism that are absolutely openly man-hating practicing open misandry the the radical hatred of men you know some of them saying all men should just be done away with and then they'll have some sort well i presume that they'll have some sort of a breeding project a la um brave new world you know we'll have designer babies you know they're just taken from our genetic material and propagated and i guess they'll all be women too i mean you could see how sick and imbalanced this becomes at some point you know i'm certainly not for the subjugation of any people let alone women i think women should enjoy the same exact equal rights under natural law that all beings do that all beings should enjoy you know i said from the beginning that's the difference between classical feminism which espoused equality under rights and neo-feminism which is all about trying to replace this so-called patriarchy with a matriarchy we don't have either folks we have an occultocracy a phrase i've been coining and you know trying to ingrain in people's minds over and over by repeating it every week we have a society ruled by the dark occultist the hidden hand if you will the controllers that understand all of these dynamics about the human psyche and how they operate and are going to exploit them because the public is painfully and dangerously ignorant of how the human mind works and how the real laws of nature work so that's the kind of rulership we have we have an occultocracy and it's you want to know what what neo agenda it ultimately leads to neo-feudalism which is what we're already in folks we're already in a neo-feudal society that's the only kind of government there is on the earth is feudalism and sadly that's what a lot of these radical feminist groups would love to see they want to see this total control system for some reason they love the nanny state they think somehow it's strength when in fact it's total chaos and destruction and the only way we're going to help heal this divide is to bring these attentions to the four we can't keep staying silent about these things we have to put them up in people's faces and talk about it it's not going to be healed through silence i mean those are the basic issues and dynamics that i wanted to bring up regarding this topic i'd like to talk a little bit about the reactionary movements that are going on regarding the whole neo-feminism agenda because of course with every action there's going to be an equal and opposing reaction and again many of these just set the stage for confrontation and a further divide and war that's what they want war between the sexes you can't understand they have to understand that's all these people want they want division and war that's it they want to continue to suck off of that energy because as long as people are divided and at war with each other they're never going to understand the predator that the mindset of the predator that's already exploiting and preying upon them i don't understand how people can't grasp that so you have the men's reaction movements to the neo-feminism agenda you know men's rights activism in general mra and then you have other groups that identify as mgtow or mgtows mgtow which stands for mra stands for men's rights activism and then migto stands for men going their own way which is a men's i would call it a reactionary movement against the neo-feminism agenda that is about totally cutting off from interaction with women men's rights activism largely points out some of these things that i've been talking about over the last many weeks and wants to try to bring some more education and discussion to the fore regarding these things uh but again it's it's very both of these seem to me to be very incendiary i've tried to take a more balanced perspective and not try to foment a further war which is why i would say i would not consider myself a member of any type of reaction movement such as that i consider myself a an individualist who you know studies these dynamics and makes my up my own mind about them and then tries to explain to others how these dynamics are really working in society uh i think getting involved with any particular group is probably the wrong answer uh i'm not a collectivist in general in my in what i consider my nature i don't see myself anymore maybe i once did so i shouldn't say it's my nature but i've changed my condition let's put it that way to wanting to be involved in groups to you know working on my own and i will work with certain groups of people if i feel their intent is you know pure and well founded uh but i just you know don't consider myself a group joiner anymore i think i learned my lesson on why it's probably a bad idea to get involved in group dynamics period okay so um you know you can look at some of these movements and you see you do see some um uh uh misogynistic tendencies or outright misogyny within them uh in some cases and that's because you're going to get radical people involved on in this because it's such a controversial and hot tempered topic to begin with in most people's minds so uh i don't look at that as reflective of the entire of any of these entire movements you know you have to look at look at that and say well there's going to be extremists in just about anything and you need to realize they're a small percentage of it there are some valid many valid points that are brought up in within these reaction movements um and um you know one of the solutions that they bring up which i don't really think is a solution is the idea of just completely separating from interaction with women i think that's going to largely i understand it as a defensive mechanism i can understand it hey if they perceive they're being traumatized by this agenda they're going to say let me shut down and not have any interaction but is that really the solution i can understand why that is proposed as a a solution but are you really changing anything as a result of doing that that that means you're not going to be interacting with any of these people they're still going to be under the influences that they have been all the pressures of mind control and cultural engineering and social engineering okay and they're going to still be outputting that same behavior because you're not really doing anything to change it you're just going into a shell you know so this is the idea of the sexitus you know many articles have been written on this uh maybe i'll post some links to some of them i think uh uh uh there was a good two-part series but i think it was an infowars reporter i think it was paul joseph watson i'm not 100 certain so don't hold me to that but i'll look up some good articles on this concept of the sexitus the the dropping out of society by the american male really the male everywhere throughout the world because they see that modern females have become so um you know i guess mentally weakened in their uh in these different forms of of uh social engineering that have been done to them but many of them don't even understand that it's been done through social engineering again uh where a lot of these groups fall into is that this is just the nature of women which i see is the greatest danger within those movements okay you could hear some of the gripes from some of these movements and accept those gripes as valid okay because they're seeing the symptoms as i've explained a lot of the symptoms okay but the proposed solution is to just go into defense mechanism mode and not interact that i see in i understand it as a short-term defense mechanism but long-term i would say that's going to lead to more problems because what you're doing is you're just going to allow the social engineering to take its course without any resistance men are as if they're awake are going to have to bring knowledge of how this agenda is a eugenics agenda to the table and confront women with that who have fallen into it you can't do that if you just drop out of society folks we'll pick this dynamic up on the other side of the break and then we'll be taking your calls in hour number three ladies and gentlemen you're listening to what on earth is happening we'll be right back [Music] we don't need no education [Music] classrooms alone [Music] welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pacio my website what on earth is happening dot com so i'm kind of wrapping up the neo feminism agenda topic and uh maybe i will continue this next week maybe i'll do an all call-in show next week on this to let people um air their comments or questions or concerns um but i feel like i've touched on most of the topics that i want to touch on and i left on that note of the whole mra and mig toe movements uh as uh what i consider kind of reactionary to this uh understanding a lot of their concerns that they bring up recognizing that many of them do see the symptoms of what's happened in the social sociosexual divide between the sexes in our society but many of them incorrectly ascribing this to quote-unquote human nature or quote-unquote female nature which is absolutely the deepest trap that one could fall into when approaching this topic in general um almost overwhelmingly you do not see people within these movements as being um spiritually awakened they are very left-brained they have a lot of knowledge and information about what has gone on but many of them are of this total left brain scientism religion that will not allow them to see the nature of the control system that really is in place occultically even many of them are anti-state and have understood the violence that's inherent in statism but yet they still don't see that as connected to morality uh and don't understand the nature of objective morality certainly don't understand natural law to a deep extent and most definitely do not understand the occult the occult aspects of the control system and that's the number one thing you know if you go back to my streetwise spirituality seminar which i wish a lot of people within these type of movements would look at the very first characteristic of being spirit truly spiritually awakened that i listed in that seminar streetwise spirituality was knowing about the occult and understanding that it has both dark and light sides to it that was the number one criteria for being truly spiritually awake out of all the other possible things that it means to be enlightened or awakened that was what i listed as number one as the most important characteristic and everywhere i look it always comes back to that one dynamic ladies and gentlemen always the people who are deeply awake who are truly awake understand the occult i'm not saying they have to be practicing occultists okay hear what i'm saying not you what you want to hear in what i'm saying i'm saying they know of the existence of occultism they know what it is they know how it's used that's the difference between the people who are truly awake and the people who think that they're awake so i just want to wrap up a few things about this on the other side of the break and then we're going to be going to your calls toll free number to join us 800 313-9443 we'll be right back folks don't go anywhere [Music] the day destroys the night night divides the day try to run try to hide break on the view to the other side to the other side welcome back everyone you're listening to what on earth is happening i'm your host mark pascio my website what on earth is happening.com i think the final thing that i want to wrap up on the final note i want to wrap up on on this topic is in these reactionary movements the biggest danger is to think that this is all female nature and to dismiss the influence of social engineering and mind control the people within these movements have to become deeply awoken spiritually and understand the nature of the occult forms of mind control that have been used against our society if you don't understand that you don't really understand the nature of what's going on around you completely removing yourself from the equation is not the answer long term i get why people want to do that as a defensive mechanism because they've been traumatized by this okay you want to do that for a time i did that for a time folks didn't interact with anybody people thought i was some weird hermit or something but what i was doing in that time was i was getting my head straight and i was learning about what was going on in our world deep amounts of knowledge and learning were being taken in and then i had to make the decision to do something with that knowledge that's not where it ends that's where it begins what you have to do is get in there and confront people explain this not stay silent not stay hidden not stay to yourself you need to put yourself out there in the world if you want to make it better you got to get involved they're playing their dark sick twisted game that leads to eugenics and the destruction of human freedom we have to get on the battlefield and play the real game of awakening the human mind to the truth to true care and the right action that's called the great work and it involves courage it involves persistence and it involves real care for all it involves understanding that this is not human nature what we are experiencing this is the deeply mind-controlled human condition and i think that's a good place to to leave this topic at except for of course we'll be exploring it more in the calls that i'll be doing in this hour and i think next week i'll do an all call-in show on this very topic for anybody that has any further questions wants any clarification you know wants to ask about any resources or just air out whatever whatever concerns or comments that they have it's a good to from time to time just do an all call-in show so maybe i'll do that next week and again as i talked about on previous shows after wrapping up this topic i'm going to go back into exploring gun ownership rights and why it's so important and how there's still so many people in the world that don't understand why it's important or refuse to acknowledge it because they're too absolutely sickeningly right-brained you know they're not in a balanced state of mind you know it's bad to be totally left-brained and be a dominator but it's it's also bad to be completely right brain and not want to stand up for yourself through self-defense you know enlightenment is about the two pillars the non-aggression principle and the self-defense principle combined that's the holy union of the sacred feminine and masculine you know there's still a lot of people that don't get that so i'm gonna give my whole second amendment presentation on the air in a somewhat extended format and then you know we'll talk about gun ownership rights and what it's really deeply about why it's a cherished cherished tradition in the united states and why that has to spread to the rest of the world so um also on future shows i'm probably going to do an entire series on the occult history of nazism as a religion people think nazism was just a political ideology it absolutely was not just a political ideology it was a occult religion and i'll be breaking down the early history of nazism and looking into its occult roots the occult roots of nazism and then i'm going to go back into solutions after that series is wrapped up and i'll be looking at what i call the technique of maven targeting this is identifying the people who have the most influence in any given sphere of influence like a familial dynamic a workplace a grouping of friends etc and working on that person to try to influence their thinking so that they as the maven or the one who the whole group seems to listen to and take their advice from will propagate those ideas and then maybe we'll be making more headway instead of just trying to target random individuals to wake them up because we seem to care about them they might not have maven value as i will explain on coming shows so the whole concept of maven targeting as a strategy to converting people to the truth um will be discussed on a future show or shows as well so for now uh i think i'll leave the neo feminism agenda topic where i have it and we will go to the phone lines for the remainder of the show so let's hear from ray in oregon ray you are live on what on earth is happening welcome to the show well thank you uh mark you know me you're you're aware you're aware of my work absolutely this is ray karczyk correct yes yes um i'd like to to speak about the uh as you know i i call myself a living christ yes and that disturbs a great number of people christian and non-christian alike sure now i'd like to talk about the christ consciousness and the second coming of christ okay and when jesus of nazareth said that i am the truth life and the way he gave the secret to a world beyond conflict a world of non-dualistic energy of balance the balance between the right brain and the left brain yes in other words insight direct perception a tie-in with one's subconscious mind which sees it all gathers it all does not separate does not divide has no beginning has no end it is infinite intelligence it is god itself operating within the human the human being man fall from grace was the was the fall the descent from that holistic non-dualistic consciousness of of divine perception of truth of being at one with truth resonating with truth you and i uh you have a different approach than i do but you and i resonate at that level of truth that is unmistakable you have a better way of connecting with the intellect of other people now i perceive that the intellect all intellect is satanic oh because it's it's dualistic in nature and by that it means i mean that it's divisive in nature and it's posing in nature whenever you have an idea it's always a dualistic energy that must be reconciled into a non-dualistic insight then one can take action and that action is the act of creation now that's the whole purpose of of life that we come together that act of creation works through our free will that's correct because we're putting that action into the world through the process of our free will right i agree most people do not know what that means you see they are still caught up with the ideas that have been conditioned into them through remote sources satanic sources the media religions that they consider that all to be normal fair right there's nothing normal about it's all satanic without let up and the average person lives that way from birth to death they lose that that non-dualistic spirit as an infant when they become conditioned by their parents who were conditioned by their parents and prior generation to the beginning of the family they've all been conditioned and they passed it on to their children that's the sin original sin of contradiction it's all done through mind control and it spreads through society like a virus like a self absolutely perpetuating virus yeah right now know that i'm quite a controversial character on the on the internet and i have a lot of opposition i think anybody who's speaking the truth about what's going on in this immoral culture will come up against opposition and be perceived as very controversial you know there's many lies that are spoken about uh all of the people who are involved in in truth telling in our society uh we're not gonna let that dissuade us you know we're gonna stay persistent and keep moving forward because that's all that we really can do and we're gonna wake people up a little at a time if that's what it takes until the great work is accomplished well i have the solution to every problem that we face in society we can dissolve a new world order instantly by following this this solution and that is from this moment forward if everyone listening to what i'm about to say gives it their full attention and watch their reactions to what i'm about to say they will understand the extent of their conditioning and the extent of their confusion and the extent of their violence and that they join with each other with other people of like-mindedness and they become the collective that's all society is and it's a divisive violent arena uh the arena of of absolute destruction both destruction of others and self-destruction of confusion from this moment forward let everyone hearing my voice from this moon forward until the end of their life never tell another lie at any level a white lie a black lie doesn't matter you see most people find that impossible and yet to rise above the dualistic energy of the intellect the satanically ruled and that's exactly what the intellect is an instrument like a computer that is programmable we must rise above that when you rise above to the non-dualistic arena of truth you have transcended hell you have risen above hell in your life and your life only but it's infectious every other man woman and child who comes in contact with a truthful man for a simple man of truth is what a christ is that's what christ consciousness is right for someone resonating at that level they're going to affect everybody around them energetically almost by osmosis yes yes now you do one heck of a job with your presentations but you are speaking to the intellects of your audience and so they're going what you say may not be what they hear because they're the noise that they have going on inside right that's that's always a tough one to uh align the so-called internal dictionaries of language you know words are are a limited thing you know they they're they they define things you know they they uh like you said that they the language is part of the left brain and it that breaks things down and analyzes and separates things so that they could be more understood and then seen holistically and a lot of people don't have the same internal dictionary so when you're saying one word or concept they you know compare to what they have in their internal dictionary in the mind of language and it doesn't always equate it's uh it's a very uh tricky concept language and like being as clear in your under in your explaining of something as is possible to be it's why kind of i prefer the spoken language over even the written like i'm working on a book and i constantly worry about well is this much explanation through language in this paragraph or in this sentence sufficient to really convey convey the idea because i can't be asked a question i can't come back with a you know a a a clarification of a topic it has to stand upon its own and that's where you get into you know very verbose wordings and get get into editing things odd infinitum and it's kind of like why i more prefer the spoken word to the written word because you can have that dynamic interaction between people where you can further clarify through you know making you know an additional statement to try to really get people to understand what it is you're really deeply saying it can be a very tricky thing and i think it requires balance and it requires a lot of practice and uh you know i always hope that i'm you know doing enough job on on those grounds uh but uh you know you're you're not always going to reach every single person you you do what you can and then you hope the chips fall where they may and that people really get the gist of what you're saying well i listen to you deeply and i i resonate with the energy behind your words i'm not i'm not too concerned with the letter of the word my attention is paid to the the spirit of the word sure and that's where truth is felt i i couldn't agree more i mean i i think that's a really uh profound um insight there for people to listen to because you know people in the past have asked me well you know who do we listen to who whose information is good who do you pay attention to and i try to explain to them it's about an eclectic gathering of knowledge and information and you have to ultimately feel do you resonate with the spirit of that individual do you think he's telling you the truth as he or she understands it do you think they are giving you the truth as they grasp it as they currently understand it uh or do you think there's an agenda behind it you know and i i just think if you pay attention to somebody's work for a long enough time you will get the essence of the heart of that person you know i followed your work for a long time uh over over approximately a decade ago almost a decade ago i guess you could say uh and it really helped me to put a lot of things together and you know it's like you just eventually by listening to somebody by gathering in their work and and taking it in you get the sense for that person's mind and heart you know it's like you have to listen to enough of it too you know so i think that's a big part of discernment it's a big part that's the intuitive right brain side of things that's right you know where the intellect isn't really present where you're that's heart based in intelligence that's that's the the right brain side of things and i think that's so important for people to be able to do and not just go along with the analytical approach i'm not saying that isn't important i think that's important as well i tend to look at the intellect as part of the intelligence process but the intuition and nurturing of the right brain and the heart have to be brought into the equation to balance it i would say intellect without that sacred feminine perspective is satanic thinking is pure dualism i mean that's where i would just slightly differ but your insight about how to feel somebody's information and feel their energy is very very very profoundly valid and i think i think more people should take that into consideration when uh listening to information from any uh teacher so so-called you know you you mentioned the word insight now insight is direct perception that's at one minute with truth it cuts through all the garbage we're coming up to a break hold on right there folks we'll be back after these words [Music] welcome back everyone you're listening to what on earth is happening here on republic broadcasting i'm your host mark pascio my website what on earth is happening dot com before the break we were talking to ray in argan and ray you were going to make a point about insight i'll let you uh finish up that thought and then i'll move on to some more some other callers we must acknowledge what the intellect is all about we must use the intellect in order to to solve technical problems and insight not insights but mindsets that are gathered by virtue of mind control our minds being manipulated by other sources and we must use the intellect in order to communicate one with the other now that is the only purpose that i see is christ i see the rest of the life we must become silent we must die to the intellect die to the mind and be reborn of the spirit of infinite intelligence and have direct perception that's insight in all other matters of life now to straddle that to have that balance between the two to know when to use the intellect and when to drop it that's the secret now this comment i made about never tell another lie that's an instant transition from the dualistic intellect into non-dualistic truth and christ consciousness when jesus of nazareth said that i am the truth life and the way he gave the secret to eternal life you can only see the truth in the eternal moment of now anything after that is in the time-bound moment of intellect you know from the past present future etc and it's full of illusion full of representations of truth and we have been trained to worship those ideas that have been imposed upon us yes that is step away from truth and to step into hell and most people are completely unaware of it not only unaware but they're attached to those paying attention to your own reactions to the truth that's how you are able to see just how conflicted your intellect is just how attached to those programs that they are yes yeah exactly now i'm under a lot of attack coming from the u.s united states government's intelligence community they've been after me for 19 years destroying my character my credibility my reputation they haven't done it but they're still at it and i'm trying to i've been to every law enforcement agency you're from the federal the fbi to the state and to the county no agency will investigate what's going on and i'm asking the assistance of the public in order to put pressure on the sheriff of josephine county oregon dave daniel who has refused to acknowledge my five requests for a criminal investigation and i need we can we can change our country with this investigation because all of the nonsense that goes on the criminal actions of our our politicians our so-called leaders who are not leaders at all can come to an end put those son of the guns in jail where they belong and to open the gates of all people who are in jail over victimless crimes that's a revenue gathering measure there's no crime if there's no if there's no victim there's no crime these people we have millions of people languishing in prison cells over victimless crimes this must come to an end but the people must understand the basis the genesis of such hellish behavior and decide for themselves no more that's what i'm asking your audience to do to exercise their pressure on their government officials to investigate this issue of mind control at the federal level and on the internet and let's get let's get this started right do you have a uh a site uh that you've documented some of this stuff or that your your work is on that you could send people to well i have two sites uh uh one is uh lisa ray enterprises that's l e e s a r a y enterprises dot com that's my daughter's site i have assisted most of my ratings are there with regards to the spiritual aspects of of uh how to how to come to christ consciousness because you cannot come to christ consciousness through thought because all thought is dualistic there must be a step off point where you die to the intellect and be reborn of the spirit and then uh that that's the dynamic ray that in my work i refer to as true care yes it's heart-based energy ray thanks so much for those insights people check out ray's work a lot of good stuff that he's put out there over the years ladies and gentlemen you're listening to what on earth is happening more of your calls for the duration of the show stay with us we'll be right [Music] [Applause] [Music] [Applause] [Music] back oh [Music] welcome back everyone you're listening to what on earth is happening here on republic broadcasting i'm your host mark pacio my website what on earth is happening dot com we're taking your calls the toll-free number to join us 800-313-9443 i want to thank ray in oregon for the great call in the last couple segments let's move on and hear from dave in massachusetts dave you're live on what on earth is happening welcome oh yeah uh hi mark um hey mark getting maybe getting back a little bit more on the topic of um of your show tonight about the neo feminism and sure sort of thing um mark um uh you know i want to you know how you talked about how what the disparity between um uh between uh men and women as fathers like uh being active in the patriot uh movement yes and everything yeah uh you know there's at least nine men for every one woman maybe even 19 men for every 12 and 20 people i mean i would i would have to agree i mean uh why do you think that that is particularly well i agree with you uh i agree with you uh mark these these women have been weaponized the women have been weaponized against them and they're back here in massachusetts not just because it's winter but they're they all look like state troopers they're they're they're they're they're like they're part of the police state they're all walking around in these big heavy black gestapo boots but you almost think they're massachusetts state troopers uh and everything you know and uh uh you know if when you when you're in a boy i hope i get uh what i wanted to talk about but uh math when you when you're walking around anywhere in any building public building a hospital anywhere whenever you hear someone making a rocket box if you notice how these women walk around like they're the gestapo they make a racket when they walk they didn't even creature when they when they walk up behind me men walk very quietly you know almost 99 out of 100 times when somebody's making a rocket walking up to me behind you like you're the gestapo and everything now you know it's it's almost always a woman we're you know wearing some big heavy boots or shoes that make a rocket you know many many more quiet uh but uh i don't know if you picked up on that david if i could bring up a point here what i seem to notice is that a lot of a lot of women in our society don't seem to recognize that this entire thing that we're talking about ultimately comes down to control it's one of the things that i feel that the female in our species seems to be resistant to deeply grasping like for some reason they feel that control meaning coerce coercive control somehow equates to security or safety and as i talked about in my natural law seminar and on all the material here on what on earth is happening when i discussed natural law i explained to people that this is a fallacy and you can never achieve security or safety through coercive control because coercive control is based in fear and ultimately can only lead to the creation of more and more chaos and disorder within any given system let alone our society so um this is i think the notion that ultimately has to be continuously brought up to people especially when they're young that the vying for control is not how an orderly society is created that's how destructive and chaotic society is created the desire for control is never going to secure you any amount of freedom any amount of security any amount of safety to believe that it can is a fallacy on its face and uh this is what i see you seem to be talking about like how many again not all but many women will kind of identify with this control dynamic because they think it somehow equates to strength when in fact all it's doing is adding more and more disorder into our existing society and bringing it further toward enslavement and i think more women need to understand that dynamic because many of them in this in their hyper masculinization through the neo-feminism agenda think that somehow taking control and constantly wrestling for control is somehow um indicative of real power or real worthiness or real um strength and in fact it's the exact other things it's not real strength it's it's actually a weakness because it's based in internal insecurity and it's not going to lead to anything that's desirable or what we say we want in our society it's going to lead to all the negative things that we say we don't want that we you know identify as bad for us and uh this whole attitude of the desire for control is not going to accomplish anything uh good for humanity in any way uh that you know we can uh uh even understand you know so this is part of what i think a lot of people are not doing with both men and women they're just not helping them to understand that the desire for control is only going to lead to a more satanic and enslaved society we have to let go of all that desire to control other people you know and this is what i just see happening in the sociosexual divide between men and women it is largely about control this is what relationships have become about they're not about partnering anymore they're about who's going to be the dominant person who's going to be you know the one who quote wears the pants it's not about a cooperation it's about you know competition i mean that's the way i see what's going on yeah martin now another another big thing is this 9-1-1 number the uh uh these these weaponized women just in pope imposed this brutal police date on us men uh they love that 9-1-1 mark the kind of man i am i've had that 9-1-1 called on me so many times not because of anything i did but just because of who i am and maybe just because of something that i said and the next thing i know the gestapo were there uh uh and and they automatically started with siding with a woman they could care less about about about uh uh my side of the story uh they're commanding me to leave the premises in in any kind of a uh dynamic where there's any kind of uh you know social upheaval um you will see the state largely taking the or listening to the side of the female in the situation uh in to a great degree more so than the man i think a good movie that was made about this dynamic was gone girl i don't know if you're familiar with that or if any of the listening audience is familiar with this movie but i highly recommend this movie uh to see how the the woman the woman in many cases will leverage the power of the state and play it um and it's it's a very powerful movie i think that this movie is so powerful that i don't think it was even it has been recognized as uh the cultural influence that it is i think it will be seen in in retrospect as a cult movie if you will as a movie that has a cult following because um i think the themes in it are exceedingly powerful about how manipulative a woman can become and get away with that level of manipulation uh because she will leverage the the quote power of the state and influence of the state uh to to get her way and you know basically um get away literally with murder in the instance in the story of gone girl which uh people you know will will have a lot of comments about both ways that movie but that was written by a woman who i believe was formerly involved in the neo-feminism agenda and kind of woke up to it um i can't remember the name of the woman who wrote the book but it was a book and then it was made into a movie i think it's a great allegorical film and i think people definitely need to see it personally so dave david i want to thank you for the call and the points that you brought up and let's move on and hear from uh han solo in toronto i hope i'm saying that right is it consolo han solo hello uh yeah it's uh gonzalo gonzalo gonzalo in toronto welcome thanks um i just um i got a book for two dollars i found it at a book sale and it was quite interesting because it was talking about moral law and i just wanted to know if you wouldn't mind me reading a section of it sure go right ahead sorry give me just a second here okay morality calls upon every human being to make the same choices and hold the same opinions with our without logical reasons without interest in its own sphere morality is like aesthetics in which indefinable beauty can and must be fundamentally the same for all thus morality makes the most sublime revelation of human history we are one becoming more and more what we are has been the object of evolution as far as we can see the existence of absolute morality confirms the existence of absolute freedom there is no guarantee no prescription no method for making our choices a method would be a model of good making every choice calculation and every false calculation an error not an evil the mathematicians who make a mistake are not liars because their objective was the truth liars are swine because their objective was error good and evil affect only objectives you do not recognize means every action is an objective in itself the choice between good and evil admits of no compromise and the symmetry is absolute there can be no question of doing good with the intention of doing evil nor doing evil with the intention of doing good in the first case the intention was bad and the result is merely apparent in the second the intention was merely apparent and hence bad and the result was too moral law does not say that necessary evil does not exist it says only that it wants none of it awesome i mean that that's just beautiful and profound now what was the name of that book uh it's called uh it was translated from french it's called the eighth night of creation and i typed in the author and it's basically unknown and there are quite a few um only a few searches interesting how long how long is the book the book let me just check uh it is about 405 pages so it goes in depth that's awesome absolutely who is the author it's unknown uh it's uh well no the author is known it's just that there's very few searches about him it's uh jerome de souza's and i'll pronounce his last name d-e-s-h-u-s-s-e-s for anyone who wants to look into that i can't believe i found this book for two dollars and it's also 1978 which is absolutely unbelievable so it's more likely than not out of print by now and that's how most of the best books are unfortunately you can find it on amazon actually for cheap so if anyone can you can get it for around four bucks used the eighth night of creation that sounds like one i have to look into i do not believe i've ever read or heard about that one so i'll have to check that out that is a really profound console thanks for sharing that with us yeah i just wanted to uh to know your your thoughts on that and if do you mind if i just quickly before i go i read a quote from the satanic witch that uh i think really applies to the situation oh yeah absolutely i mean this is this is the book that i told people that shows definitively that the whole neo-feminism agenda came directly out of satanism it's almost like a field manual i posted it i believe it was with last week's show or the week before and uh people need to read this book to understand exactly these uh how these tactics of manipulation work so yeah go right ahead this is right from zeno of a right in the beginning of the book the introduction to it i haven't even finished it but she's already in one sentence she says what it's all about quote the satanic witch among many other things is a guide to selective breeding emmanuel there it is there it is right there folks in a nutshell right there zena levay the daughter of anton levay the former high priest of the church of satan in the book the satanic witch is telling people right there out in the open at the beginning introduction of the book which she wrote okay levay wrote the book she wrote the introduction to his book is telling you right there this book is about selective breeding and that's just another term that's a euphemism for eugenics so i'm sorry can continue gonzolo a manual for eugenics the lost science of preserving the able-bodied and able-minded while controlling the surplus population of the weak and incompetent yep that's satanism there's that there's that old religion there's that old-time religion you know people don't want to understand that that's what satanism is you know they don't want to grasp that i mean right there in a nutshell that says it all and this agenda comes directly out of that religion and you know i i don't know how to put any any planer there it is in the words of of one of the most famous satanists in the world xena levay absolutely yeah and it was just that one quote she spelled everything out yep yeah so i just wanted to bring that up and then really recommend that book it's called the eighth night of creation if anyone can get a copy of that i feel like that was just such synchronicity coming across that book and that's that's how these little gems find our way to us sometimes you know absolutely he talks about to me i think this was a person that he was alive today he would be talking to you about natural law because he discusses so much of it he discusses the law of entropy causality it's a fantastic book it's all the same thing it's all that which has already been here and that we are bound by and that we work with and through and you know it's there's nothing new under the sun as they say it's just people have had a different way of explaining it in their own terms and their own words in their own cultural ways throughout history and that that's all but it's always been here consolo phenomenal points and a really great recommendation on that book and uh thanks for bringing up that quote from levay from the satanic witch uh great call thanks so much so um let's uh move on let's hear from angela in california angela you are live on what on earth is happening welcome to the show hi mark can you hear me okay yes absolutely okay awesome um i studied your work for a while now um i actually kind of was one of those avid people who took notes on it and kind of studied it like a course in school because the way you laid it out was very um helpful for me in my learning process and that kind of led me to a couple things that i wanted to touch on solution-wise that people might find interesting or helpful sure one is uh water i mean it's 70 what 70 percent of the makeup of our bodies so um i've learned a lot recently about distilled water and tested it out for myself and um there's some really powerful potential behind that i feel um in removing the impurities that we're being subjected to without our consent absolutely this is why there's a campaign against distilled water and they want to make up this lie about drinking it leeches minerals from your body no it doesn't work that way your body needs the purest form of water that there is i generally drink reverse osmosis water uh but when i can get my hands on distilled water i'll use that juicing is one of the best ways to get distilled waters from fruits and vegetables yes it's amazing for decalcifying the pineal um yes actually uh about two weeks after he started uh using distilled for the first time ever she started losing three meats so uh there's a lot of potential there andrew norton angelo we're coming up to a break hold on and i'll let you continue this on the other side of the break ladies and gentlemen you're listening to what on earth is happening stay with us we'll be right back [Music] [Applause] [Music] [Applause] there's a cold silence but we don't dare speak there's a wall between us [Music] [Applause] [Music] that there's nothing wrong [Applause] [Music] with the code of silence and it can't go wrong [Music] welcome back everyone you're listening to what on earth is happening here on rbn last segment for this edition of the show we were previously talking to angela in california angela you were giving some great information about the healing power of distilled water and uh its ability to decalcify the pineal gland so you can continue with that line of thought yeah um in case you didn't catch what i said right before the break andrew norton weber is a good resource for that he also goes into a might be a touchy topic for some but um you're in therapy if you want to take that a step further um so just really fascinating information um that i i found very useful in in my journey another couple things i just want to touch on real quick phonics understanding sound and resonance to reveal language spells and how to speak more clearly in truth um santos banachi i know uh uh he he has a great uh piece on that uh he has uh tutorials all over youtube um and he also touches a lot on after theology but i know you've also um you break down a lot of phonics in what you define in your presentation which kind of led me down that rabbit hole oh yeah santos has some great information i definitely recommend his work yeah yeah um and then uh last little tidbit for everyone listening is um sovereignty and removing our active participation in support of the system which is kind of this catch-22 we find ourselves in um which has caused a lot of frustration for me personally uh kate of gaia is really helpful in that she's done that in her own life and um he does regular talks and podcasts as well so she has some really good resources on how to do that and it's different for everyone so you're not going to get direct answers but you are going to get insights and information that help you know where you need to go and i'm sharing this not to persuade anyone to go down my path to say but to encourage others who are aware to start seeking and testing out solutions for themselves and share those with your network that is in the know as well that's how we're gonna use consciousness and intelligent to create a new way and redefine and dissolve the current limits that are being set up for us so there's some really awesome opportunities with all the adversity that we are facing and we need to use our creativity and band together with those that we know are in the same battle the last thing i just wanted to say is i'm here in california on the west coast one of my biggest concerns is right now the geo engineering the massive worldwide global weather manipulation going on we're dealing with psychopaths trying to play god with our weather who gets rain who doesn't they are terraforming the beautiful coast of california right now with heavy aerosol spraying we see the signature of harp over us all the time the the ripples we're getting hit with some gnarly precision so i just wanted to bring that up and urge people i'm not telling you what to believe or not believe about geo engineering that's a huge rabbit hole but please observe the sky and start documenting it angela great advice there for the listeners thanks so much for the call unfortunately that's all the time we have for this edition of what on earth is happening ladies and gentlemen remember there's only two mistakes you could ever make on the path to truth not starting and not going all the way thanks for listening tonight everyone we'll see you right here next week [Music] [Music] [Music] you

What On Earth Is Happening Show #187

Topics: *Free Your Mind 3 Conference, Neo-Feminism Agenda, the Power that Awakened Women have in healing the world through influencing Order-Followers to quit their jobs, Dark Occult Whistle-Blowers, Humanity's Awakening Process, Natural Law, True Care, Neo-Feminism and Epi-Eugenics, the Inauthentic Man and Woman, how Fear of what other people think holds people back, the Mind-Set of Satanists, the Elitism of some who believe they are "Awakened," people need a Long View of Human History, Humanity's deep attachment to Ego-Identification, Home-Birthing and Home-Schooling, the Emasculation of modern Males, Estrogen-Mimickers in food, "Gender-Benders," Standing strong in Truth, Meetup and Support Groups for those who seek and speak Truth*

freedom mat that's what it's all about [Music] [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening to endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascal [Music] welcome one and all you're listening to what on earth is happening right here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm the networks website Republic Broadcasting org today is Saturday February 28th 2015 this show is live every Saturday evening from 10:00 p.m. to 1:00 a.m. Eastern Time that's 9 p.m. to midnight Central Time we have a good show lined up for you here today I'm going to be gonna kind of give some final thoughts on the topic that I've been covering over the last many weeks about the neo feminism agenda and I'm also going to be taking your calls a little bit later in the show I want to get kind of your whole take on you know the topics that I covered during that segment you know during that series I guess you could say and you know see if people have any comments or questions or concerns that they want to pose and anything else that you want to bring up regarding that topic or really anything else that you want to talk about but uh you know if I could get some comments and questions and concerns about the recent material that I've been covering I'd kind of like to go in that direction so the toll-free number to join us is 831 390 443 once again the toll-free number to join us here on what on earth is happening 831 390 443 I am also going to be bringing a bob Tuscon on to the show briefly to talk about the free your mind conference the freer mind 3 conference is coming up April 10th 11th and 12th 2015 it's racing toward us it's coming up in really just over a month it's going to be taking place just outside of Philadelphia this year in Langhorne Pennsylvania at the Sheraton Bucks County Hotel at 400 North Oxford Valley Road in langhorne pennsylvania the speakers booked for the free three conference Bob Tuscan Clint Richardson Curtis the illuminated one Davis Dennis McKenna Derek Bros ed fortune the new jersey weed man freighter X Freeman Fritz spring Meyer Jay Parker Jenice barceló John Bush John vibes Josie the outlaw whales

Laura Eisenhower Lennon honor luke rudkowski Mark Devlin myself mark passio Stewart's Wardlow and the anti media panel there will also be a panel discussion group and there will be an open mic night at the end of each night on all weekend pass for the freer mind three conference only 150 dollars you can use coupon code passio for $15 off your purchase of any tickets of $100 or more and that offer ends this evening do we have Bob Tuscan on the line with us Bob are you with us you can work with surrounded hey Bob Bob's been really the main organizer along with John vibes of the for your mind conference this year and these guys have just been doing a phenomenal job getting the conference together organizing everything booking it at a great venue and booking an all-star lineup of speakers Bob want you to tell the listening audience anything else that you want them to know about for your mind and you know the floor is yours yeah mark I appreciate it are trying to bring awareness to this amazing event that has really taken things to the next level in the last few years we've been doing this we found on that being at an event like this is really something special we can all watch these videos online we can learn about this information through reading books but when you're there in person at these events sharing and learning and building community or something that is really really awesome about that and I just can't begin to say enough mark the promo codes that we've been doing this year yeah it's gimmicky it's commercial but it's scared to try to get people to buy in advance we need we need help with the financial stuff man it the Federal Reserve notes make these conference happen the information and the people at the end of the day are what make it happen but ultimately we have to slide people and we have to pay for the venue Dada Dada Dada so these little promo codes like passio which ends tonight this is to try to encourage you to just go ahead and get that ticket get that ticket now please help us out we have a lot going for this event know we have a lot on it it's a lot of people are depending on your help you get this information out there and again as Mark said tonight will be the last night for the promo code passio it's the end of the month we've been running in all month if you go to free our mind conference calm and you enter coupon code passio you'll save $15 on your all weekend pass to the conference and I urge you to take this up on that it's not gonna get any cheaper we're not gonna raise the price from the 150 and it's at mark I've decided to keep it at that price to try to continue to make it affordable and also mark I want to point out that we have been really really careful not to turn anyone away so subtly out there is listening right now and you just absolutely can't afford the 150 but yet your local contact me you know we'll make it happen we want to get as many people in there as possible obviously if we sell out we only have limited limited seating but obviously if we sell out we're gonna have to you know turn people away but if you want if you want to come we'll work something out whether we get a student rate for you whether we figure out something I don't really care ultimately if we could make this conference free we would we really would so I just want to make that clear to anybody listening who's on the fence who might not have all of the money they're you know mark I had a guy contact me and he's making payments on the ticket he's paying a little bit every using every so often just to come to the conference and and I appreciate that and anybody who said hey I absolutely can't afford this we haven't turned anyone away so that being said I don't want to deter people from spending the full amount on the ticket but at the same time I just want to make it clear that this isn't an infomercial this isn't a revenue generator this is organically happening for for a reason that's right and III think that's a straight up man i I can't I'm not gonna bend you know and get all salesy with this and do all that BS I'm gonna tell it like it is like we always do mark it's just down-to-earth people you know putting on this event it's down-to-earth speakers who really want to see the world change for the better that are being part of this event and you know you as an organizer and your organizational crew is willing to work with the people you know to to make this be as great of an event as it can be and you know I think the last two were testimonials to the hard work of the organizing staff and and the the speakers that were all-star speakers that were a part of it and I think this year is going to not only be no exception to that I think it's going to probably be even bigger and better tell people a little bit about the the venue as you guys got I mean this is a real step up from the former venues and it's going to be held in a bigger location and it's gonna it's kind of an upscale location yeah it's an obscure location that it you know it's not that it's upscale mark you know the vanity of it all it's not important to us it's that it's going to be comfortable for this space this meeting space that we find to be so important and it's gonna fit up to 600 people and we're hoping to get that many people in the door so it's at the Sheraton Bucks County just outside of Philadelphia it's a convenient location for most people in the Northeast you can get there it's right off 95 it's no hassle you can stay at the hotel if you like which makes a real convenient and we do have a block rate for anybody attending the conference because first time the free your mind conference has been held in a hotel and so it's the first time that you know people can actually stay at the venue itself at the actual location of the conference which makes it very convenient I think it's not only gonna make it convenient but I think that's also gonna make it to be even more of a community if you will there's gonna be more camaraderie because when you room with people and Yelp eating are you staying at the same place conversations will be started friendships exactly yeah exactly so I think that's gonna be really cool in that regard just the camaraderie of it all but ultimately you know I really do suggest that if you can stay at the Sheraton Bucks County where the event will be let them know that you're gonna be active for your mind conference so that they can give you the discount on your hotel room they are they they have a free remind conference discount we have the phone number up at through your mind conference calm but if that hotels full which it's in its seeming like it may be full which is awesome there's tons of other hotels in the area there's tons of restaurants in the area and all that fun stuff in fact I'm gonna be up there next week to check it out for the first time we had a lot of people go and check it out for me and kind of scope it out but I have to get up there and start getting ready here because in a blink of an eye on our this conference is gonna be here it's right around the corner and that's why we really need to to promote it listen if you can't come and you want to just help out promote the link you know share it on Facebook share it on I know we hate Facebook but use these platforms for some good use these platforms to get the word out share the videos tell people about it weird amount of email your email list I mean the list of things that you can do to help make this as great as it possibly can be is endless and I want you to kind of fill in the blanks and if anybody wants reach out to us you have any questions or concerns info at the free or mind conference comm so actually it's info at free or my accounts icon no the info at free your mind conference calm and Mark I know you're hard at work with your talk this year right absolutely I'm gonna be giving a talk called the cult of ultimate evil order followers and the destruction of the Sacred Feminine and it is going to really be a hardcore expose of what order following is all about how it's really a religious belief system and it constitutes the members of the order followers worldwide really constitute a worldwide cult that's putting the world into bondage and slavery and until they decide to quit that position to quit that you know form of action in their lives and not go along with this control system of its demands upon them nothing is going to change and so these are the people who I think we ultimately need to reach in the long term and that's what my presentation is going to be kind of geared to to speaking to I'm really looking forward to that I gave a little bit of a sample of my talk on Freeman show the other night mark I'm gonna be giving a talk on scarcity based mind control and of course the solution definitely not in abundance yeah I think it's gonna be a pretty important talk I'm looking forward to fleshing out some ideas that I think are solution oriented you know we have to look at the root of the manipulation but at the same time figure out what solutions we can utilize to get us out of the paradigm that we're in so I I hope to offer both an informative topic that takes on the the heart of the mind control you know the essence of mind control in my opinion and also take a closer look at how do we break beyond that how do we free our minds there you go you know it's largely this whole conference the tagline for it is a conference on consciousness mind control and do cults you know it's a conference about learning who we really truly are that's the consciousness side of it you know this is about the true nature of reality the true nature of the human being you know who we really deeply are inside and how we're all one insofar as that we're all in the same situation together here on earth regarding human freedom and you know then there's the mind control part of it that's you know making people be exposed to and aware of the problem you know it's the whistleblower aspect of it you're gonna come out you know with all these different methodologies that are being used against us to to keep us down and suppress and keep the population and ignorance and then there's you know the part of it that looks at the occult you know how there's this kind of breakaway you know civilization of quote-unquote elites that you know is basically trying to wage a eugenics operation against the public and these are the the occult orders you know these are the the mystery traditions of old that went rogue and took that knowledge and secret it away hit hit it you know and are using it as a power advantage over the people who remain ignorant of that information called the occult the knowledge of you know both the human psyche and how it works and how it may be manipulated or steered and the knowledge of natural law the knowledge of the physical sciences and the the spiritual sciences if you will you know the the laws that govern the consequences of behavior of behavioral choice so all of these types of things will be discussed at the free your mind conference you'll see a wide variety of speakers from all different backgrounds and they'll be talking on a vast array of topics this isn't like a conference that is kind of limited to one you know specific narrow minded focus or scope it's a very wide range of topics and it's a it's it's kind of designed to just open people's minds up to the possibilities that are out there and let them make up their own mind you want to say something regarding that no I mean I just want to reiterate that it truly is an eclectic group of speakers and audio there are overlapping themes amongst all the different talks but it really is a look at something from from several perspectives this year we're having dennis mckenna join us I was gonna offer some interesting insight on infusions and he and I were chatting the other day and he's he's got some really powerful stuff that we need to look at that hasn't really been brought forth that in a conference yeah so there's a lot of original thoughts we just had a Ross Ben I don't know if you saw that I did not sorry that's great news yeah I will add him to my notes here so when I announced it on the show his name will be in there that's really great that he's coming back I thought his presentation for your mind too was brilliant we we did as well and Ross Ben has been confirmed we also posted the schedule up on the website so if you're curious to see what what speakers are speaking on what days go to free remind conference calm but listen folks I know you all love Mark passio and you're all gonna just go see mark past you and our capacity oh this mark past you some state of here in the dark a CEO already who the hell is this guy what on earth is happening here but Josie all the speakers in Maya if you can't afford all the days by the all weekend pass we basically built in the incentives to give you Friday free so check it out and use the promo code passio there is again for your $15 off that ends tonight so we got to do that scarcity based marketing that ends tonight get on it folks mark I can't wait man I'll see you there Bob thank you so much man great job ladies and gentlemen co-organizer a free your mind free Bob Tuscan go up to free your mind conference calm and get your tickets today we'll be right back folks stay with us [Music] [Music] [Music] welcome back everyone you're listening - what on earth is happening right here on rbn I'm your host Marc passio my website what on earth is happening calm I want to thank Bob Tuscan for dropping in during the last segment to talk a little bit about the for your mind three conference an event that is rapidly racing toward us and is going to be probably the biggest event of its kind in the Year 2015 definitely check out for your mind conference calm and get your tickets today I'm going to have probably a couple of other people stopping in actually in the next hour I'll be having the owner of rbn johnstad Miller come in to talk about the pledge-drive that is going on at the network right now to help bring in some resources to help the network so John will be coming up at the top of the second hour but in studio with me today is Jay Parker of the radio show SRA today Jay is also one of the featured speakers at the free or mind three conference and Jay is actually going to be hanging out with me during the show and maybe even joining in on taking a few of the calls later in the show me once again give the call-in number the toll-free number to join us here on the air 803 one three ninety four forty three once again toll-free 800 three one three nine four four three and I'll be going to Jay in a couple of minutes and getting his take on some of the things that are going on and some of the things I've been talking about I just have a couple of other real quick event announcements or just quick general announcements I just want to reiterate that my second ammendment presentation which I gave a couple of weeks back at the Liberty on the rocks meetup here in Philadelphia you could check that group out at Philadelphia dot Liberty on the rocks org the presentation that I gave on the second amendment called the the true meaning and purpose of the second amendment that video is now edited and online at wat on earth is happening and on my youtube channel you can go to water on earth is happening calm click the videos tab and it'll be there I believe it's at the bottom of that page or you can go to my YouTube channel and check it out under my presentations so check it out it's getting some play going on through YouTube and through my website and through other people who have shared it on social media so if you feel that the presentation was a valuable worth checking out definitely pass it along and share it with your your friends so there are still what on earth is happening dot-com promotional t-shirts available to receive a promotional t-shirt as a gift in return for a voluntary donation to help support my work you can click on the email link that is listed in the article in the top of the news section of the water and earth is happening calm website so if you go to the news section of the website the first article the first item is about the t-shirts and you just click that email link and that will send an email to me telling me that you want information on how to receive one of these t-shirts there's also a donation button on the left hand side of the what on earth is happening comm website if you feel that you have received value from the information that I've presented here on the airwaves and on my website then feel free to make a voluntary donation to help support my work so that I can continue it into the future well with that having been said I'm gonna bring on my guests for this evening in studio with me J Parker J you do a radio show every Sunday evening called sra today on the blog top network you've been doing a great job with that really getting your name out there putting out some phenomenal information to people about what's really going on in this world and a lot of information on the the dark side of the occult but also a lot of solution-oriented material that you've shared with folks over the past many many months and you're going to also be a speaker at the free your mind 3 conference as well so I figured I'd bring you on a little bit to talk about the work that you've been doing and get your take on some of the topics that I've recently been covering on the show well thank you mark I haven't been on your show in a while and I said well you know we have work that we're working on right now mark and I making a 32 gig information drive with what we believe is the core information historically spiritually philosophy just what you really need to know about yourself the cosmos and what you need to do to get the best life possible all I have to say is that you know we in the peace and freedom movement at times you know look at the mainstream media look at the corruption in the world and we say yeah you know it's it's a cyclops it cannot be beaten you know that the people don't want to wake up and blah blah blah I'm not worried about that and I this is my new message to people who are in the awakened way our movement is keep on keeping on you know the biggest thing that's going to happen in the next year in this on this planet it's going to be the bricks of nations producing making their own international bank of settlements okay let's hold it right there and I'll let you pick up on that topic on the other side of this break folks you're listening to what on earth is happening we'll be right back [Music] welcome back everyone you're listening to what on earth is happening right here on Republic broadcasting I'm your host mark passio my website what on earth is happening calm in the studio with me tonight Jay Parker of SRA today you could hear his show on the blog talk radio network every Sunday evening from 7 p.m. to 9 p.m. Eastern Time and Jay I'll let you continue with your thoughts before the break well I just want to say that I'm very optimistic about the future due to the fact that since I woke up from my satanic and mind control around the year 2000 I've been studying your work mark nasi Hara mine brew slipped in all kinds of philosophers like Neil Cramer and John lamb lash and and this is what we are here as human beings to do we are here to grow and learn in consciousness in reality of what natural law and what true justice and true spirit are all about and we need now to understand that this corrupt system worldwide that the international central banker is through the Rothschild Satan I have built is basically got one year left to it the Rothschild banking dynasty is in a fight with the BRICS and nations and of course as China Russia South Africa Brazil and they are building a new Bank of International Settlement which the Rothschilds Bank of International Settlement is in Basel Switzerland where all the international money transfers happening which gives the Rothschild banking cartels central bank cartels literally complete control over the worldwide economy so now they've never had competition the Brits of nations will have a Bank of International Settlements ready in January of 2016 and this will cause a complete collapse of the Rothschild US petro dollar when that happens basically America's standard of living overnight will decrease 40% and it is my belief with the amount of people who are aware of the corruption and there's there's millions of them now it's it's well over 10 percent of true hardcore patriots that are aware of a lot of information and you know I'd say stragglers you might have another 30% but you've got more people now who are awake to the peril of tyranny in America than have been awake since 1776 man talking percentage was you know I think it's an encouraging thing and yet it's something that people should be concerned about at the same time because they're really trying to they're gonna try to collapse the economy here in a way that they can justify them to bring in martial law because oh the people are in you know disarray and upheaval and you know we have to bring order to this it's going to be a kind of a false flag event created financial families you know yes it is and we want to get back to the discussion of the of course social engineering that is going on with men and women the feminist movement of course Gloria Steinem admitted publicly that she was funded and helped directly by the CIA that's right and I just want people to understand that you know I've been through hell folks i I've lost I lost four good friends that never made it out of Arden Delaware where I grew up I watched him get killed by the cult and I lived my life now for every human being that has been ritually murdered by the Illuminati Satanist I am standing up and standing in their place those who have been murdered and declaring the truth to the American people in the world and the universe and and my life is not my own my life belongs to natural law and my life belongs to justice you know it's it's amazing Jay with how many people are involved in this that we don't were not seeing more whistleblowers come forward it's like I guess it just takes a specific kind of Constitution that somehow transcends this programming and it happens for you know it seems like the fewest of the few to ever come out of this and it's just like you know I would have thought by now that with what I knew about how the occult worked works that there would be so many whistleblowers coming forward at this time and it just seems like there's just not that much resolve on their part or courage on their part it seems like they've either been so you know frightened into the protection of their existing paradigm or either that they just you know have the the mind control has worked on them so completely that they haven't just been able to break that programming and you know that's kind of like what a conference like for your mind is all about - it's getting people to come together almost like in a group support type situation where they can you know help eat help grow each other strength you know because it does take an amount of courage to start speaking out and saying the truth especially when you understand the forces that were up against and how they could make what they won't happen because they have unlimited resources at their disposal and they have an unlimited amount of minds that are willing to give their power over to them you know and yet even in those odds we're saying we're not giving up we're not giving in we're going to move forward we're going to use our will to to press forward and doesn't make a difference what happens to us here physically because we're fighting a battle that goes beyond the physical we're fighting a battle in spiritual warfare we're in the spiritual literally trenches you know absolutely well science is now catching up to what certain philosophers have been saying for years and all I gotta say is mark you know you're doing great great work that is showing people you know what Terence Mckenna showed people to get people to understand that culture is your enemy that's right pop culture and indoctrination I mean schooling is your enemy okay you can keep people down for a long time mark but I'm telling you right now we're at a phase where you know people I I just like 10 years ago you wouldn't have seen on YouTube a video of a man naked man crawling on a sheet rope you know climbing out of a window in Buckingham Palace and you wouldn't have seen that 10 years ago I don't think and what I'm saying is energy is coming into the earth from the center of the galaxy according to some scientists I'm going to get more information on this but the the Voodoo that you do Illuminati it's wearing thin it you don't have the power to keep human consciousness down forever and and you can blow your smoke all you want but truth is so powerful right and I can tell you you know EFT helped reprogram me okay you know take some effort but I tell you a truth reprogram me to how well a lot more absolutely there's no substitute for standing within that power and that energy which is truth and when people do that and they exercise that level of courage and they have resolved to move forward in consciousness and grow their conscience you know grow in the knowledge of the difference between right and wrong and let that knowledge guide their behavior nothing is going to stand in the way of that doesn't make a difference you know how seemingly powerful this control system has been you know those numbers are rising and that energy will pick up steam as as the years roll on and you know pretty soon this is going to be become common knowledge we have that doesn't mean we don't have a lot of work to do there's still a lot of sleeping people out there but you could definitely tell more and more people are hungry for this information and they're coming online to it a lot faster well I'm noticing you know I I do counseling SRA counseling I mean in a free basis people contact me and you know I try to give them pointers as to what I did to get my head back together again and become myself again and I just want to say that some of the people and in fact I'll be in the next couple of weeks I'll be having a man on who spent a life very similar to mine and it's going to be an interesting interview but the but the thing that I want to say is the cats out of the bag mark with the internet the DVDs that Alex Jones alone has put into the information system of America and then we're talking millions and millions of DVDs exposing the federals exposing the Illuminati bankers creating all the wars this is powerful truth that you know I I don't understand the fundamental basis of the consciousness holodeck that were in but what you think and where your hearts act is of utmost importance in this reality because it's ultimately going to determine the external seemingly external experience and you're having yep I mean that's the real law of attraction folks you know as we treat other people the whole society will be you know the more people that are doing violence because they think that that's some kind of a right and you know they have been designated with the ability to do an action that really causes harm and more people believe that the the more enslaved then the aggregate an entire society is going to be the more people who really understand the difference between right and wrong and have developed the conscience and then exercise that conscience by willingly willfully choosing the right over the wrong you're going to see in the aggregate a society become more and more free you know it's just that general concept that overarching natural law that what I call the law of freedom yes there is a a law or a you know a mechanism that governs whether a society is free it's an algorithm you might call it you know it's as morality increases freedom increases and as morality in the aggregate in a population declines or wanes freedom declines or wanes and you have more and more enslavement and tyranny come into that into that society into that culture it's just a very simple equation and unfortunately most people still haven't seen that that's really how it works and this is a natural universal law that is just in place in the universe that governs whether a society is free or not once we come to that awakening as a people maybe we could start making some progress and you know break down this you know outdated immoral system that really isn't serving who we are and you know create something much better in its place well we've run out of time mark we've run out of time with the Rothschild banking system because in one year it's going to have competition and totally false it will fall because I guarantee you the Chinese and the Russians and the Brazilians I mean all the all the other countries that are trying to get out from under of the angle of British Anglo Empire they realize they have a choice stand up or die you know it's eat and it's it all comes down look at the flags of the American Revolution for God's sakes live free or die you know join or die no ok I mean there's about stand up for your life if you value your life they were telling people back then this is an issue of life or death you know this isn't something to be taken lightly and you know I constantly think about a lot of the sacrifice of those men to win the modicum of freedom that they were able to and how it seems that we've squandered it in the modern world you know and I think we're doing our ancestors the legacy of our ancestors a grave injustice if we don't stand up right now now is the time to stand up now is the time to speak up speak the truth to other people unapologetically you know and consistently you know and that's what it's this is all about that's what the great work is all about folks you know so you know in kind of keeping with that and the transition over and I'll start taking calls in the next segment hopefully you know over the last many weeks I've been talking about a pretty controversial topic that a lot of people don't want to hear they don't want to get into and it's kind of like ignored as the big elephant in the room and this is this topic of the war that's going on between the sexes in our society and it's a war that was largely fomented by a lot of secret societies occult organizations covert think tanks that are working toward globalism and human enslavement eugenics groups you know covert eugenics groups and also you know socialist schools of thought and Marxist schools of thought and intelligence agencies I mean you have all of these draconian groups working together seemingly pushing the same agenda and it's all because that this agenda leads to one place bondage enslavement tyranny you know total control by the state the state being Wed as some you know evil psychopathic overarching dark father figure or dark you know a husband figure to the women of a society and in doing so it acts as a form of controlled breeding it acts as a form of what I call epi' eugenics eugenics that is not waged through physical control of genes or physical control of the breeding of a population like let's say through something like forced sterilization no this works through mind control and then as a result of that deep mind control condition condition that social engineering that is in place and entrenched within a large large overwhelmingly large portion of one gender of one sex of the human species then it propagates out as controlled or selective breeding or in other words eugenics throughout the entire society this is a topic that I've been covering over about the last four or five weeks on the show and you know I've taken a few calls from people at the end of some of the shows but I want to kind of get your take on you know that this whole thing and then we'll move to some callers and get their concerns or their comments or their questions and you could chime in on some of that one of the things I want to just wrap up kind of on this topic on before I move to you j2se say with your take on this last you know several weeks of material that I've been putting out is that I just want to say there's one other aspect that I'd really like to touch on when it comes to this whole topic and that is the power of real women you know when women step into their true power when they step into them their true selves and they stop you know wanting to be manipulated by this control system that promises them things in return for there are obedience or compliance what can what kind of power in effect they can have on the world so we'll pick up that on the other side of this break folks stay with us [Music] [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm before the last break I was just talking about you know I wanted to bring up a positive aspect of the material that I have been covering and just briefly put out there what I feel is the inherent power that exists in women that exists in the female gender of our species to help to heal humanity you know women could be some of the most powerful influencers they could be some of the most powerful healing agents if they choose to step into that power and into that role within our society you know it's just so few of them have you know kind of decided that that's what they want to do that that's you know the work that they want to do and accomplish in this life you know I want to go back and just briefly mention that movie Jupiter ascending which I was talking about before that I really thought the implementation of it was sort of weak but I thought the theme of the movie was strong in that a heroine character a female based hero character needed to make a decision about whether she was going to you know this is the overarching plot of the movie without getting to a specific spoiler the choice that is a place before the heroine of the film is that does she do what is comfortable for her and her family or do what is required to just save her and her family or does she step into the larger form of love which is agape in other words family love and the love of just ones that are close to you is known as filos you know you have romantic love which is eros okay then filo s-- is the form of love that is between family members and siblings and friends etc but then you have the form of love that they talked about in the Greek mystery traditions that was called agape in Greek and agape means universal love it means true care wider care and caring for all care for truth care for that there's justice in society care for you know other people's suffering in general and she has to make a decision whether she wants to stay in this just familial based love of family and close ones that are close to her or does she move in to care for all of humanity and truly do the right thing and you know not care about what happens to just her and you know this is stepping out of the Satanic mindset really it's stepping out of the mindset of me me me all day long and you know thinking about something bigger and deeper and you know more Universal in your concern and in your care and that's what I felt the movie did a good very good job at portraying that that choice or that theme well you know I personally didn't really particularly think it was a greatly implemented movie that's kind of almost neither here nor there the algal the allegory was what was powerful and informative and and true so in that sense I think people can learn a good bit from it but um Jay I want to get your take before we start taking some calls tonight on some of the material that I covered over the last few weeks and we'll do that right on the other side of this break ladies and gentlemen you're listening to what on earth is happening here on RB and stay with us we'll be right back freedom man that's what it's all about [Music] [Music] welcome back everyone they're listening to what on earth is happening here on our PN I'm your host mark passio my website what on earth is happening calm J I'm gonna go to you in a second - just to get your take I just want to say that you know if the vast majority of women in this world would step into their role as nurturers true caretakers true protectors of the youth and the innocence of our society and you know not be kind of influenced by you know all of the lures of the state and the so-called protection that they think it gives them or the security that they think it affords them they could really step in to the power of being able to act as a healing influence for Humanity simply in their capacity to influence order followers to stop doing what they are doing and to quit their jobs you know that's the number one role that I think humanity and the power that that women can step in to to heal humanity you know because let's face it folks the vast majority of people who are truly creating who are acting as the creators of the dark new world order as physical dominators are men and the women that they are around and with on a daily basis I'll have to start dissuading them from doing this and not supporting what they're doing and not supporting the roles of these power-hungry men and largely immoral men are stepping into for a paycheck and that needs to stop being thought of as acceptable you know and women have the ability to do this if they first waken themselves you know and it's going to be a very you know tall order but I mean I think we're already starting to see you know this in a very small way and you know I think with events like Ferguson paying the police really as they truly are people are waking up to what's really going on and the brutality and the nay the you know violent nature of what's been going on in this society for a long time you know I think we're starting to see you know this turn a little bit Jay I want to go to you and get your thoughts on just in general the topic of neo feminism that I brought up over the last several weeks and if you can comment on you know this idea that I think women can step into the role of some of the most powerful agents of change amongst us in their capacity to influence order followers to stop doing what they're doing oh absolutely we all have our role to play in healing this planet and our species and it's time to stop saying I'm powerless it's time to stop saying somebody else has got to do this I don't have time and it's time to say I answer to a higher power you know I answer to justice to love to honor the truth and lay your lay your life down and that's Jesus Christ said and you will gain your life that's right and this is what I have discovered in the last fourteen years of study the further I go down the rabbit hole okay I see the corrupt nobody studies the corruption as much as me you know I joke but you know it's a lot I spend a lot of time looking at what they're doing to destroy the planet with their Fukushima's and they're putting all the radioactive waste when every nuclear power plant in Europe is pumped directly into the North Atlantic in the English Channel through a processing facility in what are these people mad they're pumping raw caesium-137 which has a half-life of 30,000 years directly into the North Atlantic Ocean and the English Channel which is now getting into the fish in the sea shells and you know that it's just like well what is this I mean I'm telling you right now there's a lot of people in this world that don't have the knowledge that you and I have more but when the 40% decrease happens in the petrodollar you're gonna see people saying okay I've had enough because the American government has gotten by and large nothing but cooperation from the American people with every war with every intervention every nation building every lie we have obeyed and we have a endured the corruption but now it is apparent to people that have something left of a mind that the oligarchs want total destruction of the middle class and slavery for everyone but themselves so in in the vein of you know talking about social engineering and that's this is what the breakup of the American family was nothing but a eugenics operation yep but the and you were talking about Louis Louis Jack Lisa Phyllis Schlafly spoke yeah the who killed the American family yeah now now he laid out a lot of it in that book now I haven't I haven't looked at her research but I have looked at dr. John Coleman's book I read that Tavistock Institute for human relations for and you have to get that book because you know it if you want to quit your television addiction just walk just read that book you'll turn the TV off oh yeah I mean it goes deep into how these think tanks are you know largely based overseas you know set the agenda for popular culture and you know basically steer whole societies because they understand the deep psychology that is uh required to be understood in order to manipulate people based on their you know internal psychological mechanisms and uh you know there are base desires and instincts etc and they know how to push just the right buttons and you know steer entire societies the way they want them to go you know and it's amazing how the Marxist and the fascists you know which basically it's a joke the Yalu seems the opposite exactly because it you know they say all the nazis were the opposite of the soviets excuse me when you look at the societies of the soviet union in nazi germany they're identical and so the opposite trip is not working and you know mark people are waking up and I tell you the truth here I know in my heart that when you look at people like Laura Eisenhower when you look at people like Kate be get out shamanic endeavors you know doing things on a one-to-one basis reaching out to people trying to teach them about their own power about right how the disconnect from the lie and start walking the center path I'm telling you that the change is going to happen it's going to be positive because III don't know maybe I've lost my mind but I feel that when they pull their next 1929 crash or their Boom Boom Boom we got to go to war to protect ourselves I'm sorry the American people are fed up with war and and you know you can a bunch of eggheads that it's necessary to invade Russia but this ain't gonna fly so let's you know I'm only get back to you talking about the destruction of the male and female natural relationship and and you know talk about the social engineering but I recommend that everyone go out and seek Aaron Russo's last interview with infra wars comm with Alex Jones all right that was a great interview interview with Aaron with Aaron Russo his last full length interview with Alex Jones he goes into Nicholas Rockefeller joking about oh we created the feminist movement to destroy the family so we could tax both the men and the women and and destroy the family and then Big Daddy dog and the children home yeah if the dollar an errand into the government indoctrination camps and you know they'll be the next Hitler you can well were they how government wants to put children in school at the age of three now I mean like I said folks during the expose of the Neo feminist agenda that I did over the last several weeks you know I laid out a lot of the think tanks that are involved and if you just look into their work they're quite open about it it's not even like they're even trying to hide it you know I mean the Frankfurt School and you know those on who were working through Antonio Graham she's plan of the long march through the cultural institutions constantly talked about that we need to break down the family dynamic because that's the thing that you know it acts as the social cohesiveness within you know a people that we want to conquer that we want to rule over you know and that they're very open about their strategy I mean a caller called in last week I think it was last week to talk about that right in the Satanic which which I called a a field manual for the Neo feminism agenda it says right in the introduction which was written by Lovaza daughter Xena that this is a manual for eugenics it says it's a manual for selective breeding which is eugenics and it uses the word eugenics she uses the word eugenics so they're very out in the open about it you know I mean the Fabian Society you know who's also a big part of this you know neo-marxist neo socialism coming in and essentially breaking up the family unit you know playing the two sexes off against each other you know their logo is a wolf in sheep's clothing literally they're they're telling you we're trying to conquer a society from the inside and that's really what the Nazis and the Communists did they tried it out in the open to have their open revolutions and when people rebelled because they knew it was slavery they said well you know we'll just shake hands we'll work behind the scenes will conquer governments covertly will conquer societies covertly through their social institutions and then you know we'll divide the spoils on the other side after we have them enslaved you know they just shook hands behind the scenes and this is that occult ah cracy that i've been talking about you know we don't live in a patriarchy or a matriarchy we live in what I call the occult ah cracy the rule by the dark Oh cultists the forces that went behind the scenes that wanted a wage war covertly through mind control through social engineering through eugenics through epic eugenics as I call it and they've been very very successful because up until now people have not been able to really pick apart their agenda and understand all the aspects and all the elements of their plan from a focused analysis point of view as operational warfare you know as a not only a PSYOP strategy but a eugenics strategy and I think we are seeing the very beginnings of people starting to wake up to that agenda your thoughts on that people are waking up mark more MORE this is because in the internet and you know it's just funny that they're there anonymous is doing a program where they're actively seeking out the pedophile cults of the Illuminati and trying to expose them yeah I know there's a big one going on in the north of London and I can't remember the the district name but a lot of names coming out and they're doing some fact-finding sessions there to see you know the extent of it I'm sure they're gonna realize how extensive it is once they start going down this rabbit hole and I think England has been doing a much better job at exposing the pedophilia and the ritual pedophilia of the the satanic ritual abuse that's going on within their society I think the United States should take a lesson from them as far as you know speaking up about this and exposing it but it is happening it's it's it's going on and it needs to continue and needs to go much further than it already has J we do have some callers on the line do you want to go to the phones and take some calls with me yeah sure I do want to say to people that in all honesty you know Aaron Russo's interview with Alex Jones you've gotta listen to that because it'll tie into what Mark has been saying for the last I don't know how many years about this issue and some others know right from the horse's mouth coming from somebody who's deeply involved within when it goes wrong so all right the Rockefeller Foundation exactly all right let's uh let's go to the phone lines and not hear what people have to say on this topic and really any anything that you want to propose or talk about is fair game there's no taboo topics here I'd like to take some calls on the whole neo feminism agenda topic that I've been covering the last few weeks but if people do want to wander from that you know you know it's fair game anything is fair game so let's go to the phones let's hear from Andrew in Arizona Andrew you're live on what on earth is happening welcome hey Mark how you doing AJ hi zoom well hey listen you guys are talking about enforced I'll call in the Alex Jones interview there Rousseau and in an interview they say they're gonna ship everyone but the RFID microchip and that kind of reminds me of a movie I watched recently Dark City are you moving yeah it's a fantastic movie because it with Illuminati or the dark occult is want they want you have everyone walking around with no memories and who they are what they are and they want to just just blot out the light and just turn everything well we darkness and put them into a trance at their will yeah great allegory of that movie yeah you could really glean a lot about people can say a whole lot and embed ideas through allegorical fiction and I think it's a good medium for for teaching people through the subconscious you know my tact and my approach is quite different and hits the conscious mind and you know is a direct engagement process but you know making spiritual allegories like that through fiction who fictional stories can really be quite powerful in conveying an understanding of what is going on and convey agendas to people if they at least allow from a certain open-minded perspective to allow the possibility that hey this might be about something bigger I can apply this fictional story to what's going on in the world in some way and I don't have to just take it on a you know a purely fictional basis I can look at it from a different perspective if people do that I think they learn a lot from allegorical films and I think dark City is a great one you ever seen that one I don't believe so okay yeah it's an excellent film that mark I sent you a hard drive I think it was a couple months ago for the arc data and I'm kind of sifting through it right now and I'm wondering what is your like top three things I should go do on that hard drive is so so difficult because there's so much on there you know I think anything that talks about mind control is something that should be checked out and looked at on that drive I think the things that are in there on Satanism and what Satanism really is and the kind of different schools of Satanism that are out there if you will the dark occult religion the dark eyed occult ideology should really be understood because this is really what the religion of these quote/unquote elites the Psychopaths is it is their religion and if you don't understand the mentality of the people that you're you know at war with if you don't understand their what makes them tick what drives them you're not gonna understand the nature of what we're up against and you're not gonna understand what's gonna be required to get us out of it collectively as a species so I think that's very important and then I would say the third thing is anything that deals with really deeply working somebody through any kind of trauma and up to a higher level of consciousness of any material that deals with human consciousness on there and how the mind really works will be a big help to people now you know that's not really limiting it down to specific things but if you stick with those general topics I think you know you'll go a long way in your understanding with the information that's on that drive so Andrea I want to thank you for the call great points that you brought up and ladies and gentlemen we're coming up to another break stay with us we'll be right back you're listening - what on earth is happening right here on our bien [Music] welcome back everyone you're listening - what on earth is happening here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm riding shotgun with me for this edition of the show is Jay Parker of s.ra today a radio show that he hosts every Sunday evening on the blog talk radio network from 7:00 to 9:00 p.m. Eastern Time be sure to check out Jays radio show every

Sunday the call-in number to join us as we are taking your calls through the duration of the show is 831 390 443 once again the callin number to join us eight hundred three one three nine four four three one say thanks to Andrew in Arizona for his call in the previous segment and let's go back to the phone lines let's hear from Bob in Cincinnati is this the Bob from Cincinnati what a delight and a pleasure it is to speak to both you how are you both this evening Bob it is phenomenal to hear from you I'm doing really well and you know really great that you've called in to the show haven't heard from you in a long time it's always a pleasure hey I have been oh hi Jay how are you doing my friend good excellent it is such an honor and a pleasure to call back in after many many months I have been studying like Jay we kind of delve into the darkness of this world mark your topics I can't believe that you continue to a major audience I mean the the insidious neo feminist agenda the emasculation of the American and Western male the D spiritualization of the inauthentic and a man and woman I mean dude you are tearing it up well Bob I appreciate that so much you know it could be a controversial topic to head into but I think I did it in a tempered way and I think a lot of people came away from it with a very increased understanding of a very important part of the agenda that is really tearing the world apart not just America but the entire world through fomenting this war between the sexes and the information that I brought forward was again first and foremost about trying to empower people through that knowledge so that we can heal that divide that has been wide in between sexes and hopefully this information will help to start bringing about that type of a healing process 300 percent mark and I am in full agreement with your assessment that the role of the sacred female in our culture and in the reality we live in has been stifled stunted and debilitated she along with the inauthentic male such as myself working 50 hours a week to make our pittance of a slave credits in our minor bank accounts to be able to scratch and pay our bills while our children her children lament in the care of strangers so that we can buy more plastic things and another vehicle that we can't afford and insurances and things that we don't need while our children lament in private hands hands that we the strangers we don't even know mark the sadness in her eyes I see every day myself in the workplace I see it in the dark sad eyes of the child picked up at 6:00 p.m. in the evening market it's heartbreaking well Bob I don't don't be so hard on yourself because you know I won't even count you as that inauthentic male because at least you're mentally emancipated and understand what's going on and you understand this agenda I'd call the inauthentic male someone that doesn't even really understand what's going on or almost delights in in being part of that hierarchical order or process at least that's not your mental attitude you know what's going on and you know you're trying to become involved as much as possible to be a part of doing something about that that's a love long long way from you know the type of you know totally you know but in the box thinking that I'm talking about when I'm talking about the inauthentic being you know so I wouldn't I wouldn't sell yourself short men you you you've done the work as well and put out information out there and you know interviewed people and touched on topics that are you know very esoteric and and very liberating to human consciousness if they're properly understood so you know I think you're definitely on the on the right side and part of a part of the healing process but I understand what you mean in so being physically still a part of that system you want to emancipate yourself physically from that as well absolutely and you're very kind to say that mark we won't even touch about the emasculated male SMI similarities to that but at any rate my good friend there are a couple of points under neo feminism and two of them were in the ancient days as Janos as he is shared on his show sra today on blog talk radio at on type 1 radio ashram that in the ancient ancients would sacrifice their own infants on a slab a stone slab to the god Molech dark horn god Molech and to this day mark infants are still seen through self through through the that you like you said in epigenetics eugenics operation that the dark occultists don't even need to do it themselves my god mark the people place their infants up on the slab and young couples mark who are not married who are struggling and who all of a sudden find themselves pregnant with a baby they often the infant is aborted mark in the it's a nightmare the factories are churning mark nothing has changed mark can I stay over absolutely will hold you over to the next segment Bob stay with us everyone we'll be right back [Music] [Music] welcome back to everyone you're listening to what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening dot-com we're taking your calls for the duration of the show riding shotgun with me is Jay Parker of SRA today the callin number to join us 831 394 43 once again toll-free 800 3 1 3 9 4 4 3 no taboo topics of course there never are on this show but if you'd like to call in and talk about the neo feminism agenda the topic that I've just completed covering over the last five shows or so on what on earth is happening I'd like to take some calls regarding that we were talking to Bob from Cincinnati before the break hit us Bob you were talking about how abortion really plays a major role in this agenda as well and I wholeheartedly agree with you absolutely mark the mind control and that's exactly what it is people laugh sometimes people who are unaware of the term mind control as soon as you say that word or that phrase they automatically go into cognitive dissonance and they they they layer on what they've been taught what mind control means which is a form of classic 1950s Manchurian Candidate brainwashing but as you and I at Jay and others who've studied this deeply know mind control is a subtle a very quiet influencing of the thought process and this plays exactly into the thought process of young people who don't know the world don't understand what's going on don't understand their responsibilities to humanity and natural law and and when they're knee-deep in debt and all of a sudden an infant of the prospect of an instant appears in their world they're they're not Wed they're they have no income coming in the automatic the system mark as you know the system has created a convenient place for them to deposit the infant into the arms of death and God mark how I weep and it it pains me and thanks to your your show four or five years ago when I first started listening to what on earth is happening my god the light came on and this is not a political issue the dark occult politicized this this is a spiritual issue this has to do with obeying natural law period full stop and I know you know that mark I'm just sharing this with with your audience some of the audience that that might not see it this way but but I would like to hear your thoughts on that before I make another problem without any question the whole abortion agenda is a 100 percent ritual sacrifice never-ending factory you know that that's that they want bloodletting of humans of animals going 24/7 on this planet and they essentially have that I mean that's that's what a satanic culture does a satanic culture continuously kills it's about death it's the cult of death it's the order of death you know it's the the cult of the Black Sun as I talked about over the past many weeks this is the inversion of everything that is positive that is based on life that is based on truth you know it's the inversion of all of that and they want to turn nature on its head they want to turn natural law on its head and they want to rule in hell you know they're perfectly content to do that because these beings are devoid of truth they're devoid of joy they're you know devoid of any true emotion of any true creative capacity and they want other beings to be as miserable as they are and in hell with them and like I said they're doing a very successful job but simultaneously the light side of things is also doing a relentless job at exposing this darkness in our world and you know we've been have had a modicum of success in waking some people up we just have to push this a lot farther and get a lot more people involved to do the great work and then we'll be making some real progress I think Jay your take on this well I just sit back in amazement at the status quo churches today okay when it comes to allowing fetal tissue to be put in vaccines and in Pepsi yes where where are the anti-abortion people are they down in Atlanta surrounding the Pepsi headquarters no they're not you know what I mean I mean because what what kind of deep you know religious people are getting involved to you know talk about that this stuff is being used in food products you know or we're in that agency there's fetal tissue in Pepsi Pepsi uses human baby fetal tissue as a flavoring you know about this and the Board of Directors I mean they're stockholders of PepsiCo tried to sue tried to stop Pepsi from putting fetal tissue into the Pepsi and the federal government sided with Pepsi company and said the the stockholders cannot force them to take the fetal tissue out of the past you also you don't see things like you know priests or religious leaders getting involved in trying to get you know this stuff taken out of like vaccines you know we're like why you aren't they protesting that humans are being fed to humans if they're so goddamn righteous because I'm protesting it it just it just goes to show you the inactivity that you know a lot of people are in because they're held back with certain beliefs or they're so afraid of what other people will think of them it's this whole idea that they won't step out of their comfort zone they won't step out of their position to speak up on something because oh then what will people think of me and my official capacity is this this or that you know that's why I'm so always attentive groups groupthink behavior religious institutions etc it's like these people set up boundaries for themselves and then when the truth comes along and shatters that boundary they won't go where the truth leads because they're too comfortable within their own little boundary that they've set up for themselves their role you know their community status the money that they're making etc the status in society that they enjoy they'd rather protect that and so then they'll just protect the whole paradigm they'll go along you know for the whole the whole ball of wax and protect the paradigm that's why I called a lot of these people in science in religion you know in you know government positions etc they're the paradigm protectors even many of them who know some of the things that are going on they won't step outside of that role and take you know take it to its full you know conclusion or its full measures as it needs to be if we're going to put this into hyperdrive and really wake up the public you know it's going to take a lot more sacrifice on people's part I think to really step into you know the heart energy the power of true care to to really be a warrior for the truth and it's not an easily done thing like again I go back to thinking about how few people have been whistleblowers regarding the occult what about even the positive side of the occult well I I happen to know for a fact there's thousands and thousands of people who know about you know really understand about consciousness and how it works understand about the mind control understand about the positive aspects of occult information and yet they stay silent about them because they have this old hermetic notion of don't cast the the pearls before the swine you know this elitist attitude when it comes to spiritual information it's not going to get done that way either you know that that's just as bad as staying silent for all those selfish reasons now you're kind of taking this spiritual elitist attitude and you're going to stay silent for those reasons it's like you know one is purely ego driven and the and the other one is like kind of like you think you've transcended the ego too so to such an extent that what this information is too good for some people and you know it's on they're unworthy of it I mean I think we went down into a slippery slope like a lot of people taken that kind of a mental attitude and not saying hey this is information that should be spread in an egalitarian fashion and people should just be handed it and like an adult and that's your Dharma to do that that's you know the work that you need to do to do that to put that place that information out there and that's their Karma whether they're going to accept it or not whether they're gonna take it and integrate it and integrate it and use it for the betterment of humanity or not that's their karmic you know influence or their karmic situation however you want to look at it so you know III think that just more people need to need to step up and forget about these classical roles or what other people think or what they've been told about what they should do with this knowledge and we should just all bring it to the table and speak it and speak it constantly that that whole idea of alchemy being labor and constancy in other words it's work but it's work that needs to be done continuously there isn't going to be a total break in this for anybody it's it's a heavy weight that needs to be picked up by all equally and move and we can we can move it if we all pick up some of that weight and as the saying goes many hands make light work you know but it's still a continuous effort that needs to be exercised on our part that's right an occultist need to speak out mark they have been silent good and Altis people who know that the truth of natural law who keeping silent you will have to answer for that this the Age of Pisces is over in no time to speak and Mark I just want to say one last thing about epi eugenics um there is a self sterilization going on the Germans right before World War two experimented with sterilization by drawing couples who they saw as intern mention subhumans which of course you know is just our dark ideology of nonsense but they would bring the couples into the office and they would have a an x-ray machine in the desk and they experimented with this and they found that that by high doses of radiation from x-ray they could get a small percentage of people sterilized now mark it failed I know it's horrific to think about Bob they're doing that every day with these police trucks taking x-rays in people's house you know without their informed consent just hitting the population whatnot wherever they feel like it to penetrate look into the homes that's been going on that's been going on from police helicopters you know art they've been hitting the public with these x-rays I was just talking about it with my friend John today you know they've been hitting these people the population with these rays and who knows what that's doing to the to the fertility rates I'm saying right I've got a darker one for you mark we're doing once again the dark occultist don't need to do anything we're doing it to ourselves ladies just to that laptop right on your lap any radiates your ovaries day in day out or was it that cell phone in the in your back pocket set it right next to your Duff and get that radiation so close every day it radiates your ovaries or was that your sperm disappearing day and night oh I've got one last one for you stick that cellphone right next to your head as you speak every day irradiating your brain ladies and gentlemen what a pleasure I will see you both at 3:00 or mine 3:00 pick up your tickets today Bob always a pleasure to hear from your man great points always great insights do you bring up on the show it's been too long man don't be a stranger and thanks so much for the call man Bob Bob from Cincinnati ladies and gentlemen all right let's move on let's hear from another caller let's go to Mike in Colorado Mike you're live on what on earth is happening welcome to the show well thank you very much um I wanted to say mark your work on your Denis o feminism was your analysis of spot-on and the way that you explained it really I think gives people a good idea of what's happening and what's going on with the outside world well I appreciate that well the idea to empower women and as you said have them step into their power I think for all humanity and all human being would for me what's a paramount understanding is that if it's of the mind of man it's a fabrication environment yeah I mean if it doesn't exist in nature and we believe in it that's a construct that's invented by us that's really only going to take us down the dark path the idea here is to stop accepting illusion as reality and get back to a deep understanding of the natural world as it really exists absolutely well or even a light path so when I hear the term that people need to wake up that's a mental construct as well yeah I mean it's not to say that there aren't different levels of consciousness I guess it's just kind of like a you know a way of putting something like a metaphor that their level of consciousness is so low it approximates not being conscious it approximates a form of unconsciousness because they're unable to see certain things that are actually before them in the natural world or they are in denial of the acceptance that those things exist in the natural world before them in their actual physical presence and their physical experience that's kind of where that whole construct or that whole idea came from of comparing the people who are very unaware to being quote-unquote asleep and the people who are aware you know to being quote-unquote awake you know my criterion the criteria that I look at of being really spiritually awake differs a lot from what people traditionally look at that as and you can get an idea for that if you check out my streetwise spirituality seminar where I go through the points about what I feel it means to really be awakened spiritually sure and you get that innately and I do too but I think listeners and I think the people walking around this world they don't realize that a satanic agenda is a total fabrication they don't understand it they think it's something like there's the Satan thing that's going to come and take their children from underneath the bed and so they're disempowered because they know that they don't really remember a process I'm sorry good oh I mean they don't realize it's not real and you can step out of it in any second sure because it's all based in it's all based in getting people to accept illusions that aren't real sure the farther away that they push people from the natural reality the more into the satanic world they have pushed them you know and the solution lies into coming back to a deep understanding of what's real and what's not real again the ability to discern truth from falsehood which is really where we started this whole discussion the whole show started with that whole concept that that's what is ultimately required you know the Satanic mindset keeps people in an illusory identification and as long as they're in that type of a low vibratory identification they're open to all kinds of manipulate Ori tactics and they can be kept in an artificial version of reality yeah your take on that Wow what you just said was totally right on that's all I have to say no it's what they don't understand part of what they don't understand Mike is that this is an incremental process it's not something that happens overnight a society doesn't just wake up the next day and find everything has changed and everything has gone bad it happened so slowly that many people don't have that long historical worldview to understand these patterns you know they're they're they're not educated enough in in actual world history to see hey this is not something that's new this has gone on before techniques very familiar to what is being are being used and employed now and have been used and we've been down this path before as a species you know and you know until we actually come out of there manipulative methods you know nothing's going to change so stay on the line we'll continue on the other side of the break folks don't go anywhere we'll be right back [Music] [Applause] [Music] while between us we keep welcome back everyone you're listening to what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm we were talking to Mike in Colorado before the break hit us in the last segment Mike I'll bring you back on let you finish up your thoughts from the last segment thanks mark well I'm sitting here and I'm wondering maybe we need to make up some new words so people can understand okay if you tell a Democrat that Democrat is a construct it doesn't sink in sure they're so identified with it exactly and I mean even you know you call a tree a tree that's the construct as well and it's that fundamentally basic and we've trapped ourselves into this thing and I listen to you and I've seen your work for a few years and I think you're fantastic and I think you work your tail off to try to get that across to people but yeah it's called ego identification it's like you know when people are asked what are you or who are you you know most of them stretch for a role that they're playing in society or think of themselves as their job or you know the type of person that they are you know most of them don't even think you know I'm a being that is having an experience you know in the physical domain but my nature is of spirit and you know this is all a growth process and a learning process to develop the soul to develop the you know individuated unit of that we would refer to as the soul you know most people don't even have that type of a perspective they're so bound in a worldly way to a an ego based role you know it's what I called ego identification in material early material that I covered on this show I think people would definitely benefit from you know getting a deep understanding of what that ego attachment and ego identification is all about because it helps people to understand just how deeply in mind control people can be as a result of clinging to this these roles as their identity in life and thinking that there's nothing outside of that well and that also makes me wonder what guys like you and I did karmically to be here with all these people get it or maybe we chose it willfully because we're the best people for the job out there in the universe who knows you know that's how I have to look at it I can't look at that that at this as punishment it's like I look at this as a mission and you know I think we were kind of spiritual warriors that willfully volunteered for this mission that's the way I look at it we said they said hey we got a planet out there that's gonna be a real tough nut to crack and we and we said yeah watch this well I think that's the kind of team that we are that's the kind of away mission players that we are well and good for you and thanks for your work and keep it up brother you got it my friend thanks so much hey Mike you know that's the only way I think we can look at it if we look at it a different way we might drive ourselves crazy you know what I mean I don't I don't I kind of had that that take of a maybe I'm here because karmically I did something really bad but the way I tend to want to look at it these days is I accepted a mission and I think we're going to be in that mission for the long haul we're going to complete it ladies and gentlemen stay with us we'll be right back after these words with more of your calls you're listening to what on earth is happening we'll be right back [Music] man [Music] [Applause] [Music] welcome back everyone you're listening to what on earth is happening here on Republic broadcasting I'm your host mark passio my website what on earth is happening dot-com we're taking your calls for the duration of the show the toll-free number to join us here on what on earth is happening eight hundred three one three nine four four three once again toll-free 800 three one three ninety four forty three let's go to two good close personal friends of mine Tim and Kelly in Philadelphia Tim was one of the main organizers of the second freer mine conference and his wife Kelly is on the line with him as well Tim and Kelly are you with us hey Mark how are ya doing well how are you doing Kelly I'm all right and right behind me is just putting on the babies and head nurse oh so what I want to address and this is specifically for all your female listeners out there all the ladies out there and to all the men who have sisters and daughters and and you know any female up close to them but you know there's a cycle of neo feminism that's also the destruction of family that that I have experienced tonight I feel I have pulled away from and I just want to you know go over like this cycle that I've seen myself go through I've seen other women go through but also I have solutions for that as well sure I read ahead oh you know the first cycle is you know from the moment of birth if a woman is giving birth in a hospital her baby's traumatized and you know she's splashed to miss me and I'm talking about the babies the baby the girl she splashed no it's with stinging erythromycin the eyes which can cause blindness and then they want to inject her with a poisonous vaccine within hours of her birth and they want to shove twos and other objects up her nose and down her throat and then finally they separate mother and child and then when the baby is about 6 7 8 years old she's introduced to princess programming where she's a damsel in distress that always needs saving there's the promotion of sex pink is everywhere barbie is Nino and specifically about those Disney films the mother of those princesses and those chunks always is absent usually dead and then she's raised by the evil stepmother so there you have that you have that aspect of the destruction of the Sacred Feminine and then you know that's for anything tell me what that is that's an I'm telling you exactly what they're doing yep that's that's one of them wave hello to you continued thanks Jay and then you know stop for like 10 years later and you have women going to college and I used to work at a university before I had my children and you know the one thing about what they're pushing right now and specifically at the university I worked at is STEM education stem stands for science technology engineering and mathematics and they're pushing with all over the board but specifically they're pushing it to women and stem is really left brain and when I see women these students that have STEM education come out they usually go work for the military-industrial complex and the medical mafia and now they want women to go into those fields and then after college you don't get a job get a job ladies get taxed like they're like your male counterparts you're still gonna make less so there's that other you know could be false to be if you will and then you meet your prince charming and you have your dream wedding where you're acting out your princess programming and then have the child put them into the same system and wash rinse and repeat and do the same cycle all over again and after that wedding it doesn't end there you got to go and get a marriage license but you can have menage tois with the government so there's that that destruction of family and that destruction that sacred union between man and woman and then like you said the process is repeated because then the woman wants to have a child and she's gonna go to the hospital so her child can be traumatized like she was and then she's going to be traumatized like her mother was where she's treated like a sick patient and she's confined to a bed and straps monitors and she can't move and then she's told the line her back to give birth but it's the doctor who delivered the baby not her ladies you deliver your baby and then oh and then don't forget all there is maternity leave then which you know you hear that you hear the questions when are you coming back now I wasn't asked that you know when I left they knew I was leaving there so I didn't have it but I know a lot of women are asked what are you coming back nah are you coming back and then you know under the Family Medical Leave Act ignite speaks you get up to 12 weeks of maternity leave where it's considered you know you're concerned sick ok you're not sick when you're even first ok and if you know it's considered a disability right you can answer and then you you're entered into debate about gonna look at countries like Sweden with their mothers get up to a year of maternity leave and it's paid well why why are you why are you working anyway you know and like you said mark then then the process is repeated and you send the baby at daycare and then the baby turns five and then he sends in the indoctrination station right target part of the whole process of driving women in the workforce was to just cut off the feminine nurturing from the child and the other part of it is you know you could double the tax base and also basically create more internal competition within the workforce and that drives down wages and combine that with inflation you know you have the dollars value going down and you have you know competition over wages going up and you know basically that's making a that's destroying the middle class that that combined attack is destroying the middle class and you know it's uh it's leading to the type of depression the type of financial depression that we're in that's just demoralizing people all the more they understood these forces these forces are all actuary doubt you know when they went into this whole agenda they knew what they were doing this is a deliberate constructed methodology and it's a grand stress strategy a chess strategy and most people just aren't psychologically sophisticated enough to understand the chess strategy that's been played against them how sophisticated of a maneuver this whole neo feminism program is it's a it requires study it requires reading it requires especially on a lot of the part of a lot of females who have bought into this ideology it requires you know the ability of them the you know look introspectively inward at themselves and ask some of the tough questions about why they bought this type of an into this type of an agenda and couldn't see that it was an anti-life agenda in general it wasn't about evening the playing field between men and women it's about destroying society and ultimately destroying life in the long term but there and and I feel though there are solutions and I do want to share them you know specifically for the ladies of your audience don't give birth in a hospital first of all do a home birth as you know mark and you know Kim and I attempted a home birth with with our children unfortunately you know that didn't work out but and there's one midwifery and and you know if you look at the statistics home birth is so much safer than a hospital birth United States is you know so see this industrialized first world nation and it has one of the highest maternal neonatal death rate and then number two stay at home Rob nurture and educate your children take them out of day care team and out of those indoctrination zation and number three stop living beyond your means and that's going to help you stay home because if people are you know in a two-parent household and they're both working you know find a way for for that for the father to work and the mother to stay home that is her job that's the most important job she can do this the most important job that I've ever done in my life it's the most rewarding I can never imagine going back to work me maybe maybe when my children are out of the house but now I can't fathom that idea I cannot so people just not stop living beyond their means you know don't get don't buy the fancy cars maybe you only need one car you no doubt downgrade the size of your house like me that's like that stop living beyond your means what is more important you know that's what you know a lot of people want to do they want all these creature comforts and you know they want to do that when really they're they're not you know making the kind of money that is conducive to that life saw then they go into debt you know and then they're willing to do basically anything to keep a job to you know pay off their loans that they have or pay off the debt or the expensive house the expensive car the mortgage etc or the car payments and they let that determine their actions you know they look at that as well I have to do this to maintain this lifestyle that I've you know decided I need to be living and you know then you know the control over their actions follows that because they'll do anything to maintain that lifestyle well can I add some sure The Satanic mind control that was you know conspicuous consumption and materialism in the West it is right now because the internet and the reality that things do not fill the hole in your soul I think materialism for a lot of people is getting its ass kicked what do you think I mean I certainly think that there's a small percentage of people that realize that this certainly isn't the path to happiness and they're starting to turn away from it I think society we're a long way from that happening from that worm turning but I think it can happen I think there needs to be more of a spiritual renaissance happening within people and understand that they have to get out of this mimimi mentality I think part of the first thing regarding that is to understand that the whole selfish lifestyle ideology is Satanism if people don't understand that and don't understand that largely the people of the world are living in a satanic culture already because they are in the aggregate that the people are already living in a satanic mindset most people don't understand that they don't understand that because they don't know what Satanism is they don't understand say Satanism is essentially egoism its mimimi ism let's call it that if you understand that that's what the ideology is that is completely allowing the world to be manipulated and controlled and that is no different than what these people in these you know dark secret orders and secret societies refer to as Satanism if they even ever refer to it as that again some Satanists don't even call their belief system or their religion Satanism they just call it the old religion you know they call it you know the religion of the ego or the religion of the self you know they don't they just use Satan as an archetypal figure you know some of them could believe in demons and entities I'm not discounting that that happens within the realm of the occult it does some of them believe that they call on forces and powers etc but I'm telling you the overarching religion that they have to keep people in the mindset in the idea ecology of is egoism is seeing the self as the most important thing above all else regardless of what's right or wrong you know my work is all about the importance of the self and understanding the nature of the self you know what the true self really is the authentic self but that doesn't mean it's worship of the self for putting the self on a pedestal or seeing the self as the highest power in the universe it's seeing the individuated aspect of the self and as being something that is connected with the higher self that we have to make that bridge of connection in consciousness and understand we are part of something larger and there are you know higher powers that ultimately have you know set up boundary conditions in this world that govern our behaviors and that's what natural law is man didn't make those laws you know you know it's this is all part of a wider understanding that has to open up for people to get out of the you know totally ego centric service to self mindset that they're in once we start transcending that mindset it becomes easier and easier to see how we've been fooled and the agendas that have played a big role in this whole in the orchestration of the creation of this whole worldwide control system so I think what you're saying Kelley is some good solutions in that you know we separate from the existing amoral system as much as is within our power to do so at the same time if we morally raise our children the right way by taking the time that needs to be invested in the minds of our youth and home-school them and take them out of the government indoctrination camps that's got to be a gigantic plus who are putting their mind on the right path at a young age during their formative years well I just hope that you know some people will take that into account and really you know see what their partner at home and really talk about but you know it means our boy it's only 11 months old right now but we re talking about what we're going to do oh sure you have to start you have to plan it plan it early that's a good good frame of mind to be in for sure but that's all I wanted to say but Tim has a few words absolutely hey what's up Martin J hey Tim hey young mention about this feministic neo feministic agenda that you know it's not only an attack on the woman but its attack on the male its attack it it's the agenda to feminize the male so the feminist agenda is to a seminar the male and you know masculinized the women's right um I just wanted to mention some things about that um so in America and in the Western eyes world fertility rates has been dropping and our fertility rates are below the replacement rate um now which means that our population can't sustain itself on the based on the current fertility rate that's right population is going to continue to decline based on the rates now so everybody were about overpopulation and all that it's really a falsehood and also the ethnic groups who moved here from other nations they had a higher fertility rates and so he moved here and then once they came here that a fertility rate continued to drop they're a little bit higher than the Caucasian people but you know over time that it continues to drop and nowadays we're hitting record lows were a fertility rates and it's the in 2012 I got here as 2012 fertility rates hit record lows liking the fifth year in a row that u.s. birth rates have declined so we're in this continuous decline um which leads me to what I like to cover a lot out of what I want to focus on because you know I need to protect myself and my family you know I cover a lot of the biowarfare chemicals and things that are used for eugenics against the people as population controls so um we're really on comes down to this is what is called endocrine disrupters and also known as hormone mimickers or xenoestrogen and what I refer to them as simple as gender benders because they're basically um feminizing men and mesmerising women so they're very tender towards each other and then endogenous Wade where each person the women isn't really a woman anymore and the man isn't really a man right so uh so these endocrine disruptors there are things like plastics and they're found and pesticides and chlorinated products heavy metals laundry detergents and antibacterial soaps and shampoos cosmetics and liners and your food cans and even pharmaceuticals like prozac and birth control pills and even soy like baby formulas soy based formulas and flame retardants which they use in baby clothing even though they spray pesticides for mosquito control and these are used so mosquitoes can't reproduce um so all these things are affecting people's and there are hormones in certain ways to where the men are basically making men you know emasculating men met feminizing him so there is a there's a story in the a woman who I found her story her name is Vicki blazer Tim hold on let you continue on the other side of this break ladies and gentlemen stay with us you're listening - what on earth is happening [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm taking your calls for the duration of the show the toll-free number to join us 800 3 1 394 43 we were talking to Tim in Philadelphia Tim you were talking about estrogen mimickers that are put into foods you termed these gender benders because of how they kind of blur the distinction between the sexes and kind of try to you know uh feminized men and and masculinized women and in so doing they're kind of creating the beginnings of sort of an androgynous society and that's why it's part of the agenda to put this into foods because if that goes into people's systems it's going to you know totally break down the classical gender roles and that's going to break down strong men which have traditionally acted as the protectors of the society and therefore the state can come in and basically rule unchallenged because there's not going to be any strong men in society anymore yeah Murr you said with us yeah yes I'm here on because these these gender butters you know nowadays um you know I really don't have any problems or hate for any people who are gay or any of their - it's like that's just one nowadays I just see more and more people who kind of look at them and you're not even sure whether they're male or female because nowadays it's like more and more people they either are you know these it's you know it's just hard to tell it's blaring the line and so I see this myself out in society and it's not it's not saying treat these people with any kind of you know discrimination or anything like that it's just a commentary on that this is being done in society and it's being done for a specific purpose a specific reason you know it's not saying that these are bad individuals because they you know that they're they've undergone this process it's saying that this process is part of the agenda to weaken our species in general so that we cannot counter the tyranny that we're under and this is part of just not only mental liberation from slavery but when necessary physical forceful rebellion you know which is what they don't want they don't want that to be a possibility you know part of what I'm gonna talk about coming up is this fear of rebellion this fear of revolution you know it's it's a big mental block you know part of the topics I'm going to be covering coming up is I am going to go through a gun ownership and the the whole dichotomy between force and violence again because I think it's so important to ingraining people and help them to understand the self-defense principle so you know starting that I think right here on the air next week I'm going to give my second ammendment presentation live on the air you know in an extended format and you know I said we're gonna be covering the occult history of Nazism you know and the occult roots of Nazism as a religion the dark occult roots and then go back into some solutions about how to you know work your way into people's influence through you know the exploitation of certain familial dynamics and social dynamics that many people aren't even aware of I'm going to try to make a point of that as kind of a new solution so to speak of how we can get out there and reach more people but you know this whole idea of not being able to physically wage any kind of acts of resistance they want society the controllers want society there they don't want strong men capable of rebellion in society they especially don't want strong independently thinking awakened men in society and what they're using women in this neo feminism agenda to do is keep men in a bull state keep them in a dependence they keep them attached to the state because the women are so attached to the state and the men they know that the men will generally follow the women's lead when it comes to what's going on culturally what's going on societally I mean Hitler said this he said if you want the minds of the children you have to get the minds of the women because where the women go the children and the men follow you know they have been the traditional nurturers of society those who have been green you know moral fiber in the young [Music] you know today disguise at night night divine today tried to run try to hide welcome back everyone you're listening to what on earth is happening here on Republic broadcasting I'm your host mark passio my website what on earth is happening calm I want to thank Tim and Kelly for their call in the previous segments a really great job and good insights that they brought up let's let's hear from a couple other callers and let's hear from Robert in California Robert you're live on what on earth is happening welcome now we lost Robert okay we lost there so there's a press reprint Jose importer he goes up next okay no worries let's hear from Jose in Puerto Rico Jose you're live on what on earth is happening welcome those are you with us Jackie hear me yes I can there you are ah how are you Mike doing well yourself oh how can I say this I've been waking up on a lot of things ma'am I basically have the same type of reasons you have I've been doing this for many many many years man I've been awakened but I'm so glad to see more people coming out so I wanted to tell you about some things that not many people are aware of okay specifically Puerto Rico this is a place because I'm aware and I've been around a few free masons I got Freemasons friends I'm also around a culture where they practice Santeria over here is this African witchcraft so I put the pieces of the puzzles together and there's a large influence of the Illuminati over here brother Oh large influence the HAARP facility they use I receive oh they came to us everything evil day is you know I know what's coming helicopters are passing over you know Puerto Rico was basically the place where they experimented on first and they used all these experiments once they realize that the music the brainwashing once they realized that they is that it worked they passed it on to the United States over here in the island is basically all brainwashing the gang music the gang violence everything is totally online this is basically loominatee central with the GMOs as well the beers course light all the things that they put in it there's a lot of things people are not aware of and I wanted to mention one thing that I figure it out sure I'm not gonna for the sake of my own safety I'm not gonna mention me but I've been to the free Masonic temples and I have quite a large variety of acquaintances who are inside the Freemasonry so one of them told me that there is a big battle right out of space every one of us they know what we're doing they know everything I mean there's surveillance technologies or you know advanced enough that you know they could be they have the kind of resolution that they could see you know they could read the date off of a coin from space so of course they could surveil everything that people are doing from space you know and that's part of the whole agenda is to get people thinking well we're constantly being watched so we better watch what we do and not do anything against the state seems all-powerful but I think it's like it's a fear tactic to try to keep people from real right action and you know people say well aren't you worried about them listening or you know videotaping you or trying to win you know somehow and trap you or I really don't care what people hear that I say I mean I I don't try to encrypt any data coming in or out of you know my personal computer because all anybody can do if they listen to what I'm saying is learn about what's really going on in the world you know the harm that I'm doing is in telling people the truth I guess you know in their eyes so you know I'm just I don't concern myself with you know that what they're doing and the you know the type of propaganda and fear that they're trying to put out there I just say I'm gonna stay steadfast and keep speaking the truth no matter what happens and once you're in that kind of a mindset in that kind of a mentality I feel you create a level of protection around yourself from the universe itself from creation itself when you stand in the power of truth and under the power of natural law as long as as long as you know you're doing the right thing that's what you have to keep doing oh and that's what I've been doing I have a couple bloggers that I've been spreading information on that and I came upon your information oh my god here's another guy that knows what I know I originally came upon the work of Roger Kent he speaks about divine law and he will he went through all this detail about contracts and he has a similar work that you did on he goes deeper into contracts I went more deeper into the psychological level many things of psychology I also noticed the rise of narcissism in in the United States if you go to tumblr you will notice all these teenagers that there are basically narcissists how absolutely other yeah and I think that's a big part of it is getting people on this into this totally egotistical needs that I concern myself with during course of any given day mindset which is Satanism people don't understand if you're in that mindset you are already a Satanist whether you understand they're not whether you don't need to acknowledge that you're a Satanist you know that's what people will say well you're saying that other people are a Satanist when they themselves will not admit that they're Satanists yes that's exactly what I'm doing I'm telling people who will never say the phrase I am a Satanist that in fact they are Satanists whether they know it or not your sake you're Satanists based on your actions okay your actions if your actions are satanic by definition you're a practicing Satanist I'm telling people what the main core ideological principle of Satanism is is only focus on the self and don't care about what's going on with anybody else if that is your mindset you already are Satanist whether you understand that or not it's the case and by that very definition we are living in a satanic culture because that's how most people behave that's how most people think and act and so we're living in a satanic society already the goal is to get out of the Satanic mindset so we can break down the Satanic society which is a society based on violence and slavery and that's correct man and that's what I've been seeing in all these song social networks I've been observing people I recently got came upon this information and I'm not sure if you're aware of this you were exactly as what these people worship I mean in in my estimation what they worship is the ego itself it's you could call it the Archon ik force the force that wants to destroy life the force that wants to have slavery the force that never wants to admit to being wrong the force that wants to be God and rule in a prison you know if that's what it takes to be God here that's the force that they quote-unquote worship or I would just say they place that on a pedestal as something to be respected and aspired to I wouldn't even really I personally wouldn't use the term worship when it comes to what the adherence to the religion or the religion of Satanism or dark Luciferian luciferianism believe in to me we're at least in the circles that I was involved with there wasn't really so much of a concept as worship as there was these are the characteristics we wish to enshrine and propagate and if you want to call that what they worship I mean you know that that's fine you could say hey they worship the ego but it's kind of a little bit of a misnomer because it's not like there's you know rituals to that and saying oh this is what we must worship and acknowledges our God but you know to a Satanist to the type of Satanist I'm referring to the ego is the God the ego is God you know and it's unchallenged and it can never be wrong and it's the thing that all my identity comes from and it's where my personal worth grows out of and it's all about getting more and more and more more and it's all about me me me at the expense of everybody and everything else including freedom and and right and what is right you know that doesn't enter into the picture - a Satanist that's the mindset I used to be in in my youth you know took me the better part of a couple of decades to crawl out of that the morass of that type of a low frequency low vibrational mindset and get my head back together and reclaim my soul you know and I'm telling you that comparatively my case of the ego was a mild case compared to where other people how deeply entrenched and and other people are not talking about these ëletís I'm talking about your average Joe and Jane out on the street you know they're entrenched in it a hundred times a thousand times deeper than I ever was and yet they know don't know the first thing about this religion yet they're ensnared by it deeper than I ever was and I can honestly say that but I see that out there so we need to develop a better understanding of what this ideology is ultimately really about not what the Hollywood depictions of it are and don't get me wrong I'm not saying two things like as you might see depicted in Hollywood don't go on because you know I mean the man sitting in the room with me right now can tell you all about some of those things and has he has laid out that on the table that's the other thing that's called predetermine programming that you're aware of that - sure Jay I'm gonna let you chime in on this since we're talking about Satanism and the dark occult and you know the gentleman's original question was you know what do these people worship you know in my experience the ego was the central focus focal point of this religion you've come from a different dark occult background from generational Satanism and the type of satanic ritual abuse that they use and put on put their children through so I'll let you speak to that from your area of involvement with the dark occult well I just wouldn't say first off thanks for a great call and Puerto Rico has gone through just a huge amount of black bag stuff just unbelievable stuff and to be an aware person living there must be a trip oh yeah that too one of the things that I see the whole society I've been awakened for many many years I just couldn't understand why people cheated themselves this way but the one thing that uh that I wanted to point out to mark that I figured out um what number seven is and number seven is out in his face literally out in space if you looked at vector symbolism you will notice that all those symbolisms resemble either a v-shape or a pyramid type shape or the Nike shape that's one example and the Nath nasur logo it has the v-shape as well what exactly are these people worshipping well many many researchers have considered that that is Saturnian symbolism because the concept of Saturn as a god in ancient in the ancient religions is one of disciplinarian and control center you know base vibratory energy and control control base consciousness and that's what these people identify with and so they kind of chose that as an archetypal symbol and use it a lot in their in their symbolism to basically direct people and you know influence them through art types yeah that's that's one that's part part of it as part of it but there's actually the physical object out the space literally that looks like a wishbone it was photograph of the astronaut's helmet it actually shows and it shows other types of photographs and in Mexico 2002 it was seen in this in the sky swirling around the same v-shaped object if you also look at the movie Stargate the the pyramid shape in the eye is actually that that's seven and there's actually a few song stars that talk about seven and it's kind of resembling a little bit it goes towards Willis and that's where neon the Neo feminism comes in in the north and narcissism oh man it just goes way deeper brother if you only knew the things that I knew as well I witnessed so many things as UFOs over here as well law a large part of the population is so controlled I don't even know how to begin over here you know I'm basically cornered and imprisoned in though in Aladdin me well I think one of the best things to do is try to reach out to others maybe through something like meetup or something like that or other social media and try to get something going locally in your area like maybe a documentary night a meetup group a discussion group of some kind when you create some kind of a community I think that's where you can now kind of really dynamically play off of each other's energy and and build that and that kind of builds confidence in for people to speak the truth as well when they meet with a support group of some kind that's really what we're talking about is uh you know supporting each other in the hard times that we're in to try to expose the truth and get this information out there to the general public so that it becomes widely known and then we could start putting a making headway and making progress and turning this thing around so Jose I definitely sympathize with you you know being out in Puerto Rico and being around a lot of that negative energy but I guess you know you're intended to be one of the lights to try to you know start something and get something going in that area you know the idea here is don't wait for orders from headquarters just get out there and do it do the best you can and do what you can and I want to thank you for that call yeah did I just say you know as far as waking people up start always with health issues and things pertaining to what you eat and stuff like that to open their minds to the fact they need to learn more and I just let me go from there that's great advice I'm gonna move on to another caller Jose thanks so much for the call Robert from Canada we lost them before he called back in let's see if he's here and now Robert are you with us Robert from California yes how are you bitch oh great thank you making a couple of comments about last week's show which was great that I found online you could probably search it called gender and sexuality in Nazi Germany and this other ones by Milton Mayer it's called they thought they were free that's really excellent and so we're coming up we'll break folks hang on I'll hold you over to the next segment [Music] welcome back everyone final segment for this edition of what on earth is happening we were talking to Robert in California and Robert you were talking about a couple of books that you recommended for people to check out they thought they were free yeah which is by Milton Mayer there's a PDF online but the other one is just a very short on paper it's only three or four pages and what was that hyung called I'm gender and sexuality and Nazi Germany and it really spells out like what you were saying about the destruction of the sacred mask and then the sacred Sacred Feminine right to bring in a police state and and it really started happening like in Lima in the Weimar Republic back in the 20s almost like analogous to the 60s here we you guys like note the destruction of morals the destruction of the family single motherhood became like a badge of honor yeah it's actually the first time in world history that single motherhood was not only was there no stigma it was actually encouraged encouraged and we were using women as breeding mares basically to get any more you know completely compliant youth that they could use as cannon fodder right order followers you know Factory and now that yeah men were the value of men was that they're just to be sacrificed you know that masks join was to just to be a sacrifice which is what we're their only value lay in what they could do to keep the state alive and propagating propagated you know yeah welfare for single mothers which I encourages in their marriage to this day like you were talking about so that right it could have been borne out by history you know if we just look back it's like what you're saying last week about the mrm there's no that and I agree with you it's just a reaction it's do something to join and it just exacerbates the whole thing it I'm not saying that there aren't accurate analyses that are we on some of that because there are however it becomes reactionary when it simply tries to postulate that this is just human nature and it does not take into account very specifically outlined publicly acknowledged strategies of social engineering that have been known about and that have been out there and being employed in society for decades and decades and decades and for somebody to just say oh no this is all just human nature and this is how it is and there's nothing we can really do about it except completely separate from it I think is very divisive and it's not going to lead to anything positive long-term I grasp it as an immediate response of defensive response you know and that's kind of what I think it is it's almost like a biological reflex response which is why it's spiked so big recently but I think you're going to see a lot of these people wake up to higher levels of understanding as they study it more this may have been one of their ends to the control system and because they've been disenfranchised you might say in a certain way a lot of these men they're they're it's a it's a big learning opportunity to understand mind control it's a big learning opportunity to understand social engineering in our society and how this is an example of what I call epic eugenics and we need to understand it very quickly because I mean there it's having a big impact throughout the whole Western world the great call all the callers were great tonight as they always are on the show when I thanks thank J Parker from SRA today for riding shotgun on this edition that's all the time we have for this edition of what on earth is happening folks remember there's only two mistakes that one can make on the path to truth not starting and not going all the way thanks so much for listening we'll see you right here next week good night everyone [Music]

What On Earth Is Happening Show #188

Topics: *The True Meaning And Purpose Of The 2nd Amendment, Gun Ownership As An Inherent Human Right, Anyone Who Is Anti-Gun Is Pro-Slavery, Standing Up To Tyranny, Other Countries Already Enslaved Because They Have Been Disarmed, Police Brutality In America, Speaking The Truth With Total Courage, Free People Are Armed, Disarmed People Are Slaves, RBN's Fundraising Effort, 27 Words Worth Fighting For, What Does "Well Regulated" Mean In The 2nd Amendment, What Is The Militia, Who Comprises The Militia, The Necessity Of The Militia, Why Is The Militia Necessary, What Was Meant By "A Free State" In The 2nd Amendment, Why The Founders Hated and Warned Us Against Standing Armies And Police Forces, How Militias Could Defeat Standing Armies, Militarized Police Forces Are The Standing Armies The Founders Warned Us About, ALL Order-Followers Are Duped Cowards And Cult Members, Bad Parenting As A Causal Factor For Why Most People Don't Understand Rights, The Definition Of Arms*

freedom man that's what it's all about [Music] you've got to groove on freedom like the good book says [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio [Music] welcome one and all you're listening to what on earth is happening right here on republic broadcasting i'm your host mark pascio my website whatonearthishappening.com the network's website republicbroadcasting.org today is saturday march 7th 2015. the show is live every saturday evening from 10 p.m to 1 a.m eastern time that's 9 p.m to midnight central time we have a great show lined up for you here tonight i'm going to be giving live on the air this evening my presentation that i originally gave back in on february 10th of this year uh called the true meaning and purpose of the second amendment and i will be breaking down the second amendment into its constituent elements and then reassembling it to explain what the founders who wrote this particular guarantee a protection of an inalienable inherent human right actually meant by it and what the actual purpose of that guarantee was you know why was it in effect why was this put into effect why was this enshrined in the bill of rights to the constitution of the united states so that's coming up on this edition of what on earth is happening and this is going to be part of a small series that i'm going to be doing on gun ownership rights and also on the fear of rebellion because this is something that is huge in the so-called truth and freedom community uh people thinking that there is no such thing as lawful physical rebellion or that somehow it couldn't work or somehow it couldn't be successful or somehow there's no right to that and uh i'm going to be trying trying over the next few weeks to completely and utterly bury and dispel that myth which is what it is it's a lie it's a myth and it's quite frankly new age bull crap okay is what that is so uh this series hopefully will put people on the right side of this equation when it comes to gun rights and there is a right side to it 100 black and white there is a right a correct a moral side to this issue and quite frankly you know another part of the issue that i'm going to be picking uh just as a brief aside before we jump into the presentation for tonight uh there's people in other countries they're completely on the wrong side of this equation and there's a lot of americans who are on the wrong side of this equation but i'll tell you what there are people in other countries like england australia uh you know places that are allegedly part of the quote-unquote free world part of the quote-unquote civilized countries of the world and they're complete and utter prankster jokesters when it comes to this issue i'm coming out with both barrels blazing tonight i'm swinging for the fences okay because i'm so tired of hearing people who have absolutely no idea what is going on when it comes to human enslavement because their people have already been disarmed these are little naive punk boys that have no idea what's going on in this world they're not real men and they have no idea what it's going to take to protect freedom they're a bunch of jokes so right off the bat i'm coming out with that kind of energy how about that folks all right because there's too many damn people in this world who don't understand gun rights they don't get it and there's a huge amount of women on that side of the equation too and they're a big gigantic part of the problem especially in this country when it comes to the anti-gun lobby because they're cowards they're cowards you want to know what it all comes down to folks right there how about we get this all out on the table right out in the open before i even start because i'll be going into this in depth in coming weeks these people are cowards they just have absolutely no courage and they wouldn't stand up to tyrants well you know what i'll place myself in the company of the people who waged the first american revolution instead of in the company of people who are total cowards and won't stand up for their rights they think they're going to talk their way out of slavery your little children is what you are if you think that way let me tell you let me just say it right out in the open before i even begin the presentation tonight anybody who is anti-gun is pro-slavery the end that's all it really comes down to how about that good night everybody that's all i really need to come out and say if you're anti-gun you're pro-slavery the problem is these are little naive punk children who don't even understand that so uh let me give the call and number because if there's time following the presentation tonight i will be taking phone calls i'm not going to guarantee that there will be but we'll see the call-in number to join us later probably in the third hour of the show this evening is 800-313-9443 once again the call-in number if you want to get in the queue and uh bring up anything you want to talk about regarding uh the second amendment and gun ownership rights the toll-free number to join us here on what on earth is happening 800 313-9443 and folks you could tell i'm fired up tonight because this is an issue that too few people in the modern world fully understand because all the mind control propaganda that they have been barraged with since the moment they fell out of the womb non-stop being hammered into the brain of these people and they've bought it wholesale because they don't want to take any personal responsibility for their own freedom for the preservation of freedom for the acquisition of it and then its preservation that's why they don't have it that's why most countries in the world have not even a modicum of freedom and are openly enslaved because they've been disarmed and they let themselves become that way and they think it's so great that there's no guns in their country they're a bunch of naive childish clowns you've been clowned you've been had if there's no guns in your country that means slavery was perfected there that's what that means boys and girls people say oh you're talking down to people yeah you're damn right i am talking down at you because if you've let yourself been be disarmed you've allowed yourself to be enslaved and you deserve to be talked down to till you grow the courage to remedy that situation let me tell you something you ain't the powers that should not be in this world but currently are let me tell you something you're never going to get that done in the united states you bank on it boys you're never getting it done here know it like you know the sun's coming up tomorrow morning it ain't ever going to happen i'll tell you what not without unimaginable bloodshed because you think people aren't sick and tired of what's going on in this country police absolutely raping the rights of people an open police state being forged another homeless man shot murdered in los angeles this past week hardly anybody even talking about it for being homeless this is eugenics pure and simple no resistance on the part of the people for a murder that took place in broad daylight a murder and then they won't release the footage they won't release the the body cam footage from the police because they know it shows a murder pure and simple shooting an unarmed homeless man you got to be kidding police are scumbag animals scumbag animals anybody who supports them is a nazi lover a damn nazi lover you're not sick of what's going on in this country you should be embarrassed for yourself you should be embarrassed if you're not angry and sick of it if you're not talking about it to everybody you know before i start the presentation for this evening let me give a couple of quick announcements the free your mind three conference of course coming addison you know my presentation is probably going to be just as hard-hitting as what you just heard here tonight at the for your mind 3 conference because i'm going to be talking about these cowardly animals called order followers they're the bane of the whole world they're they're the absolute bane of human freedom there are people who are keeping people enslaved my presentation for your mind three is going to be called the cult of ultimate evil order followers and the destruction of the sacred feminine these are the the the absolute destroyers of care in the world and people think that they're doing something to help people i mean you have to be completely and utterly stupid not just asleep but stupid if that's what you believe you can't see that order following is the purest form of evil and that's all these people do go and get this person out of here go and stop this person from selling cigarettes you know go and collect this tax money go and rip this person out of their home going you know stop this person from you know uh holding a substance a wheat deem is absolutely illegal is off limits for human consumption all this stuff when none of these people have harmed one damn person not committed one wrongdoing by causing harm to anybody and these people are willing to just go yeah oh i'll follow those orders like a unthinking robot because that's what they are they're a piece of trash whose mothers and fathers didn't raise them one bit and their parents were trash so this is what i'm going to talk about at the for your mind conference and trust me you know i know larkin rose likes to joke around and say when he goes to conferences he wants to make everybody else's presentation look tame by comparison well i'm going to make everybody's put together look team by comparison i'll get up there and say the things nobody else wants to say publicly out in the open i'll put a target on myself because i don't care what the powers that be are going to do i'm telling them out in the open out in the open what i think of them and i'm going to tell the truth openly because that's what i'm here to do that's it i'm standing in the power of truth and righteousness and i harm none that's it and as long as i know that i'm speaking the truth out openly with 100 courage i don't care what happens to me in the physical body but i guarantee you you're not coming at me with violence and you're not and don't expect to have absolutely no physical resistance i know what my rights are and i know self-defense is one of the inherent rights of humanity the end and all y'all listening out there need to get that through your damn thick skulls especially the women out there listening and you need to become gun ownership rights activists and understand this is something that can never be taken away from a people who intend to remain free if you don't already know that you're clowned out you're already under deep mind control and you need you need to get your brain out of it your brain's added if you think that the gun ownership isn't a good thing or isn't a right a human right you don't understand self-defense and that means you got at best half the equation at best you probably don't even have that much the free your mind three conference april 10th 11th and 12th 2015 at the sheraton bucks county hotel 400 north oxford valley road in langhorne pennsylvania just outside the city limits of philadelphia the speakers lined up for this great event coming up in april bob tuscan clint richardson curtis davis dennis mckenna derek bros ed fortune freighter x freeman fritz springmeier jay parker janiece barcelo john bush john vibes josie the outlaw wales laura eisenhower lennon honor luke rodkowski mark devlin myself mark pacio ross ben stuart swerdlow and the anti-media panel there will also be a panel discussion with the speakers of this great event there will also be open mic uh sessions at the end of each night with uh you know anybody that wants to get up and talk about it a topic of interest an all weekend pass for free your mind three 150 tickets are available at the conference website freeyourmindconference.com ladies and gentlemen the biggest conference of its kind certainly on the east coast probably in the whole united states or possibly even in the world in 2015 free your mind three be there support this great event get your tickets now freermindconference.com this is one you do not want to miss it is only five weeks away there are still a very limited number of what on earth is happening promotional t-shirts available i only have a few left so if you want one click the email link that's listed in the article at the top of the news section they're available in return for a voluntary donation also there is a donation button on the left hand side of the wallner that's happening.com website if you feel you've received value from the information i presented on the airwaves and on my website then uh please feel free to make a voluntary donation help support my work so that i can continue into the future with that having been said i just want to point everybody to the radio show page of the what on earth is happening.com website underneath the player for tonight's broadcast if you're listening live you will see images for tonight's show they're the for your mind conference posters and then under that you'll see second amendment presentation slides that's the slideshow those numerical links you can click those i'll try to be cognizant of um providing the number of the slide that i am on at any given time before i move to the next slide and now you can uh bring that up in a slideshow uh on online uh if also if you're listening with the podcast you could do that there as well this is podcast 188. we're rapidly making our way to number 200. uh probably the easiest way to get the slides is just download the zip archive it's a 13.7 megabyte file that's also available uh under the uh player for the show on the radio show ladies and gentlemen we'll begin the second amendment presentation on the other side of this break you're listening to what on earth is happening we'll be right back [Music] um [Music] people better start waking up real fast folks you know i mean because they're losing their souls is what's going on because they're so completely under mind control i mean they actually believe that there is legitimacy to human authority they actually believe these police and politicians are god and that all their commands must be obeyed without question they actually believe there's no such thing as lawful and righteous rebellion against these absolute criminals well there were people who really deeply understood inherent human rights they understood the absolute necessity of firearms ownership in the defense against tyranny and people want to insist oh this is just for somehow personal defense like on the street or something or it's for hunting rights you know just utter nonsense the things these revisionist explanations about what the second amendment was put in place for hopefully after understanding this presentation that i'm going to be giving on the airwaves today you know you'll grasp that the writers of the second amendment the authors of it themselves and the other founders of this country firmly firmly put the second amendment in place because they understood it was the last hedge of protection against all-out enslavement which is where the entire majority of the world already is i'll tell you what i'll tell you one place that isn't even close to that as much of a police station is in place they know that they have to psychologically do that to try to make us think they're all powerful because they know that there's still at least a hundred million gun owners in the united states and that number's growing it's growing and it's a beautiful thing armed people are free disarmed people are slaves that's all it ultimately comes down to that's the equation that you need to get through your head so i originally gave this presentation on february 10th of this year we're already into the third month of the year i mean this year is already flying by it's amazing it's march already past we're into the fully almost past the first week of march spring is right around the corner i gave this at a meeting of philadelphia liberty on the rocks it's a great activist group that uh is working here in philadelphia i attend their meetings on a monthly basis and uh there's great discussions that take place it's a good group of people who understand freedom and um you know i basically had talked with him and said you know i give presentations would you like me to do one maybe i could bring in some numbers and try to you know because the meetings were like you know six seven people 10 people sometimes but sometimes smaller than that so i said you know we need to build some numbers let's uh let me do a presentation let me try to get some people in here and then maybe some of them will stick around and you know retain membership in the group and start coming out on a monthly basis so you know the organizer john said well you know what do you want to talk about and i said i want to talk about gun ownership rights i said i want to talk about the second amendment this is something that's near and dear to my heart and i think too few people understand what its original intent and purpose was so i want to clarify that for them and he said okay great sounds like a great idea start putting it together we'll announce it and we'll do it so i put the presentation together and it happened and it was great it was a packed house really great response great people showed up all um very very knowledgeable in their own right and really got seemed to have got a lot out of the presentation so this is a topic that i want to revisit for a number of reasons and again i talked about them in that little hot rant that i did at the beginning of the show because um there's still too many too few people worldwide who deeply understand gun ownership rights and they're adamant about it they think they're right they think they're correct they think they're so spiritual because they're anti-gun all the new agers want all the guns done away with these naive children in the new age movement we're going to talk our way out of slavery folks yeah that's how it's always been done it's how it's always worked there's never a thought in any of these morons minds that maybe maybe folks maybe the actual spiritual lesson here is don't let yourself be pushed over by a bully maybe the spiritual lesson is that you have to physically stand up to the bully because you know your rights and you know the bully isn't within his no they never think of that that never occurs to them never once ladies and gentlemen before i actually officially start the presentation i think coming up in the next segment is rbn owner and founder john stadmiller he wants to come on and talk about a fundraiser for the network so that'll be coming up on the other side stay with us [Music] [Applause] [Music] [Applause] it was a cool silence but we don't dare speak [Applause] there's a wall between us [Music] [Applause] that there's nothing wrong [Music] with this code of silence and it can't go wrong welcome back everyone you're listening to what on earth is happening right here on republic broadcasting i'm your host mark pascio my website what on earth is happening.com this segment we're going to be joined by rbn owner and founder john stadmiller he's coming on right now to uh tell our listeners a little bit about uh network fundraising efforts that are going on uh john are you with us pacio i'm just sitting here and i was just marveling commenting to uh mike that's in the uh mothership in round rock running everything uh your position on firearms and i'm so glad to hear you talk about that i got a little i got a little uh excited there tonight because i i i go on some sites and some forums and i hear people really talking out their rear end when it comes to this issue and uh they've really been um uh completely emasculated and they've been domesticated quite frankly when it comes to this issue and i really am trying to do my best to try to reverse uh that that very disturbing trend so i get a little bit passionate sometimes but john i want to let you get to your very important issue which is about rbn needing some assistance on the part of the listenership well that is correct i don't know people don't really pay attention to everything that revolves around radio or networks or anything else mark they know what they know they know they want to dial in they know they want to hear mark pacio's show they know they want to hear the network there's other programs on this network that are very very important instructive programs for them to tune into information is the name of the game knowledge is power and this is one of the few places that you can get that years ago i was just thinking here if i can steal a couple of minutes you know you're talking about how john the floor is absolutely yours i know this is a very important issue and without support like this there is no broadcast so you take the time that you need well i i appreciate that mark i really do and you were talking about people's attitudes about guns and they're being just they're they're they're being led to the slaughter people that can't defend themselves uh what are you gonna use harsh words there's no piece of paper you can hold up to stop it that's not bulletproof uh it's it's a sad state of affairs when we've got to start thinking in terms of using a firearm to protect your person that's not the world we should live in but the only thing that keeps you and death the only the only saving grace in between is not a guarantee but at least a chance that's right that you can protect yourself and as you were as you were talking mark um i'm getting ready to sell a personal firearm off because i got to pay personal bills here at the house and i'm pulling out a 50 caliber uh navy seal backpack weapon and only measures 31.5 inches and i found a case of ammo that happens to be 50 cal steel core and that ammunition will go directly through an engine block you know a firearm is a firearm and years ago we noticed that there were the gun grabbers out there yep and it's a very very strange mix but most people don't realize that it's already been written supposedly on the wall that we could uh be disarmed and that's through the united nations and yeah and everything else so uh years ago when we saw clinton starting to mess around with firearms and wanting to limit them and we saw the barber boxers and everybody else coming out anti-gun what we started to do in this country is for militias the unorganized militia that is constitutional is legal these people we traveled to 37 out of the 50 states and it didn't matter if it was in the hills of pennsylvania or the deserts of arizona we didn't care we went up to each individual state to set up militias to let people know how to structure them the equipment they'll need firearms everything else and since that time uh and the militia is still out there you don't hear a lot of uh talk about it obviously because good old uncle sammy and they're eavesdropping they're hanging on your every word of your every email your cell phone it doesn't matter samsung came out a couple of weeks ago and said yeah our tv sitting in your living room can listen to your conversations this is not a safe or secure world anymore and the only thing that's going to keep you from personal demise is going to be that personal uh personal firearm but here's the difference i realized years ago as we were setting up these militias and again folks they are out there they're not vocal they haven't gone away they haven't gotten rid of their firearms they haven't got rid of their backpacks or the desire to keep this country free it is still in place because it's not been vocal don't fool yourself it's still there so what do we do in the meantime to lessen the damage that might be done to this country to our lives our freedom our families everything that we are familiar with in least this lifetime what do we do about it well it's called knowledge and i started this network and it's going to have its 11th anniversary on june 4th of this year and once i did my bit for god family and country helping to start those militias out there i decided it was time to start educating people a trained monkey can pull a trigger a human being has to know why and what i decided to do was to start a network and i started a network years ago 21 years ago well that operated for several years and that was sold off that became genesis communications network ted anderson bought it one thing or another wasn't quite a good fit me being grandfathered into that network and i was i was asked to leave the network that i founded and that's how rbn came into being that was up and running after i did a show on gcn that was up and running in 30 days and it's been running continually ever since why for the knowledge for the information you can't hear programming like this on any other radio outlet aside from the dwindling what is called quote-unquote alternative media well i always thought of it as being the alternative to the propaganda channels we're being pounded with it every single day i mean it it's i'm comfortably numb with it i i see it going on all around me mark but i have a tendency to tune it out and i do that because i want to stay focused on what we're doing so to have uh to have a a a country such as ours and to have people really understand the way things are supposed to operate the way things were set up aside from some of the deep issues you talk about which are absolutely fascinating i call it the fine tuning for the brain uh some of the you give some of the some of the best talks i've ever heard and by the way i know you're a working guy you're a working stiff but i need to get you on my show here pretty soon before you go to this conference for your mind conference by the way folks i freed my mind many years ago free your mind and guess what else follows your keister so you're you're whole and you're on down the road look mark i i appreciate you being on this network i just love the simplicity and the love even though that you're talking about firearms which is to some people's way of thinking that's contradictory to a loving envelope relationship with you know everything around you uh most people don't get that and i do when i hear you talk i i just it just makes me smile i find myself when i hear you talking it just makes me smile i appreciate that a lot john well not too many things in this life does that to me hey look i'm not going to chew up your show here even though i just love being on air with you we are doing a pledge drive for the network i talked to you a little bit before the show and uh corporate america doesn't really want to let me go uh i'm locked into long distance contracts that's going to be ending this june thank god uh our cost just for long distance calls people calling into the network mark is about eighteen hundred dollars a month uh better than twenty five thousand minutes a month people calling into the network to talk to the host talk to the guest you know that live interaction that is to me that is where it's at and to get out of this contract i told you that uh yeah they said they'd let me out i asked last june they said yeah we'll let you out of the contract for two thousand dollars a month which was two hundred dollars more than the actual service that i was i was receiving so they were no help i'll be out of that contract this june and our bill will go from eighteen hundred dollars a month down to about three hundred we have been cutting costs all over the place we've gotten rid of half of our office space i could no more go on air and ask for donations from the listenership if i wasn't doing my part to make sure we were as skinny and as fine-tuned and honed as we could possibly be right and that's coming from the standpoint of operating costs so having said all of that i've got to clean up back bills with this uh with this phone company i've got a i've got to pay another month's full rent because i was a bad guy and i turned the electricity off and the recently vacated half of the building so they're going to make me pay a a full month's boat on this absolutely crazy people are doing weird stuff mark and they're gripping the harder they try to grip to that dollar that's slipping out of their hands the more frustrated they're getting and we unders we understand how tight things are when we started this network back in 0-4 of uh yeah 2004 uh june of 2004 our operating costs were about 31 thousand dollars we kept trimming we got down reduced it by 10 grand got down to 21 000 and then 08 hit the banking collapse that hit we have been trimming and trimming and trimming we're now at an operating cost of about 13 000 a month and with these savings that i'm going to do uh we're going to be able to shave another 2 000 maybe 2500 off of that my goal is to run this entire network with actual live board ops that are up there at least 16 18 hours a day seven days a week we need to do a little pledge drive here ask for a little bit of support from our listeners out there and i know a lot of people aren't flush with cash right now but don't worry about it that will run out fast enough if you've prepared yourself you've got your your beans and your bullets and all the essentials that's on the ready and that's to go what we do in the meantime is most important and this is what people miss mark that they are part of the solution themselves with the knowledge that they absorb they're able to talk to other people get them interested in and being a common sense american again thinking correctly you know what is this about what's going on well that's why we're here there are going to be many more people and many people have come through our doors many mark many many people i still get this to uh to this day i still get it my god john you switched my life around i used to listen to you i listened to you 20 years ago when you're on the air and you changed my life knowledge has a way of doing that we mark i'll tell you what it grieves me and i weep for all the chaos and the death and the absolute crap corruption and everything else i see around me it almost wants to make you just give up the business of life but we were a strong country once and we can be again i look at this as kind of being a restoration process so how do we do this you bring people into the tent you talk with them you you get them to talk to other people that will lessen the damage when the time comes when we hit the reset button in this country and folks uh revolution sounds like a good tough word i personally mark i like the idea of a restoration like you would restore an old model t it was what it was in its prime many many many many years ago and it gets a little tattered a little worn out a little threadbare but you can bring that back to life and that's the same way i look at this country it's it's not that we were wannabes it's not that we're has-beens we can be again and the only way that that's going to take place is by continuing to do programming to send out that beacon of truth out there to the people in this country i love this country it's my government i fear and i'll tell you what we need to continue this so i'm going to ask people to consider donating to this network and and i i could throw a dollar amount out to you there have been people mark that have donated thousands of dollars at a clip one donation boom i've got a guy god bless a man he uh he sends 1500 to the network every single month and he is not a rich man he's been doing it for two years so i i'm not suggesting that folks do that but what i am saying is it will not hurt you're making an investment in something that we're trying to help other people and we are trying to preserve what we know to be good so if you would consider it with your heart open up your wallets open up your purses your checkbooks whatever there's guys sitting up the network right now that'll take donations on the phone at 800 720 or if you'd like to go to the website republicbroadcasting.org hit the donate button that's that blue strip right underneath the header because you can handle the truth hit the donate button go up there and paypal make a donation or if you would like to continually to support programs like mark pacio's or other programs on this network please do or you can send us a check money order frns wrapped in foil we don't care you can send that to rbn 2251 creek two words double creek drive number 302 round rock texas seven eight six six four and mark uh i'll get out of your uh i'll get out of your hair here and i'm going to sit back and i'm going to listen to your program and i'm going to continue to smile i thank you so much for what you've done i thank you for who you are and i and i especially like your involvement in going out there and moving among people and getting them involved that's what this is all about absolutely and john thanks so much for coming on and uh informing people about what's going on with the network and this really important fundraiser drive that's going on thanks so much for uh for coming on and telling people about that john and uh folks yeah absolutely folks um this is really important you know uh people don't understand what's involved in running a network like this it takes an enormous amount of dedication and it takes an enormous amount of money and uh if you are in a position where you can help out um you know um please do so like john said you can call uh the 800 number and pledge to make a donation on the air i mean to a producer that's 800-724-2719 or click the donation tab on republicbroadcasting.org there's a paypal link right there that you can make a paypal donation and the mailing address address is right there on that page everyone please get involved if you can help out that's what it's all about we all come together and we make things happen stay with us everyone we'll be right back mark is this mike [Music] welcome back everyone you're listening to what on earth is happening i'm your host mark pacio my website what on earth is happening.com just to reiterate for a moment folks uh rbn could really use your donations john was on in the past segment uh just want to give the toll-free number to make a donation to a producer you could pledge a donation at 800-724-2719 you can go to republicbroadcasting.org and click the donations tab on the right hand side of the page and you can get the mailing address if you want to mail in a personal check or money order right there and also there's a paypal link at that location as well if you'd prefer to donate via paypal so uh please be generous if you can and i'll help the network out it needs your help right now with that being said um i'm gonna go back to uh the second amendment presentation i was talking about where i had originally given it at philadelphia liberty on the rocks it's a great group of activists if you want to check out them and their work you can visit philadelphia.libertyontherocks.org and there's also a link there to their meetup group they have chapters all over the place but um that page in particular uh is the philadelphia liberty on the rocks group you can learn more about liberty on the rocks in general there so um slide one is the title card and of course the background that i used for this presentation was the coiled rattlesnake from the gadsden flag the gadsden flag of course was a militia flag during the american revolution uh created by the militiamen christopher gadsden of georgia and it represented the concept that the people wanted to be left alone but they were dangerous if you refused to leave them alone that's all this comes down to comes down to the one overarching natural law right what i would consider the first and foremost right of every human being of every being of every sentient being period the right to be left alone not to be accosted by others that's the number one right as the old saying goes folks there's only two kinds of people those who want to be left alone and those who refuse to leave them alone you know and then there's those who advocate that other people shouldn't be allowed to be left alone and that other people should not leave them alone you know they're called statists but uh gadsden designed the gadsden flag to represent the concept of you know the rattlesnake is just existing living in nature living his life you know it doesn't want to be bothered by human beings it's content to leave other human beings alone but if you encroach upon its territory its rights etc it's gonna strike it's not harmless it's fanged it's venomized and it will give you a warning as well it will warn you that it's ready to strike so that's why i chose that as the background of this entitle of this entire presentation now it's very appropriate because this is about both the non-aggression principle and the self-defense principle as all true enlightenment is about now it's about understanding that we have no right to encroach upon others rights but when others approach upon ours with violence we maintain the inherent right to defend ourselves from an attack like that folks we're coming up to the top of the hour we'll be right back i'll see you on the other side freedom man that's what it's all about you've got the groove on freedom like the good book [Music] welcome back everyone we're listening to what on earth is happening here on republic broadcasting i'm your host mark pacio my website what on earth is happening dot com into the second hour of the broadcast tonight i'm going to be giving the extended version of my second amendment presentation entitled the true meaning and purpose of the second amendment that i gave it philadelphia liberty on the rocks on february 10th so i'm moving on to slide number two which begins the presentation with 27 words worth fighting for of course all of these images are available with the podcast this is podcast 188 or you can get them if you're listening live right now at the radio show page underneath the player for tonight's broadcast so the 27 words that are worth fighting for as they have been called uh that comprise the second amendment i give in slide number three slide three shows the second amendment's wording along with images of its two authors george mason and james madison the second amendment was ratified into the bill of rights with many uh with the other um uh nine um amendments of the bill of rights on december 15 1791 and the second amendment states a well-regulated militia being necessary to the security of a free state the right of the people to keep and bear arms shall not be infringed it's about as self-explanatory and as powerful and as simple and as unambiguous as it could possibly be written yet there are still complete idiots in this world who want to make all kinds of revisionist interpretations and say this is not a right this is not about a right they want to say that the militia is a body of government that want to say that you know gun laws are just fine and are you know uh not um infringements upon the right of people to keep and bear arms in short what people want to do is change the definitions of words that's what they want to do they want to make up their own meanings for words forget conventionally agreed upon definitions what do we need dictionaries for we don't need anything like that i can make up what words mean you know why not i just say it means something and and then it does right that that's what that's what people really want because they just think they're god it's all this look folks that's all this all comes down to people who say i'm god i'm going to determine what truth is and then it'll be that way not for me to actually look into anything and try to understand what actually is present no i'll make it up as i go along that's what government is that's what the police are that's what status are there are people who ultimately believe that authority is vested in man and that means man is god that's all that's all this whole thing is about folks you can't understand what this entire thing is about earth is being turned into hell because people think they're god that's it you haven't figured that out yet you're not paying attention whatsoever so those are the 27 words the simple 27 words that comprise amendment 2 of the bill of rights to the constitution of the united states but what does it mean i think it's pretty self-explanatory but there's people who apparently need in-depth explanation of what this means and it's mostly because they really don't understand the word militia which is the heart and soul of the second amendment the heart and soul of the second amendment is the term militia if you don't understand the word militia you don't understand the second amendment this is part of the problem especially with the foreign people okay the people who are not from the united states who don't have this rich tradition they unfortunately haven't inherited this rich tradition about gun rights owner gun ownership rights which are is a human right see it's like being born with no arms pun intended it's like literally being born without physical arms i'm not talking about firearms i mean arms that end with your hand okay and and somebody trying to explain to somebody how to manipulate an object with their fingers and that person was born with no arms or hands not gonna even be able to comprehend or perceive at all they won't be able to conceive what you're talking about because they don't have the equipment they don't actually have it present it's not there and this is what people born in other countries are are like when it comes to gun rights ownership gun ownership rights i'm sorry it's literally like they can't conceive of it because they were born in an amputated state they were already disarmed born into a nation that was disarmed enslaved because it was disarmed you know people could say oh mark you can't fault them because of that it's all they've ever known sure i can sure i absolutely can fault them for that because it's called knowledge that's present and is actively being ignored sure i can fault people for that they're not nascent people what they are is they have their head up their rear end and they think they're so awake and so spiritual because their country doesn't have firearms oh look at look at these look at these um you know barbarians over here oh they have gun deaths yeah you have more violent crime in your countries people from england and australia you have more violent crime overall just because there's more gun violence in the united states doesn't mean there's more overall violent crime maybe if you count in all the crime being conducted by the police yeah i'll bet you we have more violent crime than the whole rest of the world put together you know look at how much assault robbery good knife violence violence with blunt objects goes on in england your people are just as violent as anybody at any elsewhere around the world get over yourselves the thing is you're more enslaved because you don't have the ability to resist your government so when they come with guns you know what you're gonna do you're gonna crap your pants like little boys that's what you're gonna do because you you let yourself be disarmed your forefathers let yourselves be disarmed like the clowns that they were and sorry to say it that way just that harshly but you know what it's their fault and now the sins of the fathers are visited on the suns and it's your fault that it continues it's your fault that it continues boys so we got to say it that harm and if harsh and if feelings get hurt they get hurt i'm here to be your friend i'm not your friend get that through your head i'm not your friend i'm a teacher of truth not interested in your friendship i'm interested in freedom i don't i don't care if you like me hate me all you want i'm gonna speak the truth that's what i'm charged to do spiritually in this world and that's what i'm going to do so what i intend to do in this presentation ladies and gentlemen is to completely break down every word and every phrase in the second amendment so it could be very readily understood by people who are still a little slow on the uptake if you know if you take my meaning you know they're a little bit slowed down so we have to explain what every phrase means and to do that we're going to be doing something that they call in gun parlance field stripping field tripping means you're breaking down the firearm essentially to its constituent components that are required for its continued proper operation and more likely than not you're doing this to clean it to check it to make sure it's to ensure its proper function this is known as field stripping so this is slide number four field tripping or breaking it all down that's what we're going to be doing with the 27 words of the second amendment so let's begin with the first phrase of those 27 words in slide number five i'm moving on to now a well-regulated militia so now we have to define every part of this okay now of course articles i think we know you know uh is an article okay the we won't be doing that okay if you don't know what articles are in language you know you have more mental problems than we can get into but um let's start with the phrase well regulated okay and then we'll get to the all-important word militia which i said is the heart and soul of amendment two but what did the founders mean what did the authors of the second amendment george mason and james madison along with other founding fathers mean by the term well regulated when it was applied to the word militia well many revisionists since this this means all this meant government regulation it meant right it had to be overseen by government when we say oh this this um part of the the economy or this part of the world or this part of society is regulated now in in 2015 oh we're referring to government regulation the government's involved in that it has its hand in it it's checking to see oh this has to be done the way we say and this has to be done the way we say that's what government regulation and oversight is right so that must been what the founders meant by well-regulated when they wrote that into the bill of rights in sec in the second amendment right wrong wrong absolutely incorrect see this is where these revisionist interpretations come in and people want to confuse modern parlance with the parlance of the founding fathers and they're not the same at all the founders had abs were absolutely not referring to government in any respect when they used the phrase a well-regulated militia so to under so this slide is the title of this slide in slide number six is what does quote well regulated really mean as it is spoken as it is written in the second amendment so let's look at the word regulate the word regulate the dictionary definition of the word regulate is to maintain according to a set of standards so that something operates or functions properly such as with a machine or a process or mechanical process so let's read this again slowly and and take it apart okay to maintain according to a set of standards now just what we were talking about before taking apart a firearm ensure it's proper operation all the components are in good shape they're not worn down they're working correctly they're oiled properly so that they're sliding correctly if they need to be up against each other and sliding they're clean there's not grime and grit and therefore you're going to ensure that that firearm is working properly and safely for the operator and those that he does not wish to hit with any discharge from that firearm maintain according to a set of standards so that something operates or functions properly such as with a machine like a firearm or mechanical process the process of loading the firearm discharging the firearm properly that is what regulated referred to in the second amendment the term quote well regulated unquote in the second amendment had nothing to do with government regulation it literally referred to the regularization and maintenance of equipment being used and the and proper training for tactics being employed so i'll explain this okay we already explained well regulated to maintain according to a set of standards so that something operates properly this is what it meant when it came to regular regularization and maintenance of equipment of the firearm itself so as i put in this slide you see a rack of shotguns perhaps 12 gauge shotguns okay pump action they are there and they are well regulated they are all in the same condition you have the same basic firearm if you wanted to train a tactical squad on the a 12 gauge pump action shotgun this would be a well regulated condition you're keeping them together they're all cleaned they're all work functioning properly and then you're going to train tactics on them okay that was the other part of well regulated the first part was the physical machinery is operating and functioning properly the second part of well-regulated meant that the team that is going to be using that equipment understands the operation of this equipment knows how to use it and knows tactics with it they know tactical operations with that piece of equipment and that is simply what route well regulated meant in the second amendment you used similar equipment and back then it was muskets with um ball shot ammunition and black powder they had to understand well the the the ammunition had to be regulated to the size of the musket barrel the powder had to be made properly you had to then understand how to use that powder so that you didn't blow yourself up or blow the firearm up people had to be trained on the operation of those muskets that was part of well regulated part of a a militia that was well regulated they all knew how the equipment functioned and they knew how to use it they knew how to clean it they understood battle tactics with it very simple concept except for the status the brainwashed statists out there who insist that the word regulated comes from government it's ordained by our god and master government had nothing to do with it whatsoever so now that that's out of the question uh that that question of what well regulated in the second amendment meant le is laid to rest let's move the slide number seven and get to the very heart and soul of the second amendment right off the bat and that is what is the militia so a well-regulated militia being necessary to the security of a free state the right of the people to keep and bear arms shall not be infringed what did the founders mean by the militia capital m the english word militia is derived from the latin term militium vogaram militium means of or like the military similar to the military and the term the word vagaram means present everywhere like vulgar latin the cut kind of language that was common to the people of rome of the roman empire vulgar latin spoken everywhere everybody knows it is why the word vulgar became a term that meant oh it's it's kind of base because it's all about the commoners the common folk so if it's popular among them it's it was vulgar to the aristocracy to where the word vulgar came from [Music] so the the term that militia comes from that is a truncated english form of militiam vogaram which literally means like the military everywhere present will pick up that very important concept on the other side of this break ladies and gentlemen you're listening to what on earth is happening here on rbn stay with us we all need no education we don't need no dark sarcasm in the [Music] alone [Music] welcome back everyone you're listening to what on earth is happening here on republic broadcasting i'm your host mark pascio my website what on earth is happening dot com before the break we were defining the militia from the term militium volgaram which literally means like the military present everywhere or in other words capability that is commensurate to a military which is present everywhere or distributed throughout a population the militia is distributed capability of force the distributed capability of the usage of force that is what the militia is in a nutshell and the word distributed is very important distributed throughout meaning it's not concentrated in one location which could easily be destroyed or you could you know do something to remove that from that one location it's everywhere it's omnipresent it's a swarm okay this is a term i didn't really use in the presentation when i first gave it but you're going to hear me use it a lot it's like a swarm of bees is what the militia is that it wouldn't make a difference if you took one 1b out there's still a swarm of thousands and good luck what what what's one super strong even a giant being gonna do against thousands and thousands and thousands and millions of bee stings you know what you're gonna do you're gonna drop to the ground you're not gonna do much against that that's why they fear the militia they fear the proper understanding of militia they don't even want you to understand properly what a militia is how it is constituted how it forms how it works they don't want any understanding of that and you know when they don't want you to understand something they fear it the powers that should not be fear the militia people say what are all small arms going to do against governments with nuclear weapons and tanks and uh you know bombers a whole lot is the answer and you know what they know it they know it because they know the power that's inherent in the militia and they fear it and they don't want anybody else to understand the power of the militia that's why they have to demonize it that's why they have to tell people oh it's ineffectual or it's something that's outdated it doesn't apply to to today or they have to demonize it and say oh those are all bad people somehow get people to believe that through repetition through propaganda on the on that nightly brainwashing media a militia is a decentralized meaning is not controlled from a centralized location no one can just say oh you're gonna all that you were gonna follow this one dictator order it's not hierarchically organized it is a decentralized distributed force of armed individuals who maintain weapons and tactics similar to a military force but unlike a standing army or standing military a traditional military force a militia is not centrally controlled or directed by a government if the members of the militia so agree they could be directed by a government in the event that the government needed to repel an insurrection or to fight a foreign invasion and then a militia members could in their own conscience decide whether they were going to fight according to that cause the militia is not the military people who equivalate these things who try to say that they're the same thing are either wrong or lying to you deliberately to try to obfuscate what the militia is the militia is not the military of the united states is not any branch of the military it is not the national guard the militia is not a standing army it is a distributed fighting force that is present everywhere throughout the country and as john said when he came on the show earlier the militia is still very much present and active make no mistake about it when you understand exactly who the militia is you'll understand why that statement is very true and we'll pick that point up on the other side of this break ladies and gentlemen you're listening to what on earth is happening true meaning and purpose of the second amendment [Applause] being presented here tonight we'll be right back [Music] you know the day destroys the night night divides the day try to run try to hide break on the view to the other side [Music] welcome back everyone you're listening to what on earth is happening here on rbn giving an extended version of my presentation called the true meaning and purpose of the second amendment and i'm gonna move on to slide number eight in slide seven we were explaining what the militia actually is and that the militia is not the military and it is not a standing army it is in fact a decentralized distributed fighting force of individuals who are armed and maintain weapons and tactics similar to a military force but unlike a standing army they are not centrally controlled or directed by a government so who constitutes the militia who is the militia is the question posed on slide number eight when they were asked the question who constitutes the militia what do you mean by the militia the authors of the second amendment and other american founders and patriots were consistently clear and unambiguous in their explanation of who the militia is the militia spoken of in the second amendment is comprised of the entire body of the people who are capable of employing arms for the purpose of repelling an organized foreign or domestic threat to their lives or freedom the entire body of people capable of using arms for the purpose of repelling a foreign threat to their lives a foreign threat to their freedom or a domestic threat to their lives or a domestic threat to their freedom that is who constitutes the militia which means the militia and the people are one in the same it is the body of people who are capable of using any form of arms in the service of self-defense the defense of their lives their freedom and their property so the answer to the question who is the militia posed on slide number eight is answered on slide number nine you are the militia surprise now you know i i hope most people at le look i hope that at least the american men and women who are listening to the broadcast tonight already knew this but i'd be you know maybe i give people too much credit and maybe most of them don't don't even know that they are militia members already now i've known that i've been a member of the militia since the first time i even tried to understand what the second amendment was and i did a little bit of research and understood wow the militia is the people it's everyone that is capable of defending their life and freedom with it with any arms but you got so many idiots out there that still don't understand that that's who is the militia they don't understand this concept of a militia they they hear the word militia and they think oh bad people evil people trying to take over do you know impose their will militia is a defensive organization of people that's it it remains actually in a unorganized state until it is required to use it because it is almost always used as a last resort we want to use our reason and our intellect and our intelligence and our nurturing our creativity and our wisdom first but when people reject all of that and there is no recourse self-defense is required you're not just going to sit there and allow your rights to be taken or your lives to be taken i mean folks this is what happened to the jews in nazi germany you know they didn't offer resistance there was only a few pockets of resistance namely in some of the worst places like the warsaw ghettos there was some resistance there and you know what statistically they survived more than all the rest of the jews who were exterminated because they resisted physically now another thing i look whenever i make i'm going to make references to nazis all i like okay because if i'm going to bring up something that historically took place and i i want to use it as an example that's my right to do so so i'm tired of people writing me and saying don't talk about the nazis or the the you know german workers party and uh the german people how they let all this evil happen why because it's true you're the one who's going to revise history and say oh it didn't happen like this because you don't agree with numbers or because you have german ancestry and and you want your your ancestors to look better than they were when the people living in germany during world war ii were totally a moral trash to let what happened happen in that country and i'll say it right to somebody's face just like the american people the vast majority of them are totally immoral trash to allow what's happening in this country right now and i'll say it right to these people's face out on the street all this garbage revisionism about hitler being some kind of a saint or something going around i mean please one more person sends me this junk on my facebook or my email i mean you people belong in mental institutions and you want to say i don't have it right i don't know what happened let me tell you something the evidence that it that it happened and is still happening is all around us the nazis never lost they went underground they took this country from the inside and the clowns living here still don't understand what happened people don't want to acknowledge this they don't want to acknowledge the evil that was done by the nazis because well because you don't agree with the numbers uh and you're so anti-semitic you have to make up stuff about how the numbers are all inflated i don't care if it was five people okay how about how about the holocaust that's happening in the united states called the police murdering citizenry how about that holocaust that's happening at a rate of over a thousand people a year you know we got we got a little mini holocaust going on right here in the united states right now folks so you know what all the trash out there the things that the nazis were so wonderful and hitler was so wonderful just forget my email even exists i don't want to hear from you when i get any garbage like that your name goes in a block list and you know you could try to write to me from another email address but that's going to go in the block list and it take i have a script i hit a button and it does it it's like no sweat off my brow folks you you're never even going to know that your email is never getting to me never looking at it i'm never reading it you're wasting your time i'm not interested in your garbage revisionism of human history i get the whole second world war was fomented by international bankers it's always done like that wars are always manipulated like that by the super-rich elitists who want to profit from all the weapons i get it it doesn't take away from nazism being an occult religion that almost took over the whole world and that by the way that's why the next topic of uh the next series i'm going to do is going to be the occult roots of nazism on this show because too many people don't understand the dark occult roots of nazism they don't understand how entrenched that religion still is in the united states today and throughout the world for that matter going back to the presentation slide number nine you are the militia from the mouth of george mason the actual co-author along with james madison of the second amendment don't take my word for it don't take anybody else's word for it go back to the original source and source material george mason who wrote the second amendment said what is the militia it is the whole people that's it right from his mouth it is the people the people and the militia are one in the same the people become the militia when they have to deal with a threat to their lives freedom and property and therefore they have to organize with arms you are the militia like it or not doesn't make a difference whether you agree with it or not it's the case not because he said it either it's a conceptual idea that in nature when a threat comes that is too big for single parties or just small groups of people to handle people have to come together and organize against that threat with arms it is something that actually exists in nature a distributed fighting force that is capable of repelling a foreign or domestic attack against its life for freedom against the people's lives and freedom that is what a militia is and militias should exist everywhere on the surface of the earth everywhere unfortunately we've let that right slack because of brainwashing and propaganda slide number ten james madison the other author of the second amendment along with george mason said quote a well-regulated militia composed of the body of the people trained to arms is the best and most natural defense of a free country i mean all the people who are against guns all the people who are against firearms all the anti-gunners the anti-gun lobby all the bleeding heart liberals out there the leftists the marxists oh we want guns only in the hands of the state oh you're so you're so much wiser than the founders of this country aren't you oh they were just rich white men who had slaves all this all this neo marxist you know garbage socialism propaganda you know so much better than the founders you're so much more well-educated you have such a better mind they did don't you these pieces of trash today putting down putting down the greatest men who ever walked in this land you could you couldn't carry their coattails for them and let me tell you something if these men came back today they'd crap on this country for what we've allowed it to become and rightfully so slide number 11 richard henry lee the cunt a second continental congress delegate from virginia who actually tabled the motion for american independence he was actually asked to table it because those from massachusetts who wished to table it like samuel adams and john adams etc and had some support they needed support to show that at least another state was interested in american independence from the crown and so richard henry lee was actually asked i believe it was by john adams and benjamin franklin to table the motion and he did i mean you know this man's name is practically unknown even in american history and yet he put the declaration of independence forward you know he put the motion for american independence forward and he stated quote a militia when properly formed are in fact the people themselves and include all men capable of bearing arms i mean there it is right there folks i mean how many more examples do people need the militia is the people the people themselves in including all men capable of bearing arms and i would go so far again in in his day women would not have been included in the militia because it would have been unheard of for them to actually fight women are part of the militia as well they bear the responsibility for self-defense as much as men do you want equal rights you want to be treated with equality under natural law then you need to understand the same conceptual ideas regarding freedom and regarding self-defense and you need to actually employ them and you know what with firearms there is no reason a woman should not be properly trained and should not be in that mental attitude without any doubt you know and and a gun in the hands of a woman is a the great equalizer and more importantly it is the power to say no with teeth when you're being accosted by someone who is physically more domineering and powerful than you which is why i have no idea why women would not be 100 percent pro-gun it's all brainwashing that they listen to in the media they're sitting there watching that television too damn much and therefore they're getting all of this propaganda seeping into the mind and they're taking on the same opinions and they think they're thinking their own thoughts shut the television off and open a book slide number 12 here's another quote about the people being the militia tench cox pennsylvania delegate to the first continental congress who are the militia are they not ourselves congress shall have no power to disarm the militia their swords and every other terrible implement of the soldier are the birthright of an american the unlimited power of the sword is not in the hands of either the federal or state governments but where i trust in god it will ever remain in the hands of the people oh no these weren't great men these weren't men of extraordinary minds no no we got to reduce them to just rich uncaring white landowners who had slaves i mean please with this absolute garbage social marxism cultural marxism i mean you know it's just it's just running like a viral disease to this country cultural marxism trying to discredit the the great men who put their lives on the line against the greatest military power in the history of the world at that time britain under the control of some sick psychopathic inbred boy king who thinks he was god and fought and died and gave their blood to secure the small modicum of freedom that americans secured for themselves but know all the cultural marxists out there they know better than the founders of this country these marxist social marxist idiots are pure trash and they're destroying this country [Music] [Laughter] [Music] welcome back everyone you're listening to what on earth is happening here on rbn i'm giving my second amendment presentation live on the air tonight and we've been breaking down the concept of the well-regulated militia in part one let's move on to the next section the next words in the second amendment are being necessary to the security of a free state i'm moving on to slide number 13 now and this follows a well-regulated militia a well-regulated militia being necessary to the security of a free state so let's break down all of the phrases in here well we know what the word being means it's in existence it's it's you know when they're saying being necessary it means it is required okay we'll talk about the meaning of the word necessary but we're gonna have to break down the word necessary we're gonna have to break down the word security and they're gonna work we're gonna have to break down the word the uh phrase the term free state in this section so let's look at the word necessary in slide number 14. so we can understand what it means what being necessary to the security of a free state means slide fourteen i call this slide necessarily strong language the founders were very specific about the language that they chose in the documents that they put forward for posterity the word necessary the dictionary definition of the word necessary is required to be done achieved or present needed essential something that you cannot do without that must be there that if you take it away what you're trying to do cannot be done so if a well-regulated militia is necessary what is it necessary for we're going to find that out the word necessary actually appears in the whole constitution of the united states only six times and it appears in the bill of rights only one time in the second amendment the only place the word necessary was used by the founders in the in the constitution and the bill of rights to refer to a thing group or entity is in the second amendment where it refers to a well-regulated militia being necessary to the security of a free state the only thing which the authors of the constitution and bill of rights enshrined as necessary was the militia of the people not even the three branches of government the executive the legislative and the judicial or in other words the president the executive branch the congress formed of the uh house of representatives and the senate and uh me being the legislative branch and the supreme court being the judicia judiciary judiciary branch the judicial branch of the government were referred to using the word necessary in the constitution not even the three branches of government had the term necessary tact on to them to emphasize their absolute importance and that you could not do without them the question then necessarily pun intended becomes to what ultimate purpose did the founders understand that the militia comprised of the people was in fact necessary required essential to the security of a free state which we're going to explain on the other side ladies and gentlemen you're listening to what on earth is happening stay with us don't you ever [Music] wake up welcome back everyone you're listening to what on earth is happening here on rbn i'm giving my second amendment presentation the true meaning and purpose of the second amendment live on the air this evening continuing with it we were talking about the word necessary and how it was only ever applied to the militia in the second amendment the founders in writing the foundational documents for america absolutely thought that the militia was the one entity that could not be done without if a free existence was going to be maintained as we will see moving on to slide number 15 this is called a means for security the dictionary definition of the word security is the state of being free from danger or threat and to secure something is pro to protect it against threats to its physical well-being to it from being stolen or taken away if freedom is a birthright and we want to protect it from threats we want to protect it from being taken away from us and tyranny being put in its place founding father thomas jefferson author of the declaration of independence and the third president of the united states said quote for a people who are free and who mean to remain so a well organized and armed militia is their best security just think about this for a minute ladies and gentlemen this is a quote from the man who wrote the declaration of independence for a people who are free and who mean to remain so a well-organized and armed militia is their best security now i would say an understanding of natural law principles is the very first and best means of security but i'd put a well-organized militia right up there along with that i would probably make it the very second thing the second best i would say a deep understanding of natural law principles and the law of freedom that as morality increases freedom increases and as morality in the aggregate declines then freedom in the aggregate declines i really should tack on in the aggregate to that because people think that if that people think that applies to an individual they're missing it they're not getting the point in the aggregate sense in a population as the aggregate morality increases the aggregate freedom of that population increases meaning in the totality as the aggregate morality of a population declines then the aggregate freedom of that population declines and they go into tyranny and bondage which is all the more reason why gun ownership is of paramount importance to the moral people because if you know that the society is degrading into moral relativism and moral decay and there's there is no rule of law there is no natural law being accepted and acknowledged and lived by and therefore people don't care about what they're doing to other people they're not enlightened they're violent people and they don't care it's all the more reason that if you're a moral person you need to arm yourself and be ready to defend yourself because you are going to want to stay alive to teach moral principles down to the next generation i intend to survive this ordeal you know i had a opposite attitude to this in the past oh things get so bad i just go down with the ship and out no i've totally revised that attitude in the last maybe six seven eight years of my life really since i've been publicly speaking i intend to survive this absolute hurricane of violence ignorance decay whatever you want to call what's going on in this world i don't intend for it to just take me and just go out quietly into the night i intend to survive through to the other side of it if it will happen within my lifetime if it will pass within my lifetime who knows because i feel my information and message is too important therefore survival is going to be a part of what i do in my daily life it's not going to be all the eggs in the basket but there will be some of them the first thing i'm going to put my energy to is helping people to understand natural law to understand the laws of morality to understand the difference between right and wrong behavior without that there's no foundation for for any understanding you need that first let me tell you something folks not everybody is on the same page when it comes to that this is the problem that the new agers fall into oh we want to be enlightened and we we don't want to have any uh you know aggression well you think everybody's on that page with you surprise naive boy or girl not everybody's on that page and there's violent animals out there and you better come back down from whatever cosmic you know cloud you're floating on and come back down to earth and realize you're in the physical world with the rest of us and what happens here does matter now maybe i should give my streetwise spirituality seminar on air one day or over a period of weeks which is probably how long it would take you know because people really need to understand that material if you haven't watched that go back that's i think one of my best seminars that i've ever given street wise spirituality from st louis missouri i mean you know that is about feet on the ground spirituality you could have your head up in the cosmos but keep your feet on the earth spirit in the flesh work to be done here on earth go into all the shamanic realms you want bring that cosmic information back to where it's needed to be employed right here in this world now and then be here now and do that work by spreading that information then maybe we can put people on that all on that same page and it won't have to come to a horrific outcome which is where it's rapidly headed folks i'm telling you that right now people you're going to see civil war and bloodshed like you've never seen in this country and everybody knows america is a powder keg everybody knows it i'm telling you common everyday people on the street know it's coming they don't think they could do anything about it because they're still ignorant they still don't know the causal factors of the problems we face you need to start going back and listen to this podcast from square one from show number one you start to get the big picture the tapestry but what jefferson's saying here is profound if you think that you're free and you want to remain that way well then you have to be armed armed people are free disarmed people are slaves the end it's all comes down to folks you haven't gotten that you are not awake you are a sleep an asleep being you are still in the matrix you are still in the prison you are your mind is still owned by someone else there is a truth regarding this that is not no shades of gray it is 100 black and white armed people are free disarmed people are slaves it is will be like that it has been like that forever for all eternity and it will be like that for all eternity that is an eternal truth get over yourself if you think that's a false statement you're never going to make it untrue doesn't matter how much you firmly wish to believe it were otherwise it will never be slide number 16 what was meant by the phrase a free state very very important because it doesn't mean maryland virginia georgia or new hampshire okay people think the word state in the second amendment refers to the geographic region you know that was supposed to be a nation state that were the original colonies so let's look at a dictionary definition of the words first free the word free means not under the control or domination of another which is what it's all about folks it's supposed to all be about freedom no one ruling over anybody else not under the control domination or rulership of another sovereignty meaning not a slave the dictionary definition of the word state is the particular condition that someone or something is in at a specific time the state of something so the phrase a free state when we put these together okay a state particular condition that someone or something is in is at a specific time being not under the control or domination of another free state your condition is not under control or domination of another meaning you are free it did not refer to a geographic region such as pennsylvania new jersey new york delaware et cetera it referred to a free condition of existence in other words a free way of life so now the second amendment should start the first part which is always ignored a well-regulated militia being necessary to the security of a free state should start to make a lot more sense to people now if they've been listening and really hearing what's being said in this presentation this is why that gets locked off whenever revisionists are talking about it they want to go right to the right of the people to keep and bear arms shall not be infringed they don't want to tackle the first part of the second amendment because the heart of the second amendment is in the first part of it the first half a well-regulated militia being necessary to the security of a free state that's where the heart of the entire meaning of the second amendment lies which is why it always gets locked off by revisionists a well-regulated militia a distributed decentralized fighting force of people with arms to repel attacks against their freedom or lives is required must be in place it is essential and cannot be done without if we are to maintain the condition of not being ruled or dominated in other words remaining free and not being enslaved but no they don't want people to understand that they want that part left out moving on to slide number 17 once again george mason right from the horse's mouth as the saying goes right from the author the co-author of the second amendment himself george mason this slide is about what was the threat right if if security means to be free from a threat to make sure that something is not under a threat but what was the threat to that security to this to securing freedom the threat that they were talking about what was it what threatens the security of a free state if the militia is the answer to secure the free state of existence what was the threat to the free existence and the founders were again unanimously unambiguously clear about what the threat to the security of a free state of existence was and it was standing armies it was agents of the state organized with weapons let me very clearly say that again the founders were unanimously unambiguous about what they considered the threat to the security of a free way of life it was agents of the state that were organized with arms standing military standing police forces the founders would have been abhorred and enraged and let me tell you something i shouldn't say they would have been i should use the phrase they are abhorred and enraged because folks let me tell you something their spirit is here i'm going to say that as a factual statement not as a belief but as a factual statement i'm claiming that i know this and i don't care who thinks that's bizarre or weird my experiences thus far have proven to me the spirits of these beings are still among us and i'm telling you they're enraged let me just leave it at that instead of going in any more personal experiences i'm just going to say as a fact the spirit of the founders are with us and they're not happy at all they are disturbed they're not at rest they feel that what they have done and the sacrifices that they have that they made were done in vain for what those who came after them allowed i'm telling you i've just absolutely wept and shed tears over it and it's not a trivial matter and it's nothing to take lightly or scoff at because these people gave everything their lives in in many many many cases the revolutionaries the people who actually fought the battles like i said folks the last time i passed through valley forge the energy was so heavy i had to pull practically felt like i had to pull my car over the side of the road i was almost sick i don't even want to go into that area anymore they were very clear about what they considered the threat to freedom if they would see the types of standing armies that exist now with all the branches of the military the national guard all the police forces constituting small standing armies in major metropolitan centers of the united states the founders would they would just vomit on us george mason said quote once a standing army is established in any country the people lose their liberty i mean just just read that first sentence once a standing army is established in any country the people lose their liberty can it get any more clear and unambiguous than that that's why in the constitution a standing army is only appropriated by funds for for a period of two years after which it should be dissolved constitutionally if there is a large enough threat that warrants the raising of a standing army continuing with mason's quote he says recollect the history of most nations of the world what havoc desolation and destruction have been perpetuated i'm sorry perpetrated by standing armies [Music] very clearly talking about what they considered the threat to the security of a free state standing armies we'll continue with that concept on the other side of this break ladies and gentlemen you're listening to what on earth is happening [Music] [Applause] [Music] [Applause] there's a wall between us we keep pretending that there's nothing wrong welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pascio my website what on earth is happening dot com giving my true meaning and purpose of the second amendment presentation live on the air tonight we were on slide number 17 talking about how the founders saw standing armies as the main threat to the security of a freeway of life let's move on to slide number 18. here's another quote from uh elbridge gary the fifth vice president of the united states uh talking about the threats of standing armies and gary said quote what is the use of a militia so what is a militia for it is to prevent the establishment of a standing army the bane of liberty whenever governments mean to invade the rights and liberties of the people they always attempt to destroy the militia in order to raise an army upon their ruins and this is exactly what has happened in the united states militias have been completely de-emphasized and they're not people are not taught about the importance of them and we have a completely out-of-control military force that is acting as the policemen of the world they're an imperial force absolutely imperialistic and they're made of a bunch of brainwashed little boys with abandonment issues i don't care who is offended by that i don't care who you are how close to me you are whether you're a relative a friend a friend of a friend if you're in the military you're a brainwashed little boy with abandonment issues and then you need to get your head out from up your ass and start realizing you're not fighting for freedom you're fighting for your imperialist overlords that don't give a damn about you and who call you their dog you're their pet their animal and that's really what you are you are that you are that i totally agree with their assessment of you how's that you are that you deserve to be treated like that for as long as you remain in your brainwashed completely unconscious dumb condition because you're dumb you don't read and half of them half of these people you think you're well educated you think you're educated you think you're well read because oh you're a military historian or i know a little bit about world history you're a joke boy a joke main thing you don't get is what freedom really is you're brainwashed by somebody who's telling you with their definition of what it is and then sending you to go kill people for it you're a slave punk you're a slave punk and you're too stupid to understand it you want to prove you're not a slave get out get out don't stay in to do anything you think you're gonna change things from inside it's not how it works you need to quit you need to quit evil that's the lesson of this world even as an evil isn't bargained with it isn't negotiated with you don't play games with it you gotta quit it that's what most people haven't figured out yet elbridge gary telling people the militia i'm sorry the standing army is the bane of liberty no but but again we know better modern people know better these are just all old outdated men oh they couldn't see into the future about how things were going to be no they didn't know anything the total ass clowns who are out there who think that way are the people who don't know anything these men were trying to tell us something vitally important about our freedom and we didn't want to listen because we know so much better than them in slides 19 and 20 which i'm going to move on to right now i want to try to hammer home what a militia really is and how it protects against the threat against freedom which is the standing army slide number 19 shows what is what three standing armies might look like and again we have many more standing armies in the united states they're called the police forces and they're also called the quartering of all the other troops and soldiers that are here and can actually be activated at any given time by the government which is why the the founders didn't want standing armies at all and there's people out there that say oh so many of these people will refuse their orders when they're giving them let me tell you something folks you're very naive if that's what you think [Music] very very naive you have no bearing on reality about how brainwashed these people really are they're cult members they are cult members who will follow the bidding of their masters unto their deaths that's what they're gonna have we'll pick this up on the other side stay with us [Music] [Applause] [Music] thank you [Music] welcome back everyone you're listening to what on earth is happening here on rbn i'm your host mark pacio my website what on earth is happening.com continuing with the second amendment presentation slides number 19 and 20 explain the difference between standing armies and militias in slide 19 you see what might what an invasion of the united states with three standing armies might look like in slide number 20 you see what militias constituted from the body of the people trained to arms would look like geographically throughout the united states properly constituted militias meaning the population owning and maintaining firearms and tactics would be able to swarm any invasions by standing armies at a given notice they would be much more mobile the key is well regulating them meaning putting people on the same page when it comes to the use of those firearms when it comes to the tactics the tactical usage of them this is where the organized militia comes in when a militia has to be called up and disciplined or trained to arms as a whole group as a unit not as the unorganized militia i consider myself a member of the unorganized militia i maintain firearms i know how to use them i know some tactics with them the thing is when the time comes the militia is going to have to be called up called to arms trained and disciplined and if people don't think that that that time is coming i don't i don't know where what planet they live on you know somebody's gotta just start the discussion about that because what's going on in this country is completely and utterly unacceptable and i don't see it getting done i don't see it getting reversed by talking about it personally i know there's a lot of other people who feel that way too that doesn't mean i'm going to stop talking about morality and the difference between right and wrong and how telling people there are actions that you should not be taking because they are wrong and they violate other people's rights but at some point should these people not wish to learn and continue to refuse to live according to natural law they are going to have to be engaged at some point i mean you have to look at reality the way it is not as you want it to be and people have to stop thinking of this as something that is completely unthinkable you know how many times throughout history has it already happened there have been rebellions in just about every geographic region of the world this would be no different it's something that may be required if we're going to get to the next phase in human evolutionary progress because we've let this one stagnate so bad and again that's why it's called a revolution you go around once again because you got to get the lesson it's like being left back in class you know you're going to go back and do it again because you you missed the learning process and i'm telling you i don't want it to come to that but at the same time if that's what it has to come to that's what it has to come to you can't shirk from that i mean what do you think the founders that took it lightly going to war raising a continental army they knew what they were up against they knew they were up against the most well-trained fighting force in the history of the world at that time and they did it anyway those people gave everything anyway because they were fighting for something that was bigger and they knew they were on the side of right they knew that they had morality they had the moral high ground and so do the people who understand real freedom today not the little punk boys brainwashed little boys who who think they're out there fighting for freedom you're a bunch of clowns and your owners call you their dogs you know get as mad about it as you want from hearing from my mouth they're the ones who are calling it calling you it i just happen to agree with the assessment because a well-trained dog never bites the hand of his master he attacks when he's asked to attack he sits when he's asked to sit you know and he he'll go and die when he's asked to die all for just the whims of the master that's that's what they are it's what these people are it's what the military and police of today are they're not men they're clowned out brainwashed little punk boys and you know hardly anybody will say it like that i don't know of anybody else that just comes right out and says it like that i'll be the person to say it then you need to grow up you need to realize order following is not a virtue you're a little boy who's looking for a surrogate parent because you're wrestling with abandonment issues period that's what this is all about folks this whole thing is about bad parenting the whole thing that's going on folks is about abandonment issues this all ties in to everything else we've been talking about on this podcast the all of these people go into these institutions because they're all screwed up from their parents and they're looking for an authority figure to teach them what's real and what's right and what's required and big daddy's all too happy to step right in there and provide the role fulfill the role and that's moving to slide 21 you see these people just look and look into their eyes and faces i mean you can't if you are looking into the eyes of these people just in photographs let alone in person i mean forget about it they're destroyed these are destroyed minds destroyed people destroyed hearts destroyed souls i mean they're sick these are sick cult members they don't even understand they're in a satanic cult they don't get it this is the standing army the founders warned us about not only the military part of it but especially the police forces the founders would have been sickened if they saw the kinds of police forces that we have and what they're doing and again i shouldn't even use the word would be they are they are sickened by what the police are doing in this country over a thousand people murdered by police just summarily executed no trial we're going to execute you on the street that's the precedent that was set in nazi germany it's the president that was set in soviet russia and it's the precedent that's being set in the united states now because the same forces control this country has set up those oppressive regimes and if you don't think that you don't know what's going on if you think we defeated nazism if you think we defeated soviet communism you are absolutely out of your mind naive and you don't understand how insidious these forces are and how they've taken over they took over in the late 20th and early 21st centuries and they're more entrenched here than they've ever been especially in the united states which is becoming the next great vile evil imperialistic power of the world and the people are just letting them do it because they're all drugged up they're all worried about what reading whatever's on their social media you know they're all sitting there watching the idiot box being entertained watching the game having a beer you know never doing any work with reality about what's really going on in this life moving to slide number 22 richard henry lee a quote again second continental congress virginia delegate the man who tabled the motion for american independence he said to preserve liberty it is essential again necessary required that the whole body of the people always possess arms and be taught alike especially when young how to use them again this is about proper parenting folks this is about the communication of proper real world values to your children which was not done which has not been done let me tell you something folks i in the parental abandonment issues when i gave the cosmic abandonment presentation i talked about my own first and foremost i had no real parenting okay now there's there's family members who would go nuts hearing me say that why why because my physical creature comforts were well taken care of i was sent to school i was given meals three times a day i had clothing you think that's what parenting is that's the very sl slim slim slim foundation of parenting is providing for physical creature comfort needs you think that's all parenting is you have no business being one at all no proper moral education no historical world view of the world no long view of history provided now we'll send you to some school to do that but who cares you know it's just to go get some piece of paper so you can go out and earn money and get a job and i i talked about this that's what my whole family's like i don't care about what's going on in this world they don't care about freedom and that's what makes people like that bad people that's not a good person you're not a good person if you're like that you're a bad person this is what has to be understood most people's parents are bad people i don't care how well intentioned they are i don't care how much they say they love you you're not teaching any real moral values you don't love anybody anybody lee is expressing here that these are values that are communicated through the generations from parents to children and why are they so weak today in the world why is this under such attack the second amendment in gun rights because we have bad parenting we have parents who are no nothings and then they're teaching their children squat that's why they don't care about the actual knowledge of their children growing up oh no as long as they have a paycheck coming in think they care about the spiritual well-being your emotional well-being no not a bit and that's what 99 of parents out there are like and i might be being generous if people have conscious parents you are the luckiest individuals on the face of the earth and i mean really conscious parenting if p if you're being taught real morality what real freedom is real values care for truth what true care is about that's what a parent teaches their children or should be teaching their children you know how few ever get those lessons to say you can count them on one hand is is being too generous anybody that has parents like that you should consider yourself some of the luckiest souls who've ever lived moving on to slide number 23 alexander hamilton founding father and first secretary of the treasury talking about the necessity of the militia once again if quote if circumstances should at any time oblige the government to form an army of any magnitude that army can never be formidable to the liberties of the people while there is a large body of citizens little if at all inferior to them in discipline and use of arms who stand ready to defend their rights he's exactly explaining what the militia is a large body of people of citizens hardly inferior in discipline and training in the use of arms to an actual military who stand ready to defend their rights that's the definition of a militia hamilton is giving the definition of a militia without actually using the word here because everybody knew it inherently they just knew it it was like it was like knowing like what a cell phone is the word the phrase cell phone is just it's ubiquitous it is absolutely it is in the vulgar language okay it's everywhere present everybody knows what a cell phone is today you wouldn't have to explain to somebody cynics you know cell phones are communications devices which you know work with satellites and send data wireless you wouldn't have to sit there and explain that to a human being in 2015 you just know what a cell phone is these people just knew what a militia was because it was common in their colloquial language today they don't want to ever say the word militia it is a forbidden word it is a forbidden word in mainstream media the word militia is forbidden unless it's some crime that's been committed and the member who committed this horrific crime was a militia member then you'll hear the word used as much as i don't like hamilton for how he was connected to bringing in central banks certainly an agent of uh foreign powers to bring in monetary financial domination into this country at least from my analysis of you know his his uh involvement you know he could speak the truth on certain things therefore this quote is absolutely valid regardless of who it's coming from don't fall into logical fallacies because some people did certain things that were deplorable during their lives that they can't say anything that's true next section and again we're probably not going to get to taking any calls today on the air i'm going to continue to give this presentation and i'm going to continue it next week and like i said it'll take as long as it gets as it takes to go through i'm under no rush here i'm trying to get these concepts out in ways that make sense and are unpacked and explored fully so just like the last section on neo feminism this will take as long as it takes to get through but we will of course take calls on this issue i'll probably do a whole call-in show on it now i i really i you know after i finish the presentation i'm going to take a whole show just to reel on people especially from other english-speaking nations like england and australia about the loss of your gun ownership rights and i am going to be merciless and i want to hear from people from those countries what they think of this issue that'll be maybe some calls like that will be coming up in a couple weeks on this show let's hear your logic and reason when it comes to this issue which i personally don't feel like many of people from those countries even understand at all i'll do one more section on this presentation on the other side stay with us everyone [Music] we don't need no thoughts controls [Music] teacher leave their kids alone [Music] welcome back everyone you're listening to what on earth is happening last segment with the second amendment presentation the true meaning and purpose of the second amendment we're on slide 24 the next section is the next phrase and the second amendment the right of the people to keep and bear arms so we saw the very first half of the second amendment unpacked a well-regulated militia being necessary to the security of a free state and now we fully understand what that means now we're going to deal with the second half of it the right of the people to keep and bear arms shall not be infringed so let's take the first part of that second half and that is the right of the people to keep and bear arms well we know who the people are that's all the individuals the individuated units of consciousness as i would say living in a particular geographic region in this case the united states of america okay that's the people but you know we need to know what is meant by the right we talked about this odd infinitum what a right is on this show any listener normal listener regular listener of this show already should know what a right is to keep and bear will define those terms and will define what arms are uh of which of course firearms is uh a um subset so let's start with that what are arms slide number 25 asks that question and the dictionary definition of arms are weapons and ammunition of any kind anything that you can use as a weapon or ammunition is considered arms so a hammer is arms a club a knife a hatchet bow and arrow handgun semi auto full auto hand grenade tank missile you name it if you could do damage to somebody with it it's arms hey you could pick up a screen a computer screen and hit somebody with it i could hit somebody with a microphone stand you know there's lots of things that you could use as arms things that are specifically designed to be arms are things like you know a bow and arrow a handgun a shotgun a semi-auto rifle etc that's what we traditionally look at as arms or firearms firearms are you know projectile weaponry that use bullets of course so the word arms literally in in the second amendment literally meant the dictionary definition of weapons and ammunition of any kind it was not limited to firearms that means you shall not limit my ability to to procure a hammer in my self-defense if i so wish to use a hammer or a club or a hatchet or a knife or a set of bow and arrows we're going to pick up breaking down field stripping the second amendment next week and then we'll get into its reassembly put it all back together understood in its full capacity what its total meaning and purpose really was as intended by the people who wrote it ladies and gentlemen that's all the time we have for this edition of what on earth is happening remember there are only two mistakes you can ever make on the path to truth not starting and not going all the way thanks for listening everyone we'll see you right here next week good night don't you ever don't ever [Music] you

What On Earth Is Happening Show #189

Topics: *The True Meaning And Purpose Of The 2nd Amendment, The Definition Of Arms, Natural Law, Right vs. Wrong, Definition of a Right, The Two Pillars of Enlightenment, The Sacred Feminine Principle of Non-Aggression, The Sacred Masculine Principle of Self-Defense, Ownership, Equality of Rights under Natural Law, Carrying Arms as an Inherent Right, Infringement, Encroachment Upon Rights, Incrementalism, Fabian Socialism, Communism and Fascism as Two Sides of the Same Coin of Totalitarianism, Slaves Must Be Disarmed, Right To Bear Arms As Protection Against Government Tyranny, Hitler's View Of Gun Control, Gun Control as the Path To Enslavement and Death, Genocide and Democide, 90,000,000 people killed as a direct result of Gun Control, the Re-Assembly of the 2nd Amendment, How Colloquial Language differed between the 18th and 21st Centuries, How I Personally Would Have Written The 2nd Amendment, The 2nd Amendment Is Just Words, Preparedness, Survival, The Gadsden Flag, The Franklin Flag, Come And Take It, Molon Labe, The Brotherhood Of The Snake, The Mystery Traditions, Preparedness on a Low Income, Revisionists' Interpretation of the 2nd Amendment, Police Cult Members' Attitude Toward Gun Ownership Rights, Physical Resistance To Tyranny, Sentiments Prevalent In Gun Culture, Anti-Gun Propaganda, The Gun As A Bringer Of A More Civilized Society*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law vehicle and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Mark Pascoe [Music] welcome one and all you're listening to what on earth is happening right here on Republic Broadcasting I'm your host mark passio my website what on earth is happening dot-com the network's website Republic Broadcasting org today is Saturday March 21st 2015 this show is live every Saturday evening from 10:00 p.m. to 1:00 a.m. Eastern Time that's 9 p.m. to midnight Central Time we have a great show lined up for you here tonight tonight on what on earth is happening I'm going to be continuing my presentation entitled the true meaning and purpose of the Second Amendment part two of this presentation coming up tonight live on the air I gave part 1 a couple of weeks back last week I was unable to broadcast the show live I had a commitment with some of the organizers for the for mine 3 conference which is rapidly coming up three weeks away less than three weeks now and it is going to be a phenomenal event so tonight I'm going to give the part two of the second amendment presentation hopefully this will be the final part we'll see how it goes it might extend into a into a third session but I don't think so more likely than not all concluded on the air tonight and then I'll take your calls if there's time in our number-3 for the first part I know we didn't have any time to take calls but I'll try to leave some time to take some calls in the third hour so I'll give the call-in number right now the call-in number to join us 800 3 1 3 9 4 4 3 once again the call-in number to join us here on what on earth is happening 800 3 1 394 43 a couple of quick event announcements of course starting right off the huge event coming up on the East Coast just outside of Philadelphia the free your mind 3 conference April 10th 11th and 12th 2015 that's Friday Saturday and Sunday April 10th 11th and 12th at the Sheraton Bucks County Hotel at 400 North Oxford Valley Road in langhorne pennsylvania I've been informed that already the rooms that have been reserved for people coming there for the freer mine three conference are already all taken but I know that there's an alternative hotel that is actually being recommended by the conference organizers you could check that out on the website the speaker's lined up for the freer mind three conference Bob Tuscan Clint Richardson Curtis the illuminated one Davis Dennis McKenna Derek Bros the New Jersey Weed Man Edie fortune freighter X Freeman for its spring Meyer J Parker Janis barceló John Bush John Mitchell and Bonnie Mitchell John vibes Josie the outlaw Wales Laura Eisenhower Lennon honor Mark Devlin myself mark passio Ross Ben Steve stars Stuart Swerdlow an alternative media panel featuring luke rudkowski if we are change the free thought project and the anti media a meeting of the minds a speaker panel discussion with whatever speakers want to participate in it from the conference and open mic night sessions where people from the audience can get up there and voice their opinions about whatever topics they feel are vital and of interest also there will be a movie showing on I believe Friday evening of Dan Fogler z-- Don peyote which is a great film about in general conspiracy theory culture or just you know the culture of you know open-mindedness and trying to understand what's really going on out there in our world so that's gonna be on Friday evening an all weekend pass for this great event only $150 it's going to be the biggest conference of its kind certainly on the East Coast probably in the whole country in the year of - in the year of 2015 for more information on this incredible event please visit the conference website at free your mind conference dot-com and get your tickets today I do still have a few what on earth is happening promotional t-shirts they are almost completely gone but I have I think I have three or four left I found a couple of extras that I had set aside for like the documentary screenings that we had been usually doing and I had been bringing them there but it's it's it's very few left I think I have two mediums left and two double extra larges left so if people want them in those particular sizes that's all I have left of this original printing of this promotional t-shirt if you want to receive one of those shirts as a gift in return for a voluntary donation you can click the email link that is listed in the news article at the top of the news section regarding these promotional t-shirts that link is also listed on the left-hand side under the latest news items but I'll probably be taking it down or at least modifying it soon to include a new promotional t-shirt design that I'll be debuting at the for your mind 3 conference which is a phenomenal design which is a new take on the kind of logo or sigil or whatever you want to call it that I made up regarding the one great work of truth love and freedom so that's the only hint I'll give about that shirt design but I'll be debuting that at the free or mind three conference and then I'll also be offering it on the con on the water on earth is happening calm website there is also a donation button on the left hand side of the wat on earth is happening calm website if you feel that you've received value from the information that I've shared on both the radio show and my website please feel free to make a voluntary donation to help support my work so that I can continue it into the future speaking of donations rbn is currently holding a donation drive it costs a whole lot of money to host the network like this folks a lot of bandwidth costs involved a lot of other promotional costs are involved and you know please if you're in a position to do so help out the network you can make a donation via PayPal at Republic Broadcasting org just click the donation tab you could also make a donation a pledge by phone toll-free you can call the number one hundred seven two four two seven one nine once again to donate to our bien via phone make a pledge to donate toll-free number eight hundred seven two four two seven one nine you can also mail a check to two two five one double Creek Drive Suite 3:02 Round Rock Texas seven eight six six four so please do help out the network with a donation if you're in a position to do so you could find more information about that by clicking the donation tab at republic broadcasting org so I want to direct everyone's attention to the what on earth is happening comm radio show page if you're not already listening from there there underneath the player on that page you will see images for today's show and underneath that you will see the second amendment presentation slides these are the numbers that you can click on to bring up the slides that I'll be talking about with the presentation I'll be giving live on the air tonight this is podcast number 189 if you're listening by podcast the images are are of course posted with the podcast a good way to do this is to download the zip archive which is also included there unpack that on your computer and all the slides will be right there in a folder for you and you could follow along that way locally right on your own computer it's probably the easiest way to do it last week on the show I left off on slide number 25 that was the last slide we looked into this was under the section that starts with slide number 24 the right of the people to keep and bear arms now we were breaking this down phrase by phrase I guess you could say in the Second Amendment and breaking down largely each word that's contained in the 27 words of the Second Amendment we left off by talking about you know what is the right of the people to keep and bear arms and I started that section by defining what arms are and that's on slide number 25 which is where I'll pick up from today the definition of arms as any decent dictionary will give is weapons and ammunition of any kind and this is a common-sense definition when we think of arms okay aside from the arms which we have on our bodies at least most people okay the the general population that doesn't have any sort of disabilities okay um these are potential weapons our arms and legs are potential weapons okay this is the first and foremost form of arms the ability to just conduct force by hand-to-hand combat if necessary okay but arms are defined as anything that could potentially be used as a weapon the microphone stand that's holding my microphone up right now has a nice strong solid metal base and if I needed to defend myself with that microphone stand it would definitely provide that purpose so therefore you can consider that arms if I were to use it in that form of defensive capacity but arms are weapons and ammunition projectiles etc of any kind that you can think of that can be employed for defensive purposes so that includes clubs sticks hammers knives hatchets and axes of course firearms bows and arrows anything that can you know fire any kind of a projectile weapon this is pretty simple and common-sense a common-sense definition this is where we left off on last time and the founders in the Second Amendment when they wrote the right of the people to keep and bear arms shall not be infringed this is exactly what they meant by arms it did not just mean firearms it meant any form of weaponry that can be used defensively in the defense of one's life freedom or property so I think that's about as clear as I can make that if people still don't understand that I don't really know what to how to further elaborate on that it's a simple definition and people want to turn it into something more complex than that the founders actually capital the a in arms to make it clearly understandable that this meant you know the any of the broad range of kinds of technologies that could possibly be used for self-defense so moving on to slide number 26 when we are talking about here the right of the people to keep and bear arms sadly I do need to define what a right is for most people I know the listeners of this show probably deeply understand this by now but you know we can't hurt to really berate this you know repetition makes things sink in more deeply so we have to look at what a right actually is this is probably the biggest problem in the world folks is that the vast majority of people on this planet still unfortunately do not know what a right is and they certainly don't know what the definitive objective difference inherently in nature is between right and wrong behavior it's absolutely profoundly sad to have to speak those words unfortunately that is true nonetheless so this is where I delve into you know a little bit of a rehash from my natural law seminars and my material on natural law from my former podcast if you aren't familiar with that and you're maybe you're a new listener you definitely need to go back and check out that work because it is absolutely seminal to what we talked about here on what on earth is happening and it's absolutely the most critical information really to understand so just to reiterate a little bit from my natural law material the difference between right and wrong is actually inherent right in the words we say the word right and correct meaning both moral and true meaning bit correct based in truth these two words are usually used interchangeably because if something is based in truth we are going to find that if we act upon it we our actions will be in alignment with morality so if something is right that means both that it is correct meaning it is based in and that it is moral meaning that it is in harmony with the laws of morality it is in harmony with natural law okay so that this means that actions that are based in that which is right do not result in harm to other sentient beings that is the basic definition of a right a right is an action that we are capable of taking that does not cause harm to another sentient thing that is what a right is and we're not talking about animals or lower life-forms and we're talking about rights we're talking about beings once again I've reiterated this on past shows and try to make this clear natural law applies to Bing's with the capacity for holistic intelligence which I equate with the capacity to have within your own mind the understanding of the objective difference between right and wrong once we have that capacity to understand that that means we are beings with the capacity for true intelligence holistic intelligence meaning both the intellect and the creative capacities the intuitive capacities the nurturing capacities the intelligence is not just intellect as I've said many many times on this show it is intellect combined with the right mind the left mind is the intellect the right mind the right side of the brain is the creative and moral capacities within the human being so how does this contrast with wrong behavior or wrongdoings wrong we say the word when we say it's incorrect you're wrong about that meaning it's not based in truth and we use the same word wrong when we say that something is immoral meaning that it's in opposition to natural law because actions that are taken that are wrong they result in harm to other sentient beings so that's the opposite of a definition of a right if an action causes harm to other beings other sentient beings then that is a wrongdoing and we talked about in the natural law material what the basic raw doings are the basic wrongdoings our theft murder assault theft trespass and coercion okay so we're talking about things that are some form of theft we're taking something that is not rightfully ours to take from another being that is their property that we don't have the right to take from them like life or freedom or property so this is the basic difference between right and wrong and that's what a right is therefore if we look at the right to keep and bear arms that means we have a right to keep the defensive ability to protect our lives our freedom and our property when they are under assault or they are or we are confronted with coercion or threat of violence that is an inherent human right that cannot be taken away by any other being it exists inherently in nature this is the other thing people need to understand is that rights are not constructs that are invented by human beings you hear this argument odd infinitum by people who are moral relativists who don't think that rights are something that exists independently and objectively inherently in nature an action is based in nature it exists in the real world it's not something that exists in your mind a right is an action therefore it exists in nature we have to get that straight people will pick this up on the other side of this break don't go anywhere you're listening to what on earth is happening we'll be right back [Music] [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening dot-com I'm giving part two of my true meaning and purpose of the second amendment presentation live on the air this evening and we are getting ready to move on to slide number 27 we're talking about what rights are the difference between right and wrong behavior the objective difference that exists in nature inherently because these are actions and actions create something in nature they exists in nature they are not something that just exists constructor aliy in the human mind an argument that you hear far too often from people that think that rights aren't something that are objective and inherent in nature well rights are actions folks and that means they affect other beings other than the one who takes the action therefore they exist in nature that has to be really understood deeply that's why they're objective they're not open to interpretation and they're not something that we just get to decide on a whim that's called moral relativism the people who believe that that's the case that we could just decide what rights are not you know if something causes harm to another being that's not a right it's a wrong doing it's a transgression against moral law that which does not cause harm to other beings are reserved as rights those actions are reserved as right that means the ownership of firearms and self-defense against incursions of violence are inherent rights that can never be granted by man in any way nor taken away by man in any way moving to slide number 27 now this is the second part of this natural law aspect of this presentation this is the section on natural law which I refer to the two pillars I call this the two pillars of enlightenment this is what real spirituality must include and you can never remove either of these two basic tenets or principles or pillars the foundational pillars from the equation otherwise you don't have real enlightenment and you do not have a grasp or a true deep understanding of what natural law means so of course the first principle is the Sacred Feminine principle as I refer to it but most people simply call this the non-aggression principle which is very simple do not harm of your other fellow beings period that's it don't go out and cause harm to others very simple don't take actions which are wrongdoings which are transgressions against moral law that's the Sacred Feminine or non-aggression principle and this must must must be combined with the sacred masculine principle that's what the chemical wedding is all about this is a marriage between the sacred masculine and Sacred Feminine principles without that natural law does not stand it falls apart the philosophical foundations of freedom fall apart without both of these principles included and of course the second pillar or tenet of this philosophy is the sacred masculine principle which is what I refer to it as but most people would simply refer to this as the self-defense principle this means when you are confronted or accosted with violent behavior on the part of someone else coercing you threatening you threatening your life your freedom or your property you have the right inherently to defend yourself with the appropriate usage of force up to and including deadly force should your life be threatened this is an inherent right of all people cannot be granted by man cannot be taken away by men and sadly too few people don't think that this is an essential right or too few people don't understand this principle because they're too right brained and they think somehow the state has rightfully garnered some sort of a monopoly on the usage of force and therefore we don't maintain the right of self-defense of force when we are being accosted by coercion or violence the sacred masculine self-defense principle is essential to understanding human freedom if you don't understand it you still have the mindset of a slave and this is why this is left out of all teachings of enlightenment all teachings of higher consciousness by the traditional teachers of it the New Age movement trying to sell you enlightenment without the sacred masculine principle that's like giving somebody half of the equations of physics and saying well you'll need to know all the rest you know don't worry about those you know that's like teaching addition and subtraction and saying hey forget about multiplication and division you know we'll leave those on the back burner you don't need to know anything about those yeah good luck with that let me know how your further understanding down the road works out we'll pick this up on the other side of this break folks you're listening to part 2 of my presentation the true meaning and purpose of the second amendment stay tuned we'll be right back [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm moving right along with the true meaning and purpose of the Second Amendment presentation part two this evening let's move on to slide number 28 the next part of this equation that I'm going to attempt to define clearly is the word to keep the phrase to keep okay so the right of the people to keep and bear arms what does keep mean okay it has to do with ownership it has to do with the possession of something so if you look up in a semi-decent dictionary what the word keep means it'll tell you it's a verb and it means to have to own or to retain possession of something very simple definition unfortunately most people don't understand it and - too far too many people don't think there's any such thing as ownership this is part of this New Age brainwashing it's part of the new religion of the world it's part of the whole right brained imbalance of the Sacred Feminine without the sacred masculine and it's becoming far too prevalent and it's a very very very dangerous ideology there is such a thing as ownership inherently in nature because if I am using something in nature that is my possession if I have rightfully acquired it if I am using it actively and I'm controlling and responsible for its usage then by all means by all definitions I am the owner of that piece of property that thing now you can never own another being another person but a an inanimate object I can own okay I own the firearms that I own I own the computers that I own they are mine there's a reason you would say that they are mine this computer doesn't belong to anyone else that I'm speaking to you through the usage of there's a reason for that my stuff is on it I'm using it no one could just come along and take that that would be called theft even in a society where we did away with money which I am all for I am all for doing away with the constructional idea of money which is a limiter to access of energy within a system and that's all it's ever there for it's a means of controlling people that doesn't mean there would not be such a thing as ownership ownership would not go away in a totally moneyless society where we stopped using a medium of exchange that can be exploited and turned into a completely having have-nots system which is what we have now with 1% of people controlling over 50% of all wealth in the world and that's a conservative estimate to keep means to have own or retain possession of and if you know the right brainers among us the total new agers out there want to make the argument that oh you think you could own something forever whoever used the term or the word forever you're not going to own anything forever that doesn't mean ownership doesn't exist while you are in existence in this life in this dimension in 3d reality using something of course I'm not going to own my body forever because I'm gonna die my body's gonna die one day my consciousness will relinquish this body and it will no longer own it well that doesn't mean I don't own it now ok so people want to make these ridiculous arguments about the non-existence of ownership because it's not eat for eternity nothing's for eternity folks except consciousness and existence itself so get over this this right brained notion about there being no such thing as ownership not only is it a completely naive thing you're just completely wrong about it you don't know what you're talking about if that's what you think you're incomplete right brain religious imbalance and that religious imbalance is called the religion of the New Age movement and there's nothing new about it it's a very very old deception and it's still running like a program very strongly in our world today to own something means that regarding that thing an individual maintains rightful possession of that object meaning you didn't steal it from someone else or a coerce someone to give it to you the control over its usage meaning you're using it and the responsibility for its usage meaning if you use it improperly and harm somebody with it you have to be held accountable for it you're the maintainer of it you maintain the responsibility for how it is used and its upkeep these are the reasons I own a firearm I am the rightful owner of it I acquired it rightfully I control its usage and I maintain responsibility for it the same could be said for a car a house a set of clothing technology you know a hard drive a computer a cell phone a desk whatever any physical object if it's mine these are this is why it's mine I rightfully possess it I control its usage and I'm responsible for it period so clearly try to understand that folks this is what it means to own something to keep it that's why we're losing our freedom folks because too few people understand ownership of their freedom that's why it's better that our freedoms are being taken unlawfully unrightfully from us moving the slide number 29 now continuing with the concept of ownership and directly related to that concept is a quote by Jamesburg who wrote a book called the ideological origins of the Second Amendment and in that he said the possession of arms is the distinction between a free man and a slave it being the ultimate means by which freedom was to be preserved I mean truer words were never spoken you know the problem is we don't have people of this type of a thought process today in large enough numbers that's the difference between somebody being free and being a slave slaves are disarmed slaves aren't allowed to own the ability to defend their freedom for the very reason that they are considered slaves by their masters and owners and anybody who's been disarmed has been made a slave by those who have disarmed them make no mistake about it and if you don't understand that you don't understand freedom if you don't know that definitively the possession of arms is the distinction between a free man and a slave because that's how your freedom is preserved when and if if and when it comes under attack by people who would think themselves your master your owner and no one no one that does not understand that could say that they're a real man or a real woman they're not enough they're not an authentic being they're an inauthentic being they're a person in the mindset of a slave and they don't know what true freedom is not even a little bit moving on to slide number 30 again continuing with the concept of natural law how this goes along with rights the right of people everywhere to keep and bear arms for defensive purposes we have to understand equality in rights that nobody that has any more or less rights than anybody else everyone has the exact same rights no one has any more rights than anyone else no one has any less rights than anyone else because rights are the same thing actions that do not cause harm to another Bing people want to turn this into all kinds of shades of gray when it is not it is black and white did it cause harm to another Bing well then it's a wrongdoing did it not cause harm to another Bing well then it's a right it is that black and white it is that simple people want to try to you know overly complexify everything because they can't think along simple lines of morality and this is largely because they're not truly moral beings they want to come up with the exceptions to everything they want to find the last little minutiae of an exception to that well what in this situation if this happened and then that happened and then that happened like you know what forget all of this you're making things too complicated did you take an action and it resulted in a harm to another being when you had no right to do that that's it that's it did you deliberately take an action and it's a of your own free will whether you're told to do it or not no matter why you thought it was okay to do and you didn't have any moral right to take that action and it results in harm to another being well guess what that's not a right you just committed a wrongdoing I mean people have to stop trying to overly complexify everything and just get down to basic understandings of things it's not that complicated folks since rights are not created by humanity because they exist objectively and inherently in nature and this is by right by way of them being actions as I have already explained that is why rights exist objectively and inherently in nature because they are actions and actions exist in nature no human being or group of human beings exist actually ever capable of granting rights to anyone else nor is any human being capable of revoking Rights from anyone else I would say no Bing period whether they're human or not rights exist in creation the creator of the universe the creative force in the universe existence itself however you want to word it that is how rights have come into being they are built into the very fabric of existence and therefore they're my birthright as of being within the universe within nature that means they're my possession it's my ownership I have ownership of my rights who else could own my rights if my rights are actions that I may take who else could possibly own them see this is why people don't want to understand the ownership of rights because they don't want the Associated responsibility that goes along with that ownership that's the crux of the issue of people not understanding what rights are therein lies the problem people don't want that associated responsibility moving on to slide number 31 so I'm sorry let's just go back to 30 for one second this is you know deeply deeply interwoven into the whole concept of the right to keep and bear arms we have to understand every body has this this right it's not just for some it is for all beings all beings with the capacity for holistic intelligence possess the right to defend themselves from violence it is a universal inherent right of all people everywhere and everyone shares that right equally moving on to slide 31 continuing with the concept of self-defense this right that is inherent to all people everywhere no matter where they are no man or time period no matter what geographic region we're defining now as an another part of the Second Amendment the right to keep and bear arms so now what does the word bear represent or mean in the wording of the Second Amendment you look up the verb to bear in any decent dictionary and it's just a very simple definition that will be given by almost all dictionaries to bear something means to carry it that's it to take it from one place to another to carry on one's person that's it that's all it means it does not mean to brandish to wield or anything like that some people get those confused to bear arms means to carry them on your person that's it very very simple definition so now let's look at that definition if I place my hand gun on my hip cover it up with my shirt and walk around with it like that not harming any other Bing of course that is a right because it does not cause harm to other beings so then if no one if rights are equal for all people everywhere how can anyone grant someone the right to bear arms to carry arms in a defensive capacity no one can if I use that firearm in an unlawful way in a way that was contradicting natural law or moral law by harming someone with it when I had no right to do so then of course I would have to be held accountable for that but we have these things in almost all states called concealed carry licenses were the state thinks they can grant or refuse to grant the right to bear arms to carry arms on our person wherever we happen to go saying we will determine whether or not you have that right completely contradictory to natural law thinking that some people have the right grant or refused to grant rights which already exist that's like me telling someone you have you don't have the right to use a computer you don't have the right to read books you don't have the right to use a fork or a knife I mean it's ridiculous and yet there are still complete idiots out there who think that this is some type of a privilege just they're the same people who think driving in a car is a privilege I don't care what legal terminology you want to get into the whole maritime thing I understand all the distinctions people make in legal language versus lawful language whatever it's all a fiction anyway folks made up by people who are psychopathic people who think they're God and just want to control you it's all illegitimate it's all an illusion only the mind buying in at any any of that crap makes it real it's the same thing with this no one can grant somebody the right to travel no one can grant someone the right to protect themself with any kind of arms by one they're walking around with a bow and arrow on my back that's my right because somebody telling you I'm gonna disarm you is that person saying I'm your master and honor and you're my slave and if you don't know that you don't understand what freedom is you haven't understood it yet if I want to walk around with a big caveman Club that's my right I start threatening people with it that's not my right same thing with a gun I want to walk around with an aka all day or an ar-15 or a 308 this is the reason we're in a society where there's there's so much violence by other people because an on society as a polite society a society where every person would be armed and carrying weaponry guaranteed folks you once seen a lot of physical violence in that society I absolutely guarantee it you'd see how polite people would get oh fast to each other how much sudden mutual respect would be given and received we'll pick this up on the other side of this break folks stay with us you're listening - what on earth is happening we'll be right back [Music] welcome back everyone you're listening - what on earth is happening here on Republic Broadcasting I'm your host mark passio my website what on earth is happening dot-com so we were talking about the inability of anybody to grant or refuse to quote grant and write which already exists and this includes owning firearms and this includes carrying firearms you know there's a couple of people who are starting to understand this who are even involved in like state legislators and I think I'm not sure whether it was Texas but it might be where a state senator or house representative in a state legislature has put forward a bill to try to revoke concealed carry licensing because he's recognized that this is an inherent human right perhaps I'll try to post a link to this article or articles about this you know if I could find it but I know I read an article dealing with this and thought it was an encouraging sign you know there's a lot of state legislatures out there that have passed the Second Amendment protection acts and I think that's also an encouraging sign I mean again I'm not a status you know these are words on paper however at least it's an encouraging sign - people are understanding at least philosophically that the right to keep and bear arms needs to be defended so I'll be talking about this a little bit more next week some of the states that have come forward with legislation or passed legislation that is about nullifying any of the federal government's attempts to conduct any gun control measures whatsoever because they are completely unconstitutional and they're against natural rights period so I think I'll leave slide 31 at that I think it's pretty clearly explained and let's move on to the next section which is the last phrase within the Second Amendment the phrase shall not be infringed I would hope I do not have to explain shall not be it means you don't do it for you know those who might require an explanation of that it means you never do it in perpetuity it is not ever to be done okay real simple but a lot of people have the hardest time in the understanding of the Second Amendment unfortunately with the word infringed they don't seem to understand what this word means perhaps they've never looked it up you know perhaps their English grade school teachers just never got into that term with them you know they never they never you know look that up in their spelling book okay and then looked up the definition well an infringement is very simple that was slide 32 moving to slide 33 where I explained what an infringement is an infringement is a measure or an action that limits upon something else or encroaches upon something to limit or encroach is what infringement is to act that you look up the word infringe in any decent dictionary and it will tell you it means to act so as to limit or undermine to encroach upon and we'll continue with that concept on the other side of this break folks at the top of the second hour you're listening to what on earth is happening right here on rbn don't go anywhere [Music] [Applause] [Music] there's a cool science that we don't dare speak so while the cleanups rip so we keep rated dear let there's nothing wrong it's cold of socks welcome back everyone you're listening to what on earth is happening here on rbn we're into the second hour of the broadcast this evening I'm your host mark passio my website what on earth is happening calm we were talking about what is infringement when in the Second Amendment it says the right to keep and bear arms shall not be infringed what does the word infringed mean to infringe as you will find in any dictionary it is a verb and it means to act so as to limit or undermine something to encroach upon something that means encroachment now people might want to know you know what what does the word encroach mean you look up the word encroach and it means to advance gradually beyond usual or acceptable limits to advance gradually beyond the usual perception beyond acceptable limits that's what encroachment means this is the concept of incrementalism of the stepwise progression to gradually get to where you want to go by advancing very slowly so it's unnoticeable you're encroaching upon it slowly you're gradually eroding it this is called incremental ISM and this is what all tyrants do this is what smart tyrants do I should say because someone who wants to make a quick power grab is going to be immediately recognized for the tyrant that they are they're going to try to take too much too fast and then people who care at all about freedom even a little bit will say wow we don't want to accept this you know yesterday we had this freedom today it's gone that's tyranny that's a total infringement upon our rights they would understand what was going on but if you do it very incrementally in slow gradual stepwise progressions most people never see it happening the whole concept of the pot with the Frog and you boil the water you but you put the up frog in the pot when the water temperature is just fine you know it's not hot at all it's nice and comfortable for the Frog and then you turn it up very slowly and it'll stay in there if you put in enough pot of very hot water it would jump right out this is what incrementalism is gradually making changes that lead to tyranny that's why registration of firearms is always proposed the universal background checks gun permits gun registration I mean we already have in certain states where people need permits to buy guns to own that's a complete unconstitutional enactment I mean you know the people should be seeing red flags all over the place if your state has any kind of a law that says you need a permit by government to own a firearm of any kind of any kind once they start instituting incrementalist measures like that you can guarantee right around the corner is going to be confiscation of firearms and they haven't tried this in states right now but they've done it during national disasters during natural disasters like in Katrina National Guard troops were going door-to-door confiscating weaponry and you know what I think about that is people should not have turned one thing over to them even if it meant coming to deadly force being used anything you know anybody that submits to that is submitting the slavery I don't care what the circumstances are you let yourself be disarmed you might as well accept your chains right then and there they'll use any excuse that they can get their hands on these incrementalist s-- these fabian socialists because that's what they are they're neo-marxists they're communists they're fabian socialists the incrementalist see that's how they think they're gonna push socialism and eventually communism into society and you know the Nazis are no different what do you think that's any different it's called National Socialism that's what nsdap stood for national so Silesia Deutsche arbeiterpartei the National Socialist German Workers Party that was the Nazi Party they were socialists people want to think all these these regimes are so different Maoists you know the Communists Maoists were so different from the Nazis of a Maoist were extreme left-wing the Nazis were extreme right-wing you know what folks they all meet at the wingtips which is called 100% totalitarianism death camps secret police total ownership of property by the state total ownership of the people by the state slavery you think it's any different you're buying into semantics and in word games and language so all the same measures that they enact same actions that they take anybody that thinks they're anything different has no long view of history and absolutely no understanding of what totalitarian regimes are none Stalin's Soviet Union was so drastically different than Mao's China and Hitler's Hitler's Germany don't you know so drastically different in the form of incremental socialism and incremental fascism that's being brought into the United States because these two seemingly opposite wings of totalitarianism said hey we haven't been able to take down the United States from without let's joint let's shake hands conquer them from the inside incrementally so they don't understand what's happening cuz their people are asleep at the switch and we'll sort out the spoils of of ideological warfare political warfare on the other side when we have the country in our grasp and if you don't understand that's what happened you're a naive child and you have no long view of history at all the Fabian society's logo the Fabian society's very low go their shield is a black wolf in a sheep's clothing in in sheep's dress a dead sheep skin over top of the black wolf I mean they're telling you out in the open we're coming in as a wolf dressed in sheep's clothing to conquer you incrementally we we don't even need to come with weapons of war we're gonna come with an incrementalist ideology so that you never know what happened this is what Nikita Khrushchev told Americans he said we're gonna bury you but we don't need to do it with with war weapons of war weapons of mass destruction we're gonna do it ideologically incrementally and your children are going to wake up one day in a communist country we're going to turn the United States into a communist country over a long plan this was the plan of Antonio Gramsci the Italian fascist / communist whatever you want to call him you know people think there's such different ideologies he was a Marxist you know people will call him a socialist a communist but it's the same basic thing it's just a minor difference in how you get there whether you're going to do it through the corporation or the state now we have a mixture in the United States I call it the Camino fascist regime or the fascio communist regime it doesn't make a difference it's just a label the result and the end result is the same folks Graham she had the whole idea with a physical hot revolution toward communism is not going to work we tried it with the Bolshevik Revolution toward the you know and it didn't work out the way we exactly planned so we want to do this through incremental ISM and he called this the long cultural march through the institution's the long march through the cultural institutions that means you have to take over the school system that means you have to take over the media that means you have to take over local government you have to get into the minds of people you have to corrupt morality you have to get people to worry about frivolous things distract their attention culturally bankrupt the morally bankrupt them and then they're ready for conquer you just walk in that's what Fabian socialism is folks it was named after Fabius an emperor who just went and took places that he had already ideologically decimated and the population was weak worn out and he just walked in with his troops then they and they offered little to no resistance that's what's going on in the United States right now so why people got to wake up and start understanding what their rights are and start defending them that's what incrementalism is folks that's what it means to infringe upon something to take it over incrementally and that's the plan of these socialists whether they're the left-wing variety or the right-wing variety their plan is the same speaking about the dangers of infringement or disarmament the very author of the Second Amendment George Mason who I would say had more to do with the writing of the Second Amendment even then the co-author James Madison in my opinion after studying it a little bit I think Mason really was the person who insisted on this he wrote about infringement being the road to enslave people and this quote by him explains that perfectly quote to disarm the people is the best and most effectual way to enslave them George Mason the co-author of the Second Amendment I mean it's right there I mean you you can't be any less ambiguous about how this founder thought to disarm the people is the best and most effectual way to enslave them telling people once again a disarmed person as a slave an armed person is a free Byng founding father thomas jefferson third president of the united states slide number 35 now said the strongest reason for people to retain the right to keep and bear arms is as a last resort to protect themselves against tyranny in government now this associates directly with the idea that the Second Amendment is about defense from tyranny from government and people want to say it's about hunting rights it's about sport it's about target practice it's about just home defense or defensive against individuals on the street bunk bunk the Second Amendment was about defense against government tyranny and all the people who want to make the other nonsensical argument that small arms wouldn't provide much of a defense against government tyranny in the modern day you don't know what you're talking about either if it wasn't going to be so effectual small arms which is what all governments fear their people being armed with because that's what a militia comprises and a militia is distributed throughout the population when it is properly composed no government or standing army is ultimately going to stand up against that kind of force because it's as I said last week it's death by a million bee stings there'd be so many people coming at them they wouldn't be able to defend against something like that and it would be from all places not just one place not just a place where an army had said ah a standing army had set up they would never have the ability or resources to defend against something like that from the entire population if that force were distributed throughout it and Jefferson is saying as much right here and he uses the term as a last resort which I also agree with I don't think people should be quick to just jump into warfare I've never said that okay however when reason fails and people are determined to conduct violence as a last resort there is the right of self-defense it should not be entered upon frivolously but you know what folks we're at a place where that time is coming and once again my work here from the very beginning has been to try to avert that time I don't I don't know if my efforts have been effectual enough or if another piece enough people have truly received the message philosophically that's what happened during the first American Revolution that's why we had to go that route and sadly I think maybe not right away but the time is coming soon where we may have to go that route again and it's going to be extraordinarily bad when it happens because the technology is so much more deadly than it was back during the first revolution 230 years ago that we're going to see the world if it comes to that is going to see bloodshed the likes of which the world has never witnessed before in human history and I really don't want to see it come to that which is why I teach morality which is really the only thing that could stop it from coming to that well let me tell you something folks if you don't recognize that there's enough people in this country who still do respect the the very concept of freedom and aren't gonna let that go easily and they are going to physically fight the tyranny that they are encountered with you're also very naive if you think that isn't going to happen if these thug Nazi pigs and communist pigs cut try to keep coming and encroaching upon our rights you'd be a very naive person to think there aren't enough people who still have enough respect for human freedom that will physically battle against that that kind of tyranny in this land and you know what the people trying to bring in this kind of enslavement know it that's why they want the firearms and that's why if I'm telling those people right now if you want to get them you better be prepared in every aspect of your soul for the blood that it's going to take to get that accomplished and that's all I have to say about that you want to know who I'll leave the last word about disarmament to I won't leave it to the fount one of the founding fathers Thomas Jefferson as I said in my original presentation that I gave back in February I'll leave the last word on that subject to the Supreme Chancellor of the Nazi Third Reich Adolf Hitler let's hear what he had to say about the disarmament of his slaves of those he wanted to make his slaves Hitler said quote the most foolish mistake we could possibly make meaning of course the Nazis would be to permit the conquered Eastern peoples to have arms history teaches that all conquerors who have allowed their subject races to carry arms have prepared their own downfall by doing so so let's not have any native militia he actually uses the term militia in this statement German troops alone will bear bear the sole responsibility for the maintenance of law and order what a wonderful new world order this man was bringing in one where all of his subjects races would be completely disarmed and at his mercy we'll be right back folks [Music] [Music] [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm we're continuing with part two of the true meaning and purpose of the second amendment presentation that I started on the air here last week and I'm continuing with this week let's move on to slide number 37 in the presentation a slide that I call gun control the road to death last couple of slides were called infringement the road to slavery once that has already taken place incremental II and then we have gun control measures in place invariably one thing follows ladies and gentlemen this is a historical pattern the people who understand that this happens understand a long view of human history and aren't aren't wearing blinders when it comes to just recent events they understand that this is a pattern that can be demonstrated repeatedly throughout history that result ladies and gentlemen is genocide more specifically demo side which is murder by government its murder of an aspect or a contingency of the population that the people in government see as somehow undesirable or unworthy or unfit of life anymore and they need to be exterminated like insects or animals and sadly in the last 100 years directly due to gun control measures being implemented in different states throughout the world not over 90 million civilians non-governmental people have been murdered by governments within the last 100 years or alone as a direct result of gun control measures that have been implemented by governor and you can look at the statistics on the slide that I have posted here the image on the slide the chart this is borrowed from JP fo org this is an organization that is one of the best gun rights lobbies in the United States it is called Jews for the preservation of firearms ownership and they do the work that they do as a direct result of their understanding of what happened during Nazi Germany and how Hitler began his total conquest of the state of Germany by taking guns away from Jewish citizens first and then rat rapidly completely increasing the gun control laws over time you could specifically look up a lot of the wording of the 1938 Nazi gun control laws and you could directly compare them to the gun control laws that were implemented in the United States in the 1960s they're almost identical word-for-word as a matter of fact I believe if you go to JP fo dot org you can get the original language in German of the Nazi gun control laws of 1938 and compared them with the 1968 I believe it was gun control measures implemented in the United States and the senator who put forth that legislation actually used the language of the not Nazi 1938 gun control laws to write the legislation of the 1968 gun control laws implemented in the United States took it right from the Nazi playbook and that's documented on their site but this chart shows how invariably as soon as gun control measures are implemented by government genocide or demo site follows invariably the Ottoman Empire the Soviet Union Nazi Germany Maoist China you know Guatemala Uganda Cambodia under Pol Pot and the Khmer Rouge Rwanda and there's many other examples throughout history these are Judas is just in the last 100 years if you take into account all the people killed by government where the result of government measures over 270 million people in the last 100 years alone and that number is rapidly growing but 90 people as a direct result of gun control measures and that's probably a conservative estimate and yet people still think gun control is a good thing they somehow think government has your best interest in mind and cares about you know it cares about you all right it cares about controlling you and making you a slave by disarming you and then you have no ability to resist anything they want to implement so let's leave that at that and move on to the last part of this presentation which is the reassembly again all of this was the the first part was called field stripping we're breaking down the Second Amendment into its constituent components like you would field strip a rifle or a handgun now we're going to reassemble those components put it all back together find out what it really really means and we'll do that on the other side of this break you're listening to what on earth is happening we'll be right back [Music] welcome back everyone you're listening - what on earth is happening here on our BN continuing tonight with the true meaning and purpose of the second amendment presentation that I started last week on the air and we are getting ready to conclude it with what I call the reassembly putting all of the words and phrases of the Second Amendment back together after having properly understood them by breaking down each word and phrase in the Second Amendment so that we could truly and deeply understand its meaning and purpose that's slide number 38 I'm moving on to slide number 39 now and I explained in this slide that this is a matter of language in the understood the understanding of the Second Amendment is and this is because there are differences and in many cases significant differences in the colloquial language the English usage the contextual usage of English between late 18th century speaking or parlance and 21st century speaking and this is something that people generally don't have a firm grasp on and it goes over their heads in many cases it's it's unfortunate - because the founders really did try to do their best to make their ideas as unambiguous and clearly spelled out and as specific in language as possible and yet over time the understanding of the way that they wrote and spoke you know gradually gives way and you know the the type of colloquial usage of language that we've developed today takes over and then there's that loss in translation you might say so in this slide I'm going to read to wordings of the Second Amendment the way it was actually written and then how we might write it today if we used almost all the same words so here's how the Second Amendment was written in late 18th century the the late 1700s parlance a well-regulated militia comma being necessary to the security of a free State comma the right of the people to keep and bear arms comma shall not be infringed now there's some strange comma placement especially after the word arms and before the phrase shall not be infringed we probably wouldn't write like that today some people even question the kind of grammatical correctness of that and we don't really break our word our phrases down we don't arrange our phrases I should say in kind of the order that this was done at least not with like qualifiers I guess you could say we wouldn't start the the sentence in that way today if we were trying to clearly convey necessity so we would convey the word necessity with since something is necessary then this must or must not be done and that's how I'm going to you know introduce this next wording of the second amendment how we might rewrite it using again almost all of the same words but we might write it in a slightly different parlance today in the 21st century and here's how it would go since a well-regulated militia of the people is necessary to secure freedom the right of the people to keep and arms shall not be infringed now if we wrote it like that today there would be much less ambiguity over what this whole statement means and what its purpose is the clear intention of the militia of the people is necessary to keeping our freedom and therefore since the people of that the militia of the people need to be armed no one should ever be able to infringe upon people's rights to keep in bear arms this would be much more powerful of course if people truly understood what the militia was and is that it is all people so that's a simple dichotomy there between how their language was used and how our language would be used today and again I would start that with the word since because that conveys the necessity of what follows it now on the next slide I'm gonna take a little bit of license you might say pun intended or maybe just uh you know display a little bit of ego here and say here's maybe how I would have written it back then if were I alive back then or how I might rewrite it today not that I think it needs rewriting I think it stands fine just the way it is personally I think for those who have any kind of a historical understanding of how the founders use this language or what their true intentions were by just reading their you know their writings them themselves read it read it yourself I think that it's unambiguous as it stands and doesn't need rewriting but just as a exercise where I to rewrite it myself here's how I would have written it since it is true that a militia of the people which is a decentralized distributed force of armed individuals comprised of the body of the people who maintain working Henry and tactics commensurate to a military force is necessary for and essential to the preservation of a free way of life the inherent natural rights of people everywhere to own and carry defensive weaponry of any kind shall never be encroached upon so as to limit or undermine those rights that is the reassembly ladies and gentlemen in my words for what they're worth since it is true that a militia of the people again the militia is a decentralized distributed force of armed individuals comprised of the body of the people of all the people the whole people who maintain working weaponry and tactics commensurate to a military force that's what a well-regulated militia is well-regulated means you're maintaining weaponry and tactics and a militia literally means strength that is commensurate to a military force without being a military without being a standing army since that body of people a militia of the people is necessary for an essential to the preservation the maintenance of a free way of life securing freedom the inherent natural rights of people everywhere under natural law to own and carry to keep and bear defensive weaponry of any kind not just firearms any kind of weaponry any kind of Arms shall never be encroached upon infringed so as to limit or undermine those natural rights I think were it worded according to something like this the ambiguity would completely be gone no one would ever question it maybe I'm just being a little bit optimistic there but because there are really sick demented people out there in the world who just want to be slaves and love the slavery system that we have they're just psychopathic people and then the other kind of people are just totally masochistic and just enjoy slavery because they don't want any personal responsibility because their self-loathing people they don't have any self-respect they hate themselves deep down in their heart and they want bad things to happen to them the problem may I have no problem with people being like that if that's your constitution of a complete milk toast clown fine be like that here's the problem here's where it comes into a problem enough people being like that starts to infringe upon my rights and the rights of people who want to be free and there's where I have a moral problem with that whole ideology of self-loathing self-determine you're taking something and taking that position that does not belong to you because those rights are not yours to undermine or take away and that's why I have a big moral problem with that kind of a mental attitude that's why the understanding of freedom is so important the philosophical foundations and understanding of freedom are so vitally important because they have to do with the effecting of other beings that's why I've said in the past there are thoughts that are not rights to have people think all thoughts are rights whatever thought it may be wrong folks you are incorrect if you believe that there are thoughts that are violence make no mistake about it there are thoughts that are violence just by holding them in your mind because of enough people act upon those thoughts that becomes materialized as real violence in the world you could call them potential violence when enough people have thoughts that are completely out of alignment with morality and freedom then you're going to see that materialized in the physical world according to the first principle of natural law the principle of mentalism the universe is mental everything that comes into physical manifestation must first exist in mind and herein lies the problem folks the mind must be changed what we think must be changed in order for the external manifestation to change and when you think things that are wrong that are incorrect eventually it leads to immoral action that's why the understanding of right versus wrong of correct versus incorrect is so important and that's why people need to be on the right page when it comes to the right of people to keep and carry defensive weaponry of any kind as I started this presentation last two or two weeks ago with that that the second amendments wording were 27 words that are worth fighting for I'm moving on to slide number 41 now a well-regulated militia being necessary to the security of a free State the right of the people to keep and bear Arms shall not be infringed these are 27 words worth fighting for because of what they convey because of what they mean because of what they represent because of the original intent of them and the purpose behind them but make no mistake about it folks they are just words we cannot make them sacred or put them on such a pedestal or a shrine that we forget that actions must back those words when tyranny is coming at you hot and completely brainwashed agents of the state are following their orders just doing their job listening to the commands of their quote-unquote leaders their Fuhrer their Chancellor their chairman their president and their intent on harming others and taking away natural inherent rights because they've been commanded to do so you know what happens with the twenty seven words of the Second Amendment they become just words like that real fast you're not going to be sitting there explaining historical significance or intended purpose when somebody's actually coming for your rights that's when action is going to be required and if you're not physically prepared getting psychologically prepared for that is one thing but if you're not physically prepared for it you're going to be up that creek without a paddle as the saying goes you're going to be caught with your panties down around your ankles as that other saying goes so my slide number 42 conveys the concept of getting ready and being prepared for eventualities that we all do not want to see but which very very well may manifest sadly and unfortunately and let me tell you something folks if you're not at least somewhat prepared in this capacity you better start getting prepared or you're going to be in a bad situation and you're going to have no recourse when tyrants come and want to relocate you or take your rights your freedom or your property and you think that it will be the first time it's happened in human history think again if you have any long historical framework or viewpoint or understanding you will understand if that does happen to people there'll be just many in a very very very long line then it has happened too in the past because we still haven't gotten a lesson we still haven't gotten it fully that's why I suggest if we want to avert that potentiality we start deeply understanding natural law deeply understanding morality again the firearm is the last recourse I've said before when I show this slide I've said a few things that I'll reiterate here one you're looking at a totally peaceful nonviolent being in that photo on slide number 42 who harms none I want to be left to myself I think the first and foremost right is the right to be left alone I don't bother anybody I don't want anybody to bother me when I interact with people I interact with them through reason and if I want to change their mind I do it through persuasion not violence not coercion but you know what while I've been a teacher for many years on rights and on natural law and on what's going on in this world most of my energy goes into teaching some of it goes into preparedness and I would absolutely suggest the same for others we'll pick this up on the other side of this break folks you're listening to what on earth is happening we'll be right back [Music] you know today disguise the night night divided today and tried to run [Music] [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm and just about wrapping up my part two of the true meaning and purpose of the second amendment presentation which I began here on air a couple of weeks back this is a short segment I may do a little bit to complete this on the other side and then we'll start taking phone calls but see what I can get through here we're still on slide number 42 where I was explaining you know the idea of being ready preparing physically for what may occur in this country and possibly in others and that means owning firearms that means being responsible with them that means knowing how to use them that means knowing how to take them apart knowing how to clean them operating them properly keeping them in good shape practicing with them teaching family members and friends make it a part of your life that's basic preparedness and I think more people need to become involved in it it is part of the American culture as I said in coming weeks on this show I want to talk about how other nations have allowed themselves to become disarmed and how disgraceful that is and what they might be able to do about it but just to wrap this up I want to say talk about a few things on these last few slides the first thing is some of the imagery that you see here alongside my photo on slide number 42 with my ak-47 at a local range you see two flag images these are images from flags during the Revolutionary War era one of them the one on the left with the snake on the yellow background with the words don't tread on me is known as the Gadsden flag after the American patriot Christopher Gadsden from Georgia who was one of the I believe the commander the Georgia militia if I'm not mistaken and who fought in the Revolutionary War this was a huge symbol during the Revolutionary War period and represented the rattlesnake who simply wants to be left alone in nature and when someone won't leave it alone that's when he strikes it's a concept within natural law that natural law right of being left alone of not having someone come at you with coercion but if they do you're ready you are fanged and Venom eyes and you'll also give them that warning the rattling of the rattlesnakes tail means beware leave me alone I don't want to harm you but if you're coming toward me if you're encroaching upon me my rights my life my territory my property then be ready to be struck and that was the message being conveyed during the American Revolution to the British back then who came over across an ocean on ships to oppress people at the behest of some psychopathic lunatic boy king because he was their leader and they were just following orders you pick this up on the other side in the third hour of the show and then I'm gonna be going to your phone calls I'm gonna wrap up these last three slides and then we'll see what listeners out there have to say about the true meaning and purpose of the Second Amendment ladies and gentlemen you are listening to what on earth is happening right here on Republic Broadcasting stay with us we'll be right back [Music] freedom man that's what it's all about [Music] [Music] [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening dot-com we're into the third hour of the show and I'm getting ready to just wrap up the last part of my true meaning and purpose of the second amendment presentation here on the air tonight and then we're gonna be going right to your calls on slide 42 I just broke down some of the imagery of the two flags that are on that page in the circles on both sides of my photo holding one of my firearms and on the left hand side of course is the Gadsden flag as it is known after a Christopher Gadsden of Georgia on the on the left hand side I'm sorry on the right hand side it is the imagery that is known as the Franklin flag Benjamin Franklin originally designed the segmented snake in some of his newsletters his newspapers and underneath and it said join or die I believe the original said unite or die if I'm not mistaken but it was a turn to join or die to try to bring people into the actual combat of the revolutionary war effort against the British and you know this was a warning either you know join the militia adjoined you know the Revolutionary Army and fight back against these tyrannical oppressors who came over at the behest of this psychopathic King to oppress free people or you know suffer the consequences and concept was people had to come together to fight this tyranny which was on their doorstep which was in their midst and the message could never be more appropriate than in the time that we're living in and let me tell you something folks if we unite if we join together all of the people who are seemingly separate from all the different places in not only the United States but in the world and we come together under the common knowledge and the common sense understanding of natural law of moral law and we unite under those principles not a single shot will need to be fired not one if we do not do that death is going to be visited upon this earth in amounts that are almost inconceivable and I'm not saying that to fear monger I'm saying that because that is how natural law consequences work we're in a big simulation you might look even look at it like a video game you know what the game's called folks Truth or Consequences we unite under the truth we join together under the truth under common sense under conscience under natural law under morality and we will experience freedom we will experience prosperity we will experience peace and harmony we refuse that truth and we refuse to come together under the banner of truth there's going to be the exact opposite oppression suffering warfare slavery and death and don't expect it ever to work any differently those are laws that are built into creation itself these are what these symbols mean to me those are my interpretations of what they mean and how we might see them today in the world I think they're just as appropriate and just as hard-hitting in their message as they were over 200 years ago the men who made them should be respected and revered and I think they're the real American flags forget the flag of the United States as far as I'm concerned that's turned into a symbol of oppression and tyranny in my eyes these are the real flags of this land that we call America so I just wanted to comment on that symbolism that I chose for that slide there let's move on to slide number 43 I said in my original presentation back in February that if it were up to me maybe I would only add four additional words to the second amendment to perfect it and those words are come and take it in the original Greek Molen lebay the words uttered by the king in general Leonidas who fought at the Battle of Thermopylae against the pur incoming Persian armies trying to conquer what was Western civilization at that time in Greece and those Spartans held them at least long enough before they were killed to the last man to bring in some support by other Greek factions to actually get them united because they knew that if they didn't fight they were going to be conquered and their way of life was going to be completely destroyed some people say that this battle preserved the idea of freedom in Western civilization and it would have been completely annihilated had those people not made that sacrifice however people want to look at it historically the words come and take it came out of that because when Leonidas and his men were ordered to surrender their weapons and surrender to the Persian troops his response was Mollen lebay which meant come and take them if you can and as I said they fought until the last man of course this phrase has now been used as a rallying cry for people who wish to preserve gun ownership rights especially here in America and this flag is another big symbol in the gun culture community come and take it I personally prefer the silhouette of the a.k I'm more of a neikei guy than I am an AR guy but hey you know we have our preferences and finally folks the last slide slide number 44 you know I didn't say anything about I told you what I felt the Gadsden snake meant when in reference to the Gadsden flag itself but I just want to talk about the symbol of the snake in general people will look at this oh it's the serpent it's the it's a symbol of the devil that is Satan's the great serpent yeah biblically that is true you know this the serpent is looked at as you know Satan biblically and in religious connotations in many cultures specifically modern Christian culture but if you look at the historical underpinnings from the story and connect this with the information that I broke out during my cosmic abandonment presentation there's an alternative interpretation that goes along with the original serpent story of Eden and as we talked about briefly in the cosmic abandonment series the brothers and little an N key these beings that came here in the ancient past are attributed in by many people to creating humanity and then genetically tinkering with the genetic code of human beings to make them into a slave species regardless of what people think of that story it's the underpinnings of the symbolism that count here as I'm explaining this and lil tried to make n key into the the the great devil the the adversary to his rule in this story of these two brothers and that's why he kind of pinned him as the slithering serpent many feel n key was the good guy in the story as I've said there were no good guys between these brothers because it was n keys originally planned to create humanity and genetically modify the beings that were already here as one of the early parts of this story goes when n key first set foot on the earth one of the first animals that he encountered that he had not ever seen before was a snake and when he saw that he took sort of a liking to it because again as these accounts go the skin of these beings was somewhat akin to the skin of a snake which is why many people have associated them with reptiles with reptilian like creatures but their skin simply had an appearance like you might say like a human elbow or knee but all over that's what their skin just looked like which is similar to a reptilian hide so the story goes that when he first encountered the first animal they encountered on an alien world it was a snake and then when N key had sort of a little bit of a change in conscience when he realized how degraded the Bing's that these other beings these other intelligent beings who came here from elsewhere had created on the earth were how completely violent they had become and the kind of deplorable behaviors that were they weren't enacting upon each other and key much much later on more likely you know thousands of years beyond the the first time when they when they started doing these genetic manipulations because these beings have an enormous lifespan compared to ours he allegedly had this change in conscience to a point where he wanted to at least try to help educate people according to higher standards of morality and consciousness and he formed mystery schools to do this to try to teach the humans how to really interact with each other and to teach them about the laws of nature and to teach them about you know the sciences etc and these became the first mystery schools which then of course became corrupted and polluted by people who wanted to take that knowledge and use it for advantage over their fellow beings that's how dark occultism got started but one of the original secret societies during these times was known as the Brotherhood of the snake and it was a brotherhood that came together to try to teach people again they used the snake because this was n key symbol back then and they taught the mystery traditions of consciousness amongst themselves in in secret because many of these this knowledge was forbidden by the faction of these beings the the quote-unquote Anunnaki the ones who came down from the heavens as the name is translated out of the Sumerian this this Brotherhood was considered you know illegal it was considered something that was forbidden hence a secret society had to be maintained many of these beings who came here and created us did not want our uplift did not want people to have this knowledge which would level the playing field against them while they were still here so this original society took the symbol of the snake okay and it was about higher consciousness it was about teaching others and it was about protection among those with a like mind this is one of the underpinning reasons that I chose this as the symbol for the background of this entire slide presentation because I think humanity today needs a new Brotherhood of the snake as strange as that may sound to some if you understand the story and you know what this original Brotherhood represented and I don't get me wrong let's not leave anybody out it's not just a Brotherhood we need a new community a new mystery school if you will a new brotherhood and sisterhood of the snake no one is left out of this of course people who understand both the non-aggression principle and the self-defense principle equally and are willing to come together to teach those principles and defend those principles I think if we create some sort of a new universal worldwide community such as that that teaches natural law principles I think we might be able to reverse the trend toward despotism and totalitarianism and tyranny that is so prevalent all throughout the world so I'll conclude this presentation with that notion and with that hope in mind so that concludes my presentation the true meaning and purpose of the Second Amendment I hope people enjoyed it I hope they got a lot out of it I hope they will share not only the presentation as I've given it but you could teach others yourself what the Second Amendment really means what the founders intended it to be spread the word talk to people about it get involved in firearms ownership be a responsible firearms owner own the responsibility that comes along with it most of all I think the best thing we could do is teach young people respect for firearms to teach them the rights that are associated with this to teach them responsibility the responsibility that is associated with this and when we do that we're going to see a different generation come forward in the future that will understand these principles and really hold them in deep respect and be willing to defend them so with that I hope you enjoyed it and I hope you'll spread the ideas to others with that having been said let's uh start going to the phone lines and see you know what people have to say on this topic I'd like to keep the the topic to the Second Amendment in general firearms ownership in general the self-defense principle in general if people want to go off on different topics you know I try not to make any taboo topics on this show or limit what people can talk about so if you want to go off into other tangents you can but I'm going to ask for people to if they have any comments on this particular topic to call in tonight and you know let's see what you have to say on it so let's hear from Bobby in Louisiana Bobby you're live on what on earth is happening welcome hello hello buck man I've just recently discovered your work your piece work dude on before I've gotten to your work I don't know if you're familiar with him just came is dr. Norman liver good his work is on Hermes press it's called the new enlightenment he talks and talks a lot about the New Commonwealth all about what's he's been talking about cuz I saw some of your videos and again give me the gentleman's name again it's dr. Norman liver girl he's on her knees press okay Ravi's press calm he talks about the new enlightenment some this topics go to philosophy over tyranny okay police state you're in a police state attorney right least AUSA about the Cabal cabal provoked riots and so forth and so forth oh I'll definitely check out his work I'm not familiar with it but I will definitely take your recommendation and check it out it sounds like I would definitely be interested in it and I'll look into it for sure thanks for the recommendation thank you I didn't catch all of it I don't have any access to Internet at the moment no serious serious transition right now and my goal is not all alike so he was talking about preparedness I'm saying stuff to mark you everybody's not prepared I mean I'm getting MP Bobby hold on one moment I'll let you continue on the other side [Music] welcome back everyone you're listening - what on earth is happening here on rbn we're taking your calls for the duration of the show we were talking to Bobby in Louisiana and Bobby you were wrapping up your thoughts and you were talking about preparedness I'll let you continue on that I mean you have some people like me who ask them who know who has been completely and utterly then crippled by all the policies that creates the conditions and poverty and that that's why they want to decimate the country financially as well because they know that it's very difficult for people to maintain you know things like basic preparedness items and weaponry when they don't have the the basic necessities for survival on a day to day basis you know like food and clothing and shelter etc that's one of the big reasons that the extremely wealthy global elitists want people in destitution and poverty without any question it's it's a matter in that kind of a situation - as difficult as it may be to simply you know try as much as possible to just put away small small amounts until you have something that you can part with to you know get some basics in this regard there's there's a good group here in Philadelphia that is called survive and thrive and maybe perhaps there our groups like this in other areas maybe you could check meetup comm or something like that where many people will teach people basic survivalist behavior you know they'll teach basic techniques and mental strategies psychological strategies in addition to what items that you can over time procure and put away over time without having to break the budget so to speak that you could come out with not only a mindset of preparedness but a small cache of preparedness items that may may help you know I interviewed Fernando salgueiro who was the head of survive and thrive probably a couple years back and I told him I was gonna have him on again in the future to talk about preparedness and survival we talked about water purification when I brought them on but maybe at some point in the near future I'll bring him on to talk about basic survival techniques and items that everybody can do in an affordable way even myself I struggled so much to purchase one of the first you know what you might call expensive firearms that I did and it took me several months to save up for it you know like III I'm this in the same situation as many other people are out there and you know it really just takes a kind of a commitment and saying well is this important enough to me to go ahead and do even in the light of you know that I may not have that many resources to put toward it so Bobby I want to just thank you for your call and say you brought up a lot of good points there that many people do have to take into consideration when they're looking at basic preparedness in this regard so it's a good point to make and I want to thank you for the call let's move on to Nathan in Arizona Nathan you're live on what on earth is happening welcome to the show debate club last week and I had an argument with a guy the Second Amendment okay in what I had what regard well thanks to you I knew exactly what to say when he brought up this phrase well-regulated 8'o they love the well-regulated part don't they so many people want to insist that that means the government has to be in total control of every aspect you know that's the big argument by the statist and I knew what to say and now and then II tried to say this in the National Guard is malicious oh here we go with that one that's a huge one that's a huge one by the so called revisionists out there by the leftists out there all the National Guard is the modern militia you know it's just it's an absolutely ridiculous argument the founders repeated over and over and over and over again in their own writings and in in a you know public meetings that they attended when asked who the militia was they said it was the body of the people we're over and over again unambiguous yeah and then he actually took it even further than that he even had the balls to say that there was nothing in the Second Amendment about individuals having gun rights Wow and the right of the people to keep and bear arms that has nothing to do with people's rights I guess different different language than the English language I guess I mean meaning of the word people right people you must miss that word anyway this guy was a cop yeah that makes sense now he's a cult member what do you expect from a religious cult member I could tell it because of the I am better than you attitude and he was trying to laugh at me about everything that I said in response to him and then you even started insinuating that I should be locked in the cage and give him an attitude yeah Nathan hold on I'm gonna let you continue on the other side but here's the thing with people like this okay they haven't read one word from the founders own writings not a one they show their complete ignorance by nonsense like this stay with me I'll let you continue on the other side stay with us everyone [Music] [Music] welcome back everyone you're listening - what on earth is happening here on rbn taking your calls for the remainder of the show toll-free number to join us 800 3 1-3 94 or 43 we were talking to Nathan in Arizona Nathan you were telling me that after you tried to explain what the real meaning and purpose of the second amendment was to this cult member this religious cult member follower he responded to you that you should be thrown in a cage for your agreement with our founders who put this provision in the Bill of Rights for your stance on that you should have your freedom taken away isn't that so American yeah it gets worse than that - he then went on to say that our attitude would change once we saw how big their machine guns were and I asked him what the military and police are gonna do against the hundred million gun owners and he told me that he just have to take us out one at a time yeah well like I said let them try they don't even understand what they're gonna be up against in this country if they dare to try it that's that's it and you could call that you could call that whatever you want it's not even a threat it's not even a promise it's a fact is what that is it's a I'm not gonna let them take my god and torture me for a couple years and not the only one my friend you know many people are with you believe me more than you know you can more than any of us know where you can be it somebody's mercy for as long as they want so it's a pretty easy choice if you ask me let me tell you something Nathan I go to some gun shows in some podunk podunk towns you probably call them out on the outskirts of you know the urban area around southeastern Pennsylvania and I'm telling you the amount of people that show up it's like a massive sporting event you might think it was a Philadelphia Eagles game the amount of people that come out it's on believably encouraging how many people are in the mindset of at least minimal preparedness and at least minimally know a little bit about what's going on I've had people tell me when I get in conversations with them at gun shows about the tyranny that's going on in America and I've had the response from many people we know many of the people here know exactly what's going on and we're getting ready we may not know as much of you or how it works as well as you do or to the extent that you know but we know enough to prepare and I'm telling you that sentiment is omnipresent at these shows just just go and put yourself around that culture for a time and you'll see you know there are people who aren't at a higher level of consciousness and and don't really understand it to a full extent but there's many who do get at least that tyranny is coming that they're making encroachments on our rights and freedoms and they are not going to take it laying down yeah if you're not then you're gonna be found with your pants around your ankles that's right most important that's absolutely correct Nathan I want to thank you for the call and for the points that you've brought up really great sentiments there and just hang in there because know that you are not alone and know that there are many other American true American patriots in the true sense of the word not in the sense that we just follow whatever the nation does from the point that we are going willing and prepared to defend human freedom at all costs against government tyranny there are so many of us they're gonna stand with people like you and they're not gonna be able to get this done easily so thanks so much for the call let's hear from jonathan in Kentucky Jonathan you are live on what on earth is happening welcome mark you know what the difference is between an ar-15 a what's that ar-15 like a prom queen in an aks like a biker chick I wholeheartedly agree after having you know used both of these platforms I'd have to say I'm in agreement with that sentiment I can't take credit for that that came from a Spetsnaz operator Sonny Posey cos and I knew you were a K guys I don't want to beat up on the AR too much good friends of mine really love that platform and I don't dislike it I think it's extraordinarily accurate it's it's it's a it's a nice platform but uh you know given the choice I'll take the a K platform any day of the week just my personal thank yous you're a no-nonsense kind of guy into a cave and no-nonsense kind of weapon simple is better in a fight yeah well I didn't know if you knew that I I like running guns I run my rifle every Sunday with my group I'm running right now a PTR 91 or it's pretty much a g3 okay and I just wanna let you know I went to a gun show today too and I've seen all the five five six ammo that's being bought and you think you know being uh who's running that there's a panic on it oh well put it this way all the Green Camp green chip thing is is they've made that green tip the ammunition for so long for all these wars they're converting over to a steel core round so instead of selling it a cost they're making a big gun scare and getting everybody to buy it up and they're making a profit off right right yeah and then I wanted to say man your reference on the Brotherhood of the serpent really kind of concluded what may be my thoughts were on that Kundalini experience I had - it might have uh might have been something I guess you could say and yeah I've heard what you people tell me about their Kundalini experiences how what occurred during yours if you don't mind me asking I had a serpent bite me and my dream coil around my arm and I was in an open desert and with the venom that snake bit me and uncoiled my arm and the venom surged up through my arm up to my heart when it hit my heart I awoken with my hands in front of my face and I seen the flower of life symbol in my face and it soon as it was aware of me and I was aware of it it disappeared and my lamp fell over all the power shut off my house and I heard a thousand knocks underneath my bed and on my roof and although very interesting so this was more like a visionary experience than something you may have encountered were experienced during something like a meditative experience oh no no now I will say I do dabble a DMT and I use it for ritual purposes at burn sage and I tell people you gotta let go of all your pride and ego and angst and the teacher plant but I would it wasn't anything like that because it was months afterwards and it was very powerful but we got to run some steel some time man ha ha I would love no we we got to I know I've been to Iraq and you know I you know I've learned something over there and I look at these cops dude and some of them have this smug attitude and I just look at them I think in myself I am just one man and you don't even know what kind of hell I could unleash on you yeah Jonathan the thing is I'm gonna read some information about the fear of rebellion and the fear of revolution that a lot of people have next week on the air and possibly I'll even read some of the writings of Thomas Paine in the next week or two because he talked a lot about how one Patriot during the Revolutionary War era one person of the militia one a person who really was supporting and defending freedom would be worth a hundred Tories or a hundred supporters of the state and that's the thing people have to understand is our numbers are going to be so much more powerful because people who will physically defend their freedom are going to fight like a hundred men because they have something worth fighting for they're not just fighting for hierarchy and following orders they're fighting for something that truly means something deep inside their mind and heart and when they fight for that when they fight for that truth they're gonna take on the strength of a hundred men and I couldn't set it any better myself then all the people who are supporting this tyranny they better understand that before they enter into this slightly and no Borg I mean really you know if you want to do a tracking thing they really are man yeah and it's it's gonna be to a point where this dark elite and whoever they're conduits are they're gonna go down swinging and instead of us passively being able to unite not passive but I would say assertively unite right and not by around it's not going to happen they want to have the angst and and anger and struggle and suffering so that they can feed on the last minute before they're dark flame is extinguished Jonathan I will say this more so than not I tend to agree with that analysis I wish it were not that way and I really want to try to avert it coming to that I don't know if we are going to be able to do that I think it can be done if the human will is summoned to do that work but I tend to more agree with your analysis on the way it may go I hope for all of our sakes that both of us are wrong on that though Jonathan I want to thank you so much for the call phenomenal points that you brought up thanks so much for calling you let's hear from Rafael in Indiana Rafael you're live on what on earth is happening welcome Marc great speaker yeah absolutely welcome back have a piece a few comments if I may sure go right ahead um I use finally coming up how I love and how you said in the past basically called all people and say that you don't care if they need to starve to buy a gun and and that's on for nah you know fire our municipal protection yeah I mean III wouldn't go so far as to say starve yourself to do it I mean if I said that it may be a little bit on the extreme side but there's ways of saving up slowly incrementally and there's even time to do that now I believe like I said I mean the first good firearm I purchased I had to save for several months to save up enough for that because you know I just was kind of a bad time financially and it took a while to do that but I did it anyway and I just literally I said hey uh I'm gonna put ten or twenty dollars aside each week you know and you just do what you can that's what it had to come to for me to you know I'm in a slightly better situation than that now not drastically but you know I did what was necessary to do because I'm not going to get caught unprepared and that that's all comes down to it's you have to summon the will to do it so I totally agree t-ball I guess on what alone understand Second Amendment a lot of loan natural law right there there's a B movie that I saw not so long ago mark it's called a goodbye world unless you've seen that movie before it sounds familiar I'm not certain though it's it's basically the premises where I guess technology is brought to its knees and and people are pretty much brought to her the reliance of a survivalist and how busy they're all revolves around group of people on and the meanings of basically uh survival surviving and uh it's you know it has its subtle angles they're relevant but there's a job the premise of the movie is basically it's tell me that the title of it one more time I just want to write it down all I'll check it out a goodbye world okay all right continue and and it just stopped there's a I think one of the best parts in the movie is another one give everything away but it's basically uh one of them somebody from the group they quote the third and then later on they quote a fourth amendment okay and I guess and the response is being encroached by these Outsiders and I think that's basically a permissible I guess not only your second limb that you're covering but most people don't even know let alone know natural all right no let alone the Bill of Rights they even know what what help what it means 121 I guess crap it's the fans so to speak and it's pretty good movie you know okay I'll definitely check it out on your recommendation and and one other thing else that's why I sent you an email if you got it but there was a video and as pretty relevant to what you're covering now it's it's a YouTube video it's called uh guns with history and it was a social experiment that was done it's it's a YouTube video I think he's just caught up not too long ago but um they set up the shop in New York where they're selling these guns and all these customers not knowing they come in and when they are asking inquire about the firearms instead of telling them you know of an actual history or what nature of the firearm uh they start given the history of how was used to kill quote-unquote you know somebody son murdered their parents or this gun was used in a column binding you see the people's reactions and that is totally awesome station of the Second Amendment and that's in the UI arms Wow so this is like a anti-gun propaganda documentary why that's you should think about buying guys real what's up what's up verbage is on the video but it's basically totally contradicts of what you're trying to unbeli remote and that is pretty uh that's what i do that that's part of that cultural programming you know that social engineering that they have to do to change the mindset of people to get them to lay down their freedom without a battle you know without a struggle yeah I mean it is just uh you know it's pretty pretty uh if people aren't aware it's just the attack that people are getting subversive later all eyes are so society it's it's you know it's relentless and that's why we have to do our best to educate our fellow men according to these principles to help them to understand not only the the Sacred Feminine non-aggression principle but also that sacred masculine self-defense principle they they have to go hand in hand and the understanding of them have to go hand in hand Rafael I want to thank you so much for your call always great points that you bring up thanks so much let's hear from Jeff in Cambodia Jeff you're live on what on earth has happened I think you're the first caller I've ever had from Cambodia and you are calling from a place that has experienced the direct result what happens when people are disarmed of their firearms Jeff you're live on the air yeah mark when you mentioned when you mentioned a pol pot of course I just last week went to the museum up in front n seeing the results of what happens when you've got an unarmed populace and unarmed people Papa you know a peaceful populace that is very well educated but they didn't have the wherewithal to fight back and I'm just saying that you know you can find it on YouTube and videos of it but to say that it was horrifying experience would be a massive understatement he took it to such an extreme extent that he was executing anybody that he continued he considered to be an intellectual person because he felt that the actual intelligence of other people would be a threat to the rulership of his party that is the extent that the communists there went to you know Act actually actually killing anybody that he felt had some decent intelligence because that could eventually lead to the overthrow of his his regime yeah and he by the look of the guy if you look at the interviews by the American who interviewed Pol Pot's over there the guy you almost want to believe the guy that looked like a grandfather and he I don't even know that the guy knew that he did it I mean it just it does make you think about the mind control aspect sure Jeff hold on through this break I'll let you finish up on the other side ladies and gentlemen you're listening to what on earth is happening stay with us [Applause] [Music] there's a cool science that we don't dare speak as wellbut lead-ups little whip so we keep pretending that there's nothing wrong it's cold of sidewalk welcome back everyone final segment for this edition of what on earth is happening this evening we were talking to Jeff in Cambodia a place where government demo side happened in the past as a direct result of gun control measures that were implemented Jeff I'll let you wrap up your thoughts Jeff we ve lost him so I'm sorry about that it looks like we lost lost Jeff Jeff if you can call in quickly I'll bring you back up let's move on to Rahul in Washington Raul you're live on what on earth is happening welcome to the show thank you glad to talk to you yes so in regards to your topic tonight I became a gun owner about I would say almost two years ago now okay and it was in response to the Edward Snowden Edward Snowden leak basically and it it was like a catalyst for me because I've pretty much always thought about becoming a gun owner and I've always I've always known the value of the Second Amendment but and I've kind of been in the conspiracy world for for a while but it wasn't until that moment when the government you know I don't know if Snowden is a legit guy or if he's just an actor but the government basically letting everyone know we're spying on you right out in the open yes yeah in a way that the Germans or the Russian I couldn't even have dreamed of you know with the internet and everything and so that was my catalyst for becoming a firearm owner and I've been carrying 100% of the time 24 hours a day unless you know almost 24 hours a day when I go to sleep i disarm myself and I'm nights down but um I basically carry inside my home and one thing I noticed is this is before I discovered a cultism and I discovered you know true spirituality in her medicine so but one thing I noticed is when I became a firearm owner and I started carrying and I'm out in public and I'm interacting with people is it really transforms the beasts consciousness within oneself very quickly because any type of unchecked anger could caused you to take someone's life you have the power over life and death so you find out as do I that it actually quite settles that aspect down within your Bing yes definitely we really started a spiritual transformation for me in that culture becoming a gun owner I completely became non confrontational and my level of empathy towards other people I mean it was like it's like a complete different night and day because the consequences of your interaction with other people is out of you know the stakes are much higher when you're armed Rahul brilliant points we're out of time but the final point here is if everybody were armed we'd have a much more polite society ladies and gentlemen that's all it ultimately comes down to it's not only the great leveler of the playing field so to speak it makes for a much more civilized interaction between beings as they say the gun is civilization ladies and gentlemen that's all the time we have for this edition of what on earth is happening remember there's only two mistakes you could ever make on the path to truth not starting and not going all the way thanks for listening everyone we'll see you right here next week [Music] [Music]

What On Earth Is Happening Show #190

Topics: *Gun Ownership Rights, the Gun as a bringer of a more civilized society, the Fear of Self-Defense and Rebellion Against Tyranny, Nations whose populations have already been disarmed, the Occult Season Of Sacrifice, False-Flag Attacks, Mass Human Sacrifice Rituals, Force vs. Violence, the Morality of Physical Rebellion Against Tyranny, the American Revolution as an Act Of Love, Fallacious Arguments Against Rightful Rebellion, Cowardice as the main excuse for the continued acceptance of Tyranny, Pacifism as an Ideology based in Self-Loathing, Thomas Paine's statement that ALL Tories are Cowards, the Colossal Ignorance of America's Youth, Communist Professors in American Schools, Taxation as Theft Violence and Slavery, Advice for potential Gun Owners, Overcoming Psychological Obstacles to Gun Ownership, Training with Firearms, Synchronicity, Police Violence Epidemic in America, Moral Allegories in Popular Fiction, Situational Awareness, the Personal responsibility that comes with Gun Ownership*

freedom mat that's what it's all about [Music] [Music] welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening to endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascal [Music] welcome one and all you're listening to what on earth is happening right here on Republic Broadcasting I'm your host mark passio my website what on earth is happening dot-com the network's website Republic Broadcasting org today is Saturday April 4th 2015 the show is live every Saturday evening from 10:00 p.m. to 1:00 a.m. Eastern Time that's 9:00 p.m. to midnight Central Time we have a great show lined up for you here tonight I'm going to be talking about the fear of self defense and the fear of rebellion against tyranny why do people fear these things or the or why do they believe that somehow they should never be engaged in and many people do believe those things many people do feel like that so what are the psychological factors going on in their minds what is their what is the logic so-called logic that's going on in their minds that makes them fear self-defense and fear righteous rebellion we're gonna be talking about this on the show tonight I'm actually gonna be reading a couple of articles that deal with things such as this and then I'll be going to your calls and we'll be taking many calls throughout the show so the calling number to join us ladies and gentlemen for this edition of what on earth is happening eight hundred three one three nine four four three once again the calling number to join us 800 three one 390 443 a couple of quick announcements this coming weekend less than a week away free your mind three the biggest conference of its kind in this country possibly throughout the world in the year of 2015 April 10th 11th and 12th that's next weekend Friday Saturday and Sunday April 10th 11th and 12th 2015 at the Sheraton Bucks County hotel just outside of Philadelphia at 400 North Oxford Valley Road in langhorne pennsylvania the speakers for free or mine 3 Bob Tuscon Clint Richardson Curtis the illuminated one Davis Dennis McKenna Derek Bros had fortune the New Jersey Weed Man Freeman for its spring Meyer Jay Parker Janis barcelÃ³ John Bush John and Bonnie Mitchell John vibes Josie the outlaw Wells Laura Eisenhower Lennon honor Mark Devlin myself mark passio Ross Ben Steve stars Stuart Swerdlow an alternative media panel featuring luke rudkowski of we are change the free thought project and the anti media a meeting of the minds speaker panel discussion with many of the speakers from the conference open mic night sessions featuring members of the audience and a showing of Dan Fogler movie Don peyote an all weekend pass for the freer mind three conference only $150 the website free your mind conference dot-com get your tickets if you don't have them already you can get them right up to the days of the conference or you can get them at the door at the same price free your mind conference calm is the website I hope to see many many people just outside of Philadelphia next weekend I know I'm really looking forward to it I'm going to be giving a presentation on Saturday evening entitled the cult of ultimate evil order followers and the destruction of the Sacred Feminine that is my presentation title for this year's conference it's going to be a very hard-hitting presentation it's going to be a presentation that may be difficult for some people to hear because of the religious beliefs that they are still subjecting their mind to and I mean the religion of authority ladies and gentlemen so that's the free your mind conference coming up at us next weekend it's just going to be a huge event and I once again I hope that it's jam-packed and I hope to see many of you there the what on earth is happening promotional t-shirt original design has sold out so if you did get an order form email me for an order form for one of those shirts please do not send orders for those because they are gone and I don't think I'm going to be repressing that design because I have a new design that I've already pressed and it is going to debut at for your mind 3 I'll be bringing many of them to the conference to table at my personal table and whatever is left over will be available to the public after the conference so I'll be posting the design probably in the middle of this coming week just to give people a little taste of you know what the what will be available at the conference and so that people can you know put their get their orders in you know for after the event is over so to receive a promotional t-shirt you can click on the promotional t-shirt link that will be posted on the left hand side of the website this coming week I think I'm going to post it on probably on Tuesday April 7th so 3 days from today I'll post a new t-shirt design on the website also there is a donation button on the left hand side of the what on earth is happening dot-com website if you feel that you have received value from the information that has been presented and shared on both the one on earth is happening radio show and on my website through my podcasts and my videos you can feel free to make a voluntary donation to help support my work so that I can continue it into the future also rbn has been hosting a donation drive to help support the network and keep it on the airwaves you can donate to rbn by phone you could pledge a donation by phone by calling toll-free 800 7 2 7 1 9 once again that number eight hundred seven to four to seven one nine you can also go to the PayPal link on the donation tab at republic broadcasting org that'll take you right to their PayPal donation and there is also a mailing address if you want to send a check a donation by check the mailing address is two to five one double Creek Drive Suite 3 zero to Round Rock Texas seven eight six six four so if you are in a position to do so please help out the network they could definitely use it and you know that's what it's all about this network is listener-supported and your donations help keep it going so I want to direct everyone's attention to the what on earth is happening comm radio show page if you're not already listening there of course underneath the player for live broadcast there are images for tonight's show the first two images there's only three images up there this evening the first two images are posters for the freer mind three conference you could feel free to share them and the third image is a meme that was made regarding the latest topic that I have been covering on the show over the last few weeks which is gun ownership and gun ownership rights and the Second Amendment in particular I just completed giving an extended version of my true meaning and purpose of the Second Amendment presentation that I originally gave a couple months back here in Philadelphia I gave this extended presentation on the air over the last few weeks and got a lot of positive feedback and responses from people and a listener that posts to a Facebook group that is dedicated to my work made he created a meme of me from that presentation a photo of me from the Second Amendment presentation with my ak-47 and underneath it it is a quote from me that says if there are no guns in your country that means slavery was perfected there it's a quote that I came out with during the first half of my second ammendment presentation that I gave live on the airwaves a few weeks back and I was pretty riled up during that show because I was thinking about all the efforts that are being made to try to curtail and gun ownership rights and how many states in the United States have completely unconstitutional and immoral gun laws on the books that have no business having ever been enacted whatsoever and you know having thinking about having been thinking about that over the days before I was doing that particular presentation the vitriol definitely was raised in me let's just say but um this mean I tried to kind of get it to spread as much as possible on Facebook because a lot of people need to hear words spoken just like that you know because so many people think it's so wonderful and great that there's no guns in their country that the citizenry has been disarmed you know and therefore they have absolutely no means of resistance against tyrannical government and they somehow think that isn't gonna happen in their country when it has happened repeatedly time and time and time again throughout history genocide by a tyrannical government so people like that in my opinion are just completely naive they have the mindset of little children and you know as much as I'll you know directly come out and say how I feel about people like that I would still encourage them if if they're living anybody who's from a country where the citizenry has been disarmed like let's say England or Australia has been largely disarmed Germany has almost been completely disarmed not entirely but it's most of the way there if anybody wants to call in from any of these locations you know I'd like to hear what you think about your nations populace being disarmed and basically at the mercy of your governments because let me tell you something folks one thing I know is not going to happen here the citizenry is not I'm gonna be disarmed in America you can bet on that as sure as you can bet on the Sun rising on the eastern horizon tomorrow morning okay that's one thing I'll guarantee you with my dying breath they can try all they want they could pull however many false flags they want to try to pull it's all nonsense it's all a big act to try to tug on the heartstrings of people and say oh look at how many how many more children have to be killed you know how many more every single person on the face of the earth how about that you want a number there's the number then you'll have no more gun owners in America when every person on the face of the earth is gone and not a minute until you're never gonna get that done all the Marxists and socialists and communists and fascists and Nazis out there you're never gonna get it done here but they'll keep trying folks believe it believe me they'll keep trying you know one thing I do want to mention before I get into some of the material I want to cover here tonight we are in I neglected to mention this last week or two weeks ago I should say just letting people know I didn't do a live show last week there was a little bit of confusion on the network end of things and scheduling got a little bit messed up and I just didn't prepare a show and didn't go live so it was just some back-end confusion and complication that took place so that's all been worked out and everything is fine but I didn't do it I two weeks ago I did do a show and it was during I believe the very first first week of the season of sacrifice the occult season of sacrifice as it is known that that show was on March 21st and the season of sacrifice is a 40 day time period that runs from March 19th through May first it is a time period during which the dark occultists that basically are running earth do sacrificial rituals and blood sacrifices on a mass scale to essentially basically pay homage to the gods that they believe in the entities that they believe have to be appeased and many of them do believe in entities such as that many of them do not and they are they also pull these false flag events these human sacrifice ritualistic events in order to instill large amounts of fear to inject large amounts of fear into the populace so that they can sway their minds in a particular direction that they want them to go in this is of course has been referred to politically as false flag events but they often take the place of ritualistic human sacrifices that are all not always but very often done in a location that is the name of a goddess a goddess figure okay so you'll see Columbine High School Columbia is the Dove the Dove is a representation of the goddess Virginia Tech the Virgin okay another representation of the goddess the Columbia Space Shuttle disaster again Kalume means dove Aurora another Greek interpretation of the goddess okay so the Aurora shootings you'll see this on and on and on in many of the rituals that they do and we're in the thick of it right now April is their favored month to pull one of these sacrificial rituals some people think that one has already been done and was the crashing of this plane with a hundred and fifty people on it into the French Alps this German plane so it is quite possible that that was one of these season of sacrifice rituals if so it's kind of a you know a light one if you will because it's not quite what I would call a false flag but who knows the reasons that something like that may have been done deliberately so it's been suggested that may have been one of these rituals I'm not speculating either way on that but I am saying that this is the time period to really be vigilant for false flag events especially mass shooting events you know like the Port Arthur massacre which was I believe done during the season of sacrifice as well you know that was you know we had our Sandy

Hook which was supposed to be like the Port Arthur massacre to get all the gun laws you know enacted against semi-autos etc here in the United States and it didn't work out the way that they planned because a lot of people saw right through the Sandy Hook false flag you know it's like one of these things where absolutely no part of it stands up on its own no part of it makes sense just like the official story of 9/11 which was another one of these ritualistic sacrifices not during the season of sacrifice but certainly a sacrificial mass human sacrifice ritual event that was a false flag slash inside job but I just wanted to put that out there I am NOT going to do an entire you know re-evaluation of what the season of sacrifice is if you want that you can get that in for more podcasts and learn all about it and you know what their belief system is regarding that the dark occult but I just wanted to let people know we are in the thick of the season of sacrifice April particularly around April 19th and 20th for you know some reason they really really like to bring event you know mass events out around that time period although they do do it earlier in the month of April many times so keep an eye out be vigilant it is very possible that a false flag event is on the way because this is their favorite time of year to pull them out we'll be right back folks you're listening - what on earth is happening [Music] welcome back everyone you're listening - what on earth is happening here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm so before the break I was talking a little bit about the season of sacrifice how we're in the middle of it and how to what and warning people that they should just be vigilant for the possibility of false flag events and if it does happen you know tell everybody that this is a staged event they always are and you know it's always for an alternative agenda to try to get gun control measures passed or to just try to inject enough fear into the population that these controllers can get whatever agenda that they want to accomplish through with as little resistance from the public as possible the answer is being aware of how they pull this tactic and therefore eliminating its effects so going back to the main topic I was saying that I'd like to get some calls from people later on in the show if anyone wants to call in from countries that have been largely disarmed or completely disarmed their populace and see what they have to say about something like that and what if anything they feel can be done about that deplorable situation so if there is anybody listening from countries such as that feel free to call in again the toll-free number eight hundred three one three nine four four three before I go to calls later on in the show however I want to read a couple of articles related to the topic of gun ownership and self-defense and the psychological fear of self-defense which is the main focus but before we get into that particular topic I want to read an article that is about the gun being a symbol of civilization which I ended my second ammendment presentation podcast on that note that it is said the gun is civilization and I'm in complete agreement with that sentiment personally I think if everyone was armed a society would be extremely more polite to each other because you know that everybody has equality in deadly force capability and therefore everybody's gonna be a little bit more hesitant shall we say to infringe upon other people's natural rights if they knew everybody had that capacity so this article is called the gun is civilization and it's by majorelle called deal right I think I'm pronouncing that right or caudal retired marine so

I'm gonna comment possibly occasionally during the reading of these articles you know as I've done before on the show so just bear with that if I want to make a point during I'll make my point and then say I'm continuing with the article now to give you a distinction of when is the article and when I'm making commentary on it and also post these articles with the podcast of course so this is called the gun is civilization human beings have only have two ways to deal with one another reason and force if you want me to do something for you you have a choice of either convincing me via argument or force me to do your bidding under threat of force every human interaction falls into one of these two categories without exception reason or force that's it in a truly moral and civilized society people exclusively interact through persuasion force has no place as a valid method of social interaction and the only thing that removes force from the menu is the personal firearm as paradoxical as it may sound to some when I carry a gun you cannot deal with me by force you have to use reason and try to persuade me because I have a way to negate your threat or employment of force the gun is the only personal weapon that puts a 100 pound woman on equal footing with a 220 pound mugger a 75 year old retiree on equal footing with a 19 year old gangbanger and a single guy on equal footing with a carload of drunk guys with baseball bats the gun removes the disparity in physical strength size or numbers between a potential attacker and a defender there are plenty of people who consider the gun as the source of bad force equations these are the people who think that we'd be more civilized if all guns were removed from society because a firearm makes it easier for an armed mugger to do his job that of course is only true if the muggers potential victims are mostly disarmed either by choice or by legislative Fiat it has no validity when most of a muggers potential marks are armed so I hear the break music coming up folks I'll continue this article called the gun is civilization on the other side of this break stay with us you're listening - what on earth is happening [Music] you know today destroys the night night divide today try to run hi welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening dot-com I'm going to jump right back in and continue with the article entitled the gun is civilization people who argue for the banning of arms ask for automatic rule by the young the strong and the many and that's the exact opposite of a civilized society a mugger even an armed one can only make a successful living in a society where the state has granted him a force monopoly then there's the argument that the gun makes confrontations lethal that would otherwise only result in injury this argument is fallacious in several ways without guns involved confrontations are won by the physically superior party inflicting overwhelming injury on the loser people who think that fists bats sticks or stones don't constitute lethal force watch too much TV where people take beatings and come out of it with a bloody lip at worst the fact that the gun makes lethal force easier works solely in the favor of the weaker defender not the stronger attacker if both are armed the playing field the field is level the gun is the only weapon that says lethal in the hands of an octogenarian as is in the hands of a weightlifter it simply wouldn't work as well as a force equalizer if it wasn't both lethal and easily employable when I carry a gun I don't do so because I am looking for a fight but because I'm looking to be left alone the gun at my side means that I cannot be forced only persuaded I don't carry because I'm afraid but because it enables me to be unafraid it doesn't limit the actions of those who would interact with me through reason only the actions of those who would do so by force it removes force from the equation and that's why carrying a gun is a civilized act absolutely phenomenal article ladies and gentleman I'll post it with the podcast anybody who doesn't understand the pure and simple logic that is contained in that article I don't know what's wrong with them but they are clearly brainwashed by the state that's all I'll say and you know it's it's funny because so many people can get things halfway you know this is by a retired Marine who is an order follower in one way and yet fully understands you know the self-defense principle in another way you see a lot of this going on where there's only still partial enlightenment everywhere throughout society and this is one of the main problems there's not total enlightenment you don't have a whole lot of people in the populace that fully understand both the Sacred Feminine principle of non-aggression do not initiate force against your fellow sentient beings and simultaneously deeply understand the sacred masculine principle of self-defence which is if someone else does violate your inherent rights and has come at you with violence that is violating your right to be left on a cost that are unharmed you have a right to defend yourself with physical force against that attack period and that includes the threat of attack that includes coercion that includes being put under the state known as duress you have a right to end the state of duress when you are threatened continuously with violence the only thing that I would have liked to have seen someone like this do in his language or and were verbage is to just use the word violence everywhere he used the word force then I think the article would be practically perfect because force isn't violence you know we understand what he's saying to coerce someone to do something you know to do it by coercion I prefer the term violence wherever it can be used in place of force because it means that you are violating someone else's rights and it becomes much less ambiguous when used like that in human language there's a big problem with the obfuscation of force and violence which I tried to clarify repeatedly in my natural law seminar and in the material here on what on earth is happening in any event that's the first article that I want to read and anybody that wants to comment on that is you know feel free to do so I'll post that with the podcast of course the next article I want to jump right into is called understanding the fear of self-defense and revolution and this is a absolutely brilliant article by Brandon Smith I don't really know Brandon Smith I know he is a blog writer for a couple of different blogs but after reading this article I just think that he has a very spot-on perspective and a brilliant mind and you know I commend him for writing this and this fits in with the topic I want to talk about here tonight which is the fear of rebellion why so many people are against rebellion against tyranny so many people think oh it was it was great that the founding fathers did it and the Revolutionary Army and the the colonists in the United States rebelled against a totally psychopathic King but somehow were in such a different situation today you know what less of our rights are being violated and not more were under less coercion were under less threat of violence were under less duress here in America than we were back in you know the late 18th century you know in the in the late 1700s how does that how is that possible because I you could have fooled me folks you know I mean the things that our forefathers here in America went to war over and were willing to dispatch other people over were far less egregious than what's taking place in America today we're a thousand people a year are being murdered without trial by police in America and we don't think we have an epidemic of police violence of police criminality while our military forces are being used to serve global elitist bankers and being sent to kill people that pose no threat to us only a threat that's whipped up in the minds of people by the media by the complicit yellow journalists propagandist media in this country who are bought and paid for Liars so my point here to go back to it is why are so many people in such psychological fear of self-defense and rebellion particularly when it comes to rebellion against an unethical and unlawful government so this article is going to explore some of these psychological dynamics or the the arguments against rebellion against tyranny or simply revolution as Brandon puts it in this article I prefer the term rebellion to the term revolution because rebellion takes on a little bit more of a righteous connotation and revolution has that idea of your going around again you know righteous physical rebellion can be the same as righteous revolution the two terms on you know I'm not trying to split hair here they can be used interchangeably I simply prefer the term rebellion particularly rebellion against tyranny so here's the article it's entitled understanding the fear of self-defense and revolution by Brandon Smith our era is a strange one when considering how social attitudes have developed in such a contrary fashion to the rest of history I think that our forefathers would look upon our current culture with bewilderment when confronted with the fact that our generation has all but abandoned the option of physical rebellion as a tool for social change even amongst the most enslaved of Nations and people's the idea of revolution has been held in regard as an entirely moral and principled affair involving every individual no matter their age or economic station today however that which we call quote revolution has been delegated mostly to college-age intellectuals and has been so watered down and whitewashed with politically correct restrictions that the concept is hardly recognizable I believe the civil rights movements in America and in India in the 20th century have in many ways warped the public view of how opposition to totalitarianism is actually accomplished I find it interesting that movements led by Gandhi and Martin Luther King jr. enjoy so much adoration in the mainstream media and in public schooling while the American Revolution is often either misrepresented or not discussed at all Gandhi's movement was in concrete terms a failure until Indians had actually began organizing to physically fight the British causing the crown to attempt to diffuse the movement by suddenly offering up a reformation of Indian governance one that would contend to benefit them of course meaning the British when one examines the facts surrounding COINTELPRO operations by the FBI and CIA during the civil rights movement in America one realizes that half the efforts and actions were legitimate and the other half entirely manipulated over the course of half a century the philosophy of quote anti violence has come to include a distinct distaste for self-defense self-defense is now consistently equated to quote violence and is thus immoral in other people's minds regardless of environmental circumstances even in the Liberty movement there are people who disregard physical defence as either barbaric or futile and have adopted rather less effective pacifist ideologies of more socialist activism the problem with certain factions of libertarianism is that they tend to live within their own heads I'm breaking in here for a moment because this phrase right here resonates deeply with me when it comes to the interaction with a lot of quote libertarians and they have been known as as Brannon we'll get to in a moment the eggheads the egghead libertarians they're only putting forth all these intellectual ideas but if someone suggests that someone that does not have a right to coerce someone should be dealt with in a physical fashion then all of a sudden everybody backs up ten steps whoa whoa we're only talking about ideas here see it's never something that's brought into the realm of actual action this is what is so psychologically feared in the so-called truth and so-called freedom movements continuing with the article the problem with certain factions of libertarianism is that they tend to live within their own heads reveling in a world of Ayn Randian and Rothbard Ian's political and social theory while abandoning the other side of concrete resistance some in the survival community call these people quote egghead libertarians that boy is that true and I think the label fits I agree Branden wholeheartedly continuing they rejoice only in the intellectual thus they tend to see themselves only as quote intellectual warriors unquote for them the war against tyranny by extension must be fought on an intellectual battlefield otherwise as individuals they have little to offer the resistance they believe that if they merely present a better and more logical philosophy they will win over the masses to their side or even change the souls of the rather soulless Psychopaths creating the tyranny in the first place like magic they will have won the fight without ever truly fighting it sounds like a strategy right out of the art of war but really it is an intricate excuse designed to avoid risk an intricate excuse designed to avoid risk my emphasis continuing they have almost no experience with and therefore no respect for the concept of self-defence and revolution and they have no capacity to fathom what such an endeavor would entail this unknown scenario inspires fear in them a fear of struggle a fear of failure and a fear of death while taking action from a positive from a position of love for one's fellow man is indeed it is sometimes not enough in the face of pure evil the kind of evil inherent in the ranks of elitism and the globalist ideology it is important to keep at least one foot on the ground when building a movement of dissent and realize that while maintaining the moral high ground is our mount there are limitations to what peaceful resistance can accomplish depending on the opponent let me read that sentence again because it is profound it is profound and needs to be deeply contemplated by everyone out there it is important to keep at least one foot on the ground when building a movement of dissent and realize that while maintaining the moral high ground is paramount there are limitations to what peaceful resistance can accomplish depending on the opponent if you are not prepared to use both peaceful means and physical defense if necessary your movement will ultimately fail against an enemy without conscience once again I'm going to read that sentence again to let it sink in if you are not prepared to use both peaceful means and physical defense if necessary your movement will ultimately fail against an enemy without conscience never before in history have humans been so dismissive of the self-defense concept and I attribute this to clever conditioning and to an ingrained and powerful fear here are some of the most commonly her arguments against physical revolution and why they are either ill-conceived or outright disingenuous and here is point number one that the people who are psychologically in fear of self-defense and rebellion against tyranny always try to bring up is revolution morally wrong so he's asking this question revolution is morally wrong question mark is it so continuing with the article I I think that's the break music coming up is it yes okay so we'll continue this on the other side of the break ladies and gentlemen reading the article from Brandon Smith understanding the fear of self-defense and revolution a absolutely brilliantly written article we're going to pick up on the concept of is physical rebellion is revolution morally wrong on the other side of this break you're listening to what on earth is happening stay with us we'll be right back [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening dot-com we're reading an article I'm reading an article on air called understanding the fear of self-defense and revolution by Brandon Smith and I'm going to continue it right now with a section called revolution is morally wrong question mark I find the attitude of moral superiority of the non-violence crowd rather disconcerting at times and in many ways dishonest it is very common to run into non-violence proponents who are not satisfied with their own personal choice of pacifism alone in many cases they will attack or undermine other parts of the movement preparing for self-defense on the basis that even mere preparation is somehow akin to physical aggression these people are never satisfied until everyone in the movement meets their quote high standards unquote of activist purity in the end I think their position is less about a regard for peace than it is about a regard for their own egos people in general tend to support the formation of taboos as opposed to honest principles in order to gain what they see as the moral upper hand over others they invent a condition of arbitrary piety around themselves in an act of self elevation that does not constitute true morality anyone who makes self defense a taboo is not only living in a fantasy land outside the inherent structures of natural law he is also likely doing so because he enjoys the sense of social superiority such a position affords in this way many of the more irrational non-violence activists are in fact no better than the raving acolytes of the cult of political correctness hear hear physical self defense against tyranny is not only necessary but entirely honorable when the violence of an individual is forwarded by defense when a potential thief Rob's the wrong house when a rape is prevented by an armed and prepared woman or when a potential murderer is shot dead by a citizen who refused to be a victim our society Cheers but when someone suggests the same measures be taken against a violent and corrupt government people suddenly claim moral hazard there is no difference between the act of defending oneself against a common criminal and defending oneself against a criminal government and I'm gonna read that sentence again ladies and gentlemen let that one get hammered into the brain a little bit there is no difference between the act of defending oneself against a common criminal and defending oneself against a criminal government I would venture to say that self-defense is a moral imperative more vital to the survival of peace and freedom than any other we'll pick this up on the other side folks you're listening to what on earth is happening [Music] [Music] [Applause] [Music] freedom mat that's what it's all about [Music] [Music] [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening dot-com we are talking about the psychological fear of self defense that is so strong in the modern population due to social engineering and why people are afraid of even the discussion of the thought of rebelling against tyrannical government physically you know the last sentence here says it all that in this last section on this article called understanding the fear of self-defense and revolution by Brandon Smith he said quote I would venture to say that self-defense is a moral imperative more vital to the survival of peace and freedom than any other I mean I I'm in complete resonance with that sentiment that is that is 100% spiritual truth right there and people need to get that through their head that that is spiritually true that's the problem is you have religions like the New Age garbage movement pumping people's heads full of nonsense that there's no place for self defense in a civilized society I mean please the religion of stand down don't stand up for yourself stand down take whatever violence is thrown at you yeah okay yeah that's real spiritual you're so enlightened aren't you it's it's an absolutely deplorable garbage ideology that is based in self-loathing that is based totally in fear it's based in cowardice pure cowardice as is pacifism it's a deplorable self loathsome ideology pacifism I am all for peace ladies and gentlemen but I want no part of pacifism there are two entirely different things they are completely diametrically opposed to each other one of them fully embraces and incorporates the Sacred Feminine principle of non-aggression while simultaneously bringing in the sacred masculine principle of self-defense a true philosophy of peace that's based in both of those sacred principles pacifism on the other hand totally throws out in the trashcan the sacred masculine principle of self-defense and says somehow it's not valid well I beg to differ and anybody who wants to think that they're pursuing a spiritual path needs to get it right and understand both of those principles need to be in balance in harmony operating in union with each other so this whole section that I just read is revolution morally wrong my question to the listening audience is did the American revolutionaries during the Revolutionary War period were they doing something that was moral were they somehow conducting immoral behavior by rebelling against the British who were coming over here across an ocean and oppressing us at the behest of a psychopathic king taking people's rights away raping their women doing violence unto people in the street putting soldiers on the street quartering them in people's homes completely destroying people financially taking whatever they wanted whatever decree the King said was law was made in law whether it was moral or not whether it took people's rights away or not so did they somehow do something that was immoral by rebelling against that so-called Authority that totally criminal psychopathic government I beg to differ they did something complete morale that was based in higher consciousness which is called love the American Revolution was an act of love and if you don't think so you have your philosophy all twisted up and you don't understand what real enlightenment or real spirituality is at all not even a little bit so let's continue with this article Brandon Smith understanding the fear of self-defense and revolution the next section is entitled revolution is futile and the enemy is too strong question mark this is another fallacious argument that's brought up by people who are just cowards and want to say we should never even consider the notion of physical rebellion so here we go when anti Defense Initiative Li argue against the moral principles of physical revolution they invariably change tactics asserting instead that revolution is a useless endeavor that will only end in tragedy for the participants I see this argument as a product of brainless nihilism rather than rationalism and such a defeatist mindset invariably stems from cowardice rather than logic absolutely wonderful wonderfully written truer words could not be spoken nihilism is a powerful psychological force that destroys all hope and all positive pursuits it is essentially the act of denying success before an endeavor is ever undertaken nihilists ensure their own failure because for them every scenario is a no-win scenario to them I might seem like a blind optimist while they see themselves as realists in truth Pro self defense Act this are far more realistic advocates are far more realistic there is certainly a fundamental difference in the manner in which we look at the world when I and those quote optimists like me see a problem we look for a solution regardless of the scale of the threat and if we cannot immediately find an obvious solution right away we keep working until we do there is no such thing as a no-win scenario for us there is always a way to overcome an obstacle the odds of success are not relevant where revolution against oligarchy is concerned I would also point out the reality that at bottom it does not matter what the odds are in a revolution for a freedom when all is said and done you will probably be confronted with two choices in the face of tyranny fight and possibly die or surrender become a slave and probably still die those who argue against self-defense are in most cases trying to avoid the inevitability of this choice by creating non options and non solutions out of thin air this is the opposite of realism physical revolution requires a methodology of adaptivity and courage fear has no place in the mind of a freedom fighter and nihilism is just as foreign to him the goal of Liberty will be accomplished totalitarians will be defeated the size of the movement is not a factor we expect that we will be in the minority there is no other outcome but victory because we will allow no other outcome period if we are proven then we are proven wrong but it will not be due to a lack of trying and there it is folks I'll read that again the goal of Liberty will be accomplished totalitarians will be defeated the size of the movement is not a factor we expect that we will be in the minority there is no other outcome but victory because we will allow no other outcome period if we are proven wrong than we are proven wrong but it will not be due to a lack of trying in our age arguments of the technological superiority of the enemy are often brandished as clear evidence of the uselessness of physical resistance I think one could also make the argument that technological superiority in media manipulation and other fields could make nonviolent resistance useless as well I'm not really sure why nihilists cling to the notion that technology matters at all except that it perhaps offers an easy and lazy avenue of debate the enemy has Predator drones therefore revolution is futile in conjunction with oathkeepers I will soon be producing a video that will show the Liberty movement how to build their own working thermal evasion suits perhaps this will quell the incessant proclamations that drones and tanks and Apache helicopters mean anything at all in the face of asymmetric warfare if the enemy can't see you they can't kill you and for every high-tech enemy there is a low-tech solution of course I doubt this will mean anything to the nihilists who don't have the to fight for anything except their belief that fighting back is useless that's right Brannon because these people are cowards cowards and that's all it comes down to the next section is entitled revolutions are always co-opted question mark I have heard it argued by multiple sources within the Liberty movement over the land over the years that revolution is a poor option in defeating tyranny because of the cyclical nature of political and social change they claim that all we have to do is look back at history to see that even when a revolution is successful in removing oligarchy the resulting Republic is invariably co-opted years or decades down the road I agree to a point the problem is not that the concept of revolution is ineffective what these skeptics of physical rebellion tend to overlook or deliberately ignore is that no revolution in the history of man has ever gone far enough no revolution in the history of man has ever gone far enough each revolution has targeted the corrupt government of their day but no revolution has actually removed the elitist cabal behind those regimes the same cabal of elites that has bankrolled nearly every tyranny over the past several centuries this is in part due to the fact that knowledge of who these elites are was not widespread today for the first time ever mankind has full access to information on who the globalists are and what they want in fact the elites barely hide who they are or what their intentions are anymore one can simply look up the roster of organizations like Bilderberg Tavistock trilateral commission Council on Foreign Relations the National Monetary Fund the Bank for International Settlements etc at least in the Liberty movement we know who the real enemy is co-option is always a threat if you do not know who the enemy is a revolution against the Obama administration alone for example would be useless because President Obama is nothing but a puppet a mascot playing a role that's exactly right a good actor but a little less than that removing middlemen is a half measure and anyone who tries to lead you into revolution on the premise that Obama alone is the source of your troubles is probably an elitist leading you toward disaster if you are not removing the root of the threat the threat will persist now I'm going to chime in here for a moment the real root of the threat is the ignorance of the population it's not just the globalist cabal of elitists it is the mindset of the people who are so ignorant and don't want to be free they want to be ruled that's the main problem and that's where revolutions have stopped short they've allowed all of these ignorant people to just breed up around them and to stay here people who want to be ruled to stay where you just successfully accomplished a physical rebellion and I'm going to talk about that a little bit later on this broadcast when I'm gonna read a little bit of an article by Thomas Paine where he talks about Tories who were loyalists to the British crown during the time of the American Revolution and it parallels nicely with these couple of articles on you know guns and gun ownership and rebellion the fear of self-defense and rebellion against tyranny continuing with this section of the article called revolutions are always co-opted question mark co-option also occurs when people become obsessed with the idea of popular top-down leadership rather than bottom-up decentralized resistance if you are out there looking for the next George Washington on a white horse to save you from tyranny then you will eventually get him but he may not be what he seems beware of generals and top brass suddenly in supportive revolution beware of any notion of a military coup beware of any revolution that uses political party divisions as a motivator beware of any government with a central bank that wishes to bankroll your revolution stay decentralized and refuse any push for top-down leadership this is the only way to avoid co-option brilliant and true the next section in this article is entitled revolution solves nothing because mankind is quote predisposed to tyranny question mark the great lie being injected into the movement over the past few years is that removal of the elites will solve nothing because the real problem is the corrupt nature of humanity in general and that if we remove one set of elites they will simply be replaced with another set as if society is fatally predisposed to develop an elitist class this is the most vapid form of defeatist garbage ever regurgitate it by nine lists now I want to jump in on this paragraph here because I definitely don't fully agree with the sentiment that all we need to do is take out a small percentage of people the elite cabal the the globalists the dark occultists whatever you want to refer to them as and the problem will be solved I don't agree with that I don't know if that's exactly the type of sentiment he's you know advocating here but what I'm saying is without question the ignorance of the human population is the root of the problem and there are many people who will just step right into those roles I mean you just talk to people on the street you need to go no further than outside your own home and talk to some people in your neighborhood if you live in any kind of a metropolitan area and ask them will you trade places with the rulers of the world and in a heartbeat you'll get hundreds of people all around you saying without any doubt in their position right now this is not however okay inherent to humanity this is not human nature okay so it's not because we are predisposed to thinking like this it is because we are culturally engineered to think like this it is a program that is running that has to be disinfected from the human brain disinfected from the human soul and that can be done people can be re-educated by learning the truth by learning information about consciousness by learning information about themselves and how their minds work how their psyches work this is the occult information that has been held back by the elitists the Darko cultists to gain a tactical advantage over humanity and rule them because that population is completely ignorant of how those dynamics of nature work so I just wanted to say that you know that's my take on that they would be replaced by another set of dark Kabbalists if nothing changes in the minds of the people if nothing changes in the population spiritually so I'll continue with this article on the other side of this break ladies and gentlemen stay with us you're listening - what on earth is happening here on rbn we'll be right back [Music] [Applause] [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm I've been reading an article by Brandon Smith entitled understanding the fear of self-defense and revolution were in the last section called revolution solves nothing because mankind is predisposed to tyranny question mark and he started this by you know raising the argument that people bring up that you know Humanity is corrupt you know by its nature the corrupt nature of humanity in general and if we take out one set of elites then people will just replace them and you know we'll have the same problem as ever and I said that I do think that that is the case that that would happen but not because this is our nature but because people are so mind controlled and conditioned that they want to be like their own enslavers again this is you know the concept that they have given us their mindset a lot of people have psychopathic tendencies dwelling within them and they would change place with their enslavers in a heartbeat if only they could be the rules and that is not human nature ladies and gentlemen that is human conditioning and only a deep exploration of the self and human consciousness is going to change that mentality that mindset that soul sickness because that's what it is that sickness of the soul and that is not human nature we are not born like that so that's what I would add to that but continuing with the article the last couple of paragraphs first we have no idea whatsoever what life would be like without the globalist network because we have never lived in a society in which they have been removed even for a single generation I think early America after the Revolution is the only example I can find of a society free free most elitist controls and the prosperity that developed in that environment leads me to believe that removal of the entire elitist framework would result in undeniable positive changes for the world I I do agree with that why else would the globalist spend the past two centuries attempting to dismantle the Constitution and Bill of Rights second if mankind is so predisposed to be coming naturally subservient to an elitist class why do the elites feel so compelled to manipulate the masses with complex forms of propaganda and fear tactics exactly why go through all the trouble of engineering economic disparity and war what is the point if we are all dumb animals just waiting to be ruled the argument is nonsense the elites spend billions of dollars if not trillions of dollars in capital and go to such extreme and go to such extremes because oligarchy is not a natural state of man it is so unnatural that the elites are forced to expand constant energy trying to keep us from progressing away from the slave dynamic exactly from the slave mindset I believe revolution is indeed necessary a final revolution to remove the influence of the globalist cult once and for all not only their puppet governments puppet political parties and puppet despots but the globalists themselves will bad men still exist in the world of course they will but the kind of advanced and well-organized internationalist machine that exists today will no longer exist to save a patient poisoned to the extreme the pace the patient must be purged until his body can recover on its own the elites are a poison that must be physically removed from the human system now there are some powerful and brilliantly written words and I commend this gentleman on the writing of this article I'll post it with the podcast folks my suggestion is to spread it to as many people as will read it because Americans need to read that and understand what's written there it's probably the best article or piece of writing I've seen since Aquinas wrote his small essay called on Liberty so I want to read one more small thing from Thomas Paine from the crisis in 1776 after this break and then we'll go to the phones ladies and gentlemen stay with us you're listening to what on earth is happening we'll be right back [Music] the community side we don't dare speak Wow between us [Music] as cold of the wall welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm so I just completed reading that great very well-written article by Brandon Smith entitled understanding the fear of self-defense and revolution and it all really comes down to one dynamic folks it always has only ever come down to one dynamic and that's cowardice something many people just don't want to hear don't want to talk about that's that's what this is all about you know I mean if you haven't figured that out you're not paying attention good people are just loath to do the right thing if it's gonna cost them something especially if it may cost them something physical like their well-being or their life you know all these arguments that these pacifists bring up are always struck down by simple logic revolution if it's righteous isn't morally wrong I mean by definition if it's revolution against tyranny it's something that's right that is a right so what if the enemy has stronger technological capabilities what does that mean you lay down the tyranny you lay down the evil because you think you can't win that's just pure cowardice you're not going to bother to try just because you think it'll be co-opted in the end it's a defeatist mindset it's a defeatist attitude and this totally poisonous worldview of human nature oh we're just evil by our inherent nature you know human beings are just bad that we have a corrupt nature and we're just predisposed to tyranny so so we should just live under it and accept our our fate right we should just accept our lot in life you know it would be great if there was a place where if people wanted to go and live like that they can go live under whatever kind of bondage they want but unfortunately there are people who want their freedom and are living in the same place that's why I have a huge moral problem with mindsets like that with arguments like what these pacifists come up with or these nihilists come up with where these moral relativists come up with if it only affected you you're entitled to all your beliefs anything you want unfortunately there's other people living in the world that your sick twisted mindset is affecting you're affecting my freedom my rights my life my property therefore I have a big moral problem with what these kind of people are advocating in the position of just lay down to tyranny no I don't think I will because what it comes down to is there just cowards trying to justify their immoral position of letting evil run rampant want to hear the truth of the matter that's it folks that's all it comes down to so I want to read a quote by probably the greatest mind to have existed on the American continent if you ask me and that is Thomas Paine who if you want to know who was one of the architects the real architects of the American Revolution you need look no further unfortunately most people aren't familiar with his writings because they keep his name out of American history books largely they don't want people understanding what Thomas Paine understood they don't want anybody becoming as much of an extremist as this man was an extremist toward the truth because he was in general and anarchist and didn't believe anybody had a right to rule didn't believe we should have instituted a new government wasn't there at the Continental Congress to bring in the Constitution you know he just wanted us to rebel against the crown and live free on the land period the end which is how it should be and how it should always be god forbid real freedom you know what are we talking about here you know that's sacrilege sacrilege against religion of authority there is a absolutely phenomenal set of writings by Thomas Paine called the American crisis or simply the crisis folks if you haven't read this you need to because it will give you an idea of the mindset of the of the brilliance of this man the first crisis newsletter article or essay whatever you want to call it was written on December 23rd 1776 after the American Revolution had already begun long after probably over it was owed this is over a year now after Lexington and Concord the battles of Lexington and Concord and in this paper Thomas Paine says this regarding why the enemy the British troops have chosen to make their landings or their seat of their war against the colonies the middle the middle states before they were States the middle colonies and mainly the middle colonies were New York New Jersey Pennsylvania and Delaware and they did not choose to land their troops largely in the northern the New England states or colonies or the southern ones they eventually came through the southern states as well but um they didn't choose to attack New England first which is where the revolution started they and they did this strategically because they knew they wouldn't have any ideological support among the population in the New England colonies whereas if they landed in a place where a lot of people were benefiting from the interaction with the crown making a lot of money were set or very rich were not being oppressed the way that the people up in New England were being oppressed that they would receive ideological support for their effort by the local populace or in other words the Tories those worse the loyalists to king and country you know they were still loyalists to this psychopathic boy sitting on a chair thinking he's God on earth a psychopathic punk clown little boy calling himself a king over men I mean you have to be joking anybody that thinks has ever thought anything like that is legitimate as a joke they're a joke of a human being and all these Tories living in the middle middle colonies went right along with the the whims of the King many of them and and I'll read this article and then I'm going to comment on it because it is profoundly significant to why revolutions and specifically the American Revolution did not succeed in the way that it could or should have and why we're probably going to need another one so here's the quote and you know what as a matter of fact I mean recognising the brilliance of someone like Thomas Paine and his writings I think on the next show after the conference in two weeks again I will not be on the air live next week because I'll be at the free your mind conference speaking and hanging out with the other speakers and the attendees so there won't be a show next week I'll probably replay you know a recent show but in two weeks I think I'm gonna read the entire paper the crisis number one by Thomas Paine but this is a small excerpt from it that I just want to bring up here tonight because of how nicely it parallels with the other articles I've read and here's the quote why is it that the enemy have left the New England provinces and made these middle ones the seat of war the answer is easy New England is not infested with Tories and we are he wrote this from Pennsylvania from right here in Philadelphia actually where I am at today and you know he's referring to where he's at in Philadelphia Pennsylvania that it is infested with Tories as he says continuing with the quote he says I have been tender in raising the cry against these men and used numberless arguments to show them their danger but it will not do to sacrifice a world either to their folly or their baseness the period is now arrived in which either they or we must change our sentiments or one or both must fall and what is a Tory good god what is he I should not be afraid to go with a hundred Whigs against a thousand Tories were they to attempt to get into arms every Tory is a coward for servile slavish self-interested fear is the foundation of Toryism and a man under such influence though he may be cruel never can be brave Thomas Paine the American crisis December 23rd 1776 now there are words of wisdom and just substitute statist for Tory or better yet just substitute willing slave in there one who goes along with their enslavement who doesn't rebelled against it then you'd really have something that is not only accurate but is appropriate everywhere every Tory is a coward every statist is a coward every willing slave is a coward that doesn't rebel against their slavery every ruler follower is a coward so appropriate to the discussion about understanding the fear of self-defense and revolution the psychological dynamic that is at work is cowardice that is brought about through self-loathing and through conditioning people to believe that somehow they should just accept their servitude or somehow they deserve it and only a self-loathing person can buy into bull crap like that that someone is deserving of their slavery imposed upon them by Psychopaths in two weeks I'll read that whole article because it makes so many other brilliant points but I want to take calls on the air tonight and the calls again I'll give the calling number once again the callin number to join us 800 three one three ninety four forty three I want to hear from people on the entire topic of gun ownership of the true meaning and purpose of the Second Amendment the the presentation that I gave over the last few weeks and on the psychological dynamic of why people fear physical rebellion I also would love to hear from people in places where the population has been disarmed to firearms and can really not offer any true physical resistance should their government become completely tyrannical but really all governments today are completely tyrannical you know it's their way or death or escalating up physical violence unto death which is called living under total coercion which is slavery if the truth is told the way it really is when people are loath to admit that because what that implies then is responsibility to physically do something to act and nobody wants to be the person who says something needs to be done about this not just talked about but done so let's go to the phone lines let's hear from Gumby in Colorado you're live on what on earth is happening welcome yes okay most of uh I must have gotten gotten that confused so go right ahead Jeff Jeff and Cambodia I spoke to you I think couple weeks back welcome back to the show that was a couple weeks back we got caught up in the end there I just want to let you know that I'm very glad that you're out there talking about gun ownership to the extent that you are however and you can tell me if I'm wrong here I've heard you're a lot more optimistic about the future than I am when you mentioned cowardness and you mentioned for example the young generation being if taught about Gandhi bring the exclusion which I have no problem but if you're going to talk about that to the exclusion of the Colonials which in my mind was the only contract that humanity really ever had at the protection against tyranny then what you've got is you've got a mind control here is that yes we've got a hundred million gun owners now and in America and you know we'd like to think that that'll make a difference however they don't care about those people that was waiting for this generation to die off and they got the young young kids who will take the microchip for free internet bet on it and the furthest thing from their minds at the ownership of a gun no matter whether their minds are absolutely infested with with cop out right communist propaganda in the schools today I mean a friend of mine I don't know if he wants me to mention his name on the air but you know so I won't I'll just you know an anonymous friend who is in a college here locally around the Philadelphia area recently told me that hi I'm sorry college professors who were teaching history in local colleges are telling their students that people like Joseph Stalin and Mao say Tung have it just have a bad reputation laid upon them by most modern Americans and they weren't they weren't as evil as they are portrayed to be the two largest mass murdering dictators in the probably the last several hundred years being told to our children and schools that they weren't evil people you know and the thing is when you look at it you just so wonder you have to wonder give this next generation coming along wouldn't put up any resistance whatsoever I personally think no I think she's open so I'm giving myself already your spirit chef's there will stay with us through the break I'll let you continue on the other side ladies and gentlemen you're listening to what on earth is happening here on rbn we'll be right back [Applause] [Music] [Music] [Music] [Music] welcome back everyone you're listening - what on earth is happening here on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm we're taking your calls for the duration of the show this evening the call-in number to join us toll-free 800 three one three nine four four three we were talking to Jeff in Cambodia and you know he was alluding to the fact that he believes that the minds of the youth are so taken by the indoctrination system of public schooling that it's gonna be very very difficult to get enough of their minds freedom oriented enough to really wage this ideological war let alone a physical one because so many of them are put off and told the guns are somehow a bad thing don't get involved in that don't understand self-defense or real freedom and I you know came back with that a friend of mine told me recently that in college classes in history children that the classes are being taught that Joseph Stalin and Mao Zedong were just well-intentioned people that were just misunderstood and just didn't get the things that they wanted to accomplish through in the right way and they just get a bad rap by modern Americans you know two of the biggest mass murderers who starved out and executed more people than any other totalitarian regimes they're being taught in American schools that somehow these were just well-intentioned people and they were just misunderstood by by people in a wider sense and they just get a bad reputation in the modern world imagine this being taught in American schools it's an utter disgrace Jeff are you still with us on the head and the problem is as you well know it's a heck of a lot more than just the schools at every possible angle on the internet anywhere you go I massive percentage of what you see is going to be anti-gun anti-freedom agenda now we people like us I would say and you may have commented on this on one of your early projects we tend to in our own minds exaggerate how effective we are being I hope I'm wrong about that but after you've intimated before is a minuscule percentage of the population that even thinks along the lines that we'd you without without a doubt he's often without a doubt rationale I have people ask me all the time well Jack what you're saying is true why is Alex and Steve quale and and you know mark why are these guys not dead well it's very simple because the powers that be don't need to kill you even killed me because I need to do is wait for this generation to die off because they got the next one microchipped back in fact they would be if they did try to do something like that they would be lending incredible credibility to the message that we've all spoken thus far and they don't want to do that you know they they want to marginalize us through ignoring us through not giving people in the true alternative media any real press so I agree the numbers are paltry that doesn't mean we should give up but we have a long long long way to go and we have to increase our numbers by speaking the truth to everyone around us that is what the great work is all about Jeff I want to thank you for the call yes yep I want to thank you for the column for the insights that you brought up really great ladies and gentlemen another hour of calls coming at you toll-free number to join us 831 394 43 stay with us everyone see you on the other side of this break [Music] [Music] [Music] freedom man that's what it's all about [Music] [Music] welcome back everyone you're listening this evening what on earth what's happening or here on our Vienna I'm your host Martin yes my websites what on earth is happening calm mind control natural law the occult looks like we're having a pat always oblem that effect with the dropping on the intro mover what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascoe [Music] alright Thera Co is finally ducking back down so into the third hour of the show we're gonna take your calls during this hour the toll-free number to join us 800 three one three nine four four three once again toll-free 800 three one 394 43 I'd like to hear people call in to talk about gun rights ownership gun ownership rights I'd like to hear them talk about self-defense explore more this psychological fear of self-defense and physical rebellion against tyranny you know are our ancestors didn't have a problem with it at least not here in America they didn't you know they did the right thing when the time came it might have taken them a while to get their act together and get it in gear but you know they beat back the tyrants once and I think it needs to be done again it's gonna need to be done again at some point unless we can really do the great work of putting the mindset of true freedom into people helping them to understand what rights are helping them to understand natural law but you look around at the colossal ignorance around us it seems highly unlikely the numbers that we have on on that front are paltry compared to where they need to be to really effect a change in consciousness worldwide I'm not saying that that means we need to physically you know do this now but I'm saying the time is going to be upon us at some point and people need to be prepared for it and they need to make sure they do not give up their right to self-defense ever for any reason no matter what happens and now is the time that is rife to watch for false flag events and human sacrifice ritualistic events that are designed specifically to it to inject fear into the human mind on a mass level so that people will willingly lay down their rights and if you see anything like that occur no that is a staged event I mean as soon as it you can guarantee that's a staged event like all these false flags always are so let's continue with the phones and let's hear from Tom in California Tom you're live on what on earth is happening welcome to the show yes yeah great show tonight are you still there yes I said thank you oh okay my question is is the tyranny you know I got a letter I haven't paid my taxes and I you know I'm a small kind of guy do the swap meets sell surfboards and that kind of thing right I'm just wondering if they're gonna be breaking down my door and dragging me away with their guns because it's been about 10 years since I filed that'll make a whole lot of money you know and I'd listen to a podcast that you had last week and you had a caller that called in and you mentioned that like me you just pay cash and take cash when you you know do your work etcetera etcetera have you have any type of problems with I won't file any paperwork I won't put my name on any paperwork that says that there's gonna be a middleman you know so that's that's just how I do things when I conduct business with people you know it's a it's a verbal contract between two sovereigns and that's it you know right now I I don't give you permission to tell anybody what you paid me so right right I understand I understand that but I mean if it's been a while like me and you haven't filed anything and finally they're catching up with me I mean have you had that same problem or or no I have not I have not and don't really anticipate that but they must have tracked some kind of paperwork down that you you have filed at some point or signed what yeah it's um you know you know in the 90s I you know I filed and then I hadn't dropped off the planet myself I'm just wondering what they expect and that is a come at people with violence for that in the past so I'm not going to you know just you know make you feel good and tell you that that's not outside the realm of possibility because it most certainly is and therein lies the problem the fact that somebody would come at somebody with violence for you not paying them an amount that they say you must pay them that's just extradition it's theft you know it's not voluntary it's based on coercion and violence and anybody would say that that's acceptable and just watch it happen is unacceptable you know and you know I'm a small kind of you know time guy just doing swap meets selling surfboards used bikes you know I live by the beach and I live you know try to fly under the radar and they just finally caught up with me so I'll just kind of see what happens but I appreciate you and all the work that you do and you've got a great show and I love the Thomas Paine and do read his whole thing you know after you're at my absolutely I definitely intend to he was a brilliant brilliant thinker and more people need to read his writings for certain so Tom I want to thank you for that call great points that you raised and yeah I mean it's a shame that this is the society that we live in and we consider it civilized where people come at people for violence for not paying extortion fees called taxation you know just outright theft you know taking choice out of the equation taking freedom out of the equation and saying whatever number we arbitrarily set you'll pay it you know because it served them I mean let's call it what it really is that's serfdom and slavery period and if people don't see it as such they don't see what the truth of the matter is let's move on to another caller and let's hear from Elizabeth in Connecticut Elizabeth you're live on what on earth is happening welcome to the show hi thank you I wanted to thank you very much for the video you can post it I learned a lot the one on the second of the real meaning of the Second Amendment I learned a lot I've been pretty indifferent to gun ownership I guess on my life I know usually most people are have you know one extreme opinion or the other and I'm yeah it kind of it it's been a catalyst for me to sign up you know to get classes and great but I'd also like to learn as you know other methods of self defense sure I think that's very valuable as well I mean you know martial arts hand-to-hand combat things like that you you can't go wrong with that kind of knowledge you know at your disposal so it's also you know something that will keep you in good shape and it'll keep your mind in good shape as well so I think it's definitely a valuable pursuit to get involved in other areas of self-defense as well yeah absolutely I think my problem has been actually finding some ways to do it I know the gun class is out here I booked out for another couple months I can't even find out for that it's actually more popular than people would expect you know like you said that they're they're packed full and it's almost like a waiting list where you're at a lot of people are taking interest it's a good encouraging sign actually and that they can also be expensive you know that's why you know in local groups that I work in I volunteered if anybody is just not familiar with firearms at all and just uncomfortable and you know just once basic instruction I would say I'm no you know expert super expert by any stretch of the imagination but you know I have a decent amount of knowledge on some basic platforms and you know would always be willing to help people out that you know our Liberty minded and I've put that offer out there too many people locally at least but you just got to really get involved with people that you know you know are of the same mindset who you know you can trust after being around them for a while and you know just uh you know go go to a range with them you know make it like a fun thing to do amongst people that you hang out with that's really what's going to bring some camaraderie amongst people who really care about the right of self-defense and the right to keep and bear arms III think it's just you know we need more community when it comes to this whole dynamic instead of people being atomized and on their own with it you know get together and you know make it a social event you know I think it'll it'll definitely bring more value to the entire endeavor yeah thanks for that suggestion I'm having a hard time kind of getting started I you know I didn't grow up with done some I don't I don't really have a network of people that use them my daughter's boyfriend does but you know with his schedule I don't know if that's something I should ever get in contact with him about but yeah I like that approach of you know finding people like that sure you know um the same is true for me my family didn't stress any kind of you know gun rights a gun ownership rights or I didn't have a background in that I was in the scouts when I was very young and you know shot basic rifles there but beyond that I you know picked this up recently a financial difficulty is also a big struggle when it comes to this because it can be very very expensive so that's another thing that people have to take into consideration you have to start according to your means right now and you know starting is is the most difficult part of it but again my basic suggestion would be just get in touch with some people who have already begun that endeavor ask for help ask for help from people that you think that you know who are reliable and responsible of course and I guarantee they'd be all too happy to help help you out and get started yeah and I understand laws can differ from state to state and I hear that there's some laws proposed on ammunition the ending ammunition I don't know that that's obviously another motivating factor you know the fact that they're talking about being body armor limiting ammunition yeah I don't know anything about this I'm just learning but it's just amazing that it's just amazing how many and runs they're trying to do against the Second Amendment that you know basically states the right to keep and bear arms shall not be infringed period I mean there's nothing after that you know that means you cannot stop somebody from maintaining or carrying protective weaponry the end-all laws that are regarding that are invalid in every state and no one seems to understand that you know as soon as you as soon as a lawmaker tries to pass a law that says you may not have this defensive weapon of any kind it's invalid immediately on its face and that's what we need to get across to American citizens and people throughout the rest of the world to you know this is an inherent human right period man cannot take that away from humanity period it didn't come from man you know that's that's part of the whole root of the problem is people don't understand rights or where they come from that's that's the main crux philosophically of the problem that we face right yeah thank you so much for you know enlightening and that deeper understanding I never you know hearing some about some of these laws you know these proposals going on always bothered me even even not being a gun owner and hearing that going on was just to me a little you know that that's absolutely that's just fishy right there and I saw that that really just got me right there and I just want to thank you again you have some video that deeper understanding and I realize it's gonna be a constant fight for my freedom in that way it is that's right I want to I want to thank you for for those sentiments and I think you're really on the right side philosophically and I'm glad that you got a lot of value out of the Second Amendment presentation so thank you so much for the call thank you you got it great let's hear from Tom in Toronto Tom you're live on what on earth is happening welcome hey Mark uh I was just thinking about what you said earlier you know about the elite and you cut them down and then another one in the place I was thinking about the symbolism with the Hydra in mythology yes no with Hercules he cuts off the head of the Hydra and they grow back right yeah yeah anyway it's very very symbolic of that dynamic for sure you know that that does you know kind of bring to mind that there's a lot of people that just want to step right into that role you know they are of that mindset they have conditioned us with that mindset socially and you know I tell people just go out on the street and talk to some people and say hey would you uh trade places with some of the richest most callous people in America you know if you could get to the the level of you know the financial level that they enjoy and they would do it in heartbeat in a heartbeat you know I don't want any of their money I want to be free and left alone the end that's it you really want to know what I want that's it it's you know it's it's like in the first article today the guy was saying I don't carry a gun because I'm in fear I carry a gun because it allows me to remain unafraid because I know I have the ability the responsibility to deal with whatever problem may come my way when it comes to physical violence or coercion and it allows me to enjoy the number one inherent human right which is the right to be left alone I agree I was actually somebody told me once you know like if we all own guns ooh be chaos I'm like back opposite wow that's big brainwashing right there yeah why the chaos breakout now people can't defend themself boy when I'm around all my friends who are gun owners it must be a real chaotic event let me tell you you know we're all sitting there armed and the chaos that breaks out let me to throw man you wouldn't you won't even be able to imagine it the level of chaos I mean it's just this is how brainwashed people are it's so ridiculous you know well yeah like who else but the government can commit such large-scale violence using wars because they have the funding from taxation you know exactly the average person who owned the firearm you know all he wants to do is protect protect his own stuff the own body you don't that's right better Tom we're coming up we're coming up to the break hold on through the other side I'll let you continue on the other side of the break ladies and gentlemen stay with us you're listening to what on earth is happening we'll be right back [Music] we Oh hi welcome back everyone sorry for that delay there you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening comm we were talking in the last segment from with Tom from Toronto Tom are you slow with us yeah okay I'll let you continue with your thoughts there and then I can move on to another caller okay yeah so like I was saying taxation is only way that large-scale violence can be conducted because wars are so expensive so really a government or some entity that takes from others the only one that can continue a war or the mass amount of resource expended in the process without a doubt I mean imagine how much of all of that confiscated money is going to just control in in whatever way they see fit to do it and then they can print money as well you know they can print as much money as they want and use it for control purposes you know we're funding our own enslavement which is why people have to say no and stop doing it you know just stop contributing to what these Psychopaths want people to do you know I I just won't do it you know it's it's most people just don't have the courage to just live a life like that they just won't do it like I'm not going to take part in that system where I'm contributing to that I don't care what happens to me that's the bottom line the bottom line it all comes down to do you care more about comfort or do you care more about freedom and what's right the end that's it and people can say whatever they want that oh if I go into a store I buy something their sales tax associated with it I'm still paying it I'm minimizing it to the extent that is within my power to minimize it you know nobody needs to tell me I need to go and live without technology live out in the woods someplace no you go live out would someplace somebody that says that to somebody you know I'm minimizing the negative damage that I do to other people by my refusal to pay the bulk of whatever I make through my contribution of work you know and that's what I can do you know this whole argument well you know do nothing well watch sit there in a corner and rot and die you know and and and you know not eat not do anything you know because somehow you're gonna be contributing into the into the system yeah I have to live among it to try to change it that doesn't mean I need to be involved in it you know I'm not involved in doing it but I try to minimize my impact as much as possible so I mean I hear I totally hear what you're saying more people have to recognize that this these are resources that are being confiscated under duress are being put right back into the work of enslaving the very people who are paying that money without a down that book on that point as well I agree you know not only does it like really the ownership of like crazy amounts of land contribute to large-scale crime but also a small scale crime how many people you know we're just like committing a mugging or just starving to death they don't really have an option like oh you know I could go out into the field get some land and start growing my own No all this land belongs to us right oh sure the the claim of the ownership on land that isn't even being used for anything you know I know it of like a contradictory to the whole concept of ownership so people aren't using it and yet they're keeping it from other people it's not really a word Emet ownership yeah well Tom I want to thank you for the call and for the points that you brought up thanks so much and let's move on and let's hear from Jonathan in Kentucky Jonathan you're live on what on earth is happening welcome words of encouragement that is speaking knowledge don't help with the action without a doubt yes and if you guys are anybody was listening to radio station you need a bass harm and I'm not saying this to be invoking any type of fear sure but you need in a various weapon nine years in the industry so I went first firsthand with people who are insurgents which were the US military inserting themselves and I've dealt with guerrillas who are locals and you need at least one first get a network going with your community you need to read out he is you know a part of the system and it was like minded and you need to invest into a firearm I would recommend if you are cost efficient to get a SKS even their friends throw down two hundred dollars together and you can split a thousand rounds of 7.62 by 39 stock up on some twenty around Tapco magazine you that are about pulls off degrees but you know combat right at six plus one an excellent I always get Jonathan stay with us stay with us through the break and I'll let you continue your thoughts on the other side ladies and gentlemen you're listening to what on earth is happening we'll be right back [Music] you know today disguise a knife night divine today right welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening dot-com taking your calls through the rest of the show toll-free number to join us eight hundred three one three ninety four forty three we were talking to Jonathan in Kentucky Jonathan I think you were recommending to people a choice that you thought was a good one for a semi-automatic of the Russian SKS which is chambered in the 7.62 by 39 variant and you know is a pretty inexpensive and would probably be a good choice for a person getting a first semi-automatic rifle Jonathan yes yeah there you go yes and I would recommend they'll have different names on them Noriko that's usually Chinese but they're all formatted pretty much the same you need to get something to hold magazines for an infantryman combat load is six plus one or seven mags but you can downgrade depending on weight you want something to hold magazines which are the device that holds your bullets right and you want to sell a pouch to hold your empties and you want to have something with water and you want to go out with your friends and wear it all day and practice shooting with it and you want to learn Marvel control and charger safety so you won't want to sleep your buddies when you're practicing and you want to keep your finger off the trigger until you're ready to shoot there you go no no ladies and gentlemen do you know what Jonathan from Kentucky just described there he described a well-regulated militia continue and not only do you want to train the shoot but you want to train just having the weapon with you so find some of that lives in a rural area and just walk with it walk with your friends practice walking in what they could say in military terms patrolling but just get it get a feel what it's like you'll get exercise you'll connect with the earth and you'll get to learn the environment where you live and you want to start practicing with your friends and you need to find something lizzard rural area that yes and combated everyday I call when you're in the deep urban jungle as I am but I don't think that yeah I would encourage if you if you can do it absolutely take advantage of that without a doubt that's good advice yes sir I'd just like to add one more thing Marcus's okay now I know synchronicity has a lot to do the things you hear the things you see I just wanted to make one comment in natural law I would perceive to work that if you don't do any action you were forced to make a reaction and I just wanted to say that and when I all got out of the military my life stay in the military I just want to tell you this is kind of odd but uh I was going to my armory that day and um the road was a dead dog and I went on the neighbor's house and asked them if that was a dog and they said yes it died and I drug it off the road into the grass and when I left and got in my car it just hit me how symbolic that statement was Wow I don't know if that if that connects with you at all but I just thought it was very symbolic for it being my last day in the drogon dead dog off the road amazing I mean like synchronicity and you know symbolic events like that that you know if you're conscious enough to pick up on them they can have a profound impact on your consciousness and yeah yeah I mean that it makes sense to me so and I think and I just want to tell people the reason why I say to go outside it's not so much the freedom of using your firearms is that you really need to connect with this planet and I know that sounds hippy but the only way you're really gonna know what you have is if you start connecting exactly I got like absolutely Jonathan thanks so much for the call thank you good advice there you know that's what we do need to do we need to prepare not put all our eggs in that basket put them into right action into teaching people in a learning for ourselves and changing our own minds and then helping others to change theirs but you know there has to be that preparedness mindset there as well and the advice to connect with nature and know your surroundings is also very sound so great call there let's hear from Josh in California Josh you're live on what on earth is happening welcome hey Mark and hear me yes I can well I make this sort first I just want to say it huge thank you to you I I've listened to every episode of the podcast I just finished 189 yesterday so I don't some listening live as a treat to myself first couple years of hard work and that's been amazing man I just everything you said for episode 1 2 till now has really resonated with what I already knew but hearing you say it helps me come into a deeper understanding and now I'm trying to communicate it to other people so thanks a lot man for slugging through with you know teaching people a difference between right and wrong you're very well someday thank you for the compliment yeah absolutely maybe someday we can get out of kindergarten and start you know dealing with the graduate level material that we deserve to think about but um anyway I'm just on the note of guns I wanted to tell you that I grew up in a very like typical American liberal liberal kind of household and

California and I'm doing the hard work of admitting that I was wrong which I think is most important thing people can do and realizing how conditioned I am to happen anyway so um you know not even consider owning a gun and thinking it's negative everything and I'm actually actively researching different kinds of firearms and getting ready to make my first purchase and it is largely thanks you so it's wondering you to know that this is not falling on deaf ears and there will be a hundred million and one gun owners in America there huh that's fantastic and you know trying to talk about this with people because even though I'm still getting used to do personally owning a gun and cleaver like me really quick that you know obviously gun control is just centralizing of gun ownership by the state and it's the moral and everything now I'm trying to talk about Iran I'm just especially the state that you are in unfortunately Josh I mean yeah well I wasn't really the worst offender probably next to nosey yeah I was eyeing your a K and looking at Larkin roads they are thinking well I love all of you but apparently that's not currently an option because the people just love their slavery over here is it's very rough that the two were States I would say are California and New Jersey but New York and Connecticut seem to be trying to catch up Massachusetts as well and even Maryland I mean there's some really egregious transgressions against the Second Amendment going on in many states at the same time there's some good positive reinforcements of the Second Amendment and gun you know ownership rights going on in many states I think eight states in America have passed legislation firmly solidifying the right to keep and bear arms in their state legislatures so there's some positive things going on on that front as well I think people need to put a lot more pressure just in general on bringing up the discussion of the inherent nature of the right to keep and carry defensive weaponry you know I mean I think there was a there's a state or at least the some municipalities that are trying to get do away with concealed carry permits because they just say you know carrying a defensive weapon is a human right period it's it's not something that can be permitted or you know decided on whether to allow somebody to do that you know and I'm totally in in agreement with that I don't think we should have concealed carry permits you know getting permission from the state to engage in a right I mean what is that you know that's just the omen right and it'll be walking permit react on that yep exactly yeah I actually looked it up and I guess the county I live in is like a may issue for concealed carry permit and I looked it up in there in the county of you know hundreds of thousands of people there I think 80 80 or 90 concealed carry permits this year that said Wow dad yeah that's how it is in the state of New Jersey they have the May issue concept instituted in that Nazi controlled state as well and it's a very extreme rarity where they will issue a concealed carry permit you know if you don't give them adequate reasons according to their definition of what constitutes the right to concealed carry then they deny it yeah I don't want to march into the police station here and just ask for a reason you know the point of them and say you're the reason I need exact Terry perfect huh that's one of the best reasons at this point where we're at you know cuz they're trials just set precedents just like the SA and SS did in Nazi Germany that you know if you dis disobey your commanders on the street you'll be summarily executed that's really where the whole thing is going ideologically that's what they want to psychologically set in the mindset of the people and it's it's just disgusting what's going on you know we're losing a thousand citizens a year to summary execution without trial by police in America I mean the rest of the world has to be completely laughing at us that we're taking this garbage but Josh great points that you brought up and I I think it's really really great that you turned your mindset around regarding that and it really shows your Constitution to be able to do that and admit that you were wrong about certain points of view and then actually take action to to remedy that so my you know congratulations on that hey Mark you're doing a great work thanks so much you too all right let's hear from Ivan in Phoenix Ivan you're live on what on earth is happening welcome to the show my friend hey Mark in a while it's great great to talk with you hi how have you been alright okay a little bit busy here and there I'm actually from work tonight since I changed my days off for this week so that I can make it out to the conference Wednesday Thursday or Friday looking fun with the scenes on yep just real quick before I stepped off the phone here I recorded a couple of new podcast episodes and my team was a truce mine reality a little too episode a little presentation if people who are interested in maybe catching that they can hear it on three or nine az.com and it's also on itunes but i kind of touch on what you recall Melissa the last time I spoke to you I mentioned something about helpers and that kind of over the lines with people like us that know what's going on and what needs to be done and sharing it with others so that's that's the concept I threw out there in that podcast and then also on with your topic tonight I'm noticing within the last six months a lot of the TV shows and films that I'm watching I'm really picking up a lot of a lot of secret masculine and Sacred Feminine topics in the movies where they show a lot of the women defending themselves exactly you know it's actually taking action you know and even this last insurgent film that was very had a good theme at the end you know that the divergence they were considered a people that are odd and different but as it turns out there's a little spoiler alert as it turns out at the end of this movie that people that are divergent or different were the one that were part of an experiment to see if humanity can still generate creative original people and then all the other factions that were you know believers in government believers in religion believers in science they were a part of the problem lack of originality lack of creativity so you know that that was pretty good and this movie sure I've heard really great things about the our allegorical content of this film as well I haven't checked it out yet but I definitely intend to write and then going back to some of the classics that you've talked about I recently rewatched the Matrix trilogy and everyone knows about your original one all the allegories in there but I was very pleasantly surprised with third Matrix trilogy Matrix Revolutions and that hinted strongly to malicious also because when the Sentinels attack Zion not only are the soldiers or the Warriors or the fighters fighting you see the women the women are creating explosive the mozu there they're having attack again showing that it everybody you know with ability was also brought up in the last Hobbit film the Battle of the five armies where the women became involved in the in the effort to fight against the the you know insurgency of the orcs and you know they they took up arms as well toward the end of that fight so that was another a Jupiter ascending also had the theme of you know the

the the sacred feminine aspect of having to care for a wider aspect not just you know yourself and your family dynamic but care for all which I thought was a good theme within it I didn't like the implementation of the actual film so much you know dramatically but the the the underlying theme was was excellent that she had to make the main heroine of the film had to make a decision between whether she was going to protect her own and her family's interest or whether she was going to extend her care to a wider extent to encompass all of humanity which I thought was a good theme and then also off like on social media without other Facebook videos that we're seeing with the police brutality and press just recently we saw one yesterday or the day before where there was a high-speed chase going on and the car that was being chased crashed into a couple other civilian you know cars that were parked there and two individuals came out of one you know the vehicle that was struck and they pulled the guy out of the car that struck them and you know held them down until you know unfortunately the cult members too interesting but that also showed you know regular people taking responsibility and you know I'm not just standing there with the camera phones and waiting for somebody else you know wrong interaction and and did something and if that if that can be done with you know data rounds into them I'm hoping that people can step it up you know and so uh more important situations like when police are killing other people instead of recording it to jump in and actually start stopping that absolutely and that's pretty much all I got for today I got to start heading back to work but I'll be on you this weekend and yeah that's about it absolutely I haven't always a pleasure to hear from you and I'll see you at the free or mine three conference this coming weekend all right take care Mike you got it all right let's hear from Paul in Montgomery Paul you're live on what on earth is happening welcome thank you sir how's it going going doing well yourself very well sir I was prompted to call by that sweet young lady that was talking about considering owning a firearm yes and it just struck me you know because ver honesty and and I am 61 years old I've lived most of my life with the policy of not owning a fire firearm until a couple years ago when I realized for obvious reasons I needed to change that policy and I did so I began to do the reason to do the research and so I just want to pass on a couple introductory items that may help her sure I'll hold on to that through the break I'll let you continue that right on the other side of this break ladies and gentlemen stay with us you're listening to what on earth is happening we'll be right back [Music] [Music] welcome back everyone last segment for this edition of what on earth is happening we were talking to Paul Paul you were just about to give some advice for a potential new firearms owner I'll let you continue with your thoughts yeah I'll try to be brief I would say just what I would recommend what I did and that is to go slow to do her research and to meet people try to find venues that she can meet people that are gun owners I want to say right up front the statistics show that gun owners are some of the most responsible people in America they're very even headed folk and there they are not looking for trouble in fact it's quite the contrary they are looking to avoid trouble that's right I am and they are prepared for at the last at the last element that's there they are prepared to defend themselves correct with that being said I mean a very balanced spoke without being said I there's plenty of things I could recommend but I recommend two sites YouTube sites that's Hickok 45 that's a chai CK okay 45 this is a marksman he's an older gentleman who reviews all sorts of guns he's very very familiar with that channel and it's an excellent one and the next one is another one that you would be aware of and that's nutnfancy that's nu T in at they ncy nutnfancy is a retired colonel a young man who reviews guns now there's a particular talk that he gives actually gives several talks on top of you know here's many many reviews of guns but there's a particular talk I'll Rebecca meant for everyone who's already a gun owner and has plenty of experience go listen to it and it's called Burke Canfield carry protocol the concealed carry protocol where he discusses all the ways of avoiding issues just because there's an issue there don't mean you're supposed to get involved because you're mr. big guy with the gun you're supposed to look for every opportunity not to get involved but you still observe I guess the overall commentary on that is when you when you do your training and you become good with your with your pistol you become there's a term called situational situational awareness I now when I walk into a convenience store when I pull into a parking lot of the Best Buy or wherever I go I'm aware more now than I have air ever have din of my surroundings it's not like I'm suspicious so I'm very casually looking at what's going on around me whereas before I would just blindly enter into situations and not even think right now I am very aware and in fact when I got my concealed carry license after I bought my pistol all the way home I had a profound peace it's not like I you would think it would be the opposite but actually I just profound peace and my awareness around me expanded dramatically an expanded awareness carries with it even more responsibility become an owner actually makes you a more responsible human being that's the man this is all ultimately about Paul phenomenal call to end the show on that's all the time we have for this edition of what on earth is happening folks remember there are only two mistakes you can ever make on the path to truth not starting and not going all the way thanks so much I really hope to see a lot of you at the freer mind 3 conference this coming weekend in langhorne pennsylvania april 10th 11th and 12th I'll see you right here in two weeks thanks for listening everyone good night [Music]

What On Earth Is Happening Show #191

Topics: *Free Your Mind 3 Conference Re-cap, A gathering of high-consciousness minds, Exposing Evil, Humanity's power and potential, Open-Mindedness, Gratitude, The Power of One Person to influence positive change, Local Free Your Mind Activist Groups, The Quit Your Cult Campaign, Numerical Sychronicites, Occult Symbolism used to mock Police and Military, Abundance vs. Artificial Scarcity, Psychological Fear of Rebellion Agaisnt tyranny, Thomas Paine's "The Crisis" Series, The Support of Providence for those struggling to achieve True Freedom, True Blanket Statements regarding Order-Followers and Statists, How Tories hampered the ealry stages of the Armerican Revolution, The Occult Season Of Sacrifice, True Courage in the face of danger*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascal [Music] welcome one and all you're listening to what on earth is happening right here on our bien I'm your host mark passio my website what on earth is happening calm the networks website Republic Broadcasting org today is Saturday April 18 2015 this show is live every Saturday evening from 10:00 p.m. to 1:00 a.m. Eastern Time that's 9 p.m. to midnight Central Time ladies and gentlemen it is officially history the freer mind 3 conference went down last weekend in Langhorne Pennsylvania just outside of Philadelphia and man was it one for the history books I'm telling you this was the greatest event that I have ever attended in my life tonight on the show we're gonna do a full recap of free or mind 3 with the one of the main organizers of the free your mind 3 conference Bob Tuscon who's going to be coming onto the show with me in just a few moments I also want to take calls from in the first hour I want to take calls from anyone who attended the free your mind 3 conference so during the first hour only calls from people who attended free your mind 3 only only attendees of the for your mind 3 conference please call in the toll-free number to join us in the first hour with Bob Tuscan for your mind 3 organizer the toll-free number to join us 800 3 1 3 9 4 4 3 once again toll-free 800 3 1 3 94 43 Bob's gonna be coming on with us in just a few moments I have a couple of very quick event announcements that are not event announcements just a couple of quick announcements I do have some water on earth is happening promotional t-shirts left from the free or mind three conference but I'll tell you what I don't have many of them they really went people have really loved the new design and people were just so generous and supportive I I went there with two boxes full of shirts and left with like less than I think about 8 shirts 7 or 8 shirts so I already have to be reprinting this design it was very popular people seem to like it a lot and again they were just very generous and supportive so they really went fast at the conference the new design was they viewed it for your mind 3 it's now available to the public the design has been posted to what on earth is happening calm so if you're interested in receiving a what on earth is happening promotional t-shirt as a gift in return for a voluntary donation you can click on the promotional t-shirt link on the left hand side of the what on earth is happening calm website and there you can take a look at the new design there's also a donation button on the left hand side of what on earth is happening calm if you feel that you have received value from the information that I have shared and presented here on the what on earth is happening radio show and website feel free to make a voluntary donation to help support my work so that I can continue it into the future there is an ongoing donation drive for Republic Broadcasting if your if you want to help keep Republic Broadcasting going again it's listener-supported a station like this a lot of costs associated with hosting a online network like this feel free to make a donation to help support our bien you can call toll free to pledge a donation eight hundred seven two four two seven one nine once again toll-free 800 7 to 2 seven one nine you can click the PayPal link on the donation tab at Republic Broadcasting org so just go to Republic Broadcasting org click on the donation tab and then click on the PayPal link and you can make a donation via PayPal or if you want to send in a check via snail mail you can send it to two two five one double Creek Drive Suite 3 zero to Round Rock Texas seven eight six six four once again 22:51 Double Creek Drive Suite 3 zero to Round Rock Texas seven eight six six four all right with no further ado let's go to our special guest for today the main organizer along with John vibes of the freer mind three conference Bob tusks and welcome to what on earth is happening more are you lucky out and put you in cuffs conference he's starting already got a little out of hand there a few times Barlow not to get the bolt to take care of you next time that's right I'd get a nice grope down on my way back oh yeah man I did I you know I look forward to the gropes that the beautiful hands at the TSA administer and I've posted that video on my youtube channel of course so if anybody wants a good laugh and to see my belly sticking out I guess I've gained a few free or mind pounds and next confidence that's be freer belly from weight that I've gained over the past few years what happened was my wife gained all this pregnancy weight mark and I felt bad for her so I tried to you know make her feel better and then she lost all the weight after the baby was born and and I didn't so what can you do but evens it out right it does it does it's it's all about balance and exactly right so I had a blast I don't know about you but I had a good time and I think the information was equally as compelling as the energy there as the vibe from getting to talk with people getting to meet face to face with like minds we can't underestimate just how powerful that is by itself the idea that we have 500 people in a room together that get what's really going on on this planet to various degrees perhaps but nonetheless all have a common bond of being folks that are fans of good over evil and to me that that is in a sense the underlying theme of it all is that we are there to expose evil and promote good and promote loved and so on and so forth and one of the things that I noticed right away mark was that anybody that I spoke to from the hotel staff and everyone else in the area that was affected by the attendees of free or mine 3i got rave reviews about these people I was just curious you know how they were receiving us I wanted to know how the various hotels in the area and the staff and the bar staff and the people the people cleaning the bathrooms I wanted to know how they received this iconoclastic group that we have right and I gotta tell you we've converted quite a few people just by our very presence people were looking it up they were genuinely interested we weren't ostracized we weren't marginalized and told we were crazy we weren't treated poorly and of course we didn't treat people poorly they got a vibe of love and they got the idea and there was a one one little caveat here there wasn't an episode I believe on Saturday night where the order followers the cult members were called to the hotel that the conference was held out at the Sheraton Bucks County I was unaware of this well I'm gonna share this with you mark has my heart dropped when I heard this I said really they said yes there was a domestic dispute at the bar and the cops were called and instantly I started to say to myself no this can't be they were really you know I was starting to say to myself well where none of us are perfect just because we're here doesn't mean we can't have disputes bla bla bla bla bla and I asked I start to ask around do you know if it was our group for sure can you confirm that finally I get wind of who it was and well lo and behold it was not our group it was actually some other small group that was saying happened to be staying at the hotel right I was a fencing Club go figure so I I just said to myself at that point you know the this event is not going to attract that sort of energy and I'm even something like that sort of energy could breathe at the conference with all of us around and you know days after in correspondence with everyone I was just hearing again and again just how cool everyone was and how how gracious the people were they were genuine human beings Bob I mean it's like what the earth could actually become it's it's what the people of Earth could actually become if they allow knowledge to transform them and these people were of a whole different order of consciousness from the people that you know are just around us on a day-to-day basis in our lives on you know on the streets where we live and it was just amazing being around that level of consciousness for three whole days it was like riding high you know without any substance whatsoever needed you know no substance needed but you were on a total high the whole time I couldn't agree more and I was just completely consumed and I needed a vacation from the vacation but it was a good drain of my energy perhaps and I think you hit the nail on the head with what you just said these were human beings that's right these weren't people that have been dehumanized these aren't people that have been made out to be primitive beasts these were human beings that operated as such and shared their consciousness as such they weren't belittled and brought to that beast that Leviathan that the powers that shouldn't be have been trying to convince us humanity is comprised of no folks this was human nature at its finest not human behavior but human nature and I talked a lot about that in my talk that I gave in looking at scarcity and its effect on our behaviors and our true nature which is out of love and that of a spiritual abundance and so on and so forth and I believe that this consciousness being in such abundance this vast open-minded yet critical mindedness that was found at the conference and I don't mean to sound like a cheerleader here we're not trying to sell you obviously the conference is done but at the end of the day it was something to be experienced you're gonna want to be there I know everybody who missed it is disappointed they're gonna watch the talks that for your mind conference calm but ultimately it does not do justice to the actual physical of being there yeah the experience of being there could not possibly be replaced by an Internet experience by just watching it watching the speaker's online you'll get the information that was shared for sure and that's a that's a volta min importance of course that's why the conference is be hosted to begin with but being there in person and being around people of that level of consciousness all in one place cannot be replaced without any question in my mind one of the things that I really found you know exciting and enjoyable about this particular year's conference for me personally was since the responsibilities of organizing the conference were handed on to yourself and yeah thanks a lot yeah and the other main organizers of the event I played an ancillary role in the organisation of this conference at ver at the very best but this kind of freed me up to really interact with the people who attended and it's something I had been wanting to do the past two events and just because of all of the responsibilities I had in organized in the organizational role I was not able to do that to the extent that I was this year in past conferences so that's the part of the conference I enjoyed the most even beyond the information sharing which of course is critical I really enjoyed the dynamic interaction with the people who attended and they just really gave me some hope about the possibilities of what we can create here by just being around them and talking with them getting into the interactions that I that I participated in with them it makes makes one realize that there are people who are awakened and they are out there and they are doing the great work and you know all is not lost yet as long as people like this are still in the world I think you're right I think we forget sometimes that we can come together and stand up against the evil doers and so on and so forth and we are completely reminded of that and humbled of that realization if you will that were you know we are powerful and we are able to stand up in the face of tyranny and say enough is enough and that there are other people out there willing to do so and hold your hand side by side if you will absolutely and that word that you just said there that is a word I repeated again and again at the conference it was a humbling experience for me so many people came up to me and conveyed you know that they thought that the work that I've been putting out over the past several years has had a profound impact in their lives and there they came up to me with such a an entire attitude of gratitude you know that they're thanked sheriff's was overwhelming and the outpouring of support and generosity was in fact very humbling for sure the interesting thing about that is that I was thinking to myself mark we talk often about what one person can do and then we see that one person can do a lot and for it for instance we don't even know what sort of butterfly effect takes place after our actions for instance I had no idea that hooking up some crazy dude from Philly who had this local presentation he was giving would turn into a freaking rock star named Mark passio with what on earth is happening I had no idea giving you a radio show was even a good idea I thought at first you were kind of crazy and probably full of it and I and I wore my tinfoil hat religiously for the first 15 shows that we produced for you know of course I'm joking but nonetheless I've been overshadowed now and now I'm one of my claims to fame is the guy who gave Mark passio a freakin radio show to begin with go figure you know so so it's it's humbling to me back to that word because it's awesome to see the unintended consequences of how one thing leads to another and there is with every action a reaction and so on and so forth and I struggled with this mark and I know you do as well because part of me was to put my ego in check so when I when you have hundreds of people come up to you and you're one of these people that does not like the idea of celebrity or ego right or however you want to frame it it makes you wonder sometimes you know you start to feel a little uncomfortable you know the after the first ten people come up to you and say thank you man I appreciate your mark I appreciate you Bob I start to say to myself geez am I just stroking my own ego here and by like what what am I doing this for and after a while I started to realize that again it's more than the ego dude it's it's something that is an unintended consequence that there is gratitude given but I have the same sort of gratitude to everybody else that I've learned exactly and and that that's nothing that is is something that gets to our head in a negative way it only inspires us and makes us stronger to continue our trip down the rabbit hole so to speak and that's to me the bottom line and and again very very humbling and very very rewarding at the same time without a doubt Bob let's talk a little bit about some of the speakers and their information what occurs really made an impact for you I got no let's hold that because there's the break music yeah okay so we'll get that this is gonna be good mark because when we get back we I wanted to share with the listeners dude some of the speakers that I had no idea would be as freaking profound as they were great we'll get to that on the other side of this break ladies and gentlemen you're listening to what on earth is happening my special guests this evening Bob Tuscan for your mind 3 organizer we'll be right back [Music] the Coon decides that we don't dare speak it's a while between ups little ribs so we keep pretending that there's nothing wrong this coal decides a cackle walk welcome back everyone even listening to what on earth is happening here on our BN I'm your host mark passio my website what on earth is happening calm tonight on the show we're talking to free your mind three main organizer Bob Tuscan and the toll-free number to join us if you attended the free your mind three conference we want to hear from attendees or free your mind three will put you on the air with the main organizer Bob Tuscan and get your reactions to the conference and get your suggestions for future events the toll-free number to join us 800 three one three nine four four three Bob we before the break caught us in the first segment we were getting ready to talk about some of the speakers and the information that they shared who were some of the speakers that had the biggest impact on you at this year's conference my talk of course was the number one at our conference naturally sure um so like you mark I didn't get a chance to listen to as many talks as I I would have liked to I was in organizer mode and as you know that's yeah quite consuming and I'm running here and there and everywhere but I got to tell you the few moments of some of the talks that I got a chance to so listen to and all of them were compelling in their own right but a few moments of some of the talks and I'm about to mention really really stood out and struck me as jeez this is compelling groundbreaking material that's being shared here this is original material you know anybody can repeat some of the stuff we've learned over the years about this and that you know there's there's researchers to kind of gather information and put together puzzle pieces on some level and then there's researchers that come at you and you're like how the hell did they think of this how the hell did they connect these dots in such a compelling way and I got to tell you a ross ben was one of these set individuals who brought forth original research that i had never heard before that was so freakin compelling that you're gonna have to see it I mean his look at Philadelphia and the idea behind what Philadelphia really is and and Benjamin Franklin and just the the dots that this man connected were insane and it really brought into focus mark the synchronistic reasoning why this conference was at Philadelphia sure or is being held at Philadelphia yeah I heard you get a chance to hear some of that I unfortunately did not catch Ross's presentation this year as I did last year or two years ago with for your mind - while I thought was phenomenal his presentation was phenomenal it for your mind - unfortunately I was not able to see his presentation live this year but I heard incredible things about it I heard people raving about it after he came off the stage I made absolutely brilliant research and and again all original he he broke down some things very detailed things that you won't find in reading a book about this sort of stuff for in in reading an article or watching a documentary online but it's definitely deeply oh coltd information because he gets into geo mansi and earth energies and energy lines that run on the surface of the earth and how they converge at certain points on the earth and how these dark occultists use this energy grid system to kind of you know send dark energies throughout the planet and you know this has been a fulcrum point of his work and I think it's groundbreaking and a lot of people really catching on to this and beginning to understand it and he puts it out there in a deeply focused way as you said sure does the other compelling talk so many levels was Jenny's Barcelos very very disturbing talk now I get to see a good portion of that one and I agree that very powerful and important information for people to understand yeah and and very difficult to sit there and listen to unfortunately she Shama yeah but the children in hospitals when they're bright and that some of the the imagery behind her talk was very graphic or you know people are in tears and it was just very hard but very hard to handle but very important to expose that's right and to try to continue to you know rejuvenate ourselves and and heal ourselves rehabilitate it's the word I was looking for there as I tripped all over my words the other cool thing I want to shout out to was the open mic deal oh he had probably 50 people I want to say participate in the open mic guys talking about anything from one of the guys did something on radio frequencies and cell phones and the dangers of that another person did something on drinking distilled water versus other types of waters one person came up and and talked about urine therapy right you know peeing in and a cup and having a nice drink and so on and so forth so it was really cool and very eclectic to hear all of the people doing the Open Mic toxin and I'm not doing it justice so you're gonna have to go to freer mine conference calm which in the near future will have all of the lectures available for you to watch at your own time and your mom's basement with your tinfoil hat for your mine conference calm we'll have that all mark let's get some calls in a minute what do you say sure absolutely let's go to the phones let's hear from Nathan in Arkansas Nathan you're live on what on earth is happening with our special guest Bob tusk and welcome to the show mark I was I was bring with you and I was leading you into the break I am pletely mist I'm unfortunately not hearing it in my headphones so I'm way off by the [Music] welcome back everyone you're listening to what on earth is happening right here on rbn I'm your host Marc passio my website what on earth is happening calm apologize I went over the last break I had a hard time hearing the bumper music coming in but we were about to go to some phone calls with our special guest Bob Tuscan one of the main for your mind three organizers so let's hear from Nathan and Arkansas Nathan you're live on what on earth is happening welcome to the show hey Mark its Nathan how you doing nice nice to talk to you again absolutely so I had to sell some stock in order to make my way over to a four-year mine 3 but let me tell you it was completely worth it that's awesome I'm glad to hear it was good to see I remember you distinctly now that I hear your voice Nathan was walking around with his acoustic guitar and doing all sorts of uplifting little ditties as he walked by yeah and everybody appreciated too sometimes I do it on the street and people walk by and they won't even like they're it's like they're zombies you know you ever see a zombie out in public all the time yeah so I on the way there I got sexually assaulted by the TSA a couple times and once on the way back as well I heard you talking about that Bob that listen it's not not considered assault if if you're volunteering for it all right yeah it's not great that's not rape if you're having it up man well one of the talks I really liked was of course more SEO talk I mean I like the interview with the typical hoarder followers I was you know pretty typical right I'd say that there's more of them out there than we could possibly imagine and we know what our work is to do now you know we have to reach the minds of these people and transform them right so one thing I did when I got back to Arkansas was I started a meetup group called the Arkansas anarchist and I used I still feel your ideas mark because you know you have such great ideas there's no such thing you know it's all out there for using it and helping people with that information you know it's a feel free to take it and do what you will with it you know that's what it's out there for yeah used some sacred geometry I designed a symbol which was a outline of Arkansas and I put that in red and blue and I put a anarchy symbol the circle and that the triangle with a line through it I put that on top of the Arkansas outline and I put that in green and purple so I stole a lot of your ideas like about color meaning tribalism and well let's say we've operated those ideas fair enough they're the best of them all geniuses do that yeah sure so one of my favorite if I had any advice for you know future shows I would just say eventually you're gonna need a bigger venue right cause if it keeps growing at this rate sure there might be thousands of them next time oh that's a good thing you know the more people that are coming online to this information and becoming involved the better one of the things that I also enjoyed was the grassroots efforts you saw so many people coming from other states in the United States that had already put together groups activist groups in their area for your mind groups from all over the whole United States you know and that's what I love to see you know I want to see more of that type of you know grassroots activism happening every other that's exactly the remark that was one of the most badass components of the solids that people are starting groups for your mind groups you know Anarchy groups whatever you want to call it freedom groups and there J you know gathering each other and and meeting not just at these conferences but starting to meet locally as well and coming from all over the place to meet the other groups at the conference it's kind of a central location if you will Nathan good to hear from you man appreciate it alright nice again thank you so much Nathan so um one quick thing I want to mention regarding my talk is that you know and I'll say this for the first time on air is that I announced what is going to be a new campaign that I'm launching as part of what on earth is happening it's going to be called the quit your cult campaign and I don't know exactly what this is going to entail I'm still formulating ideas probably going to have a sub section on the website regarding this but this was a big part of my talk which was called the cult of ultimate evil order followers and the destruction of the Sacred Feminine which I delivered it for you're mine 3 I kind of announced in that presentation that I am going to be forming this campaign called quit your cult which will be directed toward helping order followers to get out of the cult that they are in mainly meaning military and police but basically anybody the service supporter of government and involved in the government in any role whatsoever and it's gonna basically be like you know steps to take at a grassroots level to help people to understand that what they're involved in is coercion and violence and it constitutes a cult and it has all the same trappings and all the same techniques that cults use throughout time and that's what my presentation was basically about how order followers do constitute a cult and it emphasized the necessity the you know moral obligation the people who are awake have to help these people to come out of that mindset and quit their cult so that's going to be coming up over the next several months here on what on earth is happening I'll be formulating this campaign called the quit your cult campaign so just wanted to mention that formerly on the show and tell people to watch out for that in the coming months watch out for that boy you know better watch out for that mark I'm already thinking in my my crazy mind here of ways in which I can can participate in quit your cult outreach and I and I have some ideas here I don't want to let the cat out of the bag I'll run them by you off the air absolutely and should talk about that yeah without an absolutely because I you know I'm the type of guy who likes to go out there and confront people well I say that much and hint hint at that movement but let's just put it this way I have some ideas of doing some outreach you know getting some outreach going on that's what this entire campaign is going to be all about that sounds great so let's uh let's take a couple more calls let's hear from Rahul in Washington Raul you're live on what on earth is happening welcome hey Mark yo roll was good to see at the conference dude yeah was awesome I just want to have a couple things I just want to say about the conference the people there that I met were absolutely the most intelligent kindest most loving most generous people and every single one of these people is dedicated to truth and goodness and and ending evil on this planet and it was just one of the most amazing experiences I had meeting all these people and my only regret is that I wasn't able to personally talk to everyone there's so many people there it's only three days but you know the people that I was able to talk to they just blew me away I totally agree I mean I couldn't read it better I completely concur when I was talking to the people when I was first meeting someone at the conference like a complete stranger and I was talking to them for the first time it really wasn't like a first time meeting it was it was almost like it was like a reunion between old friends who hadn't seen each other in a long time it were like level of just care and respect towards one another because um these are the people who you know are trying to turn stop what's happening on the planet and I mean it's like it was like meeting your your spiritual family really that's the best way to put it these are my brothers and sisters and it was just that's right you know one of the best experiences of my entire life I mean that's a great testimonial to the energy that this conference about and that's what it's all about it's about bringing people of that kind of a mindset together with each other so they can share their ideas and network amongst each other and you know build upon the work that they've all done and just share their ideas and I think on that level it was a beyond a phenomenal success and I could not have possibly hoped for anything better Thanks roll yep thank you roll thank you so much for the call let's hear from Gary in Pittsburgh Gary you're live on what on earth is happening with our special guest Bob Tuscan welcome hey yeah I just wonder share how great the conference was and I like I like what role Raul had to say yes you know wasn't like being about around a bunch of strangers it was like we you know we had this thing this bond in common the thing like-mindedness whatever you want to call it everyone I talked to was so kind and courteous and I happen to mistakenly me some ounces of silver on the table or I had all my DVDs and I was gone for like an hour and a half and came back and every one of them we're still there yeah let me let me interrupt you for a second here Gary's been calling my show for probably years now mark show as well and I got to tell you you know he's always been a pretty cool dude calling the show and I've been reading his emails but when I got to meet Gary this past conference in person and he came up to me say hey I'm Gary from Pittsburgh calls your show you know me and I said yeah dude it sealed the deal for me these people that we see as numbers on a piece of paper or numbers on a computer or just names on a computer screen these are real people and Gary's are genuinely real dude and I love you Gary it was great to see you man I just wanted so much for you guys I've been listening to you both since you were on Oracle and I you know I know the story about you two guys how you you brought mark on the or all and then on the RPM it's it I just feel so honored to be in this circle with you guys and and all these people that are that have awakened to some truth and I just follow up the phone with Denise I got winders I don't want your shirts on mark and everybody I'm up at the new moon meeting we're coming back home right now well we were worried if we asked you to speak we if you can find the time this year wait I was just blown away by oh it's like I was sharing with you up speed the other night about the people that came from all over the world by themself you know like Renee from Switzerland I don't know if you got if you got to talk to her yes like like you came here by yourself she says yeah I think like my husband thinks I'm French so he was glad to get rid of me I wanted to be around like-minded people but it was March I was explaining them I felt I felt like I was witnessing remember that meeting the close encounters of the third time where all these people held to converge on that mountain yes like you know without had up I mean it wasn't like people had a lot of money hit there either they scrape together like you know they're doing with the guitar you know and they got it together and they showed up and I definitely think we're gonna need a bigger venue next time say what I'm gonna bring a busload if I can because the people that I brought up and I have a pretty big network of people they're going to they're sharing with others now how great it was you know and none of them were sorry they came up and they were just blown away by the whole thing and I got I got the interview spring Meyer and Jenice I just got off the phone with Denis a couple hours ago and she was so overwhelmed with the join of love she felt there and she sold over 60 books and she was I mean everybody needs to read that book I'm buying a case of them off for this week and trying how Brad Pitt you know you just want to support everybody that spoke there and everybody because I knew you guys don't get paid and you know I do what I can't I have my own activism I spent a lot of my own money and you know it's it's just so rewarding to to you know touch some people and wake them up because you know waking people up has become an art form you really have to be careful how much information you bring you know these people were all sick they're spiritually sick like you say mark they're mentally ill a lot of my mentally ill when they see the truth they just they don't want to see it and I really uh I'm really interested in not getting involved in that that project you got on going on with the acquitting the putting your cult by following orders I'm gonna put you on DVD and try to pass it a pass around these police stations and give them a little taste sure I mean that that'll be a big you know one of the methods that will employ you know it'll be a whole like I said it'll be a grassroots groundswell effort that's what the whole quit your call campaign is gonna be about like I said I'll probably have a sub section within the website that'll just have you know just uh little things that people can do on a day-to-day basis to try to reach out and infiltrate this cult that that's what I talked about is needed on our part we need to infiltrate this cult of order followers we need to go around them in their everyday lives of course you know I mean you could try to confront them while they're on duty quote-unquote but that's going to be very difficult to reach them when they're in that mindset we have to talk to these people when they're off duty we have to talk to them in their personal lives in people in in the lives of people who we know who are involved you know everybody probably knows somebody who's involved in a governmental position or in a position in the military or the police in some capacity or have friends or family members that are involved we need to deal with them in our personal lives and on a one-to-one basis and that's gonna be a huge part of this campaign that I'll be launching right and before I go if you're serious about helping you're covering attics I'd be glad to help you in any way I can without a doubt Gary we need to talk personally off air as well very soon and there are definitely lots of projects I would like to work on with you in that regard and I would like to come up and speak at that gathering that you told me about so we should talk off air and set up these projects as well okay mark you got my card I have a nice office barb man she's a super woman you're very blessed there I'm sorry but in your corner very famous I'll become next week I do take care of men oh yeah I'm anxious to hear what every single one of these calls have to say let's move on and hear from Bill in Idaho bill you're live on what on earth is happening with our special guest Bob Tuscan bless you okay so very much for your very public I know you were at the conference okay I was gonna say how did I miss bill from Idaho's another caller who's been calling in for years now okay yes we do offer blessings and tanks but considering that it was only due to Manny at the board you at the station on the broadcast that caused my video to go international while I was outlining each and every step of either their assault or their coming up to a break hold on we'll be right back folks [Music] mark our teachers considered members of the cult well I would guess it would depend on just how much their indoctrinating the children to the governmental belief system versus how much they're trying to get them to think for themselves and actually you know discover things on their own so how about the government school teachers teaching Common Core safely and many of them yeah I would say that they lean toward the the being cult members or maybe their ancillary cult members but I'll reserve a little bit of judgment on on the teachers in this whole thing I mean it's a big part of it don't get me wrong but the people I think we have to target and reach to deprogram from deep mind control and violence is the military and the police especially the police I mean the police are the most brainwashed out of everybody that they are the most deeply put into a cult mindset than anybody else these days not that the military isn't but you know what we see going on in police violence and brutality is so unacceptable that I think there are the people that we have to you know reach with this information more than anyone else we have police in all of our schools across the country nowadays unbelievable and the schools look more like prison or schools exactly yeah we said that at the same time hell for sure you want to do a few more calls Bob we can squeeze a man I mean you're basically at a time this hour I don't know if you planned on all along whether we could hold over for another segment or two and wrap up the callers from the conference yeah let's do it I'm interested to hear what they all have to say let's hear from John in California John you're live on what on earth is happening with Bob Tuscan hello Josh in Virginia Oh Josh in Virginia I'm sorry I don't good got a little bit cross stop there but no no worries hey Josh how are you good no problem mark I don't know if you remember so many people there I got you to sign my copy of James bill and fire in the minds of men yes it's a appropriate birth in my opinion because it's on origins of the revolutionary faith and anyone who hasn't should check it out as a mini section that book to take years of study but I just wanted to say the whole weekend was just synchronistic in so many ways the people there were so open and accepting I had events happened outside of the conference that were more profound and what I learned in the conference sure that me and I actually ran into two old friends Warren who was a really good friend that I haven't seen in probably ten years and both are military and you know the things they were saying were right along with your presentation and I wasn't planning on speaking about this but when I first found your work I just heard you quit Michael I know we got to hear this when we get back hold on through the break and I will let you continue on the other side ladies and gentlemen you're listening to what on earth is happening right here on Republic broadcast my special guests Bob tusk and main organizer of the free remind free conference we'll be right back [Music] [Music] welcome back everyone you're listening to what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening calm my special guest tonight is one of the main organizers of the freer mine 3 conference Bob Tuscan and we're taking calls from people who attack the law for your mind three vehicles and all these that affect the freedom of the people's hold free number to join us what on earth is happening reward every shine like more for three on the darkness of our world and to offer any power and some looks like we're having a problem with the docking on the pump and vanity approaches it's pretty cool moment of choice and now here is your host mark Pascal [Music] okay welcome back everyone again the toll-free number to call to call in to the show to talk with Bob tusk and main organizer of free your mind three eight hundred three one three ninety four forty three we're asking for calls of people from for calls from people who attended the free your mind three conference so we can get their feedback and their suggestions so let's continue with Josh from Virginia and he was telling us about how he was formerly in I believe you said the military and you got out of that institution no sir I've met with friends who are in the military okay but I had like I said was saying I had just a small little landscaping job for a good-sized city and I was internally conflicted because I was not above the work or even the people I was working with but I was above the institution I was working for and one day I was at the end the day it was pouring rain we couldn't do much we're all back to the shop it was about 45 minutes until we were allowed to these and there was a bunch of people in a room waiting to leave who could just as easily get up go out the door and go see their families do something productive not waste taxpayer dollars and that's exactly what I did I got up I left I left went home went online and wouldn't you know it went on richard.rose website and there was a video called natural law by mark Pesce and I didn't quit my job that day but in my mind I made the decision mentally that I would do it no more and Mark you've uplifted me so so much in my thoughts in my mind and my actions in my life and I thank you for that very much why I recited that so much I learned on this I'll make a deal with you mark sure you polish that next conference you hope that you would be signing your own book and if it's a be there with happening hand oh it will definitely be up on the next conference I won't let it go that long but I'm still working on editing it and hopefully it'll be a few more months so Josh thank you so much for that call it's good to hear from you Josh my book will also be out it's gonna be a coloring book but it's gonna be colorful I can guarantee it it always is with you Bob without any exception ever well thank you let's hear from John in California John you're live on what on earth is happening mark Bob can you hear me absolutely yeah John it is great to meet you and I did not go to the free of mine conference hang up on this guy I wanted to go I didn't know anything about it well as I've been dying to talk to you I just love your work I mean you have just opened my mind and I don't even know where to start so I just like to throw a couple questions at you sure no I was watching real quick I was watching your demystified series and he started talking about 11:11 yes I had this experience at a university I went back as an older student and I got thrown out I got kicked out of all 23 universities because I wrote a story and I won't get into it but to make a long story short I know that I'm supposed to write a book about the story and what happened to me well I always felt like that was and I'm listening to your demystify series and you're talking about 11:11 and I'm like I never see 11:11 I never see it so it must mean that this is just some weird thing I'm supposed to be wrong I had a facebook chat with a friend once prior and I'd saved it because I deal bleeding my facebook and I went back and I'm reading because it's part of the story and I had fallen asleep for an hour and 38 minutes 11:11 was all over it when I was asleep I had what I had typed I'd sleep typed I did it at 9:49 that's 22 that's 11 or 11 I did it well 110 that's I did it at 11:11 and nivel p.m. I was asleep and I woke up and I hit plus minus a hundred and eighty five times in one minute amazing Robin I mean and I seem to be a number that kept coming up around the time of the conference that in the number 23 you know and you think about it 23 I mean well let's start with eleven eleven you know as you said in my demystifying the occult seminar I touched on this in the final section of that presentation of that seminar by the way I didn't mention this I should have mentioned this during the announcements my demystifying the occult seminar was completed being edited by richard grove who filmed and edited it and it is now on the water on earth is happening calm website in the video section and it is also on my youtube channel this was actually completed the week before the free your mind conference so I didn't get a chance of course I wasn't on the air last week because I was at the for your mind conference and you know didn't get a chance to mention this so I'm glad you even you know helped me to recall that so I could you know tell people that that is out and on the website but the number eleven eleven represents the call of the light worker in other words calling people to do the great work to transform themselves and then to help to transform other people through the dissemination of knowledge and you know that's so powerful that that was a synchronistic number that kept coming up before the conference and during the time of the conference and at the conference even and the number twenty-three I kept seeing and still have been seeing I mean this has been repeatedly actually over and over again the number twenty three in the last month or so for me and that is the number in the occult in in different systems of occultism particularly Thelema which means in which it means to get out of mind control to free the mind and it's just so amazing what an amazing synchronicity that the number 23 kept coming up for me around the for your mind conference because that is what the number actually represents in different systems of a cult thought you know in numerological terms that's incredible mark I kept seeing six-six-six everywhere what does that mean that mean anything yeah that means that uh you know we have a lot of work ahead of us still yeah sure does thanks John wait can I continue ok so just real quick ok so III the local sheriff uses a seven-pointed pentagram it's upside down at the top point to point it down is there any significance to the extra two points compared to the five pointed pentagram or is it just the number 7 and Distortion well I believe they use that to represent the Septon or II you know the the seven you know planets the seven chakras etc you know I've talked about the importance of the number seven as being like a divine number so they're setting ourselves up in this sense of we are the gods we are divinity you know you know we are the the spiritual essence that runs through everything and there none of those things but in proxy symbolically they're trying to represent that not only represent it but then turn it upside down you know that's why that seven pointed star is always inverted in police regalia so so it's all a dark occult symbolism of course it all of their regalia and symbolism is just dripping with dark occultism as always because that's who owns them the dark occult owns the police and military well is the courthouse you know I went into courthouse and there's there's a compass in the square I mean it's just you know they're dressed in black is is one is is that the black robes a symbol of Saturn and Saturn the dark is chatter in the dark the dark Sun a lot of dark occult to see it as such possibly as a failed star of some kind or you know just being the base chakra the representative of the base chakra of the solar system which is about base consciousness and control Saturn is known in astrology as the planet of discipline and control it's it's the disciplinarian energy and they see themselves as that they see themselves as you know we are the law we are the the ones who are going to control the actions of other people and you know it is a Saturnian cult without a doubt the the the the black robes the the the rituals that are basically performed in court it's all part of a Saturn alien cult without any question in my mind one more thing you know I don't I don't want to keep you too long I know you go to the colors have you ever heard of negative pleasure no okay how much of this stuff that you you know the the dumbing down and the people I mean that God they spread out here man and nobody notices it I would spray night here in Philadelphia today keyless it's just like how can you not how can news trucks not be crashing into each other trying to cover this story but basically you know the story that I wrote was about negative pleasure we're young were abused we attach pleasure to the abusive event we shut down emotionally and we grow up it comes out in different forms you know as protections and and so basically we we get be we have to hurt not to feel and when you look at the 777 and they the the one that I see they remove the most is the emotion you know we're popping till we drink we're not feeling that we're not feeling and I've done some personal work I've been in the fetal position when I sobered up and I oh my god it hurts but that's what I want to write about and so I'm just curious to know if you've ever heard the term and how much of it you think you know correlates because I see a lot of correlations between negative pleasure and you know the 777 specifically that the seven that represents a motion yeah I'm not as familiar with this concept I'll have to look it up and do some research on it and perhaps you know talk about it a little bit in the future yeah I would like to talk to you again I'll let you go I appreciate you taking the time but I sure would like to talk again absolutely up I'll just call back in John thank you so much for your insights all right mark thank you let's hear from Ivan in Phoenix Ivan you're live on what on earth is happening with our special guest Bob Tuscan Ivan are you with us yeah there he is Ivan did we meet at the freer mind I don't know because I don't know if you I have pulled something on Facebook that I showed up in Philly on a Thursday for some conference and I blinked and next thing I know I was getting off a plane on Monday and Phoenix so we did mean or we didn't mean I don't know maybe it was a dream yeah we did go by like a blur didn't it Ivan so fast yeah yeah it made me think of what David Icke has talked about you know how when something's dreadful and painful it takes forever and when you're like around a beautiful woman how it goes by quick well this whole weekend that it was just so full of goodness and so much of everything that it was like a hundredfold it went by you know like a blink of the eye and I'm flies when you're having fun that's for sure yeah I mean you know I I initially I showed up as just you know observer for the first conference and ended up helping you guys and the same thing with this one with the intention to help you guys but I don't know how anybody can take it all in because even just as a spectator or somebody's up there to get the conference's the meet and greets talk to each speaker or to network with other attendees I mean there's so much going on that it's just overwhelming all all together from the get-go it definitely can be overwhelming especially when you're like one person that a lot of people are you know running things by and you know throwing information at and you know talking to and you know sharing insights with and it's like trying to remember people's names and faces and you know when you're just one individual trying to do that with a whole lot of people it can definitely overwhelming for sure but you know we got yeah sorry go ahead no good I was just gonna make a smartass remark I was gonna say especially got tiresome and everybody kick kept coming up to me saying what happened to your hair ha ha to me that was one of the most largest burdens of the job that's the signature long hair and has a different look now so that was one of the first things people remarked on when they were meeting you right yeah unfortunately I didn't recognize them I picked you up at the airport and you have to flag me down I don't know who the heck you were so um you know III think it says I tried to just pace myself and just deal with people individually one-on-one and try to be fully present as much as possible that was my quote unquote game plan for the conference and I think you know went pretty well and uh you know the energy that I felt was was a very high level and and balanced and just um you know it just spoke to the the the high level of consciousness of all the people there I just wish we could see that extended so much more in society in general you know Barb and I were talking and saying if you know we could help to foster this level of consciousness it throughout society on an everyday day to day basis I mean the problems of the world would go away so quickly and you know we would become a type one civilization overnight practically well mark I'm here to announce for the first time ever from the makers of the freer mind conference and what on earth is happening in the Bob Tusken show we will be here already laughing having to say it we will be starting the first ever free your mind City going to be a collective if you will of all these individuals and we're just going to move into our marks backyard if you can fit us all or you know somewhere I don't know where we'll go but we'll have to have a freer mind compound somewhere for your mind intentional community right yeah I mean I dig it I mean ultimately those are typically you know they end up being kind of a shoddy experience and dysfunctional but heck if we could live in an autonomous you know sovereign community if you will right I think that would be awesome with the kind of people that were there I'll bet you we can make it work because those people were definitely like I said of a higher order of intelligence without a doubt yeah and they had some good grass too man always thank you you guys hope to stuff there Bob you posted something on Facebook that you and John asked some of the hotel workers and stuff but what they thought of the attendees and that all you got back was positive you know responses that you know everybody was friendly and appreciative and you know totally different from what you would think those crazy conspiracy theorists you know well Ivan I I want to bring something up here and we have a lot of callers so I don't mean to take away from going right back to the phones here but I got to share this and talk about synchronicity all right somebody who worked at the hotel with us and I hope this is okay for me to say this mark but somebody that worked at the hotel who was a part of their planning department I'll just say that he the that very day we came into town was was given some bad news and I and I saw him I said you know this is a guy had been planning the conference with at the hotel for months now and I said I won't mention his name but what's going on with you man everything okay I just kind of could sense something was up with the dude turns out he had been given the diagnosis that day that he had cancer Wow pretty bad cancer and I said dude this is your lucky frickin day that our conference happened to be at the same time because guess what dude Rick Simpson oil b-17 laetrile soursop Gerson Therapy and the list goes on and on and I hope and saved ladies and gentlemen you're listening to what on earth is happening with our special guest Bob Tuscan stay with us we'll be right back you know today disguise at night night divides a day tried to run try to hide welcome back everyone you're listening to what on earth is happening here on Republic broadcasting I'm your host mark passio my website what on earth is happening calm Bob Tuscon main organizer from the free you're mine three conference as our special guest this evening he's going to stay with us for this one more segment and we're going to just try to blast through some calls from attendees of free your mind three let's hear from Dave in Nevada Dave you're live on what on earth is happening Markham's Dave the list out looking at has Chris from Des Moines Debbie from let anyone know Jason let's move on to Chris from Des Moines Iowa hi Chris it is park Matthew and Todd buskin yes it is it's actually bob foreskin but you can call me whatever you want I was not at your conference and that you want to put me I got some pretty rollin up on anything all right but if you want me to I can hold on no go ahead you can make a comment okay well you know I woke up in 2008 and and I've always I I create abundance and I built things with my hand that's my job I have no backyard chickens I have 50 chickens and quail and earthworms and I'm getting ready to raise fish I've built a rocket I am I create abundance and I love it it's the best thing that that I can do to help people it's awesome and I live in Des Moines Iowa we got this phenomenon going on right now with all this all these rural followers and rule makers coming into town for this new of this election coming up and then the Iowa State Fair and it is this the statism on parade and I just was a great bit I mean there is so many sweet people walking out there it's got big cult it's it's thing it's the big cult that we have to work toward infiltrating and helping people too wit you know that that's what this is all ultimately about a bob your talk was all about creating abundance in people's lives and get out getting out of this artificial scarcity based mind control yeah that's exactly right scarcity is a major tool of manipulation and it's done in many ways shapes and forms so you're definitely gonna have to learn a little bit more about my breakdown of scarcity based mind control and the the subtitle of my talk which was the liberation of the mind body and spirit which in many ways is brought to you in abundance thanks for the call Chris Chris thank you let's hear from Debbie in Connecticut you're live on what on earth is happening welcome good evening how are you I'm okay I'm much better now that I'm so Debbie what did you think of free your mind 3 I I have not listened to your radio station for a long time but right now I am listening to consistently and it makes so much sense to me well that's great awesome I mean that's what it's all about is making sense of what we're going through in the world together absolutely and I I just got back from a cruise from the Bahamas my daughter paid for it with for my 60th birthday and you know I met people from all brands and walks of life but you know the evilness that I'm seeing right now it's outrageous it's widespread it's everywhere the corruption you know the order followers you know people who just basically think that they're in control and own other people you know that's what we're dedicated to helping people to understand is wrong and stopping it in you know whatever way we can certainly trying to reach their minds trying to reach their souls that's what the great work is ultimately all about you know that was a huge part of what many people touched on it for mine three and specifically that's what my campaign that I'm going to be launching on the water on earth is happening dot-com website quit your cult is going to be all about yeah it absolutely hurts me I mean it hurts me Trinity that's me in the heart it really does I love my Lord and I love the beauty of them and everywhere I turn it seems like I'm being so attacked yeah it's so it's a difficult time period that we're all going through and Debbie I will say to you you know stick with the information knowledge is the great transformer of people's lives and you know just stay with it and try to stay strong and try to communicate what you've learned other people as much as you're able I want to thank you so much for the call Bob let's read squeeze one last call in here let's hear from Eddie in Connecticut Eddie you're live on what on earth is happening welcome let's here that's good at Jason in RM Jason you're live on what on earth is happening welcome it doesn't look like we're gonna have time Bob I want to thank you so much for coming onto the show and sharing what we all experienced it for your mind three which was an event like no other man mark not everyone ladies and gentlemen for your mind Three's main organizer Bob Tuscan we'll be right back after these words stay with us [Music] welcome back everyone you're listening - what on earth is happening right here on our PN I'm your host mark passio my website what on earth is happening calm I want to thank Bob Tuscan for coming on for the first half of the show this evening the main organizer of the freer mind three conference he did an absolutely outstanding job along with his Co organizer John G vibes I cannot have could not have possibly asked for a better turnout and a better organization of this event I feel I've put it into the hands of the right people and they're doing just a brilliant job with it and for your mind three was an absolute testimonial to that again it was a humbling experience the people that showed up who I interacted with and talked with over the weekend were just so supportive and so generous you know there are no words to really describe the whole experience again I just want to say thank you to everybody that made it happen and thank you to everybody that was a part of it in person so I want to tell people who are holding on the phone lines I may get to some calls later in the show but I do want to do something that I talked about a couple of weeks ago a couple of weeks ago I was going into the psychological reasons that people fear rebellion against tyranny in general and we read a couple of good essays on that and as part of that I had read of a segment an excerpt from a paper that was written by Thomas Paine back in 1776 the year that the American Revolution began and I told people I was going to read this entire paper on the air and I think now is a good time to do that especially as we're on the eve of the anniversary of the American Revolution and actually we will be going into at least here on the East Coast at midnight April 19th of 1775 is when the Battle of Lexington Green occurred you know and those were the opening shots of the American Revolution the so called shot heard round the world so this paper that Thomas Paine wrote it was a series of essays that he distributed throughout the colonies but particularly here in Pennsylvania was written on December 23rd 1776 issue number one of the series that Thomas Paine titled the crisis many people may refer to it as the American crisis as it later became called but it simply referred to as the crisis and I will post it with this podcast I believe this will be podcast number 191 will be moving toward the 200 anniversary edition shortly soon enough so what I want to do I think for the remainder of this episode is I want to read in its entirety the first edition of the crisis by Thomas Paine Thomas Paine is of course the most marginalized of the founding fathers he's my favorite of the founding fathers I think he was the most enlightened of all the founding fathers and he's marginalized because he was he because he was so enlightened and the powers that shouldn't be in our world today who are you know rewriting and controlling you know the communication of historical events through the control of textbooks and the control of information to the extent that they can control it they don't want people to know about Thomas Paine you know he's a thorn in their side so to speak because he was anti forms of mental control you know he was waking people up from the mind control of his day and you know he did this as a communicator he was a great communicator as you'll see when I read this paper and it's just really sad to see how marginalized he is in the modern day especially in education because so many people could learn so much from reading Thomas Paine's work I highly recommend it and you know if you do you'll recognize that he was a man living way out of his time who was way ahead of his time in his mindset so this is the paper called the crisis it's issue number one December 23rd 1776 and this is by Thomas Paine here we go these are the times that try men's souls the summer soldier and the sunshine patriot will in this crisis shrink from the service of their country but he that stands by it now deserves the love and thanks of man and woman tyranny like hell is not easily conquered yet we have this consolation with us that the harder the conflict the more glorious the triumph what we obtain too cheap we esteem too lightly it is dearness only that gives everything its value heaven knows how to put a proper price upon its goods and it would be strange indeed if so celestial an article as freedom should not be highly rated Britain with an army to enforce her tyranny has declared that she has a right not only to tax but to bind us in all cases whatsoever and if being bound in that manner is not slavery then there is then then then is there not such a thing as slavery upon earth even the expression is impious for so unlimited a power can belong only to God whether the independence of the continent was declared too soon or delayed too long I will not now enter into as an argument my own simple opinion is that had it been eight months earlier it would have been much better we did not make proper use of last winter neither could we while we were in a dependent state however the fault if it were one was all our own we have none to blame but ourselves but no great deal is lost yet all that Howe has been doing for this past month is rather a ravaged than a conquest which the spirit of the jerseys a year ago would have quickly repulsed and which time and which time and a little resolution will soon recover I have as little superstition in me as any man living but my secret opinion has ever been and still is that God Almighty will not give up a people to military destruction or leave them unsupported Lee to perish who have so earnestly and so repeatedly sought to avoid the calamities of war by every decent method which wisdom could invent neither have I so much of the infidel in me as to suppose that he has relinquished the government of the world and given us up to the care of devils and as I do not I cannot see on what grounds the King of Britain can look up to heaven for help against us a common murderer a highwayman or a housebreaker has as good a pretence as he tis surprising to see how rapidly a panic will sometimes run through a country all nations and ages have been subject to them Britain has trembled like an OGG at the at the report of a French fleet of flat-bottomed boats and in the fourteenth century the whole English me after ravaging the kingdom of France was driven back like men petrified with fear and this brave exploit was performed by a few broken forces collected and headed by a woman Joan of Arc would that heaven might inspire some Jersey made to spirit up her countrymen and save her fair fair fellow sufferers from ravaged and ravishment yet panics in some cases have their uses they produce as much good as hurt their duration is always short the mind soon grows through them and acquires a firmer habit than before but their peculiar peculiar advantage is that they are the touchstones of sincerity and hypocrisy and bring things and men to light which might otherwise have lain forever undiscovered in fact they have the same effect on secret traders which an imaginary apparition would have upon a private murderer they sift out the hidden thoughts of man and hold them up in public to the world many a disguised Tory has lately shown his head that shall penitential e solemnized with curses the day on which how arrived upon the Delaware so I'm just gonna break there for a moment I'm talking what pain is talking about is you know that the American Revolution is has basically begun and it's not really going as well as the colonists had hoped because there's a lot of support from a lot of the colonists in the form of Tories which he's going to get into and he's going to explain you know that you know because of the support in the middle colonies of these Tories these supporters of the crown what we would call status today or supporters of slavery in any age that's why the English decided that the British decided to attack the middle colonies to make that the seat of their war as opposed to the Northeast colonies around Massachusetts because there was very little support from there because of the kind of tyranny that they had already enacted upon the New England colonies so continuing with pains words in the crisis as I was with the troops at Fort Lee and marched with them to the edge of Pennsylvania I am well acquainted with many circumstances which those who live at a distance know but little or nothing of our situation there was exceedingly cramped the place being a narrow neck of land between the North River and the Hackensack our force was in considerable being not one-fourth so great as how could bring against us we had no army at hand to have relieved the garrison had we shut ourselves up and stood on our defense our ammunition light artillery and the best parts of our stores had been removed on the apprehension that how would endeavor to penetrate New Jersey's in which case Fort Lee could be of no use to us for it must occur to every thinking man whether in the army or not that these kind of field forts are only for temporary purposes and last in new and last in use no longer than the enemy directs his force against the particular object which such force forts are raised to defend such was our situation and condition at Fort Lee in the morning of the 20th of November when an officer arrived with information that the enemy with two hundred boats had landed about seven miles above major general Nathaniel Greene who commands the garrison immediately ordered them under arms and sent express to General Washington at the town of Hackensack distant by the way of Ferry six miles our first object was to secure the bridge over the Hackensack which laid up the river between the enemy and us about six miles from us and three from them General Washington arrived in about three-quarters of an hour and marched at the head of the troops toward the bridge which place ice I expected we should have a brush for however they did not choose to dispute it with us and the greatest part of our troops went over the bridge the rest over the ferry except some which passed at a mill on a small creek between the barrack between the bridge and the ferry and made their way through some marshy grounds up to the town of Hackensack and there passed the river we brought off as much baggage as the wagons could contain the rest was lost the simple object was to bring off the garrison and March them on until they could be strengthened by the Jersey or Pennsylvania militia so as to be enabled to make a stand we stayed for days at Newark collected our outposts with some of the Jersey militia and marched out twice to meet the enemy on being informed that they were advancing though our numbers were greatly inferior to theirs how in my little opinion committed a great error in generalship in not throwing a body of forces off from Staten Island through Amboy by which means he might have seized all our stores at Brunswick and intercepted our march into Pennsylvania but if we believed the power of hell to be limited we must likewise believe that their agents are under some providential control and I want to stop there for a moment as well what pain is saying there is that because of the colonists who were fighting the revolutionary war against the British were on the side of freedom and were fighting against tyranny that Providence was at their back this is the idea that if you're doing the great work the universe will actually assist you it will come to your aid you know and he's saying if these were agents of hell they're under the control of Providence as well and the force of Providence or is working against them just the way it is was at the back of the revolutionaries you know people think a lot you know in in all in all war Oh everybody thinks God is on their side quote unquote but I think what Thomas Paine is saying here in this section of the crisis paper number one is very true providential forces do come to the assistance of those who are fighting on the side of the true will and of true freedom so I think that it's just incredibly powerful his statement there and I'll continue with the paper now I shall not attempt to give all the particulars of our retreat to the Delaware suffice it for the present to say that both officers and men though greatly harassed and fatigued frequently frequent yet frequently without rest covering or provision the inevitable consequences of a long retreat bore it with a manly and martial spirit all their wishes centered in one which was that the country would turn out and help them to drive the enemy back Voltaire has remarked that King William never appeared to full advantage but in difficulties and in action the same remark may be made on General Washington for the character fits him there is a natural firmness in some minds which cannot be unlocked by trifles but which when unlocked discover discovers a cabinet of fortitude and I reckon it among these kinds of public blessings which we do not immediately see that God hath blessed him with uninterrupted health and given him a mind that can even flourish upon care I shall conclude this paper with some miscellaneous remarks on the state of our affairs and I shall begin with asking the following question why is it that the enemy have left the New England provinces and have made these middle ones the seat of war and I'll pause right there and we'll pick up that on the other of this break ladies and gentlemen you're listening to what on earth is happening right here on our bien we'll be right back stay with us [Applause] [Music] [Music] welcome back everyone - whistling - what on earth is happening right here on rbn I'm your host Marc passio my website what on earth is happening calm in the second half of the show tonight I'm reading the entire in its entirety the first paper of the crisis series by Thomas Paine which he wrote in 1776 this is crisis number one which was written December 23rd 1776 and you know he continued them into 1777 this first paper was actually read to Washington's troops at Valley Forge that's how inspirational Washington considered Thomas Paine's writings and I just want to say you know as you know we're getting ready to cross into midnight here on the East Coast we'll be going in to April 19th which is the anniversary of the beginning of the American Revolutionary War April 19 1775 was the Battle of Lexington and of course it was followed by the Battle of Concord and I want to reiterate this is also a high time to watch for false flag events because we are in what is known as the occult season of sacrifice a 40 day period from March 19th to May 1st in which dark occultists look at it as a prime time for bloodletting rituals and mass human sacrifice events you'll see repeatedly events have happened over and over again in this time period the Oklahoma City bombing the Columbine school shootings you know the examples go on and on and on you know I did on an entire show about this you could check it out in the archives on the podcast section of my website the day after that they also favor Hitler's birthday April 20th you know for obvious reasons so these next two days Sunday April 19th and Monday April 20th people out there should be exceptionally vigilant we should really keep our eyes open and watch for false flag events and if anything does occur I mean scream it from the mountaintops that it was a false flag okay because governments are looking to do events on these days that put people into deep fear so that they can justify their draconian agendas so if anything happens you can guarantee it was a false flag government sponsored terrorist event and it was not done by who they claimed it was done by so please be very vigilant over these next couple of days not saying that to inspect - you know foster fear in anyone just making people aware that this is a time period in which false flags have been done before and you know they stick to their guns and to their strategies they don't want to diverge from the strategies that have worked for them these psychopaths so you know until people figure out the strategy until they figure out the pattern these people are going to keep using it because it's worked up to this point so with that being said you know I think it's it's just highly appropriate that this would be done on this day and I didn't try to plan it like that folks it's like synchronicities keep coming up over and over like this and you know it just kind of worked out that today was April 18th going into the 19th and it just happened that I had promised a couple of weeks back that I was going to read this paper you know about the opening volleys of the American Revolution as written as recounted by Thomas Paine and here we are on the eve of the opening shots of the American Revolution ladies and gentlemen will continue this great paper on the other side of this break you're listening - what on earth is happening stay with us we'll be right back freedom man that's what it's all about [Music] [Music] [Music] welcome who are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host Marc Pascoe [Music] welcome back everyone you're listening - what on earth is happening here on rbn we're into the third hour of the broadcast for this evening and I want to give the call-in number once again because after I conclude reading this this paper the crisis number one from Thomas

Paine I will be going back to the phone so the toll-free number to join us is eight hundred three one three nine four four three once again toll-free 800 three one 394 43 I would like to hear your thoughts on the free your mind 3 conference if you attended I'll still take callers who attended the conference I would like to hear any ones take on my recent series on the Second Amendment on my demystifying the occult seminar if you want to make comments or so or have asked any questions regarding that I would like to hear people's take on my show a couple weeks ago or anything you know regarding it related to the psychological fear of rebellion against tyranny why people seem to fear that so much especially in the modern day or think that it's somehow not something that we should even entertain you know as a notion and why there's that deeply ingrained fear you know so these are the topics of course that I'd like to hear but you know there's no taboo topics ever so you know I won't limit it to just those things but there are just some suggestions on what people might want to call in and and discuss let me go back to the paper by Thomas Paine the crisis number one December 23rd 1776 there's an entire series of these papers which Paine wrote and distributed throughout the colonies during the American Revolution we kind of finished the first half of the paper now he's moving into the second half where he's going to comment on what he thinks is really going on his take on what's going on during the very early stages of the American Revolution so continuing I shall conclude this paper with some miscellaneous remarks on the state of our affairs and shall begin with asking the following question why is it that the enemy have left the New England provinces and have made these middle ones the seat of war the answer is easy New England is not infested with Tories and we are I have been tender in raising the cry against these men and used numberless arguments to show them their danger but it will not do to sacrifice a word either to their folly or their baseness the period is now arrived in which either they or we must change our sentiments or one or both must fall and what is a Tory good god what is he I should not be afraid to go with a hundred Whigs against a thousand Tories were they to attempt to get into arms every Tory is a coward for servile slavish self-interested fear is the foundation of Toryism and a man under such influence though he may be cruel never can be brave and I'm gonna stop there for a moment in common because this section is so powerful and so important to understand deeply and this was a big big part of my talk at the freer mine 3 conference where I made blanket statements about order followers one of the sections of my presentation was called true blanket statements regarding order followers in which I made three general overall blanket statements regarding all order followers in the history of humanity no matter what time period and I made the claim not even the claim the statement of fact that this is eternal truth it is not my opinion it is actually the way things are in nature in reality all order followers are bad people 100% all if you are following someone else's orders you are a bad human being I don't care what the order is - there is no such thing as an order follower who is truly intelligent an order follower does not have true intelligence when when an order follower develops true intelligence they quit being an order follower no such thing as a truly intelligent being that continues being an order follower and I'm talking about true holistic intelligence not left brain intellect only because true holistic intelligence incorporates the heart it incorporates true care and an order follower doesn't have that and three every order follower in the history of the world in the history of humanity was is now and until they quit being an order follower will remain a coward all order followers are cowards so to reiterate that little section of my presentation and relate it to what Thomas Paine is saying here every order follower is a bad human being every order follower is not non intelligent they do not have they have not developed true holistic intelligence they are not an intelligent thing and every order follower is a coward because at the deepest level of their being they will not do one thing they will not say no to evil they will not say no to the person who is the person or group of people that is controlling their minds and the refusal to say no to evil is willful complicity with it and I don't care who that offends get as offended as you like those statements are eternal eternally true they are eternal truth they are not my opinion on the matter they're the reality of the matter and that's very very hard for a lot of people to hear most people to hear in fact and there are people I know that attended the freer mind conference that insist that it isn't that way well tough is my answer to that you know you need to get your ego out of the way and recognize truth boys and girls if you don't understand that those statements are eternal eternally true eternal truth you're never gonna make them untrue by how much you don't want to accept them and I think I did a pretty decent job at you know hammering on those points and making it very clear that no amount of getting offended or not wanting it to be that way we'll ever make those statements untrue and this is what Thomas Paine is saying here he's not saying some Tories are cowards he's using the qualifier every every single one 100% of them blanket statement that is 100% absolutely true every Tory is a coward you could replace this today in the modern world every statist is a coward every order follower is a coward every believer in government and supporter of government is ultimately at the core of their being a coward the Tories were the supporters of the king who thought he was a god you know the people who wanted to remain loyalists to the crown that didn't want the colonies to break away and saw that his blasphemy against their God the Almighty King of England I mean please I mean how could anybody not see that as a boot licking coward I'm gonna have a shirt made just for myself that says on it every Tory is a coward you know not not that that'll be even understood by the zombies walking around you know on the street these days because they have no historical framework whatsoever to even know what a Tory is but maybe some people you know for some it might be a conversation starter it's just a the general statement that it makes maybe I'll make another one that says every statist is a coward you know that maybe you might get a little bit more understanding and more conversations going but my point here is this statement is eternal truth it's a blanket statement that pain is making here and it's true it's a true blanket statement you know he risked upsetting people by saying that he was trying to explain to them he tried to make numberless arguments to show the Tories their danger how the crown didn't give a damn about them didn't care about them was using them he said you know it ultimately did no good because they were in folly and baseness they were in total ignorance and folly and they had just base instincts operating all they cared about was themselves they thought that they were gonna get over they thought that they were gonna be the ones who were gonna benefit you know if the crown reigned victorious same thing happens to all boot licking order followers and cowards and Tories and status they get used up and they get thrown away when they're done being used up you know go look up the night of night of the Long Knives and see how the SA in Hitler's Germany were used up and thrown away and then massacred you know because they brought the new guard in place of the regime the SS it's all they're gonna do any of the people to try to help them bring in their agenda you know they'll be the first people to go because they were stupid enough to follow orders so anyway that's just my little comment on that section my little rant in that section but let's continue with the crisis by Thomas Paine but before the line of irrecoverable separation be drawn between us let us reason the matter together your conduct is an invitation to the enemy and he's addressing the Tories here yet not one a thousand of you has the heart to join him in other words the Tories didn't fight with the British you know they stood back and did nothing because they were cowards they just were you know hoping that the British would win and they would continue to live under the crown under the Crown's rule of continuing how is as much deceived by you as the American cause is injured by you he expects you will all take up arms and flock to his standard with muskets on your shoulders your opinions of are are of no use to him unless you support him personally for his soldiers and not Tories that he wants I once felt all that kind of anger which a man ought to feel against the mean principles that are held by the Tories a noted one who kept a Tavern at amboy was standing at his door with as petty a child in his hand about eight or nine years old as I ever saw and after speaking his mind as freely as he thought was prudent finished with this unfairly expression well give me peace in my day not a man lives on the continent but fully believes that a separation must some time or another finally take place and a generous parent should have said if there be trouble let it be in my day that my child may have peace and this single reflection well applied is sufficient to awaken every man to duty I mean just unbeliev well just unbelievable words here spoken by pain written by pain tell saying that he saw a torii with a child with him at his doorstep and he said oh I want give me peace in my day give me peace any day over over over this conflict and what pain is saying here that a real patriot you know a real parent who cared about their child would say if there must be trouble let it be in my day not in my child's day let it be in my day that my child can have peace in the future let the trouble be here and now when I'm older and my child is young so that he can grow up in a better world that's what a real parent would say not run away from conflict like a coward does not a place of continuing with the SA not a place upon the earth might be so happy as America her situation is remote from all the wrangling world and she has nothing to do but trade with them again this was one of the big founding principles of the founding fathers you know trade with all nations but entangling alliances with none don't get into their wars of aggression you know trade with all people but don't create entangling alliances with other nations where then you're gonna go into debt and you're gonna go into their conflicts continuing a man can distinguish himself between temper and principle and I am as confident as I am that God governs the world that America will never be happy till she gets clear of foreign dominion wars without ceasing we'll break out till that period arrives and the continent must in the end be Conqueror for though the flame of Liberty may sometimes cease to shine the coal can never expire America did not nor does not want to force but she wanted a proper application of that force wisdom is not the purchase of a day and it is no wonder that we should err at the first setting off from an excess of tenderness we were unable to raise an army and trusted our cause to the temporary defense of a well-meaning militia a summer's experience has now taught us better yet with those troops while they were collected we're able to set bounds to the progress of the enemy and thank God they are again assembling I will always consider militia as the best troops in the world for a sudden exertion but they will not do for a long campaign so here he's talking about the difference between a militia and an army that needed to be raised to actually fight the British with discipline because they were some of the most disciplined troops or the most disciplined troops in the world at the time and you know that's why the founders set up provisions for raising a standing army in the event of a crisis like this like an attack like this on this magnitude but then it would be dissolved afterward so you know he's talking about that you know they kind of waited too long to do this and that they you know were unwilling to raise an army you know they they wanted to let reason prevail but they realize they were up against an enemy that was not going to allow that to happen we'll continue this brilliant paper by Thomas Paine on the other side of this break ladies and gentlemen you're listening - what on earth is happening here on rbn stay with us everyone we'll be right back [Music] the cool decides that we don't dare speak Wow between us [Music] welcome back everyone you're listening - what on earth is happening you're on Republic Broadcasting I'm your host mark passio my website what on earth is happening calm we're going to jump right back into the crisis number one by Thomas Paine here we go I always considered militia as the best troops in the world for a sudden exertion but they will not do for a long campaign how it is probable we'll make an attempt on this city and he's referring to Philadelphia where he's writing the paper at should he fail on this side of the Delaware he is ruined if he succeeds if he succeeds our cause is not ruined he stakes all on his side against a part on ours admitting he succeeds the consequences will be that armies from both ends of the continent will march to assist their suffering friends in the Middle States for he cannot go everywhere it is impossible I consider how as the greatest enemy the Tories have he is bringing a war into their country which had it not been for him and partly for themselves they had been clear of should he now be expelled I wish with all the devotion of a Christian that the names of Whig and Tory may Nevermore be mentioned but should the Tories give him encouragement to come or assistance if he come I as sincerely wish that our next year's arms may expel them from the continent and the Congress appropriate their possessions to the relief of those who have suffered in well-doing so pain was for putting the Tories out of America because if they helped the British win the war some people wanted to put the Tories out of America even when the colonists on the Revolutionary War and you know it's something to think about I always go back to the the point I've made many times that I think one of the reasons that the Revolutionary War failed long term and perhaps the American experiment may have failed long term remains to be seen is because we didn't put the Tories out of America and we allowed them to just stay here even though they didn't lift a finger to help secure freedom here did lift a finger to beat back the progress of tyranny in this land and you know people here just let them stay because they didn't have the heart to put him out of the country the Tories in my opinion never had any business or right to stay in a place that they didn't didn't give a damn about the other people or their freedom you know they were just as complicit as those British soldiers and trying to take people's freedom away with their mindset and the status of today are no different than the Tories have then so going back to this paper let's see where I left off should the Tories give him encouragement to come or assistance if he come I as sincerely wish that our next year's arms may expel them from the continent and that Congress appropriate their possessions to the relief of those who have suffered in well-doing a single successful battle next year will settle the whole America could carry on a two years war by the confiscation of the property of disaffected persons and be made happy by their expulsion say not that this is revenge call it rather the soft resentment of a suffering people who having no object in view but the good of all have staked their own all upon a seemingly doubtful event yet it is folly to argue against determined hardness eloquence may strike the ear and the language of sorrow draw forth the tear of compassion but nothing can reach the heart that is steeled with prejudice so I believe he's saying there you know that people may you know feel sorry for them and not want to go that far you know and it may be difficult to convince people otherwise at least that's kind of my interpretation of that continuing quitting this class of men I turned with the warm ardor of a friend to those who have nobly stood and are yet determined to stand the matter out I call not upon a few but upon all not on this state or that state but on every state up and help us lay your shoulders to the wheel better to have too much force than too little when so great an object is at stake and I'll pause right there the pain is calling all of the colonists to rise up to help them in the effort against the British in the Revolutionary War continuing let it be told to the future world that in the depth of winter when nothing but hope and virtue could survive that the city and the country alarmed at one common danger came forth to meet and to repulse it I mean just unimaginably powerful words right there let it be told to the future world that in the depth of winter when nothing but hope and virtue could survive that the city and the country alarmed at one common danger came forth to meet and to repulsive [Music] [Music] welcome back everyone you're listening - what on earth is happening here on rbn I'm your host Marc passio my website what on earth is happening dot-com I'm gonna jump right back into this reading of the crisis number one by Thomas Paine say not that thousands are gone turn out your tens of thousands throw not the burden of the day upon Providence but show your faith by your works that God may bless you it matters not where you live or what rank of life you hold the evil or the blessing will reach you all the far and the near the home counties and the back the rich and the poor will suffer or rejoice alike the heart that feels not now is dead the blood of his children will curse his cowardice who shrinks back at a time when a little might have saved the whole and made them happy I love the man that can smile in trouble that can gather strength from distress and grow brave by reflection it is the business of little minds to shrink but he whose heart is firm and whose conscience approves his conduct will pursue his principles unto death my own line of reasoning is to myself as straight and clear as a ray of light not all the treasures of the world so far as I believed could have induced me to support an offensive war for I think it murder but if a thief breaks into my house burns and destroys my property and kills or threatens to kill me or those that are in it and to quote bind me in all cases whatsoever unquote to his absolute will am I to suffer it what signifies it to me whether he who does it is a king or a common man what signifies it to me whether he who does it is a king or a common man in other words if your average person doesn't have a right to do it there's a king or a government have a right to do it continuing my countrymen or not my countrymen whether it be done by an individual villain or an army of them just talking about natural law here folks you know you can't give somebody a right that you don't have individually continuing on if we reason to the root of things we shall find no difference neither can any just cause be assigned why we should punish in the in the one case and pardon in the other let them call me rebel and welcome I feel no concern from it so he accepted the title of rebel as well he should and as it's a proper title a rebel is somebody who's doing something righteously against coercion and tyranny they're rebelling against it righteous rebellion what we're talking about here and why is there this widespread fear of this this should be something that people should embrace should feel proud to be involved in not shrink away from and be all Oh taken aback how could you possibly even suggest such a thing you know you just see the overwhelming cowardice in the modern world when it comes to this when our forefathers were you know wore the label rebel with pride let them call me rebel and welcome I feel no concern from it but I should suffer the misery of Devil's were I to make a whore of my soul by swearing allegiance to one whose character is that of a sada SHhhh stupid stubborn worthless brutish man I conceive life likewise a hard idea in receiving mercy from a being who at the last day shall be shrieking to the rocks and mountains to cover him and fleeing with terror from the orphan the widow and the slain of America there are cases which cannot be overdone by language and this is one there are persons to who see not the full extent of the evil which threatens them tell us about it there are persons to who see not the full extent of the evil which threatens them they solace themselves with hope that the enemy if he succeeded will be merciful see this is a big part of this psychological mindset they think oh if the people in charge now win they're gonna have mercy on people who didn't stand against them yeah that's what you think find an example in history where that has happened good luck because you'll not find it continuing on it is the madness of folly to expect mercy from those who have refused to do justice and even mercy work on where conquest is the object is only a trick of war the cunning of the Fox is as murderous as the violence of the wolf and we ought to guard equally against both house first object partly by threats and partly by promises to terrify or seduce the people to deliver up their arms and receive mercy the ministry recommended the same plan to gage and this is what the Tories call making their peace quote a peace which path is all passive passeth all understanding indeed a peace which would be the immediate forerunner of a worse ruin than any we have yet thought of ye men of Pennsylvania do reason upon these things were the back counties to give up their arms they would fall an they would fall an easy prey to the Indians who are all armed this perhaps is what some Tories would not be sorry for where the Home Counties to deliver up their arms they would be exposed to the resentment of the back counties who would then have it in their power to chastise their defection at pleasure and were any one state to give up its arms that state must be garrisoned by all house army of Britons and Hessians to preserve it from the anger of the rest mutual fear is the principal link in the chain of mutual love and woe be to that state that breaks the compact how is mercifully inviting you to barbarous destruction and men must be either rogues or fools that will not see it I dwell not upon the vapors of imagination I bring reason to your ears and in language as plain as ABC hold up truth to your eyes I thank God that I fear not I see no real cause for fear I know our situation well and can see the way out of it while our army was collected how dared not risk a battle and it is no credit to him that he decamped from the White Plains and waited a mean opportunity to ravage the defenseless jerseys but it is great credit to us that with a handful of men we sustained an orderly retreat for near 100 miles brought off our ammunition all our field pieces the greatest part of our stores and had four rivers to pass none can say that our retreat was precipitate for we were near three weeks and performing it that the country might have time to come in twice we marched back to meet the enemy and remained out till dark the sign of fear was not seen in our camp and had not some of the cowardly and disaffected inhabitants spread false alarms through the country the jerseys had never been ravaged one more we are again collected and collecting our new army at both ends of the continent is recruiting fast and we shall be able to open the next campaign with 60,000 men well-armed and clothed this is our situation and who will may know it and he's talking about basically the retreat of the Continental Army toward Valley Forge of course first came the Battle of or the the siege of Philadelphia by the British and they took Philadelphia but then you know of course the tide began to turn at Valley Forge continuing on with the essay the very end of it now by perseverance and fortitude we have the prospect of a glorious issue by cowardice and submission the sad choice of a variety of evils a ravaged country a de populated city habitations without safety and slavery without hope our homes turned into barracks and bawdy houses for Hessians and a future race to provide for whose fathers we shout out of look on this picture and weep over it and if there yet remains one thoughtless wretch who believes it not let him suffer it unlamented that is the conclusion of the crisis number one issue number one by Thomas Paine December 23rd 1776 written right here in Philadelphia I consider Paine to be probably the greatest mind that has ever existed on the American continent people should really delve into his works his works were I mean you know the the the controllers and and the mercenaries and the armies of you know that we're fighting against the colonists and the king they wanted no part of this man's ideology to reach the eyes and ears of the people you know they recognized that his clarity of thought and his passion in his speech and in his writings were were a call to the colonists to take up arms and do what had to be done at that time and you know thank God for him is all I have to say you know I consider him the greatest of the founders of America so you know I don't think it could have been more appropriate that this was read on their anniversary of the battles of Lexington and Concord April 19 1775 in any event there it is and for the duration of the show for the little time that is remaining I guess we could go to the phones for whoever is still holding on on the line let's see if we can get anybody who's still holding let's see if we could bring up a day from Alabama a day you're live on what on earth is happening welcome to the show hey how's it going mark I'm doing well yourself I'm doing well hey I had a question on that kind of applause to this comedy year sure um I was wondering with like the energy focused toward the con like on the ground I was there for 20 the national we day yes believe the darkest Walt is kind of take advantage of that energy for their flag operations I mean I'm not saying it's out of the realm of possibility but I really do believe that it's more so that they're really kind of almost honoring Adolf Hitler's birth you know as socialists themselves whether they be the National Socialist variety or the international socialist variety meaning communists it's really two sides of the same coin the people that don't understand that the whose things are basically the same with slightly different methodologies are very naive in their understanding of how totalitarianism works but I tend to look at it more simply they're kind of almost revering Adolf Hitler and the modern day through these false Flags I think it also has to do with the ancient occult belief system of you know Perpetual blood sacrifice to the Sun especially during the 40 day period which is traditionally referred to as the season of sacrifice in the dark occult so those are the reasons I really feel that they're doing it could it have some connection with you know that they made you know weed on 4/20 April 20th because of the police code 420 being referred to as you know marijuana possession I'm not saying it's outside the realm of possibility but I think there are other much more important and occult eclis connected reasons for why they pull false flag events during this time period I hope that answers the question okay yeah thanks good job with the Freemont conference three so much will oh it was the most incredible event I've ever been a part of I never in my life thought that for your mind one and two could be surpassed but it was done last weekend just outside of Philadelphia in langhorne pennsylvania it was just bigger and better than ever and i see the event as something that is going to grow in the future and yeah we may need a bigger venue at some point just absolutely incredible people incredible speakers a phenomenal weekend overall could not have possibly asked for any better energy or consciousness in that event the people who were a part of it I thank them so much and people who aren't you'll get to see the videos on you know YouTube when they come out but I hope that people would consider trying to be a part of it in the future because it's just an absolutely world-changing is life-changing event and hopefully it will be it will become a world-changing event at some point but you know I can't say better things about it I mean people think we're hyping it up trust me ask the people who were there there it's no hype it's just something that you will touch you and you'll remember for for the rest of your life let's put it that way okay well I'll definitely help them make the next one in a give the great work now thank you so much let's hear from Nathan in Massachusetts Nathan you're live on what on earth is happening welcome good evening mark very good how's it going I'm doing well yourself I I would well let me just say that I'll sum that up and agree with what you just said I was at the freer mind conference and I echo and say in amplify everything you just said it was it was that wonderful and yes it will touch me and everyone else for the rest of their lives it's the kind of people that are going to be the those who rise let me just carry on what you're saying here these people rise in the spirit of Thomas Paine these are the real heroes of this day you know I I I have like five or 17,000 things I was going to write when I called in but let me just go with this this is a this is the zeitgeist necessity of our time the courage that we need to cultivate in our society all right I apparently am a descendant now we're on the eve of a Lexington and Concord time I'm apparently a descendant of the Harrington house who if you look at the story the man was shot on the battlefield and lurched into his wife's arms and died on his porch in her arms so this is apparently in my blood or even if not I'll take that as something that can fire me up because honestly you do have one life and those who are going to be stuck in their head cages are going to be those who are going to be stuck in the FEMA cages right yeah I don't know I I was terrified to call and say something but apparently that's what I'm going to say well Nathan I want to thank you so much for the call and we're coming up to a break right now so ladies and gentlemen stay with us we'll come up for the last segment just after this these words you're listening to what on earth is happening right here on Republic Broadcasting we'll be right back [Applause] [Music] [Music] welcome back everyone you're listening to what on earth is happening here on our behalf welcome back everyone will listen to what on earth is happening I'm the host mark passio final segment for the show this evening we were talking to Nathan in Massachusetts Nathan I just want to comment on your comment I agree that these were the people who are the truly courageous souls coming together I mean courage was so abundant in that room as well and I could tell that there are people there there were people in that audience in that crowd that are going to be teachers themselves that are going to come into their own and are going to break forward information that they know and that they have discovered and they have learned and they are going to become future teachers there's no question in my mind that some of those people in that audience are going to be up on a stage themselves teaching a lot of this information to other people because there were so many people there with really great communication skills and you could tell that they had a desire to you know spread this knowledge to anyone who needs to see and hear it and that's what the great work is all ultimately about so Nathan that's my comment on your comment regarding the free your mind conference and I want to just thank you for the call you got it okay let's try to fit a couple more calls in let's go to Greg in Colorado Greg you're live on what on earth is happening welcome yes hi mark yes thank you thanks for taking my call sure just a little newsflash for everybody in Colorado I'm up here in the San Juans and 9,000 feet I decided to go have a sandwich and a beer walked across the highway I looked at the highway weather warning sign right next to the the surveillance camera and it said CSP Colorado State Patrol saturated enforcement saturated enforcement rolling roadblocks Wow I vote didn't even come up with something that good did they Wow and what is their justification why statewide and what is their justification for something like this in your money Wow yeah 420 on the location huh it's unbelievable unbelievable unbelievable it makes me think you know not again not to instigate fear in any way but it makes me think they have something big planned this year for these these days so people definitely keep your eyes open minds trying to get you know they're trying to get people whipped up but that's that means we need to be vigilant and we need to stay in that higher level of consciousness as well and help people to understand what their tactics how they really work well unfortunately folks that's all the time we have for this edition of what on earth is happening great show thanks for Bob Dustin for coming on in the first half great callers as always remember everyone there's only two mistakes that one can make on the path to truth not starting and not going all the way thanks so much for listening we'll see you right here next week good night [Music] [Music]

What On Earth Is Happening Show #192

Topics: *Mark's hiatus from What On Earth Is Happening, the New WOEIH Podcast, Mark's new Anarchist Hardcore-Punk Band, The Founders, Free Your Mind 4, Mark's FYM4 Presentation, the Unconsciousness of modern human society, the possibility of the need for physical Rebellion against Tyranny, In-Fighting within the so-called "Truth Movement," False Flag events of 2015, the Agenda to disarm Americans, Social Engineering and Mind Control, Neo-Feminism in America today, The Emasculation of American Men, "Man-Spreading," Mark accused of being "Racist," Mark's upcoming work*

freedom man that's what it's all about you've got to groove on freedom like the good book says welcome you are listening to what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches its critical moment of choice and now here is your host mark pascio welcome one and all you're listening to what on earth is happening i'm your host mark pacio today is monday december 7th 2015 and i'm back from a long hiatus my last podcast was back in april of 2015 april 18th to be exact that's almost eight months ago and uh you know a whole lot has gone on since then uh in my life and in the world obviously and i just wanted to come on and uh ease back into things and tell people a little bit about what i've been doing during my hiatus some of my reasons for the hiatus and i'll catch people up to date on some important happenings and things that are actually taking place so let's jump right in and uh and just tell people a little bit about why i took a break for a while um i was feeling pretty burnt out i felt like i needed some time for myself to do things for my uh physical health and mental health and um just really wanted to put the ball in some other people's court for a time and uh just take some time that i needed and i did that and i'm going to attempt to come back in a podcast format maybe eventually move it back to uh some form of an internet radio network but for now uh it's going to be in in a podcast format once again and i'm going to attempt to do this about once a week that's going to be my goal so um hopefully these will be pretty regular and i think it's uh important that i keep people up to date especially with the freer mind conference coming up for your mind 4 is coming up in april of 2016. i'm going to talk a little bit about that today as well so um you know i'm not a superhuman folks you know contrary to what some people may think um i need time for myself i need to rejuvenate and recharge i need to reflect upon things i need to figure out new ways that i want to approach this work and other things that i do so um that's that was my main reason for the podcast hiatus for the radio show hiatus uh i left the um former network that i was on republic broadcasting and i just want to kind of do this on my own without a network for the time being i want to say a few things about um you know how i want to approach things moving forward for people who are familiar with me and my work this shouldn't really come as too much of a shock they kind of know my personality they know that i'm straightforward don't sugarcoat anything but i really want to even move that into higher gear because with the events that are going on in the world and how things are very rapidly quickening in the move to um bring people into totalitarianism and slavery um i really want to drop the pretense all together uh about you know kind of talking to people in any kind of a way that uh placates them or uh makes them not feel offended by you know what i have to say i really want to bring out a little bit more of what i would consider my real personality uh how i would interact with friends just on an everyday basis and you know just really be more of who i really am which is somebody that doesn't tolerate bullshit and doesn't placate bullshit and bullshitters to say in very plain street language okay uh and there's a whole lot of that going on in the world today there's way too much of it and there's way too many people that placate it and because they're placating that people don't understand that their behaviors are completely unacceptable and the things that they support are unacceptable uh in other words i want to make this radio show if you will even less politically correct than it ever has been before uh and i want to really stick it to people who need it stuck to them so to speak you know uh who need to be completely told that what they're doing um is not only asinine not only destroying our culture not only destroying our values but ultimately leading us into a state of slavery from which we may never escape and it's wrong and that's the problem is so few people are willing to tell people that their behavior is wrong so this is going to cut like like moving forward i want to make what i've been doing even more in your face and abrasive because um that's what i'm really like on a day-to-day basis when i talk about these things i'll just give a quick anecdote you know and i'm going to get into this a little bit later in the podcast you know the whole false flag incidents that are taking place in the world recently like i said like i've been saying 2015 is the year of false flags we've had more false flags this year than ever before and it is starting this gun control debate in society uh and you know i i recently made someone so uncomfortable that they walked away from me in a uh in a pub okay because i was saying to a friend i don't care what people want to talk about and debate on regarding gun control there is no debate and when i talk to somebody when they bring up this issue and ask me what my take on it is i immediately say there is absolutely no debate i don't want to have a debate because here's the bottom line are you going to come and try to take my guns from me because you'll be met with the front end of an ak-47 if you try it and i said so will any agent of the state who tries to do that period the end of the debate and that's that should be the attitude of every american who values their freedom and wants to remain in any modicum of the the sense of the word free at all so you know i'm going to get into talking about some of these false flag incidences incidents later on the the the program so i've done a lot of interviews during the hiatus and you can check all of those out you know i wasn't completely inactive as far as the great work is concerned although i've been busy with other aspects of the work which i'm going to also get to there's many interviews that i did with many great radio talk show hosts and you could check that out on the news section of my website what on earth is happening dot com if you're a new listener of course i always recommend to people to go up to the podcast section of the site the archives and just uh move forward in order from number one forward because there's a progression of information there a lot of people you know will look at my website and say i don't know where to start you know if you read the home page if you read the landing page it tells you where to start where i recommend that you start i recommend that you start in the audio archive the podcast section and you go back to number one and you work your way forward in order at your own pace it's building block material uh there are prerequisites you know listening to the modern uh podcast that the later ones in the series is you know be you shouldn't do that before you listen to the early ones because the information in the later ones has prerequisite material that you need to understand from the earlier podcast so take them in order if you're new if you're a new listener and move forward at your own pace you'll get the maximum value from the information that i've shared by doing it that way i want to say thank you to all the people who um expressed concern for me during the hiatus and you know just real quickly you know people uh basically wrote to me and asked in many cases are you okay and the answer is you know no not really you know it's something it's something else i want to talk about um i'm not okay um i'm not okay emotionally you know physically yes i'm okay you know actually physically i'm in better shape than i've been in my life i've really been uh doing uh you know in my personal life a lot of uh physical activity um trying to stay as fit as possible and keep my health in as good shape as possible um i've been uh you know doing a lot of physical fitness work i've been training in martial arts because that's just as important as learning how to handle firearms should it come to a situation where uh self-defense is going to be required um so i've been studying the martial art called jeet kune do which was bruce lee's system of martial arts uh street fighting and um that's been going really great um i've been enjoying it immensely it's it's been helping keeping me in decent shape and uh it keeps the mind sharp as well i've been um doing other activity in the form of music which i'm going to get to uh and that's a really really big new thing for me i've always been involved in music i've always been a vocalist and been involved in bands in the past and i'm going to tell everybody about my new project in this podcast so uh just to go back to uh you know the thank yous that i was about to send out um a lot of people expressed a lot of support and concern for me during the hiatus and you know while i i totally appreciate that i might i've been fine physically but the answer to a lot of those questions and concerns is you know i'm not i wasn't okay emotionally and mentally in many cases uh during that time because a lot of things have been taking place in my personal life and just seeing the state of the world the way that it is and rapidly growing worse i mean things are growing more and more and more insane by the day and it seems that less people are awake it seems that people who seem to be awake are really not it seems that the mind control was working uh even more effectively on people and more people are television watchers and less people are readers and there's just there's so much going on in society that is absolutely tragically horrific and i'm going to get into that as well today um but i just want to say thank you for the concern because it's definitely appreciated and heartfelt and i understand that you know p a lot of care was sent my way during that time so uh thank you for that thank you for people who uh um helped support me in my personal life and in the work that i do by uh sending me gifts and donations and you know that that really helped me to keep going um and just thanks for you know having the mindset that you do and being part of the fight for freedom you know that's more appreciated than anything else so i just wanted to say thanks to everybody for showing their support during my time off um just wanted to mention quickly before i get into the material for today uh that there is a donation button on the what on earth is happening website and for people who have found value in my work and want to uh help to support the work that i do and i'm going to continue to do you could make a donation by clicking that on the left side of what on earth is happening dot com the donation button uh with that said i'll i'll jump into some things that i want to talk about for today like the freer mind 4 conference i mean this is going to be the biggest conference by far of 2015 for anything having to do with events that are taking place in our world and truth being spoken regarding those events for your mind is a conference on consciousness mind control and the occult and it takes place now yearly in the philadelphia area it was by yearly i founded this conference back in 2011 and set it up as a by yearly event a bi-annual event during the odd years so we did one in 2011 in 2013 and in 2015 i turned it over to new organizational members in um i guess that was late 2014 because freer mind 3 was under new organizers and they've done a phenomenal job with the event made it uh bigger than ever before a freer mind three was by far the biggest event that uh uh was part of the freer mind series and i'm sure free or mind four will be even bigger so the speaker lineup is just phenomenal already this is this conference is going to be taking place um just outside of philadelphia in bucks county pennsylvania on april 15th 16th and 17th of next year 2016. next year is just right around the corner we're rapidly approaching the end of the year it's amazing how fast 2015 flew by and uh the freer mind 4 conference is going to be here before we know it it's going to take place at the sheraton bucks county hotel once again the same venue that freer mind three was held at which was a phenomenal venue uh the sheraton bucks county hotel is located at 400 north oxford valley road in langhorne pennsylvania just outside the city limits of philadelphia so here's the description of the event freer mind 4 returns to philadelphia in 2016 with a three-day conference featuring top caliber whistleblowers and researchers from across the country who will shed light upon our world's problems and bring forward empowering solutions spreading awareness on the topics of consciousness mind control subversive occult influences holistic mind-body spirit health and solution-oriented approaches to the problems humanity faces in these challenging times that's what free your mind has always been about and will continue to be about in the future the speakers lined up for freermind4 already bob tuskin kathy o'brien david whitehead freeman jamie hanshaw jay parker janiece barcelo jim mars john vibes jordan maxwell josie the outlaw wales ken rolla laura eisenhower myself mark pacio mark phillips mary sean young max egan and ross ben and more speakers are going to be announced soon that is not the complete speaker lineup that is already a phenomenal lineup of speakers the tickets for the freer mind conference have been on sale for months and uh all an all-weekend pass is 169.99 individual day passes 59.99 you could visit the conference website for more information the conference website is freeyourmindconference.com once again freermindconference.com free your mind for coming at us in april of 2016 april 15th 16th and 17th now my personal presentation at the freer mind 4 event is going to be a double presentation yes i'm going to be giving actually a double presentation on over two nights my presentation will be split over two days at the freermind 4 event it will be on saturday and sunday so that's saturday april 16th and sunday april 17th and this two-part presentation that i'll be delivering will be entitled neo feminism and the satanic epi eugenics agenda that is my topic over a two night presentation for freer mind four neo and the satanic epigenetics agenda and that i'm going to go more in depth into this topic than i have before i'm going to be talking about the war on men and therefore by proxy the war on women i'm going to be talking about neo-feminism as a satanically inspired agenda i'm going to be getting into how it is an example of eugenics eugenics through waged through mind control waged through social engineering and hence what i refer to as epigenetics and uh you know there's going to be a lot of detailed information in this presentation and it's going to be uncomfortable information information that many people don't want to hear that's what i pride myself in doing saying the things that other people won't say because they're a little bit timid a little bit afraid they want to be liked more than they want to tell the truth they you know uh don't want people to be offended you know they don't want to upset their delicate sensibilities you know well like i've always said and is the tagline for this show get as offended as you like and uh you know if you don't want to be offended don't show up for my presentations at freermind4 because i'm going to say some hard things that many people are not going to want to hear so it's going to be a very intense presentation and it's going to cut through all the bs and it's not going to it's not going to hold back any punches let's put it that way so you're going to want to check that out at for your mind 4 over uh two nights so speaking of epigenetics and neo-feminism i'm going to be getting into some anecdotes about incidents that i've been through recently uh just in interaction through music because of course with um with a new band you want to get out there and promote and you want to meet people in the music scene and you want to uh you know meet venue owners and bookers and you have to really put yourself out there socially in order to promote a ban properly and that's one of the things i've been doing recently so i want to tell people about my new music project it's called the founders that's the name of my new band the founders and we are a we are an anarchist hardcore punk band so for people who um aren't too familiar with that genre of music it's kind of a blending of the uh punk rock the old punk rock style kind of from the late 70s and uh 80s through into the early 90s and it's it's kind of blended with a more hard and abrasive style of music called hardcore so it's a faster and heavier form of old-school punk rock known as hardcore punk so it's taking punk and it's hardening it even more than its original um stylings and you're putting more uh heavy and abrasive lyrics into it um with faster some faster beats so um you know anybody who's around my age around 40 probably would have heard this musical genre heard of it if not actually be familiar with it um you know it's uh it's not your father's music let's put it that way you know it's uh this isn't music for old men wearing fedora hats you know uh this is music for you know people who are into fast paced fast moving energetic music that is up and in your face and you know putting a message forward specifically our style of um this form of hardcore punk so you know i grew up on stuff like this this is stuff that i listened to when i was you know in my teens and early 20s and uh i still love it you know um i like heavy music i mean when people heard my uh you know um bumper music during the wall on earth is happening radio show and podcast you know it's it's mostly metal um i think metal punk hardcore genres like that are the essence of rebellion at least they were intended to be you know part of what we talk about in the founders is how that rebellion was sucked out of the music you know sucked out of those genres sadly and most people who are still in these you know so-called heavy genres of music like metal hardcore and punk they're not talking about anything you know they're just posers who are basically you know trying to be part of a scene they're trying to you know forge an identity you know uh they think it's all about you know what they wear how they style their hair what tattoos they have you know what kind of people that they hang out with in this quote unquote scene they're seamsters you know they're not they're not interested in the message they're not interested in rebellion you know and you know another thing i'm just kind of tired of hearing when i bring up music is all these new agers who think oh all music has to be this uh you know namby pamby fairy style um you know what woodland flute music all the time or something or you know playing the didgeridoo you know it's like get over yourself i mean for real okay you know how old are you are you 90 years old you know because i'm not you know i want some energy in my music and don't don't give me this crap about oh it's just all about just vibration there's more to music than just the vibrational tonality and you know what sometimes you need an abrasive and discordant tonality to wake people up okay sometimes they need to hear it that way that's my style it's always been my style it's always going to be my style i'm never going to hand it to you with the sugar cube okay so if you're expecting that you're going to have a long long wait you know so all the people that think oh music is only this one thing and it's got to be so pleasing and pleasant and sweet and nice it's like whatever you know i understand the experiments with the emoto water stuff i get it understood but you know what i could be just as effective playing some hardcore punk music up on that stage and delivering a message through that then anybody can through whatever new age music or you know uh relaxing calm soothing melodies that they can play so you know i'm not really interested in hearing people's opinion on that you can have your opinion on that i'm going to write the music and play the music i want to write and play got it okay so you know this isn't going to be for everybody the founders is not going to be for everybody i fully understand that you know this is what again what i like it's what i grew up on i'm proud of this band how it's coming out so far for as long as we've been around since by the way we were born on the fourth of july okay you know i was trying to put something together a little bit before that it kind of wasn't working out i had a little fourth of july uh party here at my house uh where we did uh uh a cookout and a few friends showed up and we got to talking i was telling them that you know the project i tried to put together wasn't really working and you know they said hey we're we're musicians and you know we got together for some rehearsals after that and it went great we really gelled well and uh you know realized we were kind of on the same page about what we wanted to do musically and uh you know so far it's working out great so uh this band was born on the 4th of july which is amazing i'm in an amazing synchronicity and we publicly announced the ban on september 11th so kind of uh two very interesting synchronicities there um i'll tell people a little bit about our upcoming show and again just to go back to this briefly um this band isn't going to be for everybody i fully realize that not everybody's going to like the style if you don't like the style don't listen to it simple as that i tend to think the founders are going to be a band either people love or they hate there's not really going to be much in between you know it's either you're kind of familiar with the genre you kind of like it you really like the message you resonate with the message and the energy or you don't and i totally understand that's what it's going to be like and you know what i prefer it that way that's how i prefer things so we clearly know where we stand you know that's how i tend to be in my personality that's how i tend to be in my life and why should it be any different in my music so uh check out my band the founders our website is the founders dot us the founders dot us s that'll take you right now to our facebook page we're probably gonna have a full website under construction soon but for now uh we have a facebook page uh for the band with photos up there and uh you could check out some videos of course uh we don't have a demo recorded yet we'll probably be going into the studio to record a demo very soon um we're going to be playing live though we played a preview show where we played a couple of songs at an open mic night uh back in october but um we're going to be playing our first full show with some other great bands uh coming up this week i know it's very short notice for people who are listening to the to the radio show right now but if you are in the philly area and you want to come out and check out my band the founders we'd love to see you out there live we're going to be playing this thursday december 10th 2015 with three other awesome bands custom power ride beards and whiskey and concord road this will be taking place this show will be taking place at connie's rickrack connie's rickrack is a uh you know popular original uh band music venue uh that's uh located right here in south philadelphia uh in the italian market section of south philly uh which is my neighborhood i mean i i you know when i usually go there to check out some vans i walk over there it's right near my house so um you know this is you know right in my uh neighborhood that i grew up in so uh connie's rick rack is at 1132 south 9th street in philadelphia um again this is this thursday december 10th uh the founders uh philly's newest anarchist hardcore punk revolutionary band and we're playing with custom power ride beards and whiskey and concord road three other great bands uh it's ten dollars admission for the show the show is 21 and over to uh go in because there it is a bar and there's alcohol served and um uh the doors will open at 8 pm this thursday night and the show will begin at 9pm the first band will start playing at 9pm so for more information on the founders check out our website thefounders.us um that's you know one of the things i've been doing and you know what we're bringing a very serious uh upfront message about freedom with this ban that's what the lyrics are all about the lyrics are all about ending tyranny ending slavery ending mind control you know um talking about a lot of the negative elements that are taking place in society you know uh it's freedom oriented music it's music that is exposing the dark new world order agenda it's um music that is talking about what we need to do to get our minds right and um you know start fighting back against this tyranny so um that's what the founders talks about are you know our songs again are are up in your face you know um very simple language and you know it's abrasive and again like i said it's not going to be for everybody for people that enjoy energetic in your face music though they're going to love it for people who don't like that kind of music you're not going to be into it so you know don't listen to it and complain about what i want to do musically if you don't want to do music like this form your own musical outfit and do whatever kind of music you like and put a message forward with it just like if people don't like how i deliver the truth then uh you know get your own radio show or do your own video or host your own conference or you know um you know do your own presentations you know and this is kind of like what i want to transition into talking about there's so much infighting in the whole truth community and nitpicking and people just um constantly trying to say oh this person's a show because he talks about this or this person's a show because he doesn't talk about this and meanwhile these people are basically doing nothing but complaining you know i've talked about this before and it's going on worse than ever a lot of in a lot of ways i think these people may be paid this info agents just to spread uh you know division within the scene within the truth telling community and uh you know you often look at people who complain about things like this and complain about certain people who are doing something and you look up what they're doing and the answer is always nothing they're doing nothing you know which is why i want to say i i really do appreciate a lot of the people who have stepped up and started doing their own podcast started doing their own radio show um started making their own presentations you know i see a new crop of truth warriors out there who are really doing the great work and it's it's really encouraging to see you know i i like to think that maybe my work helped you know uh influence some of that and other um pioneers in the this whole community really helped influence that you know as they say you know if we've seen farther it is because we are standing upon the shoulders of giants i look at it like that as well for myself if people who came before me in doing this work and putting this information forward didn't do what they did to the effective level that they did it and the proliferous level that they did it i wouldn't know what i know and i wouldn't be able to do the work that i have done so you know um it's good to see that it's continuing forward and people are taking the ball and rolling with it and i think more of that needs to be done i think we need to have less infighting and people need to unite on the one front of freedom and we could sort out all the differences later you know um i do want to talk about my view of modern society and my take on the whole getting this done through consciousness aspect where i previously really had a very positive outlook towards some of this stuff uh my outlook has be becoming decidedly darker when it comes to our ability collectively as people who are trying to expose the truth to quote-unquote wake the sleeping masses and get this transformation um in humanity accomplished in consciousness or in other words um breaking human slavery breaking the chains of human slavery through consciousness alone i am at the point where i do not believe personally any longer that it will be done that way and i'm just being honest you know i'm i'm being honest about where i stand you know in my analysis of the situation that we're in i think things have grown dramatically worse i think people are more asleep than ever i again i don't know where people who have a positive attitude live or where they're coming from or what they're seeing it's almost like we live on different planets because anybody who has a positive outlook about people waking up i think they hang out with too many people who are very awake and they don't understand how outnumbered people like that are so they're seeing the world through rose-colored glasses so to speak they think everybody is like them because i feel they're leading a sheltered life they're leading a sheltered existence they're only surrounding themselves with people who are of like minds and they don't venture out into the world to see what's out there they don't venture out in this society very much in many cases they're you know they'll sit behind the keyboard all day talking to people who are like them or they'll hang in their houses or in their friends houses with people who are like them and then they develop this mindset wow everybody's waking up because people i deal with on a daily basis they're they're pretty awake it's a very very naive mindset to work yourself into because i mean when i go out into the public into society on a daily basis i see what's out there and i'm telling you it is mindless golems out there that have absolutely no idea about one thing that is happening you could not bring up one topic of truth one topic of anything that is of significance to human freedom and these people have not looked into one iota of it not one microscopic aspect of it they're closed-minded they're ignorant on every aspect of what's going on in life all they know is what the television tells them you know they are absolutely shut down and don't care that's the thing not only are they dumb and completely ignorant they don't care about how dumb and ignorant they are i mean these people are just that they are the perfect slave they are the perfect mind control slave they love it the way it is in many cases absolutely love it the way that it is totally identified with money totally identified with career totally identified with the state and they want all of that to continue unabated unchallenged because that's their comfort uncomfortable in my slavery is their mental attitude oh uh you know if it's slavery and this is slavery well it's not so bad i actually got an email from a golem like this that said if this is slavery well then slavery isn't so bad why are you so angry what makes you what makes you so uncomfortable with the world the way that it is i mean you have to be an absolute child to think that way i mean it's not that stuff like that doesn't even make me mad or upset it makes me profoundly sad that cultural engineers social engineers are capable of making a human being into that putting a human being into that mental emotional and spiritual condition it's almost an unfathomable thing i i could not have believed it years and years ago until i understand the depth of what was really taking place in our world now that i understand the depth of social engineering epigenetics mind control you know i i realize that these social engineers have accomplished something that is a miracle it's a miraculous situation that they could take a a human being with actual potential and turn them into a mindless golem robot that doesn't care about their own freedom let alone anyone else's it's pathetically sad these people aren't human beings i don't know what they are but a human being is not one of them they're not even close to being a human being not by my definition of what a human being is and the qualities a human being has not even close so my take on the ability of people who are awake to awaken the masses and get it done through consciousness is and has for actually quite some time been very dark i personally think this is going to come to war i've stated this in some interviews and i'm just going to come out and say it openly especially now with all the false flag events with the communist the the rabid communist who is leading the charge from the puppet actor position of pr puppeteent president in the in the white house right now with the the new neo uh liberal and communist and neocon and fascist uh you know puppets that are on the way in whoever it may be doesn't make a difference who gets in you know government will still be the ruler because people have elected masters um i don't think that this is going to be done by convincing people of the difference between right and wrong behavior and the government is violence and slavery i think it's going to have to happen through through bloodshed through forceful revolution and i went into in my last podcast why people are so psychologically afraid of that it the main the real answer is because they are absolute cowards and they wouldn't fight for anything let alone their own freedom they don't care about themselves they ultimately hate themselves they don't care about their children they ultimately hate their children deep down inside in their own psyche they didn't really ever want to have those children if you aren't willing to fight for yourself and the generations that come after you don't tell me you love yourself or your children because you're a liar you're a liar and a coward on top of it okay so if you hear somebody say i think physical revolution is going to be necessary and you think oh no it should never ever ever come to that you know well what do you think the founders of this country did this is another thing you know people talking down this cultural marxist bullshit about the founders somehow being bad people you know that comes in through the communist infiltration of america because that's where all that crap comes from you know that the founders were setting up this country for slavery i mean please the world was already completely enslaved folks that this country is the only place where a modicum of freedom ever occurred because people who actually cared about freedom actually put down their oppressors for a time for a very short time you know and the monarchy couldn't stand that they had egg on their face for a short amount of time and they vowed to come in here and wipe this place off the planet through stealth through infiltration and that's exactly what they've done exactly what they've done they followed through on their promise and they always do because they have the will and the care to get done their agenda and yet sadly humanity still hasn't developed those qualities so i i don't want to hear from people who say oh that's too militant of an attitude you know like samuel adams said if you love the tranquility of servitude more than the animating contest for freedom then go home from us in peace we don't we don't want your opinion we don't want your help and you know what we don't need it it's gonna get done however it has to get done folks and you know what you wanna you wanna test this attitude you wanna test the zeitgeist the spirit of the times you want to test that go to any american gun show and you'll see the zeitgeist you won't see it you'll feel it in your bones you'll feel it in your bones there is at least three percent out there who aren't going to lay down and go quietly into the night ladies and gentlemen bet on it know it like you know your name so i want to openly table that discussion it needs to be openly talked about because this government is getting more and more brazen by the day what the communist puppet talked about yesterday on the airwaves is a disgrace it's all these false flags are being done for is to try to disarm america and you have the absolute cowardly trash european weakling cowards who think america should be disarmed you don't know what freedom means boys you don't know you couldn't spell it okay you're a bunch of domesticated dogs and you love your domestication and you think you're a man you don't know the meaning of the word think that only government should have guns i mean you got to be joking anybody who's not vehemently angry about that is asleep is asleep and if you're not talking to these people just like that you're asleep they can't understand what gun ownership is for they're asleep the information's been out there they're ignoring it now because when your government comes for your rights and freedoms physically you know what you're gonna do you're gonna crap your pants and you're gonna piss in your pants like a little child and then you're gonna go in the ground because you're gonna have no means of resistance you know what that's not happening here in america boys you know this whole european attitude it disgusts me just because you're already enslaved because you gave up your firearms decades ago doesn't mean that you're gonna lead us into that condition punks it's never gonna happen here it doesn't matter how many people get killed it doesn't matter how many children get killed it ain't happening here know it know it so how's that for some vitriol huh how's that for some righteous indignation about what's happening here in america turn this country into a fascist communist regime and that now they want to take what they laughingly call assault weapons away assault is a behavior clowns it's not a kind of weapon a semi-automatic rifle is not an assault weapon assault is a type of behavior can a semi-automatic rifle be used for assault yes it can so can a baking pin okay you know this is a mind control tactic to try to demonize a tool that is intended to be used as a defense against government tyranny and people still don't understand it go back and watch my second amendment presentation again the true meaning and purpose of the second amendment look it up on my website in the video section look it up on youtube watch it share it one of my most important presentations that's out there but you know it's like once they've taken the man out of you know a physical body it's very difficult to reinfuse the essence of an actual man into a male body that's another thing i want to talk about today you know how emasculated this society is and europe is way farther along than even america and you know it's disgusting uh it's something i'm gonna talk about a lot of for your mind for this gender bending you know the emasculation of the american male and the masculinization of the female that's how they know once they confuse gender roles you got a society on the road to enslavement because there ain't going to be no real women in that society and there certainly ain't going to be no real men they're going to be weak they're not going to resist they're not going to know the meaning of rebellion against tyranny because they're cowards and that's what you have you have a whole society of men with no base in their voice who wouldn't lift the finger to fight against tyranny they're garbage and they've been constructed that way they've been built they think their thoughts are their own they think the way they are is their choice it's a joke you're a joke a joke that you even believe that crap that you made those choices those choices were made for you little boys you think the way social engineers and dark occultists wanted you to think according to their plan according to their specifications and they built you to spec you don't even know your thoughts aren't your own you don't even know your behaviors aren't your own you're running a program you're running a program that was written by people you never met and never will meet i want to tell some anecdotes about things i've seen in society that actually have happened to me and friends of mine that if if you don't understand the depth of mind control by even hearing these couple of anecdotes i don't know what will explain it to you you know the just go back quickly these false flags this one in paris now this one in um uh california i mean it's so blatant that these are scripted events with crisis actors you know who don't even display any real emotions real grief real trauma and the news media is just constructing this whole narrative that this is oh all just because of gun owners we got to get these guns out of society and they're tugging on the heartstrings because that's what they do you know and they got people thinking with their emotions not with any logic not with their minds not with the logical part of the mind you know this neo liberal retard logic that goes like we need to get all the guns away from private citizens and so they'll only be in the hands of government and criminals who don't care about laws you'll take them away from all the law-abiding people you know who don't want to harm anybody they'll have no ability to resist the government and the criminals who don't care about what laws get passed but you know what there's a segment of people who are going to be turned into criminals because they're they are good people who don't care about what laws get passed when those laws take their rights you're not taking my rights you're not taking one firearm i have you're not taking one magazine i have you're not taking one thing i have for defense away from me not without bloodshed and you know what you think i'm the only person who feels like that in america let me tell you something i'm tame about it compared to some people i even know personally let alone probably some of the really really vehement people out there how they feel about this it make me look tame very encouraging sign regarding the sentiment here in america regarding all this crap with these false flags the day after thanksgiving on black friday there was 185 000 gun sales in america on one day i mean that is like a gift from god itself as far as i'm concerned know i mean that's one of the only things that has put a smile on my face in the last several months that is such a beautiful majestic statistic that it's just like i'm ecstatic over it because what that shows you is there's people who are awake to what's going on and they're drawing the line in the sand and if you want to get total enslavement done here in america you are just very much listen to the words that are leaving my mouth right now globalists dark occultists rogue people in government military who are going to follow your orders to your own deaths the only way the only possible way that you're going to have of leading this particular country into total enslavement is through total war and you better know that like you know your own name you're not going to get it done without that just know that and you want to keep trying to bring that dynamic you're going to get war that's what you're gonna get so very encouraging statistic that means that people aren't fooled by this agenda not here anyway some of them are some of them are retarded idiots who actually believe government cares about them and is trying to protect them you know like this clown this commie clown coming on uh you know network tv last night and you know just talking like you know you're they're supposed to be our protectors really you're supposed to be my protector i don't need a protector boy i don't need a protector i don't need or want a protector i'm my protector and ultimately living in accordance with natural law is my ultimate protection that's what all the protection i need in any dimension of existence anywhere you know so i don't need anybody coming up and telling me i'm going to be your protector i'm not a punk little boy child like you you know i don't want to protect her i take that responsibility unto myself like every human being should this is the problem with society you got too many little punk boys and girls who say i don't want that responsibility i want to be an eternal child i don't want to have to learn how to defend myself i don't want to have to learn how to fight the bad guys if i have to then therein lies the problem ladies and gentlemen weak people weak minded and weak bodied people who don't want to do what's required to keep their rights to keep their freedom no they want somebody else to provide that quote-unquote service for them you know what it's not possible that first of all it's not possible for you to abdicate that responsibility it's always yours and it's not possible for anybody else to truly protect you that's not what these enslavers and government ever do anyway all they do is show up after the fact you know ain't one cop or soldier that i know that ever protected anybody especially cops all they are good at doing is showing up after the fact of making things worse you know you want to talk about terrorism there ain't nobody that's ever made any kind of a terroristic threat to me or um made me feel like i was being terrorized or oppressed except police except american police they're the only people who have ever made me feel physically threatened in life that's it no terrorist organization no tower cell no radical religionists anywhere have ever made me personally feel threatened for my personal physical safety the only people in life who have ever done that to me are american police so who are the real terrorists who are people who inspire feelings of unease and discomfort and threat duress in other words only people who have ever done that to me in my life are american police i don't even worry about gangster criminal thugs and thieves on the street because at least again you know where they stand they're not people who are trying to tell you they're your protector while they're trying to uh physically harm you you know where you stand with a common street thug criminal the problem with government is people believe they have legitimacy in doing the violence that they do so i want to just get back to the degradation of consciousness in society how bad it really is how far gone we are you know all the work that people have been doing trying to explain to people about mind control about dark occultism about the loss of our freedoms and what ultimate impact has it had there are some people a small percentage of people who are waking up and who are doing good work themselves but you have this huge huge swath of society that is just going deeper and deeper into a trance and the mind control was so effectively working upon them because of their absolutely degraded emotional state these people are literally retarded literally retarded which means slowed down they're developing it's called arrested development intellectually emotionally and ultimately spiritually they are in the state of arrested development meaning that they never really came out of a childlike naive child-like emotional state because they're not doing any shadow work with themselves they're not trying to understand the self better they're not trying to understand the consciousness better they're not trying to do self-reflection and personal improvement this is a thing that is actually so sorely lacking it's not even sorely lacking it's actually talked about in a negative way in society now oh you want me to do personal improvement that might involve effort truth i mean i've heard people scoff at truth in the time i've been all i've heard people scoff at the term free will since i've been on this hiatus just interacting in people and with people in society i have heard people not only scoff at the term truth i've heard somebody say oh that word just imagine that scoff like eyebrows come down in a in a you know a pharaoh and scoff when i said the word truth and said oh that word like i just said i'll foul dirty filthy word i mean what how destroyed does the spirit of a society need to be for any individual to hear the word truth and react negatively like that how much mind control does a society have to be under i heard someone scoff at the term free will oh free will you think that's really important or scoff at it as if it doesn't exist oh yeah that's an illusion i mean this is how totally zombified brainwashed they have members of our society it's disgusting it's totally disgusting it's very very frustrating and again i feel more sad for these people than i do angry with them it's like you're that destroyed you're that weak you're that spiritually dead you know how did you ever allow yourself capital s self to come into this degraded condition it's pathetic and sad and the problem is folks you know people will say well why are you angry about it the problem is because unfortunately very unfortunately and i don't want it to be this way but i'm not the kind of person that says oh because i don't want it to be that way i won't acknowledge how it really is this is how most people react to things that they don't like that are actually true and real you know they'll try to say oh no it's not that way it's the way i want it to be well i don't do that you know i'm not a naive person that thinks i can make reality the way i want it to be just because i don't like how it is i fully understand how it is to adapt that most people do not understand and have seen the people who are making it like this through their willful efforts to make it like this so people are in the condition of thinking i'll make make things how i want just because i'll ignore it if it's uncomfortable with me i'll ignore it and then it'll go away it won't exist anymore this solipsistic attitude you know i mean they actually think this way that's how degraded they are spiritually that's how naive they are there is a huge huge push in society to emasculate men that's another thing there is this gigantic push to somehow make men fearful and ashamed of being a strong man a strong willful man this is what the neo-feminism agenda wants they want men who have no will to challenge anything any woman says regardless of how off-base it is like truth uh or free will why do you think that's so important you know and when i tell when i tell you things that have occurred when i'm i'm getting ready to tell these anecdotes you'll think that those things are like nothing in comparison with how bad it actually is i went with my guitarist from the founders mike to a show to try to basically um check out a club where we will potentially be playing at maybe you know um introduce ourselves and you know meet the people who book there and get into the venue in the near future it's a a place in um in the northern liberties area of philadelphia called kung fu necktie it's a rock club and we went to a um we went to see a psychedelic rock band that evening and we were we went to the bar we got a couple of beers and uh actually it was two of my guitars it was mike and dj and the show was over people were starting to file out we still had a couple of beers that we were going to finish before we left and went somewhere else and we were leaning on the pool table near the rear of the club near the exit door as about as far away from the stage as you can get without leaving the building without leaving the venue and there was absolutely plenty of room everybody else was just walking by us with net with no problem we weren't blocking the way out there was a wide um through way through through thoroughfare to get out of the the the venue uh and get to the door uh at least 50 people or so walked by us and went out the door as the show ended while we were still you know leaning there at the edge of this pool table having a beer and not one person said a word until a woman turns to my guitarist mike and with a very angry angry nasty look on her face goes almost right up to him in his space in his personal space near his face and says why don't you quit manspreading yes ladies and gentlemen that word just left my mouth and like i had to do a triple take and like a triple take like what i couldn't even process in my mind mentally what was just said it was so unfathomable to me to actually hear this in a daily interaction with another human being like when i now for people who don't understand what that term means and again um she she bumped into his elbow on the way out the door as he was leaning on a pool table and accused him of what she termed as man spreading because she bumped into him probably in her drunken condition because she looked like she wasn't all together with it um and you know we were absolutely fine sober having one beer getting ready to go and you know nobody was like you know blocking the way nobody was like you know trying to make themselves as big as possible like they were getting ready to fight a grizzly bear or something okay we were leaning on the pool table drinking a beer getting ready to go and because you know she bumped into him nudged into him on the way out she turns to him with this really angry look and practically screamed that right to his face now for people who don't know what man spreading means um you have to go back to new york's subway new york city subway signs uh this comes from a man sitting with his legs open on a subway seat and therefore making it um you know tight for other people to get a seat if they want to sit in the seat directly next to him because his knee is out because men aren't going to sit there with their legs crossed like a woman because they're not women they have these things or at least are supposed to have these things called testicles in between their legs uh i realize most modern men don't have those but you know allegedly they're supposed to be there and some men who still do have them uh tend to open their legs instead of cross them on a subway car in the small seats of a subway car so new york has actually started fining people new york city in america has started fining people for the horrific crime of man spreading sitting with your legs spread open on a subway seat i mean this is where america has come folks when i first saw this ladies and gentlemen when i first heard this term i actually thought it was a joke i thought this was like a sarcastic type of you know uh jab at the neo feminist movement i actually thought it was a joke when barb first brought this to my attention she said look at what they're doing in new york and i said oh that's funny and she's like no no no it's not i'm like yeah that's really funny and she's like that's for real i'm like nah come on that's a joke right and she's like no that's not a joke they're for real they have like signs on the subway cars there and i was just like you absolutely have to be kidding i mean with what's going on in the world today this is what people are concerned about not only that but this is what people that but people look at this and don't think this is a complete asinine joke this woman takes it so seriously she's yelling in a man's face at a rock club at a rock club in a major city because she bumped into his elbow in a crowded rock club i mean and you don't think that there's a war between men and women taking place that is socially engineered against the minds of women i mean this is one slave bumping into another enslaved human being and getting angry at this person and talking at them like you know they're the problem or the enslaver oh you're you're one of the the hierarchy of you know men who is oppressing us the patriarchy like i said there's no such thing dunce there's an occultocracy you are living in an occultocracy which is ruled by the occult rule by stealth methods of manipulation mind control and epigenetics that you know nothing about because you're an unread dunce that's where you live not in a patriarchy and let me tell you something there's plenty of female dark occultists that i was around and worked with as well when i was involved you think there aren't women involved in this agenda you're out of your mind if you think that there's people from every walk of life every ostensible religious background every ethnic background every gender every class uh economically even you think it's just the rich you think it's just men you know oh people think it's just white rich men yeah sure to talk about naive you know that believe this they actually believe this crap let me tell you something i was actually good friends with a black female satanist for a while so you don't think that there's every ethnicity every gender involved in the dark occult agenda you don't know what's going on and you don't know who's directing it because you quite frankly haven't read enough haven't opened up your mind enough haven't studied enough you don't know what's going on in this world or who's directing it and you're taking it out on somebody sitting at a rock club having a beer talking to friends because you accidentally bumped his elbow in your delusional state and probably drunken one too so uh my guitarist did not remain i was so dumbfounded that i actually remained silent ladies and gentlemen if you could believe that uh you know i could not even process it i i was literally standing there like gape jawed for several seconds because i could not even process what just happened i was so in it like a stupor over it that the words couldn't leave my mouth but immediately my guitarist answered in a very vitriolic way let's say i won't repeat even on the airwaves what he said and you know then you gotta start thinking you know are there gonna be uh the white nighters coming out to rescue the damsel in distress who just accused somebody of man spreading and being a patriarchal tyrant because uh his elbow extended out a little too past too far past the pool table god forbid um you know and you know then you have these dudes who hear a harsh uh things said to a woman god forbid who acted that way in society and then he wants to be a big tough guy you know that didn't happen on this incident but you know upon hearing what he said and the tonality that he said it and other people turned around and heard what he said because he said it even much louder than she said what she said to him uh i was like you know getting ready to have to physically defend myself at that point but that eventuality did not occur no white knights stepped up you know you could look up that term if you're not familiar with it you know people who want to defend uh the damsel in distress regardless of how wrong she is you know i have no problem with defending people just make sure they're in the right first you know make sure they're within their rights first then come to their defense you know these guys that think women can do no wrong because they're women they they have their head lodged firmly in their colon um you know and anybody who tries to put somebody who is acting inappropriately in their place regardless of what gender that they are you know uh you know they want to immediately come to their rescue if they're a woman regardless of how wrong they are so yes ladies and gentlemen in my own experience i have now heard the term man spreading viciously and vitriolically directed at a person who was just standing at a pool table with a beer this is where society is at this is how far the neo-feminism agenda has come and if you're not angered by that you're asleep you are completely unconscious and asleep to what's really going on in our world because this is part of the emasculation of men this is you know another term that's that's floating out there toxic masculinity i guess i'm just completely poisoned because i act like an actual male member of society that doesn't want my freedom taken away and my rights taken away and i'm prepared to physically defend those things so i must be extraordinarily toxic you know any hint of anger that is expressed in the voice that's toxic masculinity toxic masculinity i mean you know you know who sits and comes up with this stuff good old reginald over in in the city of london at tavistock you know our boy reginald man you know he's over there with lionel you know and james and they're just sitting there with their cigars looking out the window from the tavistock building and going wait don't you see what we got for these americans next man spreading lionel oh original that's brilliant you know and you don't think this is how it's going on you know if you understood the people that were inventing this stuff and coming up with the things that they're gonna put in your mind these fat old white men in three piece suits smoke and expensive cigars with more money than they know what to do with sitting there in a think tank building saying how are we going to rape americans next and you don't think this is all coming from europe and particularly england and the crown and israel and germany and france all of these european states is where this is all coming from they just have this is still their colony they just have their little satellite here that they're running from dc and new york and l.a and hollywood you know and they're ju it's it's just they're running their operation remotely i mean it it it's laughable i mean i have to almost poke some humor at it because it's so sad and these people are just completely asleep to it and completely enthralled by it toxic masculinity man spreading you're you're a slave you're enslaved your rights are taken and this is how you're thinking trying to attack the only people that are going to be capable of defending your freedom and rights physically because you're not certainly not going to do it you know like happened in the first american revolution young men had to make sacrifice of their lives and possibly even give it all to create the modicum of freedom that we enjoyed for a certain time a small amount of time and people are inventing these terms to try to make men embarrassed for being real men i mean your slaves who love being slaves now possibly even the worst one if that's not bad enough folks yes it gets worse or at least to me it gets worse i mean some people might think the man spreading thing is like the worst one but i have a doozy for you here um i was in the venue where we the founders my band the founders are going to be playing this thursday uh last week to promote for the event i brought some hand bill flyers there and some stickers uh to you know put our name out there and put the event out there uh so that people who attend can you know see that we're going to be playing so uh i'm doing some promotion in the club handing out some flyers putting them on the tables and the bar and um while i'm standing at the bar doing some promotion um a black woman comes up to me at the bar and says are you a racist and i said to this african-american woman what in god's name would make you ask me that question obviously she didn't know who i was or she never would have asked that question but i'm like why would you think that about me what a possible impression would i give you that i'm a racist person did you hear me say anything to that effect she said what you're wearing and i said what i'm wearing what are you talking about and she said the things that are on your shirt and your hat and i said i'm i sat i think for a minute about like you know how to look down for a second because i just threw on a shirt that i had laying around and went out i had a three percenter shirt on this night it uh has you know the three um roman numeral and then it has two crossed um old-school revolutionary war era black powder muskets on it and then it had the gadsden snake underneath that um and there were no words on it it was just those symbols it had the three the gadsden snake and then the crossed rifles and i'm sitting there just thinking for a second how could she possibly interpret that as any kind of a racist symbology could you possibly believe that black powder musket rifles you know are a symbolism of our symbols of racism could you possibly think that the gadsden snake a coiled rattlesnake is a symbol of racism when has a coil the coiled rattlesnake ever been associated with racism and see this is the effective power of the mind controlled mass media they actually have people ignorant people who aren't readers in society believing that symbols like this are racist see if you're anti-government you're racist imagine this and then of all things she said my hat i was wearing a baseball cap a black baseball cap with the ben franklin join or die on it now for people who aren't familiar with that the join or die symbol is the segmented rattlesnake that was used as a rallying banner during the first american revolution and franklin would publish this to try to get men to join the militias in newspapers and newsletters and it meant either join together against the british or you're going to be in big trouble because you know they're coming for your rights and possibly your life so this was the flag that was actually the unifying banner for all the militias at the battle of bunker hill which was the first major battle of the american revolution the the franklin flag as it was known or the joint or die flag and this symbol of the segmented rattlesnake with the words join or die under it was on my hat and my answer to her was do you know what that symbol is on my hat that's that's how i after the shock and awe of being called racist or being asked whether i was racist and saying you know not only am i not racist i think racism is one of the biggest ways humanity is divided and conquered and ultimately enslaved to her and she was like oh and i said yeah but not just that you know after i said well what made you think that and she said your shirt and hat i said well do you even know what's on my hat do you know what that is or who made it and she said no i said well first of all why would you think it's racist if you don't know what it is secondly do you know who made that and she said no and i said that was made by benjamin franklin one of the founding fathers and revolutionaries of america during the revolutionary war era and i said do you know what he did and she said no and i said he founded the first abolitionist society in america in 1775. he founded the first anti-black slavery society an abolitionist the pennsylvania abolitionist society in right here in philadelphia in 1775. so you're talking about the person who championed and pioneered the anti-slavery movement in the north before anybody else was talking about it as a big problem uh and accusing me because i'm wearing the symbol of his rallying cry for the american revolution against the british who were instrumental in bringing those slaves over here to america to the south not that the north wasn't involved in that at all but the south was obviously the people who were utilizing that slave labor force this guy set up the first organized society to try to put that practice down and you know what i heard from the other end of the line folks crickets chirp chirp chirping away absolutely nothing to say back because she was so embarrassed at how ignorant she was that she did not know any of this part of our own history these are the kind of golems you have walking through society on a day-to-day basis and it's not getting any better because these people's minds are owned they're owned by the media they're owned by the government they're most of all owned by the social engineers they don't even understand how their minds are socially engineered at all or who's doing it they're reveling in their ignorance because oh this is my time to get back at the white man you know the white man is becoming the new cultural enemy and this is what their these social engineers are trying to foment the war between men and women in particular and between the races as well between black and white and they're succeeding they're getting it done i'm seeing evidence of it all over the place when i go out into society it's like if you're a white man you're being treated like you're the enemy we are not the enemy because i'm a man and because i'm white and because i act like a man i'm not your enemy as a matter of fact i'm one of the people fighting for human rights more than anybody else is and you know this is why i need a break from this sometimes folks because this is what i see on a day-to-day basis and it starts to wear thin on you it starts to wear you out to see this is disgusting it saps your energy it saps your strength it saps your will to continue to go on not that i'm going to stop because i'm going to keep going but people need to know how bad it is so we can get to work on this we need to get to work on this and you cannot remain silent about these issues they have to be discussed in the forefront how there's a war on men how there's a war on white men in particular as well you know this isn't a race issue i'm trying to explain how the divide and conquer tactic is progressing in society and people are still falling for it you know how many people think that oh it's it's all white people are the problem you know because why because most white people in government are doing oppression to people of minority minority uh you know races of course they are there is real racism happening there that doesn't mean all white people are supportive of that you know i mean i mean these people have to be more discriminatory in their understanding you know yeah i mean they have to be that they have to discriminate in the right way and realize their it's not about white versus black it's not about any race versus any race or men versus women it's about government versus the people it's about tyranny versus freedom that's it that's the only war going on and people have to understand that we're already actively in a war i talked about this on um a rece in a recent interview on veritas radio we're already actively in a war folks thousands of people over 5 000 people have been murdered since 9 11. without any trial by american police in america i mean the nazis couldn't have done anything that successfully with the silent consent of the people being accused of being racist for wearing a for wearing ben franklin iconography i mean you have to be kidding and again this has to do with this absolute bullshit garbage you know with the the rebel flag being uh removed from our culture because it's allegedly racist when it wasn't about racism it was about the right to secede from the union and not be enslaved as states of a federal government but now anything associated with that see she saw the crossed rifles and associated that with that elongated x of the rebel flag you know so you know then probably associated the snake with the tea party who she sees as oh they're rich white men who don't want their money taken away and they support the corporations so that's the bad guy because they don't want socialism in america you know they don't want the radical redistribution of wealth out of the hands of people who have actually contributed to society through doing you know uh building businesses etc god forbid we have a voluntary society you know what i'm not a rabid communi i'm not a rabid um capitalist either folks you know i'm not for communism and socialism but i'm not a rabid capitalist either i've talked about money as a form of mind control and how people get attached to it as a religion but you know what go and go into real capitalism versus the crony form of capitalism we have now would be a great stop gap compared to moving into socialism and communism the way we're headed just like having a constitutional republic would certainly be a better uh way of being than moving into a form of totalitarianism than than we are obviously we have to go to total a total anarchist society where there's no masters and slaves and no perceived you know uh legitimacy to violence and coercion in the form of government and we have to go to a society where people in consciousness have come to such a level of consciousness that they see each other as they would see themselves and don't need monetary systems and move to a true gift economy you know we're so far away from that those levels of consciousness that it's it's laughable those have always been my positions you know but are there stop gap measures to that hey would i love to go to the form of government that um the founders envisioned compared to what we have now yeah it would be like heavenly in comparison to what we have now is that the end of it no it's got to go further than that it's got to go to total anarchy meaning there is no government because there's no people who are masters and none who are slaves and there's no subjects and there's you know there's only natural law that is always in effect and people understand what natural law is and they know the difference between right and wrong and they respect that those boundary conditions that's it you know same thing with the monetary system compared to the fractional reserve uh absolute crony capitalism of fiat currency and uh absolute nonsense in the form of derivatives and you know bank fraud that we have now would would it be like heavenly to go to a uh a monetary system that was based in true voluntary capitalism it'd be like heaven in comparison to what we have now is that the end of it no it would have to be pushed farther than that you know and move to a point where we don't need these these uh chits of exchange to actually accomplish what we want to accomplish in society people still can't envision how that could ever work or be done because they're under mind control you know i tell people it's like you know a family would would a family of a mother father and two children develop a monetary system or would they just do things for each other that they could because they note recognize that they're they recognize that they're all in the same situation together and they would help each other as a family unit a family dynamic until humanity forms that kind of consciousness that we are all one family sharing a a similar experience here on earth and we don't need to compete with each other and have these systems of exchange and ultimately complete imbalance where one person can have it all and one person can have so little then you know nothing is ultimately going to really change for the better in the long term because these are all ultimately systems of control any form of government money or systems of control i've talked about that from day one it's always been my position it's going to always be my position i think that's the position of someone who's fully awake and you know and there's still many people who hold on to one or both of those religions authority and money but you know that's what we're trying to break down those are the religions that the great work is all about breaking down folks so you know i think that uh explaining these incidents explaining my take on where society is headed um talking about what i've been up to especially musically and with the conference i think that's a good place probably to leave it for now just uh i'll briefly mention what i'm going to be up to over the next uh you know several weeks to months um i'll be releasing the video of my tesla presentation shortly i'm not going to give an exact date but hopefully over the next few days to a week it's called the dark side of tesla's technology and it's about um action at a distance weaponry or scale or weaponry i gave this presentation back in july at the tesla conference here in philadelphia it went really well it was received very well and i hope to get the video out very shortly i'll also be doing some upcoming live presentations i don't have exact dates on those but uh they'll be here in philadelphia and the surrounding area i've not stopped doing live events um also probably going to be working with some people to do some presentations out of the area shortly nothing confirmed there yet but um keep it stay tuned to the website and the radio show for that um some of the topics i'll be talking about in those presentations i i've wanted to do a presentation uniquely on satanism and how it works how it's structured its ideology to really clarify that because there's still people who don't understand what satanism really is they still believe in the hollywood variant of it and uh i want to do a full length presentation to clarify that especially since in my demystifying the occult presentation i only very very briefly touched on dark occultism i want to go very in depth on satanism in particular um i'll also be uh probably doing a presentation soon if not uh in a live presentation certainly here on this radio show in the future on the occult origins of nazism which is something i've wanted to cover for a while um so i think that's a really good place to leave it for today and again i as i said at the beginning i'm going to attempt to do a new podcast once a week don't hold me rigidly to that schedule but that is my goal um and um uh you know hopefully i can stick to that schedule of at least putting out a new podcast on a weekly basis so ladies and gentlemen thank you so much for listening to this uh new edition and new format of what on earth is happening i'm your host mark pascio my website is what on earth is happening.com and i will see you here on this podcast in the very near future thanks so much and have a great day looking for the answers don't care don't you ever stay down you

What On Earth Is Happening Show #193

Topics: *Courage as a necessity to end human slavery, Cowardice in modern society, Men's fear of Rebellion, Lack of Rebellion in modern music, Social Engineering, True Patriotism vs. the false "patriots," Cultural Marxism and the lies it spreads about America's Founders, the Love of Comfort, people who let False Love hold them back from doing the Great Work, Mark's anecdote about visions of the American Revolutionaries at Valley Forge during fever brought on by food poisoning, Calling Up the Militia, the Validity of "Second-Hand" information, Not having to go through Suffering to understand what NOT to do, Art, Music, Science and Invention as the forces that drive humanity forward*

freedom man that's what it's all about [Music] [Music] welcome you are listening - what on earth is happening this show will discuss the topics of human consciousness mind control natural law the occult and all issues that affect the freedom of the people of Earth what on earth is happening will endeavor to shine light upon the darkness of our world and to offer empowering solutions to the problems we face as humanity approaches it's critical moment of choice and now here is your host mark Pascoe [Music] welcome one and all you're listening to what on earth is happening I'm your host mark passio my website what on earth is happening dot-com today is Monday December 14th 2015 have a great show lined up for you here today I'm gonna be getting into the lack of courage in modern human society courage is something that we need in much greater abundance in our world if we're ever going to defeat the dark forces that currently have a stranglehold on this planet and become truly free so I wanted to talk about how much courage is really missing from our society and what we could do to remedy that situation I'm also going to be getting into how it takes wisdom to really deeply understand information when it's coming from a secondhand source not having to go through a painful dark experience of suffering firsthand in order to understand how something necessarily works so these are some of the themes I'm going to get into today on the show I want to let everybody know that my Tesla presentation that I told everybody about wanting to get out last week is finished and released it is called the dark side of Tesla's technology and I released it on my website and YouTube channel earlier this week the presentation was originally given back at the Tesla Science Foundation's Tesla's people conference back in July of 2015 and it was it was about how Tesla's technology has been seized and confiscated by the United States government and by agencies of that government and weaponized and used against the people on September 11th 2001 in the biggest false flag terror event of our and when I was planning to give this presentation you know shortly before the Tesla's people conference I was thinking you know how is this organization the Tesla Science Foundation going to receive this message you know with a little bit of hesitation a little bit of trepidation because these are you know the very intellectual types the very left brain scientific types and I'm happy to say that when I gave this presentation live at the ethical Society of Philadelphia back in July it was very well received by many scientists and engineers at this conference several of which came up to me afterward and congratulated me on a good presentation and said this is something that I really need to look a lot more into so it was not dismissed out of hand as conspiracy theory it was received with what I would definitely call an open mind even among the very scientific types that you will find at a conference such as this so if you want to check it out it's called the dark side of Tesla's technology it's only about it's less than 20 minutes long maybe about 18 or 19 minutes and it is up on my website in the videos section you could also go to my youtube channel at youtube.com slash what on earth 93 which is my youtube channel and you can watch it there as well feel free to share it on whatever social media sites you want to share it on that's a good way of spreading the information on what on earth is happening calm so the free your mind for conference just to do a little bit of housekeeping and get the event announcements out of the way the free your mind for conference is going to be the biggest conference of 2015 by far and away I'm so looking forward to this event not only because I'm a part of it but because of the other phenomenal speakers the world-class speakers that are going to be part of this great event coming up here near Philadelphia in April for your mind for a conference on consciousness mind control and the occult taking place at the Sheraton Bucks County Hotel which is at 400 North Oxford Valley Road in langhorne pennsylvania on april 15th 16th and 17th of 2016 for your mine returns to philadelphia in 2016 with a three-day conference featuring top caliber whistleblowers and researchers from across the country who will shed light upon our world's problems and bring forward empowering solutions spreading awareness on the topics of consciousness mind control subversive occult influences holistic mind body spirit health and solution-oriented approaches to the problems humanity faces in these challenging times the speakers lined up for this year's for your mind conference Bob Tuscan Cathy O'Brien davidwhitehead Freeman Jamie Hanshaw Jay Parker Jenice barceló Jim Mars John vibes the legendary Jordan Maxwell really looking forward to having Jordan as part of for your mind for Josey Wales ken Rolla Laura Eisenhower myself mark passio Mark Phillips Mary Sean Young Hollywood star max Egan Ross Ben and there will be some more speakers announced shortly before the conference but that is already an incredible all-star lineup of speakers and you'll never see speakers of that caliber all in one place except that for your mind for your mind for Sheraton Bucks County Hotel 400 North Oxford Valley Road langhorne PA coming at us April 15th through 17th 2016 tickets are available now get your tickets right now at free your mind conference common all weekend pass for this all-star lineup one $69.99 individual day passes 59.99 tickets available now at free your mind conference calm just want to also mention that I do still have what on earth is happening promotional t-shirts available you can get those by inquiring as the how to receive one at my website what on earth is happening calm you can click the t-shirt link on the left hand side of the page there's also a donation link on the left hand side of what on earth is happening calm if you feel that you have received value personally from the information that I've shared on what on earth is happening calm my youtube channel my video my podcast my videos my podcasts then feel free to make a voluntary donation to help support my work so that I can continue it into the future so with that having been said let's get into some of the topics that are gonna be discussed on the show today I want to start off by just basically telling people about how the founders first full show went this past Thursday in Philadelphia my hardcore punk my anarchist hardcore punk band the founders our website the founders thought us we played our first full show our first full performance at a little place called Connie's rickrack in South Philadelphia in the Italian market area of South Philly we play with some other local bands and the show went really well as far as I'm concerned I was especially happy with how the band performed they did a very professional job you know I congratulate them for that we played a tight set and there was a lot of high energy and a lot of good people came out I do want to say that I'm in general disappointed about the entire Philadelphia music scene as a whole if you won't even call it that I've been going to a lot of music shows just to see what's out there just to see what kind of music is popular to see the the quality of people who come out to music nowadays whether they're awake and aware at all or not and I just have to say that I feel pretty profound disappointment with what's out there in so far as modern music goes I don't think there's any kind of a message in it this is something that we personally spoke to at the show on Thursday and I don't see that getting better I see people not wanting to infuse any kind of a message in music they're too cowardly to do it in many cases and that fits in perfectly with the theme of the show today you also have a lot of what I would call outright political enemies in the music scene today and you know this is something I really want to do a whole show on I may bring on a member of my band in the near future and just have a discussion with them on the air you know to talk about this very topic and make a whole show out of it because it's something that I think music is a vehicle that can awaken a lot of people if it's used in that way and unfortunately I think all too few people are using it in that way to spread a message of awareness and make people aware of what's going on around us I mean this is what the founders was envisioned to do and that's what we're going to continue to do we try to infuse a message in every one of our songs so there's very very few people who are what I would call even politically awake let alone spiritually awake in music nowadays at the founders show I would say that there were very few anarchists there although there were some certainly what I would say are there are people who think that what we're doing is extreme and that's you know not an encouraging sign is insofar as where people's general consciousness is at now it doesn't really surprise me because I know this city in general is pretty much completely asleep major cities on the East Coast basically are I mean the mind control techniques has worked to such a almost perfect extent that it's not a matter of you know who is under mind control it's a matter of who is and who has slipped through the cracks so to speak and who is aware enough to understand the the methodologies that have been used against them that have been used to subvert their minds and essentially engineer how they think so I find that it's very difficult in to get people even excited about a message of freedom in music these days and that's sad that's a sad thing it's um you know you you'll hear people basically saying you have too extreme of a position when we're already enslaved you know and this is what people are basically saying it's like a very wishy-washy attitude especially from men you know I mean again in no way am i trying to make any kind of a sexist statement regarding this but it's a statement that I would expect more from a female member of society moreover not because they're just less apt to understand real freedom but because this system of control benefits them a lot more than it does men in many ways it also oppresses them as much if not more so than men in many ways but you can see how the system has been designed to basically do a lot of violence unto men particularly at the behest of women in many cases when it comes to certain things that they want to do to use the apparatus of the violence of the state to get back at men in some ways okay if there's a problem between them the state has traditionally been used by like that by many women in society so you can understand the perceived benefits that a lot of women in society have regarding the state what I can't understand more so much more so than that attitude is I can't understand how men can want to continue to support and uphold the completely immoral institution that is government it's very saddening to me that this is how domesticated and emasculated men have become you know I mean they have literally had the courage sucked right out of them they're wishy-washy they're soft they I mean let's just comment right out and say it they're cowards you know they're cowards you say something about rebellion to them you say something even just about how absolutely immoral government is and you could see that look come over their face like a frightened dog like oh my god he's talking about this how am I gonna get out of this situation I don't want to talk about this you know I'm too scared to talk about this I'm too chicken to talk about this I'm too much of a little boy to even talk about this let alone do something about it you know and this is where society is at folks you know you have practically half of society practically cheering on the state and the other half is too chicken to do anything about the absolute immoral coercion violence and slavery that's being enacted by the state and until that changes I mean don't expect anything better than what we have expected to get infinitely worse this is part of what I'm going to talk about at the free your mind for conference as part of my presentation which is called neo feminism and the Satanic epi eugenics agenda is the title for my free your mind for talk because men have to really start to deeply understand that they need to table this discussion about how the state needs ultimately be confronted and ultimately ended but moreover they need to table the discussion that they need to start having absolutely nothing to do with women who want anything to do with the state to cut them out of their lives until they put their head on straight and realize that the state is coercion violence and slavery and until they recognize those things and don't want anything to do with it as an institution on this planet men should have nothing to do with them and should do nothing for them you know so that's part of mind that's gonna be in my solutions section as harsh as it sounds as a solution I think more men need to understand that and I know these will be words that will be very difficult for people to hear out there well tough I could care less how you perceive it I'm not here to be your friend or be liked by you I've said that a million times you know I'm here to tell the truth about what's going on in this society so that slavery can be ended in it people's minds are completely socially engineered by people they never met never even knew and aren't ever gonna know probably who meet covertly plan covertly and execute their plans covertly I mean what I find hard to swallow about all of this is that we're on living in the city where the founding fathers of America lived walked wrote the Declaration of Independence organized against the British fought the British and set up the foundational principles by which this country was supposed to you know allegedly work and in that very city you have a bunch of wishy-washy little boys who are afraid even table a discussion to talk about the immorality of the state and here's why folks they have no courage they're cowards they're afraid of rebellion they're afraid of lawful righteous rebellion it instills fear in them like a little boy and that's why they're living lives of quiet desperation that's why they find life so difficult and constantly battling against it never going actually with a flow of life but constantly in a state of depression constantly in a state of conflict internal conflict and conflict with those around them and they don't understand why things aren't gonna get any easier because they're battling against creation itself they're battling against the universe itself if there's one thing I know for sure the universe rewards those with courage that's why it's rewarding the dark occultists again this is something people don't want to hear me say how could you say the universe rewards evil Marc why because if evil people have more courage than good people you know what the universe is gonna reward them it's gonna work that way especially if they don't actually carry out the actual physically harmful behavior and get stupid dog minion robot followers to do it for them you know they understand how to perform little tricks to get around the brunt of natural law consequences these dark occultists not that they're going to escape at all but you know they're certainly not gonna get hit with the kind of karmic debt that an order follower gets hit with people still don't understand how that works because they think karma and natural law work some different way than it actually does I've talked about this concept before on the podcast I call it dark care when somebody who has bad intentions at least aligns their thoughts their emotions and their behaviors their thoughts their emotions and their actions are aligned as one even if they want to carry out dark deeds they're gonna be able to accomplish it because they're unified and they're not in internal conflict and division they're not divided amongst themselves they're on the same page and all I see out there in society again I don't want to make a blanket statement this is a generalization because there are some very very good courageous people out there and some of those people came out to see the founders on this past Thursday night I'm making a generalization about people in this city in particular in most major cities on both coasts I would say most major cities in the United States period and certainly most people in the music community in this area where I'm from and it saddens me because one of the things I talked about stage was that the types of genres that we blend namely punk rock hardcore and a little bit of metal these were supposed to be the genres of music that were infused with the spirit of rebellion and today you don't see that at all except in very very few bands and again it's because people don't have the courage to put a message of rebellion in their music anymore because they're too afraid of oh we're people gonna think of me if I speak out what might happen to me Mike an agent of the government come after me or something you know why be harassed will I be watched why be listened to you know what who cares about any of those things the only reason that you're gonna care about any of those things is if you're a chicken coward then you'll care about those things a whole lot I could care less who's listening to me I could care less who's watching me you know what all they can do is learn something from my words and attitude and behaviors maybe maybe by watching me and paying attention to what I'm saying and trying to record it all maybe you'll learn something little boy maybe you'll learn something little girl time for you to grow up you think I'm worried about who's listening to me who's tracking my activities who's tracking what I'm saying do it do it as much as you want first of all not afraid of you because I know that's all you are is a little Arrested Development completely spiritually dead and being what do I have to be afraid of that I'm not afraid of you physically let alone spiritually and once again true courage is not the absence of fear I'm not saying that you need to be completely fearless you know you be completely fearless you could be reckless courage is moving forward with what you're doing that you know to be right in spite of whatever fears may be present that means you could say to yourself oh I might be afraid of what the government might do of what these are following hordes of orcs might do to me physically because they're brainwashed morons but you know what that doesn't mean that you're not going to continue to do what you're doing anyway see that's where the absolute cowardice of most of the people of this society comes in they let their fear stop them from doing anything stop them from taking right action stop them from learning stop them from understanding stop them from putting information forward for others to understand and as soon as the word rebellion is spoken they shut down you know the fear that very word instills I just recently listened to a compilation of some former podcasts that I did before I took my hiatus many months back this was actually before the free your mind conference when I talked about the Second Amendment the true meaning and purpose of the Second Amendment when I gave that lecture live on the air over a period of a couple of weeks and then followed that up with a show about the fear of rebellion in society and I listened to it again and you know I mean I have to be honest about what I thought about the job that I did during that pod those series of podcasts I'm sitting there listening to it and I'm thinking to myself no one else practically no one else I shouldn't use the term no one it's a blanket statement that in this case is not true um hardly anyone else all too few people say things as plainly and clearly and unambiguously as this and have the courage to say it in that way and I was just very happy with the job I did on that and I was happy that the person who you know made that compilation of shows did it and put it out as a six hour video podcast I'll probably link to that on this show today on this podcast because I think the person did a decent job with the slides that they put together for it from a lot of my work and some other slides that they assembled and it conveyed the message really really well the way that they put the video together and I was just thinking you know I wish more people would do something like this because a lot of people just won't say it plainly and clearly they'll beat around the bush they'll tiptoe around it but they won't say things to order followers right in their face so to speak I mean whether they're saying it through a podcast or to them directly in person you know when I encounter people in the military or police I don't sit and bite my tongue just because that's what the job that they do or people who have relatives who do these jobs I'm gonna say what I think about it regardless of who is around me or what they think if something is true it's true I don't really care about what they think you know people have this total fear that they allow to cut them off from what not only they want to be doing in many cases but what they really should be doing a need to be doing if we're going to reverse this human condition of slavery there's so many people who could probably actually do a good job with conveying information because they have a mind that you know can take in information and process it and understand it and then deliver that to others but they're in this state of Arrested

Development you know they've been shut down before they even begin it really is like a child in many cases with these people it's like a frightened child who says Oh daddy told me not to go near that you know that's in daddy's closet we don't we don't go in there because that's where all his stuff is that and he told us we don't go in there you know that this is really what it's like it's like a psychological child they can't get past that fear they can't get past that idea that they've been told you don't go to that topic you know and so they obey and as long as that courage is missing they're gonna remain enslaved I mean this is what a lot of cultists looked at as the ultimate answer courage more so than even care more so than even knowledge and understanding they looked at courage as the absolute essential ingredient in the awakening of the soul because it takes courage to even look into information to understand what's going on that kind of courage is required not only courage to act upon right information but courage to even take it in because they're so afraid of how bad thing are at how ugly the truth is that they don't even want to do the work to take in the knowledge and I mean what really sickens me about people like that is they're squandering what our ancestors did for us which was for a short amount of time create a pocket of freedom in a world that was completely enslaved yeah the encroachment came right back in and took took it you know took that modicum of freedom that they built this you know encroachment of tyranny but for a time America was the freest and most prosperous place to live on the surface of this planet and what the cowards of the modern day world the men and women of America today are doing is squandering what our ancestors fought and in many cases died to create here and when I think about where I'm at that saddens me greatly because Philadelphia is where that basically started and the battles that took place near here the men who died fighting tyranny near here especially in a place such as Valley Forge you know I think about the spirits of those individuals who cared enough about freedom and who actually had the courage to do something when their freedom was threatened the way it was and ultimately gave their lives in many cases the spirits of those individuals is completely at a state of unrest and cannot rest because of what's going on in this country now I want to talk about another topic that really kind of irks me and that's the concept of patriotism and what it really means to be a real Patriot you know a lot of people attack this word now because it only means one thing to them you know this unit dimensional thinking that you know something can't mean more than one thing to different people like it's like when you say Satanists to somebody when when I'm talking about Satanism I'm talking about it as an organized ideology that runs through occult networks throughout the world that has basic tenets such as rampant out-of-control self-interest and self-preservation at the expense of other people's rights and freedom in other words pure selfishness moral relativism social Darwinism and eugenics these are what I call the four tenets or the four pillars of the satanic ideology of organized institutional Satanism as what I would call a dark occult religion you know the word Satanism can also apply to people's perceptions of what Satanism is which isn't what I'm talking about when I use the word just like the word freedom can mean more than one thing to different people you know certain people think the state of freedom is present in the United States now because they have a very limited idea of what that word means when I use the word freedom I'm talking about true freedom capital F capitalized all the letters in it to distinguish it from the fake form of freedom that is perceived by many people still so the word Patriot doesn't just mean one thing you know so many people say oh you know people who call themselves Patriots you know that word has been co-opted and it needs to be taken back it needs to be reclaimed by people who understand what the word patriot really means I'm not talking about the fake Patriots out there to people who think government can do no wrong status who think my country can't do any wrong and I'll be loyal to it no matter what it's not what a patriot is never was never has been is never going to be anybody who thinks that's what a patriot is they don't know the meaning of the word Patriots are are people who have loyalty to the truth first and foremost real Patriots not only do they have loyalty of the truth they have loyalty to the other people living in their land who have loyalty to that truth it's a brotherhood Patriots are a brotherhood and a sisterhood of people who want real freedom they're the real Freedom Fighters people with real courage real will to act not people who praise the military who praise the police who praise the state propaganda and say because this kid this kind of control comes from our country it's somehow good I mean give me a break people like that daring to call themselves Patriots are a joke they don't know what real freedom is and they don't know the meaning of the word Patriot they're followers just like the people there they're praising when they praise the military or the police a bunch of followers true patriots are real free thinkers they're people who understand the essence of real freedom and are fighting to create that and protect that and we have men in society who are completely neutered completely neutered because they're so afraid so afraid of actually speaking out let alone doing something to challenge the immorality of this state they don't even want to talk about it they don't even want to put it on the table and talk about it I mean they think they're men you are absolutely D bald neutered animals you don't even resemble a man Arrested Development folks that's what creates this absence of slavery they don't even have an emotionally developed makeup to even be able to get angry at things that should anger them at ways that they're completely controlled and even worse they'll let people who absolutely don't care about freedom influence them because of what they want from those people their employers or their spouses or their family members you know all these fake forms of loyalty out there that people are letting just completely stunt their spiritual and emotional development and keep them inactive it's the worst place to be ladies and gentlemen I've talked about it before the worst place that one could possibly be in this world is to know what's going on within yourself within your own mind and to let other people keep you in a state of fear and inaction I'm talking about people who have particularly who have spouses who they'll listen to and they'll say I don't want you involved in that you know oh it's too dangerous or you sound like you're crazy because you think these things just because they don't understand them and people fear what they don't understand so they're in shutdown mode and they say you got to be in shutdown mode with me and you know what that's the worst place you could possibly be especially as an individual who knows something about what's going on I'll tell you what it's the last place I'd ever want to be in many cases people are living in such a state of conflict internally and conflict with the truth that they'll go into addiction mode you know to beat up on themselves doing drugs and alcohol and trying to numb out that knowing that inner knowing that they should be involved in this battle part of getting that whole attitude out of your your whole makeup is to develop real courage and start getting on the side of truth and start getting on the side of right action to do what you need to be doing in society to start doing the great work and you'll see how the universe will come to your aid in your life well acts improve people think why is my life so difficult why am i encountering so much resistance etc well part of it is because you don't care about truth part of it is because you don't care about freedom and you're not actively doing something to you know try to advance those things in the world people love their creature comforts you know and I understand women's love of creature comforts what what really aggravates me is how much men have become attached to creature comforts and how much they love quote unquote love life whenever I hear people say I love life it's like I don't know how you can love this state of existence the way that it is you love life the way it is there's something seriously seriously broken inside of you I mean you're way way more screwed up than I even imagined life in the form that we're living at today shouldn't be loved folks I mean don't get me wrong I'm not knocking the whole con I'm not knocking the whole idea of life of course life is a brilliant gift a wonderful gift but I'm saying if you love the way things are now there's something really wrong with you and this is the problem people are so attached to their comforts to their you know the way that they do things now the way that they have something set up you know you'll hear people say I don't want to speak out about that or I don't want to talk about any of that because I don't want to lose what I have you don't want to lose what you have what do you think you have things you think you even have don't even belong to you your body is claimed by somebody else let alone either physical objects like your house or your car I mean it's a joke this is how selfish and satanic this society is you know this idea that I'm comfortable I'm I'm in a comfortable job I'm in a comfortable house I'm in a comfortable relationship these are all false notions of comfort anyway you're in a relationship where the other person really doesn't care about freedom you're you're not in any real relationship you're just attached that's all you just don't want to be by yourself because you're trying to fulfill some need to be with somebody else and when that's not any kind of genuine situation but you're you're in a job and you're happy that you make a certain amount of money so you can live a certain lifestyle and really all you're doing is prostituting yourself I mean is how many people are actually doing something they genuinely want to be doing very very very few goes all they want is the paycheck you know and they'll prostitute themselves out for it again it all comes down to absence of coverage I'm too cowardly to stand up to my boss I'm too cowardly to quit my job and do something I really want to do I'm too cowardly to stand up to my so-called spouse because they're saying that what I'm talking about doesn't have any validity or is quote-unquote crazy I mean imagine people allowing other people's perceptions to color what they're doing because they don't have the courage to stand up for themselves and do what they want to do or what they know they should be doing and ultimately it comes down to we love our comfort and our lives quote unquote more than we love freedom more than we love truth and freedom and that's a false form of love that has nothing to do with agape with true love with love as a higher form of awareness and consciousness that allows consciousness to expand and unfold and evolve I want to take back the word patriot because patriot originally meant real men who are standing up for truth and are united on that front standing up for truth and real freedom that's what the Patriots of America were doing and that's what the new Patriots of America will do when I think about where I live and what happened here and how the founders and the revolutionaries of America how their efforts are being squandered by the absolute hipster leftist commie trash that exists in this city and throughout this nation these too-cool-for-school know-nothings television watchers is what they are brainwashed television watchers who think they know something and you know what they are they're communists walking around in costumes dirty Communists and that and they'll spread this cultural Marxist garbage which by the way do me a favor anybody the ones that try to convince me the founders founding fathers of America were somehow bad people don't bother to email me don't bother to attempt to contact me in any way cuz you're a moron I'm not interested in your cultural Marxist garbage okay go move to North Korea or someplace where you know you could spread your cultural Marxist garbage to another bunch of zombies cuz it ain't flying with me because I'm more educated than all that okay gram cheese plan is not gonna work on somebody like me you're not gonna convince me that what those men fought and died for was to set up some other form of slavery here I don't buy that revision revisionist now I'm not interested in hearing it I have already looked into the claim and have rejected it thoroughly as and I wasted too much of my time even doing that because it smelled like before I even investigated it and I have done that investigation and it holds no water and quite frankly I'm tired to hear a lot of this crap that all it does is try to put doubt in people's minds and take them off the course it's a really good tactic of distraction and manipulation and disinformation what the Founding Fathers and the Revolutionary individuals of early America did for this country being squandered by people who are no nothing television Watchers it's a disgrace let me tell you something folks the founders would have already called for war a long time ago a long time ago they would have called the militia up you know what maybe I wasn't even planning on doing this but maybe I should at this point tell a personal anecdote people seem to like it when I do that so you know I'll throw one in that I had a few last week on the show and this is a very very very very personal one for me because of this state of consciousness that I was in when this occurred and you know what a lot of people will probably completely dismiss this but that and that's fine you could dismiss it all you want it personally means something to me because a lot of people will dismiss the spiritual world you know they'll say all that that's not real that's just in your mind you know for example if you have a psychedelic experience for example with a compound like DMT just throwing it out as an example people say oh that's just interactions and you're in your brain the reductionists out there you know consciousness is just an electrochemical interaction in the brain I used to be one of these people by the way I used to be one of these left brain eggheads you know so another part of why so many people don't have any courage you know I just want to as a brief aside before I even tell this anecdote I want to talk about the left head left brain eggheads you know because so many scientists don't have courage and that's what kind of impressed me at the Tesla conference there were scientists and engineers there that at least had the courage to say there's something to what you're talking about and I need to look into it because I haven't looked into it I was impressed by that most egghead types you know or have no balls whatsoever they have no absolutely no courage their total cowards they sit behind their research they sit behind a keyboard you know they sit behind a desk and they want no part in trying to turn over the the established paradigm you know all they're worried about is the grant money that's flowing in and you know their comfort once again you have a lot of egghead libertarians they want to make everything about just a conceptual idea and a philosophy but when it comes time to actually taking real-world action they want no part of that so a lot of eggheads out there who are just purely left rein intellectual and have no real intelligence will say something to the effect of Oh mark you're going to tell a story about something in the spiritual realm that absolutely can't be real everything's just an electrochemical interaction in the brain now we perceive well you know what I never envisioned anything like what I'm gonna talk about with you I don't think my brain just magically came up with it and being where I'm from and having recently been through the place where I was through I think it'll make some sense to people back a little bit I believe it was just before the fray was just before the free your mind conference about a month before the free your mind conference maybe two months definitely before for your mind three so this was early 2015 um I had driven through Valley Forge Pennsylvania and became and I was fine that day I mean I was feeling really good I think we were going to some kind of a meetup group and I took a different route that day then I normally do to get to where I was going and it took us right through the middle of Valley Forge where of course very important battles during the Revolutionary War took place and was a turning point in the Revolutionary War and a feeling an overwhelming feeling of unease and discomfort came over me that I have never felt I've I it's not not entirely true I did feel before the last time I was at Valley Forge but this time it hit harder like it was overwhelming it was so heavy of a feeling of discomfort and unease and sadness that I almost had to pull the car over I definitely slowed down and I said I vocalized how thick this feeling of sadness and discomfort was and I felt that I was feeling the spiritual residue if you will you know of the souls that died there and I'm not a sensitive folks ok in case you didn't know gather that from all the the years of podcasting and information sharing I'm not somebody who like is like very subtle or picks up on a lot of subtle energy you know it's not like you know somebody walks into the room and I say oh I can feel your aura and I can feel the you know this chakra is slightly off and needs tuning or whatever you know however you want to look at sense it is that can see all and or feel all these subtle energies That's not me intense energy yes subtle energy not so much I told people anecdotes about like when I went to England and visited the crop circle formations as part of a sacred sites tour and we we went to Avebury and Stonehenge and you know places like that you know the crop circle energy was super subtle it's not like you felt it physically in your Anatomy we went to Stonehenge do is nothing subtle about that place at all you felt the energy physically in your body almost as an electrical signal and it was there as surely as I'm sitting in this chair right now didn't you didn't take any subtle perceptions to realize it to feel it if you couldn't feel it you're probably uh I don't know paralyzed or something or you know your your nerve endings were dead end or something because it was real palpable tangible energy in the body that was my experience at Stonehenge anyway I've never been to a place like that before or since and never felt energy like that before or since and it wasn't just you know the you know all at being at Stonehenge that had worn off a long time and the end I was still feeling this energy you know so there's something real there obviously in the geo mansi of that place but my point is when I was at Valley Forge feeling this energy it wasn't subtle I'm not a sensitive and pick up on super subtle energies it was palpable and so you know a little while after that you know I'm I just made my way to where I was going to go and then you know went home after that and maybe about a week or so after that I'm just estimating Barb and I ordered some food out from a local takeout place in South Philadelphia I won't mention the name of the place because it was a bad experience and it's not typical of them that this was something obviously that was like a one-off problem with one of the components of the food it's not like this place is always bad or always serves bad food actually it was usually very good but we had a bad experience with a salad that we ordered we each ordered a salad and there was a hot pepper in each one of the salads like a green hot pepper and both of us when we bit into the pepper kind of thought we sensed that something wasn't was off about the taste but you know it wasn't so bad or off that we like spit it out of our mouth immediately and so we both ate the salad and finished it and almost immediately after finishing it barb starts feeling sick and she's like oh no I think something was bad in that salad and I said are you sure because I don't feel it again she's a little bit more sensitive than me especially stomach wise with food and this hit her immediately and you know I I have an iron cauldron for a stomach you know anything that goes in it unless it is extraordinarily rancid or diseased gets dealt with you know it's I never have any stomach or intestinal issues it's a you know kind of my intestinal system my digestive system just each literally whatever is thrown into it and deals with it I've always been like that very fortunately but barb stomach is stomach is certainly more sensitive and she felt this right away and went upstairs and you know vomited and you know started feeling really sick and she's like I think I have food poisoning from that sound and I'm like really because I don't feel anything and she's like oh yeah something was bad in it there it's definitely because of that and you know she started feeling feverish and then I'm thinking oh wow maybe it really was I wonder if this is gonna hit me and boy did it okay and you know this is like the only time I was really sick and in during the whole early part of the year you know and it wasn't obviously just like a sickness that comes in from the immune system this was food poisoning and I did not throw up but I got this fever you know my system kind of kept it in but this I guess obviously it was some kind of either a bacterial or viral agent in this and it made me like you know extremely hot body temperature wise probably had a fever in the range of a hundred and two sweats chills you know everything associated with flu-like symptoms and this came on really late I'm trying to sleep it's very uncomfortable and I'm waking up I'm in and out of sleep and the fever is obviously getting worse and I'm becoming what you would call delirious from the fever like the fever is so high it probably was approaching 103 or so that I'm starting to hallucinate a little bit and I'm having these like waves of like you know visions or hallucinations I'm starting to see the faces of men who were involved in the first American Revolution very clearly coming toward my vision near my face and they were very angry these Souls these spirits were very angry and they were it was like they were costing me asking me questions why is this going on why is that why is this being allowed why did we do what we did if you're allowing this to happen and go on and I swear to you folks I'm not making any of this up this happened and it was extraordinarily disturbing and I wanted it to end because it was extremely intense I didn't like what they were saying or asking I felt almost like I was highly accosted because I have been trying to do something to reverse it and it was very accusatory these spirits and it was all men that they look like Revolutionary War era people you know faces of like men of that period clothing in some cases like when I perceived that very much similar to what people wore during that period and they were angry about what's going on now in this country and I felt like what are you getting you know in my in the condition that I'm in why are you hitting me with this I'm one of the people that's been trying to do something about this and it was like a barrage they kept coming and they were saying what did we do this for we did this for nothing we gave our lives for nothing and they kept asking why has the the militia not been called up that was a phrase that many of them kept repeating why has the militia not been called up yet in other words saying we would have already been in physical rebellion what you're allowing is so unacceptable it's a disgrace and folks I mean this was so powerful and hard-hitting because it was there was a tangible narrative to it it wasn't like a disjointed thing where a one came and said I miss my wife and one or one came and said you know I live near here during you know two hundred and forty years ago all of them were saying the same thing America has become a disgrace what you're allowing is unacceptable the militia should have already been called up why are you allowing this to continue and I broke down completely in this feverish hallucinatory state I completely broke it you know if an event any of you ever talked to like Barb about this if you see her through your mind or whatever she'll tell you how like really really profoundly weeping that's the state that I went into I mean I went into profound beeping because these Souls if you will these spirits would not stop barging me well I was already in a sick weakened state and again people will say there's nothing to it mine just manufactured at all while you were in a you know weakened physical condition having food poisoning I don't look at it that way I take into consideration Who I am I take into consideration where I am I take into consideration what had just occurred now you could say oh well that was fresh on your mind and you just brought that into the narrative I don't know you know people will dismiss it easily they'll poopoo it they'll say oh there's nothing to that you know and you're just feeding into a hallucinatory experience well maybe I tend to look at it more like maybe the veil did thin there for a little while in the state that I was in maybe these beings maybe these entities these spirits are always around us but we just can't perceive them maybe their souls aren't on rest and they can't move on because the job isn't finished yet not only is it not finished we've practically squandered the work that they did do and they're not happy about it and they can't rest I think that's actually more likely than just the revision of the reductionist explanation that oh it's all just you know little electrical impulses in them in the physical matter of the brain I don't buy that explanation I don't buy that egghead explanation like I said years and years and years ago I probably would have but recent experiences and you know my awakening process have shown me that there's much much much more to reality than we perceive with the normal state of consciousness that were in most of the time so that's my anecdote about having encountered possible spirits of the revolutionaries of the first American Revolution who are not at rest and who want the militia to be called up who see what's going on in America as an absolute affront to their efforts as a squandering of their efforts and these men and in many cases who were just boys who were I just leavin say that they were they may have been the age of boys but they were real men you know fourteen fifteen-year-old so-called boys but I'd say fourteen and fifteen year old men who fought and in many cases gave it all gave their lives to secure even a small amount of freedom that led to the most prosperous place on this planet for a time they're definitely not at rest folks they're angry they should be angry and they would have called up the militia already would have already been done they would have tolerated it to this extent that we've allowed it and people say oh that's too extreme you know maybe for some who don't care about freedom who love the comfort that they enjoy more than they actually like their rights and they just don't understand that they are already enslaved and that physical action may be required to remedy that situation they don't have the courage to encounter that reality and deal with it and again it's part of the whole social engineering the war on men the war on the sacred masculine aspect of self-defense the war on self-defense in general keeping people sedate keeping them trying to keep them as calm as possible so that they could be led to slaughter without resistance there's a war on testosterone folks this is another thing I'm going to talk about it for your mind for they want that's the chemical of rebellion and they want that eliminated from society as much as possible the chemical assault that people are under to arrest their development and destroy testosterone in society which is not only essential for a man's development and the spirit of rebellion to be present in a man but it's also necessary for women to have testosterone in their bodies to have hormonal balance healthy sexual attitudes and energy and for them to have an amount of rebellion within them not to just be enslaved and ruled so it's an essential compound for both men and women and that's why there's a war on it that's why there's so many over estrogen izing chemicals estrogen mimickers that take this compound out of the human physiology I personally know a an individual a man who's a friend of mine who had such a problem with testosterone I won't mention any names but had such a problem with testosterone that his doctor told him for all intents and purposes you have the hormonal balance of a woman your body is mimicking the hormonal aspects of a woman because your testosterone levels are so low they're almost non-existent for what they should be as a man and how this individual had to have testosterone injections I'm not even sure he might even still be taking them so you know I mean this is because of this chemical onslaught the B you know things like bisphenol A there's another thing that attacks testosterone and acts as an estrogen mimicker who knows what's in the heavy-metal toxic soup that they're spraying on us every day being sprayed like bugs from the chemtrail assault so I think I've said what I want to say about courage today I think people will get the gist of the message by what I've put out there and understand where I come down on this issue I think you know there's still an enormous amount of ignorance in society but I don't necessarily believe that any amount of talking is going to remedy that ignorance because these people are willfully ignorant but not only willfully ignorant they are cowards period and their cowardice is not going to allow them to see the truth accept the truth and act upon the truth and no amount of suffering is going to develop courage courage is something that has to be worked within the individual to be built up to be built upon and that takes time especially if someone has lived in a state of cowardice softness weakness for their whole lives that's why they want a society of so-called men that aren't men at all raised by in many cases single women who don't care about anything but creature comfort getting their way getting what they want out of men getting what they want out of the state and don't aren't concerned with freedom whatsoever not even a little bit these aren't men folks there are little children they have Arrested Development not only spiritually mentally emotionally and physical Arrested Development because there are hormonal balances completely off their testosterone levels are completely off the chemical makeup their of their brain is imbalanced their right brain imbalanced and in many cases they're both left and right brain inbounds there are eggheads who are also cowards the egghead side of it is over intellectualization and that right brain side of it that's office you're willing to lay down the tyranny lot of people with letters after their name that these titles are so proud of her just like that completely often imbalance they're not even a man it's not that's not a man a male doctor a male scientist you know most of these people are cowards they don't care about anything but money they're totally you know reductionist and they're thinking about consciousness and you know their total egghead over intellectualized left brain imbalanced cowards the thing I want to kind of wrap up on is the idea that and it's the second part of the main topic topics that I wanted to get into today is and I brought this up because of the whole world situation of what we're going through again you know it's not like we haven't been through this before likely that will be we'll go through it again because it's probably gonna come to bloody revolution and again that's just going around the big wheel of karma once again because you didn't get the message and do it through consciousness like it needs to be done to affect the true solution not just a revolution there's many people that insist that somebody can only learn something through first-hand knowledge to actually doing it themselves and I reject this notion I talked about this on the Veritas show that I did with Mel fàbregas which I think was a really really phenomenal interview I it's up on the news section and on the right now it's in the recent news on the left-hand side of the water on earth is happening calm website I definitely highly recommend people to check it out Mel's an excellent interviewer and you know he does good work in his own right on his radio show Veritas radio so in that I talked about in that interview I talked about he Amell actually asked me the question do people have to learn through suffering you know and I I basically answered that you know suffering can definitely be a teacher chaos can be a teacher but is it a hundred percent required to learn that way no it is not you do not have to learn through first-hand experience his first-hand experience a absolute clear teacher oh yeah without a doubt you know but I gave the example if somebody had never seen fire before and you wanted to explain to them the essence of fire could you communicate the essence of fire to them without them having to put their in the fire and the answer is yes you could explain that to people people wants us all no you can't you know they'd have to feel that they would have to know you can garner what the essence of something is by hearing about it seeing images of it having somebody write something down about it having somebody tell you about it absolutely if your ego is not so powerful that it says I can't take any of that I can't accept any of that no matter how logically the argument is structured no matter how many examples are provided and shown to me I need to go and do that harmful thing for myself and you go put your hand in the fire that would be ego especially if there's a ton of evidence built up to explain what that thing is and how it works and you know this is what a lot of people erroneously even in the truth movement in the new-age community whatever you want to call these movements insist that things have to be learned firsthand and no they don't this is what mystery schools were set up to teach people if you want to learn it the hard way then yeah go do it firsthand which is why you want to learn what how to be moral and you want to learn how not what actions not to take because you're creating chaos as a result I'll keep doing what you're doing which is completely wrong and creating tyranny and enslavement in society and you're gonna learn firsthand why you shouldn't do those things does that need to happen that way do you need to go into tyranny to understand what freedom is no you do not I mean this whole idea is not the way the law of balance works this is not the way the laws of polarity work you absolutely do not have to go into that extreme to understand what something is you can garner it through what you might call secondhand knowledge but at some point it was first-hand knowledge things can be taught down to another generation things again can be taught from someone that didn't go through that experience why it's not good thing to take that experience that negative experience you do not need to burn your hand and learn that fire is hot folks if I if somebody else puts their hand in the fire if somebody had put their hand in a fire 100 years ago and you know what the effect on the flesh is going to be you do not need to repeat the experiment I think we've had enough examples of how tyranny in society works and what it does to the human spirit and what it does to human innovation and motivation and consciousness you know to understand this is not a good road to go down so you know this whole idea that we have to experience that thing and we have to have that firsthand gnosis I reject it thoroughly secondhand information taken from people with wisdom who are trying to convey it and communicate it down to people who have not necessarily been through that experience is valid and legitimate if it's true and somebody understands how it works and they convey it down to somebody secondhand that is a valid and legitimate method of learning you can garner through consciousness through someone else's experience how to understand how that thing's thing thing works on your own for yourself but the ego has to be removed from the equation that has to be gotten out of the way you have to think I'm not so important that I absolutely must have that first-hand experience you hear so many people say this nonsense unless I experience it for myself it isn't real oh really so if you've never been skydiving it isn't real you know I mean this is nonsense I've never been scuba diving is it not real I mean please you know I've never driven a big ocean liner I've never sailed a big ocean liner oh I guess I can't be done because it's not real then until I do it I mean people are idiots with what how they think the logical fallacies that they come up with they're really really brain dead their brain damaged and brain dead in many cases because the ego thinks like that the ego thinks there are no absolute truths the ego thinks that there is no objective reality the ego thinks that all make reality the way I want it to be just by my thoughts the ego thinks unless I experience it it isn't real the ego thinks my perception is the only reality there's objective reality independent from you and if you don't think so your ass all obsessed which is the biggest form of mental illness in the world moreover what it is is it's wanting to be God you know that's what this really comes down to people think they're the arbiters of truth and there are the arbiters of reality I'll make things the way I want them to be ignore how they really are because I prefer them that way and I'd rather have reality be that way and so therefore all just thinking and it'll be yeah like your God good luck with that that's why we're going through the experience we're going through folks you want to try to be God you're going to be put in Chains in Chains and you're gonna stay there till you burrito breaks down and realize I'm not that thing I'm not God I'm not the creator of the universe I'm not the creator of reality laws exist in this realm I'm bound by those laws those laws are here from my uplift and benefit and I need to learn how they work the ego wants no part of that and that's what the ego is not this sense of self that the New Age movement constantly tries to convince you the ego is all we need to dissolve that barrier you know why so I'm floating off in a spiritual hey so place and I don't know you know what my rights are so when somebody encroaches on my oh we're all wanted it's okay and you know this person is it's no no fault of their own there is no such thing as fault you know it's all just an experience I mean these people are like you know gone gooses okay gone there's no help for them in many cases because their brain damaged right brain imbalance just as much as left brain and balance will lead to physical brain damage that's where a lot of people are at folks the more and more I look at society the more and more I realize just how sane I am through the knowledge that I've taken in and how insane other people are and how in a state of complete imbalance they are in and it saddens me because here's one of the things I wanted to get into last week a little bit which I'll touch on for a moment now before I wrap up it is highly unfortunate that we are connected to all of these other people to the morons out there the eggheads and you know the reductionist you know who think that there's no such thing as consciousness and all the people who take it to the other extreme the right brain imbalance people who it's all just an experience and it doesn't matter what happens and nothing that happens in the physical domain is meaningful all just as imbalanced and unfortunately we're all connected to all of these idiots their ignorance is our enslavement the people who care about truth and freedom we're enslaved by them not the dark occult okay by the people who are socially engineered by the dark occult that includes the military in the police of course because they're doing physical enslavement and that includes the dumb down masses because they're doing the mental enslavement they're propagating the mental enslavement and their ignorance and their mental enslavement is our enslavement unfortunately because there's no place we can just go to be free it being nice and easy to say hey slave and masters and slaves enjoy your little drama down here on earth but we're out you know what when you figure that out and you can can show the place that you go physically physically not just saying oh you can go to a mental place I'll go to my safe space where there's no tyranny it's just all in my mind you know no that's not what I'm talking about
